Wrong....Markey told me that he heard that MSNBC relayed all sorts of
messages and they came out perfect.

New Orleans Phones, Cell Networks Still Down

September 2, 2005
New Orleans remains shut off from the outside world, with virtually no
phone service and repair crews not yet allowed to enter the flooded,
battered city.

The various telephone companies have been unable to estimate when
service might resume, since they have not yet been able to physically
inspect the damage to their equipment.

The landline network has been out in most of the New Orleans area since
the storm hit *and most cell towers failed during the first few hours.*
Emergency generators kept some facilities up but they soon ran out of
fuel or became water-logged

Sure couldn't tell they blew it big time by this article from MSNBC, or
dozens of others like it.

Ham radio operators to the rescue after Katrina
Amateur radio networks help victims of the hurricane

With telephones down and wireless service disrupted, at least one group
of people did manage last week to use technology to come to the rescue
of those in need.

Often unsung, amateur radio operators regularly assist in emergency
situations. Hurricane Katrina was no exception. For the past week,
operators of amateur, or ham, radio have been instrumental in helping
residents in the hardest hit areas, including saving stranded flood
victims in Louisiana and Mississippi.

Public service has always been a large part of being an amateur radio
operator. All operators, who use two-way radios on special frequencies
set aside for amateur use, must be tested and licensed by the federal
government, which then issues them a unique call sign. (Mine is W2GSK.)

Ham operators communicate using voice, computers, televisions and Morse
code (the original digital communication mode.) Some hams bounce their
signals off the upper regions of the atmosphere, so they can talk with
hams on the other side of the world; others use satellites. Many use
short-range, handheld radios that fit in their pockets.

When disaster strikes, ham networks spring into action. The Amateur
Radio Emergency Service (ARES) consists of licensed amateurs who have
voluntarily registered their qualifications and equipment for
communications duty in the public service.

In this disaster a number of ham emergency stations and networks have
been involved in providing information about this disaster ï¿½ from
WX4NHC, the amateur radio station at the National Hurricane Center to
the Hurricane Watch Net, the Waterway Net, Skywarn and the Salvation
Army Team Emergency Radio Network (SATERN).

On Monday, Aug. 29, a call for help involving a combination of cell
telephone calls and amateur radio led to the rescue of 15 people

stranded by floodwaters on the roof of a house in New Orleans. Unable to get through an overloaded 911 system, one of those stranded called a relative in Baton Rouge. That person called another relative, who called the local American Red Cross.

Using that Red Cross chapterï¿½s amateur radio station, Ben Joplin, WB5VST, was able to relay a request for help on the SATERN network via Russ Fillinger, W7LXR, in Oregon, and Rick Cain, W7KB, in Utah back to Louisiana, where emergency personnel were alerted. They rescued the 15 people and got them to a shelter.

Such rescues were repeated over and over again. Another ham was part of the mix that same Monday when he heard over the same Salvation Army emergency network of a family of five trapped in an attic in Diamond Head, La. The family used a cell phone to call out. Bob Rathbone, AG4ZG, in Tampa, says he checked the address on a map and determined it was in an area struck by a storm surge.

He called the Coast Guard search-and-rescue station in Clearwater, explained the situation and relayed the information. At this point, the Coast Guard office in New Orleans was out of commission. An hour later he received a return call from the South Haven Sheriffï¿½s Department in Louisiana, which informed him a rescue operation was under way.

Another search-and-rescue operation involved two adults and a child stuck on a roof. The person was able to send a text message from a cell phone to a family member in Michigan. Once again, the Coast Guard handled the call.

Relief work is not just relegated to monitoring radios for distress calls. The organization representing amateur radio operators, The American Radio Relay League or ARRL, now is seeking emergency volunteers to help supplement communication for American Red Cross feeding and sheltering operations in Mississippi, Alabama and the Florida Panhandle ï¿½ as many as 200 locations in all.

Hams who wish to volunteer their time and services should contact the Hurricane Katrina volunteer registration and message traffic database.

And, for the first time, the federal government will help hams help others. The Corporation for National and Community Service (CNCS) will provide a $100,000 grant supplement to ARRL to support its emergency communication operators in states affected by Hurricane Katrina. The grant will help to fund what is being termed ï¿½Ham Aid,ï¿½ a new program to support amateur radio volunteers deployed in the field in disaster-stricken areas.

One last note for ham operators in the stricken area: The FCC has announced that itï¿½s extending amateur license renewal deadlines until October 31, 2005.

So not only can't hams work in a weak signal environment, but we would
also lose the ability to format messages while monitoring FRS?

It must be on amateur frequencies or nothing will work. With enough
amateurs involved, they'll make sure it doesn't work.

Hi Stan Lawson, Lardass Lloydie's gay lover!

Saggytits Lee steps on his own tiny dick when he tried to correct
somebody

else's English use first by saying one "operates" a dictionary instead
of

reading it, then uses "things" instead of "thinks" in

<jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let

alone
correct someone else's language.But that's not surprising from someone
who

things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his

improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

Saggytits Lee (SLee@houston-hunks.com) talks out of his fat ignorant
ass

again in:
<secwet.googley.woger@houston-hunks.com>:
"did you know, Woger, that some of the anonymous remailers are operated

by the CIA?"

Leviticus 19:19

"Ye shall keep my statutes. Thou shalt not let thy cattle gender with a diverse kind: thou shalt not sow thy field with mingled seed: neither shall a garment mingled of linen and woollen come upon thee."

So, those 50/50 cotton/poly t-shirts are out of the question, then?

Other parts of Leviticus warn against those unclean shellfish, so those are forbidden too, lest you anger God. So, no more lobster dinners. Or growing more than one crop in your fields. Or not letting ground lay fallow on Jubilee years.

In a more symbolic reading, to Christians, Leviticus is part of the prophecy of the coming of the messiah and his eventual death on the cross as a sin offering. It is not specifically about Jewish law and regulation for worship or marriage.

For Jews, Leviticus is specific instructions for the house of Aaron, the tribe of priests. It may also be an important early part of the Torah in the Talmudic tradition.

For anthropologists and biblical scholars it is an interesting example of the rules created by early Judaic pastoralists (contemporaries of the early Judaic people did not share many of these rules) specifically dealing with the codification of items like food, clothing, kinship and land ownership into distinct groups. Those items (like shellfish) which could not be placed easily in a particular grouping (i.e., neither of the land nor the sea) were declared "unclean" (and there is some disagreement if this translation is even accurate.) Only items which fit into a specific group or place were considered holy enough for the Aaronites.

The verse you quote is part of a series of laws regarding marriage, sex and childbirth; these rules followed many of the same requirements regarding categorization and grouping.

There is a lot of interesting reading available about these early monotheistic pastoralists and Leviticus is a very well studied, but poorly understood, part of that history. There is a fair amount of disagreement not only on what it means, but who wrote it and why. There also happen to be some troublesome translation problems in Leviticus, not unlike much of the old testament.

In short, applying the laws and pronouncements of Leviticus to a modern situation to completely different times and people is not really helpful. I encourage people who do so to remember that you shouldn't just pick and choose the rules you like; that would be presumptuous. If one is going to go around quoting Leviticus admonishing people to follow it as if it was God's literal word on Earth, then they had better make sure they are following it as strictly as they would have others do.

"Let he who is without sin cast the first stone."

Hi,
How can I test my 1/4 wavelength antenna (for my car?)... when I hook it up to my radio I see no better signal throughput to the repeater then with my rubber duckie (even at 7 watts). however.. with my j-pole antenna my signal is crystal clear...

Any thoughts?

Halloween arrived early this year. All these "first responder"
ham heroes have been boo-boo-boosting ham radio emergency
efforts as if they had really been ON the scene! :-)

So far, I've NOT seen any news video or newspaper accounts of
all the waterproof ham gear AT WORK in any block of any parish
in New Orleans (dry or flooded) or even any of the neighboring
communities. I HAVE seen some rather standard handhelds in the
hands of the REAL first responders and the various NG units
with their military-issue radios wading around getting folks
(alive or not) out of the Big Easy.

Coslonaut thinks that FRS handie-talkies only work out to a
block away. Apparently he got a bad pair of them at K-Mart?
Dee, with all those years of professional years of message
relay behind her, is ready to lecture all on How It Is Done
(but hasn't said anything but vague generalities she read in
some ARRL softcover). Buzz Corey apparently ran out of super
rocket fuel for his old ship and never made it to Nyorleans.
Danger Dan was in his Command Track busy tawkin' ta da
Heinie repeaters to carry health and welfares to Yurp and
cussin' up a storm (to replace Katrina). Everyone seems to have
SO MANY stories about "what they did" as First Responders and
the absolutely vital role played by ONLY amateur radio. Gonna
be a dent in the federal budget to pay for all those Medals of
Valor awarded to the NTS members for saving everyone's lives.
Jimmie Noserve, spending far too much time negatively critiquing
his dastardly newsgroup enemies, has not yet Responded to the
NPRM to toss out code testing nor has he boo-boo-boosted His
part in saving all those lives by dilligent morse codings.

It's beginning to sound like a big Trick or Treat thing in
words in here. Eye candy of gratuitous praise to fill the
empty bags of the first responders with their waterproof,
hurrican-proof radio gear. <yawn>

I heard that a guy used his CB radio to get a ride for a woman who's
car stalled. Even if someone did use text messaging to get a message
through, that sort of thing is just the exception that proves the rule.

I've seen a lot of articles about Ham radio and Katrina, and far from "Hams blowing it" they were one of the few groups who performed as advertised. The only places they didn't was where they weren't allowed to.

As usual, ham radio operators help sustain wide-ranging relief efforts
By Andrea Kelly
ARIZONA DAILY STAR

When all else fails, it's ham radio to the rescue. Across Arizona, ham radio operators are helping sustain Hurricane Katrina relief efforts by helping storm-torn communities communicate with rescue workers and family across the country.

This is not a first. Ham radio operators come out of the woodwork during disasters around the world, even transmitting in Morse code if language barriers pop up, said Mike Swiader, president of the amateur Superstition Radio Club in Mesa.

Ham radio operators have contributed to emergency communication efforts since World War II, Swiader said, and were crucial in post-9/11 emergency communications, as well as during the Asian tsunami last holiday season.

Ham radios work when other communication systems are down because they're powered by solar energy, batteries or generators rather than the usual power sources.

The messages are passed from radio to radio until they get to the one they are directed to, so radios don't need to be near each other to receive signals, like regular AM/FM radio signals.

"We've been involved in passing traffic to and from the Louisiana and Mississippi area," said Tom Fagan, a leader of the Arizona ham radio

operators organization. "Whatever needs to come in and go out, we're doing."

When Arizona's ham operators - there are about 16,000 of them - get messages from the hurricane area, they send them along to agencies like the American Red Cross and the Salvation Army in the Southeastern region of the country.

"We're the link," Fagan said.

Because communications within a disaster area are often jumbled, Swiader said, it's frequently easier for someone there to contact an operator in someplace like Arizona, who can then relay the message back to a recipient in the disaster area.

"Sometimes it's easier to be heard that way," he said.

More than 30 ham radio operators from Arizona have already headed toward the disaster area, hoping to assist relief efforts and give emergency workers a way to communicate with each other, as well as assisting searches for missing persons.

"They're moving in when they're allowed by American Red Cross and Salvation Army," said Ned Stearns, a Phoenix ham operator and vice director of the American Radio Relay League, the national organization for ham operators.

In fact, the ham operators plan to compile a list of people they can determine as missing, deceased, alive or unknown, based on information transmitted over the ham signals.

To find out about people in the area, visit www.satern.org and fill out the health and welfare information request for the person you are trying to find. This information will be sent through the Salvation Army emergency radio network.

Ham radio operators are helping from afar
Sunday, September 11, 2005
By DONNA FORK
For the Times dfork@knology.net

But sometimes, even the airwaves can be shut down

They also serve who listen and wait.

Huntsville amateur radio operator Douglas Hilton and other "hams" in North Alabama are helping victims of Hurricane Katrina by relaying messages between families, officials and each other.

Lately, Hilton's been spending most of his spare time in his "ham shack" listening to calls for assistance. The systems analyst for Intergraph Corp. is one of thousands of amateur radio operators who help people during emergencies.

Hilton is unusual in the ham radio world because he wears three hats: He is an amateur operator; a member of the Alabama State Defense Force, heading the Communications Platoon for North Alabama; and he's also a military communicator authorized to use the Military Affiliate Radio System.

His connection to the military (although he is a civilian) gives him access to additional radio frequencies most amateurs can't access. He has been a ham radio operator for 42 years; his father had him build a crystal radio when he was 7 years old, and he got his ham license as a teenager. But he wasn't all that active until after the terrorist attacks of Sept. 11, 2001.

"That hit me right between the eyes," he recalled, and he began to get back into "hamming."

Now Hilton averages about 100 hours a month on the airwaves and takes countless courses and certifications. He noted that amateur radio operators are "amateurs only in that we're not paid." In return for service "the government gives us frequencies."

Hilton said the North Alabama ham community is large.

"The astronauts are all ham radio operators," he said, noting that astronaut Owen Garriott "was the first ham in space."

Hilton''s "ham shack" is not really a shack at all. It is located in a formal dining room - complete with crystal chandelier. It includes six radios and two computers.

"You don't need six, but don't tell my wife, please," Hilton said as his wife, Diane, laughed. She recently obtained her "technician class" license, which is the entry-level license for ham radio operators. The next is "general class." The highest, which Hilton has, is "amateur extra." Anyone can be an amateur radio operator, Hilton said. There is no age limit: Hilton knows a local ham who is 18 and another who is 89.

It doesn't cost much to be an operator either, he said. A beginner could purchase enough equipment to get started for about $300. Courses are free through one of the local ham radio clubs, of which there are several, including the Huntsville Amateur Radio Club (the Web address is www.harc.net).

In addition to six radios, Hilton has two computers: a laptop and a desktop. "The radios are hooked into the computer." With his setup, the Hiltons can talk to other hams as far away as Japan.

But for the past two weeks there hasn't been time to chat about matters such as which antennas they like the best. There are emergency frequencies to monitor. At the moment, a critical one is the Salvation Army's emergency frequency, Hilton said.

Hilton never knows if it will be a busy night or a quiet one. Recent solar flares have added to the uncertainty because they disrupt communications. Friday, during the late afternoon and early evening, it was unusually quiet.

"I'm a little surprised," he said Friday. "I can't believe how dead these bands are."

Solar flare

It could be a solar flare, or could be something else. "That's the problem, you never know," he said. The waiting, the listening, "it wears you out." But it's worth it when you hear a voice and "you might be the only person who can hear this guy."

On Thursday night, when Hilton was expecting problems, reception was fine. He was able to contact two operators in Louisiana. He also heard one Mississippi ham talking to another ham "so at least one is working there."

ecause of the Hurricane Katrina disaster, there are thousands of messages piling up, waiting to be delivered by ham radio operators: What will happen when all their radios start working again?

People like Hilton will be extremely busy. There are thousands of ham radio operators in Louisiana and Mississippi. When they all get back to the airwaves, it will be quite a challenge to sort out all the messages.

But meanwhile, as they waited for the deluge of messages, on Thursday night the Huntsvillians received a call for help from New Mexico.

Maura Campbell Kingston of Clovis, N.M., was trying to reach her aunt, 76-year-old Sister Joan Campbell, a nun, of Harvey, La. Kingston called the Salvation Army, which contacted a ham radio operator, who called Hilton.

Hilton tried Thursday to reach a radio operator in Louisiana to check on Campbell, but almost all of them were off the air. Finally on Friday night Hilton got through to "KG5YK," who is Robert A. Turner of Elm Grove, La.

When Turner's message came through, hams from all over the United States could be heard, eager to talk with him.

Helping 'ham brother'

The outpouring of sympathy could not be contained: Radio operators from Texas, Indiana and elsewhere all expressed their support for their "ham brother" in Louisiana.

"I hope this never happens again," said Turner of the Katrina disaster. "It's been a tough time. ... I'm looking for the right words." He thanked the other hams for their all their help.

"You'd do the same for us," the ham from Texas said. Others echoed his sentiments.

Turner gave Hilton information about when to call with his "health and welfare message" about Kingston's aunt. Hilton vowed to keep trying to deliver the message "for as long as it takes."

But that proved to be unnecessary.

Friday night, after calling her aunt repeatedly, Kingston finally reached her by phone. She was still at her home in Harvey.

"She was OK," Kingston said in a telephone interview Saturday. "Harvey stayed dry." But the area was without power and Campbell "was sitting in the dark with her flashlight."

Later, Kingston called Hilton to thank him. She said he told her: "I'm just doing it because I want to help."

Kingston was impressed.

"I believe that thing about Southern hospitality."

Ham radio proves to be more than a hobby
By Jeannetta Edwards

Daily Times Leader

When Hurricane Katrina hit, telephone and cell phone communication hit an impasse because of downed lines and towers. But, amateur radio operators did not miss a beat or a transmission.

"Before and after the hurricane, this has proven to be the most reliable form of communication," said Randall O'Brien, a retired highway patrolman who has been involved with ham radio operation for 35 years.

"People thought when they got cell phones, they didn't need us anymore," said O'Brien, an advanced licensed operator, who often talks to missionaries in South and Central America.

According to Denver Baker, Clay County has more than 30 amateur radio operators, but only a small fraction are active.

"It's a wonderful hobby," said Baker, whose wife recently received her technician license.

The multi-faceted operation includes digital and satellite communication and is enjoyed by all age levels.

"This is a good hobby for seniors or for young people," said Baker.

By becoming a ham radio operator, which requires taking a test to obtain a license, people can communicate with others anywhere in the world.

"The classes for the test are free," said Baker, "and we help you with everything you need to know."

According to Baker, who has been enjoying this hobby for the last 10 years, the only investment required is the fee for the test and the purchase of equipment. A handheld transmitter cost around $100.

The self-policing group ensures that everyone adheres to the rules and regulations.

"We're called amateur radio operators, but there's nothing amateur about it," said O'Brien, who first became interested in electronic at age 13.

The group, which also belongs to the American Radio Relay League, meets monthly in West Point.

"We have a good bunch of hams in this area," said Baker. "We bring food at our meetings and have a good time."

"It's nice, especially for seniors," said Baker.

For information on getting involved in ham radio operation, call O'Brien at 494-2898 or Baker at 494-9096.

Ham Radio Operators Offer Help

By Beth Hahn
Mountain View Telegraph
Since Hurricane Katrina hit New Orleans last week, several ears in the East Mountains and Estancia Valley have been tuned to amateur short-wave radios.
McIntosh resident Ed Brooks said local Ham radio operators are willing to relay messages from the Gulf Coast if needed.
"We guys here in the Estancia Valley are just listening," he said. "We haven't had any need for what we can offer."
Although they may not be needed yet, Brooks said local Ham radio operators are still listening in to conversations taking place in Louisiana, Mississippi and Alabama.
During the interview with Brooks, his Ham radio was tuned to a conversation involving a Coast Guard helicopter that was rescuing a family from a rooftop in New Orleans with direction from another Ham radio operator.
Brooks said similar situations have been broadcast hundreds of times during the past week.
"It's been really spotty, but what we've been (hearing) is that it was good fortune that somebody down there had Ham equipment," he said.
Daryl Clutter, an Edgewood Ham operator and member of the Salvation Army's shortwave network, said he relayed a message from Ontario to U.S. Coast Guard officials in Washington, D.C., that originated in Louisiana.
"It was just the word 'help' spelled out two times," he said.
Like Brooks, Clutter said he has stayed close to his Ham radio since Aug. 29.
"There's been so much going on," he said. "Every day, something happens."
Clutter, a former truck driver who often delivered frozen food to the Gulf Coast, said radio traffic has slowed since the hurricane devastated the region.
"You just wonder who all you know, that used to be your customers down there, that are still alive or had the good sense to get out," he said.
As amateur radio operators, Clutter said, Ham enthusiasts practice for disasters "every day."

"There's only so many cell phone frequencies," he explained. "If the phone system goes down, there's no way ... (one company) could handle all the 60,000 or 70,000 phone calls."
Mountainair resident and Ham operator Bob Scupp said the Salvation Army network alone has handled more than 128,000 messages since Aug. 29.
Brooks said Ham operators have been relaying messages from residents to volunteers or emergency personnel. Since a large number of National Guard and military personnel have arrived in the area, Brooks said the messages have changed from pleas for help to questions about well-being.
Shelters for evacuees are beginning to utilize Ham radios to communicate with other shelters to help families find missing relatives, Brooks said.
Rescues are still going on.
"There's been instances where they're still finding people, trapped in houses, trapped in buildings or running out of oxygen," said Clutter. "It's just terrible what's going on down there."
Clutter and Brooks said they will not offer assistance unless someone requests contact in the Albuquerque area.
"We don't want to tie up the frequencies," Brooks said.
Clutter and Brooks said they will continue to listen to their Ham radios for messages or relay requests until communications are restored in the Gulf Coast.
"We live and breathe this," Clutter said.

Amateur radio operators provide vital communications support
By Teresa Atkerson
MCALESTER NEWS-CAPITAL (MCALESTER, Okla.)
MCALESTER, Okla. -

With more than 10,000 requests for help in finding loved ones, the amateur radio operators in Louisiana are extremely busy.

In fact, they are so busy, they have asked people to wait with their requests unless there is an extreme emergency.

Ralph Suter, with the Pittsburg County Amateur Radio Club, said they had about a half dozen requests for assistance in locating loved ones in the area devastated by Hurricane Katrina. ï¿½The Red Cross funneled the requests for health and welfare,ï¿½ he explained. Now, the national traffic system is backed up with the requests, he said, because there were so many.

There are extreme problems with communications in New Orleans at the present time. Suter explained VHF radio has to have line of sight while amateur radio operators can use lower frequencies that can bounce off or curve to get the message through. ï¿½A benefit of amateur radio is you can throw a piece of wire in a tree or up a flagpole. With 12 volts of power, you can operate on a local or even worldwide basis,ï¿½ he explained.

As an example, Suter said recently an amateur radio operator in Louisiana had some kind of problem that he couldnï¿½t get help with after the hurricane. He put out the message, it went through Washington state to Texas and then into Louisiana where the right people were found to help him.

Amateur radio operators can also communicate via Morse Code, upload through television or computer or radio to satellite, Suter said. That gives them even more advantages in communication.

Jim Russell, president of the PCARC, said amateur radio has been around as long as there has been radio. Even in World War I, amateur radio operators helped with messages in Morse Code, which is something operators today still must learn as part of their licensing process.

ï¿½We look at it as a hobby,ï¿½ Suter said. ï¿½Itï¿½s a resource of individuals because they have an interest to develop the skills to operate radios in various modes.

ï¿½Itï¿½s a resource for trained communicators.ï¿½

There are forms that must be used when transmitting messages. ï¿½When it goes into the system at one point and comes out at the destination, it is exactly the same information, even with the misspelled words,ï¿½ Suter said. ï¿½Itï¿½s our responsibility when handling traffic that it comes out exactly as it comes in.ï¿½

Suter said many of the operators use their radios on a daily basis while others check weekly. When it comes to disasters, there is the Amateur Radio Emergency Service. ï¿½Itï¿½s not really an organization but it is organized on a national basis for community programs.

John Wright, another PCARC member, checks with the Oklahoma Sooner Net and with the Salvation Armyï¿½s network, SATERN.

After the Oklahoma City bombing in 1995 and 9/11, Russell said amateur radio was used extensively. It is also used during and after tornadoes and other natural disasters. Now, the group can work with the Automatic Position Reporting System to help more accurately report severe weather.

The group has an annual field day, which is a combination of a exercise and a contest. ï¿½We go out and set up radios under adverse conditions to simulate disaster response,ï¿½ Suter said. ï¿½In the past, weï¿½ve started with solar power, using a battery in a car or even a portable generator.

ï¿½The last time I kept count, we were able to make contacts in 47 states, the Philippines, some in South America and Puerto Rico in a 24-hour period.ï¿½

Suter pointed out that the word ï¿½amateurï¿½ is not what people interpret it as. ï¿½People interpret it to be an unprofessional group. But while itï¿½s made up of a lot of people for a hobby, itï¿½s not unorganized or unprofessional when dealing with disaster. We have capabilities that public agencies just donï¿½t have,ï¿½ he said.

Members also have to be licensed. The license testing can be done in McAlester now so those wishing to be licensed donï¿½t have to go to Dallas or Oklahoma City as in the past.

Teresa Atkerson writes for the McAlester (Okla.) News-Capital.

Old Technology Still Needed
(Page 1 of 2)

Sept. 8, 2005

Overwhelming Charity

Joe Carcia, station manager of the American Radio Relay League in Newington, Conn. helps with the disaster relief effort for Hurricane Katrina's victims along the Gulf Coast. (AP)

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

(CBS) There is a store in London dedicated to "appropriate technology." It mostly carries products designed to be used in developing countries where there is a weak communications infrastructure.

Sadly, thatï¿½s now the case for a large swath of the United States where Hurricane Katrina and its flood waters have wiped out cell phone towers, telephone switching stations, Internet routers and other ground-based communications systems. Even wireless Internet depends on nearby transmitters and receivers on the ground.

But amateur radio is working and, according to Allen Pitts of the Amateur Radio Relay League (ARRL), "ham" radio operators from throughout the country are answering the call to provide vital communications links. Satellite phones, a much newer technology, are also coming to the rescue.

Pitts acknowledges that cell phones and other technologies "work wonderfully when everything is going right," but "they are very vulnerable when everything is going wrong."

Just as with past hurricanes, earthquakes and on September 11th, the ground-based infrastructure, in many cases failed because vital parts of the system were damaged or overwhelmed during the emergency.

In other words, when you need them most, those cell phones are of no value.

Amateur radio, says Pitts, is not vulnerable to these problems "because each of the radio operators is a complete transmit and reception center unto themselves able to continue going and continue with nothing more than an electrical source, such as a battery or a generator, a radio and piece of wire for an antenna."

Listen to audio of Larry Magid's interview with ARRL's Allen Pitts.

While base-station radios are larger and require an electrical power source, there are also portable ham radios slightly larger than a pack of cigarettes with a range of about 20 miles, according to Pitts. Pitts says that the next sized radio, about the size of a paperback book, can communicate up to about 50 miles without a repeater while larger systems, "about the size of a desktop computer" can communicate globally.

Amateur radio operators are in demand. When I checked the ARRLï¿½s Web site there was a call from the Salvation Army for "10, two-operator Amateur Radio teams for deployment in the U.S. Gulf Coast. Operators must hold at least a General class license. Teams should be fully self sufficient in terms of food, water and lodging and plan to remain in the disaster area for from one to two weeks."

Pitts said there was a "lady in Connecticut," who was listening on her amateur radio and happened to hear that there was a woman "who was trapped for four days without food and water." She was able to relay that message, by ham radio, into an operations center that dispatched the fire department. A day later she got a call from the trapped womanï¿½s mother, thanking her for her role in the rescue.

Ironically, this comes at a time when amateur radio is struggling for respect and, to some extent, survival. What was once a popular hobby has fallen into somewhat hard times for a variety of reasons, including the fact that the Internet, cheap long distance calling, cell phones and other technologies make the ability to use these two-way radios not quite as compelling as it once was.

Also, there is a bit of a rift between some members of the amateur radio community and some parts of the Internet industry over the use of power lines to transmit Internet signals. This technology, which could put power companies into competition with cable and phone companies for broadband service, has been criticized by some ham operators because of possible interference problems.

Despite the fact that their origins go back to the early 20th century, hams are hardly low-tech. There are now bridges between ham operators and other technologies including the Internet, cellular phone systems and Internet phones. In fact, long before the Internet became popular, ham operators were using their radio gear to transmit data along with voice and morse code.

Also coming to the rescue are satellite phones. These phones - which are much more expensive to buy and use than cell phones - rely on satellites rather than ground equipment to communicate with the phone network.

Because satellites are in space, theyï¿½re not vulnerable to conditions here on earth. Also, as long as you have a view of the sky, youï¿½re able to communicate. Iridium, which operates "66 low-earth orbiting (LEO), cross-linked satellites and 11 in-orbit spares," says it provides "complete coverage of the earth (including oceans, airways and Polar Regions)."

I carried an Iridium phone with me when I traveled to Peru a few years ago. It worked great when I was in the clear such as on a boat in the middle of the Amazon River but, because it requires a line of site view of the sky, it had problems in dense jungle and in cities with tall buildings.

Iridium spokesperson Liz DeCastro estimates that there are currently about 10,000 of Iridium's phones being used in the region with orders for about 6,000 more. The company sells through resellers so it doesnï¿½t have exact numbers. DeCastro says that "traffic in the region increased by 3,000 percent" since the storm hit and that the number of subscribers increased by 500 percent.

Satellite phones are a lot cheaper to use then when I went to Peru, but they still cost between $1 and $1.25 per minute to use, according to DeCastro. Thatï¿½s a lot more than domestic cell use, though often cheaper than using U.S. phones when roaming overseas. The phones themselves cost between $1,000 and $1,500 she says.

In addition to handling voice calls, satellite phones can also be used for messaging or data, albeit at modem rather than broadband speed.

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

Thatï¿½s why some news organizations keep manual typewriters around. You never know when that old technology may suddenly become the "appropriate technology."

Amateur radio operators head to Gulf Coast

September 6, 2005, 1:00 AM EDT

NEWINGTON, Conn. -- Oscar Fuller only became an amateur radio operator about a year ago, but he knows how valuable his equipment can be in an emergency.

So even though he has never responded to a crisis, the American Relay Radio League member is planning to head to the hurricane-ravaged Gulf Coast and see if he can help establish an emergency communication network.

"This is a tragic set of circumstances," said Fuller, who recently retired from IBM. "If I can lend a hand, I want to."

Fuller and about 14 other members of the Newington-based amateur radio operator network have signed up to join the relief efforts for Hurricane Katrina. The amateur operators _ known as hams _ can often use their equipment to communicate in difficult circumstances.

Because the radio equipment operates on many frequencies, is self-contained and portable, it can often work when other communication networks, such as telephones, aren't working. It can never be blocked, which is why operators say it is good in disasters.

"When all else fails, ham radios work," said Betsy Doane of Shelton, who oversees the 2,500 members of the league in Connecticut.

David Patton, an official with the radio group, said as many as 750 volunteers may be needed. The Connecticut volunteers are going to help provide communication support for more than 200 American Red Cross Shelters in Mississippi, Alabama and the Florida panhandle.

"There are limited resources to an overwhelming disaster," said Allen Pitts, public relations manager for the radio league. "So there is not a ham on every corner. The hams are put where they are needed most of all, in emergency traffic or for saving lives."

Dennis Motschenbacher of Colchester was among the first volunteers to say he would go. He spent Sunday shopping for supplies and getting ready for the 18-hour, 1,100 mile drive to Montgomery, Ala., where he will be dispatched to a shelter.

"Everything I need, I'm bringing," he said. "There won't be any Radio Shack to go to."

The 57-year-old has been a ham for more than 40 years. He has operated his radio from places as far as East Timor and the Balkans.

The hardest part will be "seeing people in this troubled state _ smelly, sick, depressed, angry. And no matter what any of us do, it won't be enough for all of them."

Ham Radio Operators Pitch In To Hurricane Katrina Relief Effort General Interest
09/07/2005
With communications out all over New Orleans and the Gulf Coast, the professionals are turning to amateurs to be their ears to what's going on in the areas devastated by Hurricane Katrina.

Local operators say they've been in touch with people in and around New Orleans since the beginning of the ordeal.

Ed McLaughlin, of Kennewick, says in the days that followed the disaster, he was able to help a family in Medford, Ore., get an update on how their relatives were. He's provided similar contact for a family in Chicago.

The reason-- ham radio, which is able to get in places that have no other means for communication when land-based infrastructure fails.

Ham radio has been such a success during these recent days that FEMA and the Red Cross are now using it as their primary mode for communication until other modes of communication are restored.

News-Leader.com Springfield Mo.
Ham radio helps close communication gap

Nixa man relayed message from president to New Orleans' mayor.

Joe Hargis works on his amateur radio in his home in Nixa. Hargis helped rescue an elderly woman by notifying someone who could contact rescue workers via radio.

By Sarah Overstreet
News-Leader

If you've been unsuccessfully trying to get information about someone living in Hurricane Katrina's region of havoc, here's an avenue you may not have considered: local ham radio operators.

While cell phones rely on towers and traditional telephones rely on intact land lines, ham radios transmit from radio to radio, bouncing waves off the ionosphere in the upper atmosphere far above the Earth's tantrums. They can run off batteries, generators and sometimes even the sun.

Two Ozarks amateur ham radio groups - the Nixa Amateur Radio Club and the Christian County ARES (Amateur Radio Emergency Services) - have been relaying messages from people all over the world to those whose communication has been cut off by Katrina.

David Beckler, a ham radio operator from Nixa, even relayed a message Tuesday from the director of the Federal Emergency Management Agency in Texas to New Orleans Mayor Ray Nagin.

"He had a message from President Bush to the mayor of the city of New Orleans," says Beckler, a New Orleans native who moved to Nixa six years ago.

Since the message was an emergency communication, the dispatch needed to go through the net control station on an emergency frequency, Beckler said. He knew it was important, because the ham operator had said, "break, break, break," which requires all other communications to yield and give that one priority.

"The net control station or other stations on this frequency could not hear this message," Beckler says. Beckler contacted the net control station, and people there asked him to contact the sending ham operator and relay the message back to that operator. "That's when he told me it was from President Bush."

Joe Hargis, another Nixa ham club member, also helped with an urgent message. "I was monitoring the SATERN network (Salvation Army Team Emergency Radio Network)," said Hargis, a retired elementary schoolteacher.

"A person called in with a piece of emergency traffic and the (receiving) person could not hear him. He said, 'Is there anyone on the frequency who can copy this?' I broke in and told him I could hear it fine."

Hargis relayed the message back to SATERN, and the operator there could hear Hargis well. "It was a 90-year-old woman and her elderly neighbors. They were afraid to leave their home because of the unrest in the neighborhood, things that were going on, and they needed assistance to

be evacuated. They were running low on medicine, and one was running out of her oxygen supply."

Nixa ham club member Rod Kittleman says their members helped save the lives of a couple in New Orleans.

"A weak, disabled elderly couple were trapped in their attic. Their phone worked, but they couldn't get through to local authorities," the KADI radio program manager explains.

Too weak to break through their roof so emergency personnel could find them, the couple called their daughter in this area. She contacted the Nixa club, which relayed the message to a local ham operator who is licensed to operate on emergency frequencies.

"He got through to authorities in New Orleans over the radio, and they were rescued. (The ham operator) relayed the message back to their daughter. That's the reward we live for."

Quarter wave antennas need a counterpoise to work properly --- are you testing with the antenna mounted on the car? (It won't work properly sitting on the floor of your shack, or on a wooden desk.)

If the antenna >>IS<< mounted on your vehicle, then you have a feedline (coax) problem (shorted coax, open connector, etc.).

Yup.. it's on the roof of the car. I was kinda leaning towards damaged
coax or connector, but was wondering if there was something I could do
with an ohm meter or something to determine where the issue might be?

If it's a true 1/4-wave antenna, it won't have any matching transformer. So you should see very low resistance from the center pin of the coax connector to the antenna element, and a very high resistance from the center pin to the shield. This will tell you if you have an open or shorted cable.

It is my personal opinion that God doesn't necessarily hate fags but he hates what fags do.

Submitted for your reading pleasure and education,
The following info is from
www.GodHatesFags.com

a.. SODOMY IS AN ABOMINABLE SIN, WORTHY OF DEATH.
a.. "If a man also lie with mankind, as he lieth with a woman, both of them have committed an abomination: they shall surely be put to death; their blood shall be upon them." Leviticus 20:13. "Who knowing the judgment of God, that they which commit such things are worthy of death, not only do the same, but have pleasure in them that do them." Romans 1:32.
b.. See also Leviticus 18:22, Genesis 19, Romans 1:18-32, I Corinthians 6:9-11, I Timothy 1:10, and Jude 7.

a.. SODOMITES ARE PROUD OF THEIR SIN ("GAY PRIDE"), AND IN THAT PRIDEFUL STATE THEY CANNOT REPENT - YOU CANNOT REPENT OF SOMETHING YOU'RE PROUD OF.
a.. "Were they ashamed when they had committed abomination? nay, they were not at all ashamed, neither could they blush: therefore they shall fall among them that fall: at the time that I visit them they shall be cast down, saith the LORD." Jeremiah 6:15.
b.. See also Jeremiah 13:23, Romans 1:24-32, Ezekiel 16:49-50, etc.
a.. THE SODOMITES' ONLY HOPE IS TO HAVE THE UNAMBIGUOUS TRUTH PREACHED TO THEM, AND PERHAPS GOD WILL SOFTEN THEIR HEARTS AND GRANT THEM REPENTANCE TO DEPART FROM THEIR SIN AND NAME THE NAME OF CHRIST. NOT VERY LIKELY, THOUGH, SINCE GOD HAS GIVEN THEM UP.
a.. "Nevertheless the foundation of God standeth sure, having this seal, The Lord knoweth them that are his. And, Let every one that nameth the name of Christ depart from iniquity." II Timothy 2:19. "Wherefore God also gave them up to uncleanness...unto vile affections...to a reprobate mind." Romans 1:24-28.
b.. See also II Timothy 2:24-26, Psalm 5:5, I Corinthians 6:9-11, Acts 17:30, Jude 22,23, etc.
a.. THERE IS A HELL WHERE ALL IMPENITENT SINNERS WILL RESIDE FOR ALL ETERNITY. THAT INCLUDES SODOMITES (CALLED "DOGS").
a.. "And they shall go forth, and look upon the carcasses of the men that have transgressed against me: for their worm shall not die, neither shall their fire be quenched; and they shall be an abhorring unto all flesh." Isaiah 66:24. "For without are dogs..." Revelation 22:15.
b.. See also Mark 9:44, Luke 16:23, Revelation 20:15.
In summary, sodomites are wicked and sinners before the Lord exceedingly (Gen. 13:13), are violent and doom nations (Gen. 19:1-25; Jgs. 19), are abominable to God (Lev. 18:22), are worthy of death for their vile,

depraved, unnatural sex practices (Lev. 20:13; Rom. 1:32), are called dogs because they are filthy, impudent and libidinous (Deut. 23:17,18; Mat. 7:6; Phil. 3:2), produce by their very presence in society a kind of mass intoxication from their wine made from grapes of gall from the vine of Sodom and the fields of Gomorrah which poisons society's mores with the poison of dragons and the cruel venom of asps (Deut. 32:32,33), declare their sin and shame on their countenance (Isa. 3:9), are shameless and unable to blush (Jer. 6:15), are workers of iniquity and hated by God (Psa. 5:5), are liars and murderers (Jn. 8:44), are filthy and lawless (2 Pet. 2:7,8), are natural brute beasts (2 Pet. 2:12), are dogs eating their own vomit and sows wallowing in their own feces (2 Pet. 2:22), will proliferate at the end of the world bringing final judgment on mankind (Lk. 17:28-30), have been finally given up by God to uncleanness dishonoring their own bodies among themselves, to vile affections, and to a reprobate mind such that they cannot think straight about anything (Rom. 1:23-28), have wholly given themselves over to fornication and gone after strange flesh (Jude 7), must be pulled as faggots from the fire (Jude 23), and have no hope of Heaven unless they repent (Rev. 22:15), which they can't do in their prideful state (Jer. 6:15). They need to hear this truth if they are to have any hope of penitence, faith in Jesus Christ and salvation (I Timothy 4:2-4).

If this Gospel truth offends you, TOUGH.

Mark,
You're a sicko

In 1973, the weight of empirical data, coupled by changing social norms and the development of a politically active gay community in the United States, led the Board of Directors of the American Psychiatric Association to remove homosexuality from the Diagnostic and Statistical Manual of Mental Disorders (DSM). Their decision was supported in 1974 by a vote of the membership.
Subsequently, a new diagnosis, ego-dystonic homosexuality, was created for the DSM's third edition in 1980. Ego dystonic homosexuality was indicated by: (1) a persistent lack of heterosexual arousal, which the patient experienced as interfering with initiation or maintenance of wanted heterosexual relationships, and (2) persistent distress from a sustained pattern of unwanted homosexual arousal.

The new diagnostic category, however, was criticized professionally on numerous grounds. It was viewed by many as a political compromise to appease those psychiatrists - mainly psychoanalysts - who still considered homosexuality a pathology. Others questioned the appropriateness of having a separate diagnosis that described the content of an individual's dysphoria. They argued that the psychological problems related to ego-dystonic homosexuality could be treated as well by other general diagnostic categories, and that the existence of the diagnosis perpetuated antigay stigma.

Moreover, widespread prejudice against homosexuality in the United States meant that "almost all people who are homosexual first go through a phase in which their homosexuality is ego dystonic," according to the American Psychiatric Association.

In 1986, the diagnosis was removed entirely from the DSM. The only vestige of ego dystonic homosexuality in the revised DSM-III occurred under Sexual Disorders Not Otherwise Specified, which included persistent and marked distress about one's sexual orientation (American Psychiatric Association, 1987; see Bayer, 1987, for an account of the events leading up to the 1973 and 1986 decisions).

Text of APA resolutions Some psychologists and psychiatrists may personally hold negative attitudes toward homosexuality.

Notes

1. Although Kinsey's studies are often cited as documenting that 10% of the U.S. population is gay, Kinsey did not categorize his research

participants according to sexual orientation. Instead, he chose to emphasize sexual behavior and fantasy. In addition, because Kinsey did not collect his data from a probability sample, valid inferences cannot be made from them to the larger population.
For a discussion of how the Kinsey data came to be widely understood as supporting the ten percent figure, see Voeller (1990). Support for the ten percent figure was also provided by Paul Gebhard (director of the Kinsey Institute) in a 1977 memo to the National Gay Task Force.

He NEEDS confinement to a long term care facility. No shoe laces,
soft music, rubber padded walls, plastic "silverware" counted in and
out of the lunchroom, etc etc etc...

K1MAN BULLETIN - B051026A -

LEGAL UPDATE FROM THE AMERICAN AMATEUR RADIO ASSOCIATION (AARA) AND INTERNATIONAL AMATEUR RADIO NETWORK (IARN) LEGAL DEPARTMENT:

AARA is literally flooded these days with E-Mails and calls regarding K1MAN's on going battle with the FCC. A trip to a local law library has been recommended to hundreds of people. Look at 47 CFR Part 1, Subparts A and B. Of particular interest has been 47 CFR Pt. 1.62:

"(a)(1) Where there is pending before the Commission at the time of expiration of license any proper and timely application for renewal of license with respect to any activity of a continuing nature (such as amateur radio), in accordance with the provisions of section 9(b) of the Administrative Procedures Act, such license shall remain in effect until such time as the Commission shall make a final determination with respect to the renewal application."

The FCC has acknowledged K1MAN's timely filed renewal application on their web site. Look up K1MAN on www.QRZ.com and click on FCC INFO.

If Hollingsworth and Company try and argue in court that Granting K1MAN's recent timely filed renewal application and then "setting it aside" the very next day constitutes "final determination with respect to the renewal application," thus satisfying 47 CFR Pt. 1.62 and the 14th Amendment to the United States Constitution which guarantees due process of law, they will lose in the D.C. Court of Appeals if not lose in front of a Commission Administrative Law Judge. Just doing nothing more than "setting the license aside," as they have so pathetically tried so far, is not going to "cut it" at IARN and AARA, and K1MAN has no other choices other than to "give up on America" (not in this lifetime!) or to continue operating under 47 CFR Pt. 1.62 (2):

"A licensee operating by virtue of this paragraph shall, after the date of expiration in the license, post, in addition to the original license, any acknowledgment received from the Commission that the renewal application has been accepted for filing.

Note that the FCC web site lists K1MAN's renewal application as "PENDING." A printout of this has been posted next to K1MAN's original (now expired) license per 47 CFR 1.62 (2), and K1MAN on air operations continue under this entitled authority.

Secondly, federal law does not allow anything alleged in an unpaid NAL to be brought up in any other proceeding such as a renewal hearing or revocation hearing. The April 2005 $21,000 NAL against K1MAN has not been affirmed by the Commission and is illegal anyway since the substantive issues therein are the same as the ones in the unpaid 1990 NALs illegally "deep sixed" by the Commission years ago.

America is a land of laws and not of cheap and corrupt men like Hollingsworth and Company. He must have been sick on the day they taught law at law school, wherever that might have been. He should have gotten a note from his mother and made up that ENTIRE day! How much of YOUR tax money has poorly educated Hollingsworth and Company wasted already on old K1MAN? If there are valid issues with K1MAN (or W1AW and ARRL), let's go to court and be done with it. I will even buy Hollingsworth's lunch! Until that day comes, K1MAN continues to operate on the air under entitled authority CFR 47 Pt. 1.62. 73 and GL de K1MAN

I monitored SATERN around 1400Z this morning, I heard check-ins but no traffic exchanged. Anyone come across nets handling disaster relief communications related to hurricane Wilma? Please provide frequency of operation.

I have never been locked up so Mr Slit stated a lie and you have tried
to repeat it

> According to YOUR own words, you've been treated
>for emotional instability.

I was treated yes after being raped by number of socalled stright men
it was an experence not to be faced without assitance

it the attitudes of people like you that give the mental health field
such a bad name

BTW at one time you offered I beleive to proivde the address and/or
phone for your nursing Broard, the offer still good?

why are you lying Mr Slit?

If had been locked no file you could legaly have access to would tell you that or if you had access it would be a crime to disclose it contents

since it isn't true why bother telling the lie

I know thinks that Lying or being Bisexual gets you confined to a pysch ward but he doesn't know what he talking about

Scavaging? gee sound like you issues to me

the guy has been looking for proof of ARS emergncy traffic and has had
trouble finding it

some thing I would expect him to have as most of the real stuff is
pretty local and unsung

"newsgroup's"

Scavaging for frequencies is not "issues".

Most of us ARE galled to hear about Baxter, Markie....He's a
skidmark in the shorts of life as far as Amateur Radio goes.

This fight WILL get "carr(ied) through", Markie...Baxter's
collected so many black eyes in his record that I bet the deal is about
done for him.

You sure that isn't the character at 16 with the spacing set to give 8
WPM?

If the character and spacing are not the same it just doesn't sound
right. It was easier for me to learn with the proper spacing for the
speed.

Now days I can copy 5, but it's work. At 20 I hear word sounds which
is easy, but I'd be lost trying to copy 8 with a spacing for 16, or
the characters sent at 16 with the spacing set to give 8WPM.

Every one is different.

>It gives a better sense of the "flow and rhythm" so its easier to

For me it breaks the flow and rhythm, but OTOH you are learning the
character sounds .

id take you up on that bet but you would surely whech on it like all
the other times you bet

i don't see how he can lose this round his biggest probelm would seem
to be the interference in emergency op one but that is likely a fine at
worst I mean they have to go through the motion of turn the NAL into
something

"considering"

Only a deviant who think's having another man's excrement on his
genitals is "acceptable" would think that.

Oooops! >>I<< forgot to "consider the source"...You DO think it's
acceptable...

> > This fight WILL get "carr(ied) through", Markie...Baxter's

>
> id take you up on that bet but you would surely whech on it like all
> the other times you bet

"I'd" "welch"

So far you've not "won" anything to have had a bet won on, Markie.

> i don't see how he can lose this round

That's because you're an idiot, Markie.

> his biggest probelm would seem
> to be the interference in emergency op one but that is likely a fine at
> worst

"problem"

A "stuck mike", or your pet cat Garfield sitting on the keyer
paddles is "a fine", Markie...

Repeatedly jamming the net, demanding to be given net control,
etc, are worthy of revocation, fine AND jail time. The feds SHOULD
have shown up with Marshals and confiscated every last electronic
device on the property capable of generating RF after that.

> I mean they have to go through the motion of turn the NAL into
> something

They don't have to "do" anything. Baxter did it all on his own.
He should be prohibited from any/all FCC licensure and/or operation
under any established Part.

Uhhhh...no acutally, he's right, but probably not for the same
reasons.

It's only SOME men's bigoted (that would be YOU, Markie) concept
that homosapiens is somehow above Mother Nature's need to thin the herd
once in a while.

AIDS wields a double edged sword...If it can't slow down the human
growth rate by forcing humans to slow down their copulation habits, it
just kills them outright.

Our grandchildren will probably laugh at us for having not known
that the "cure" was something they take for granted, but then they will
probably have a scourge of their own that's every bit as ugly.

k1man is a great man who is fighting an opressive govnerment in order to
save ham radio. long live his broadcasts. can he please play some
olivia newton jon songs? thank you. a fan.

Sounds like there are some ego-maniacs at work here. I don't see any reason for most of this other than wanting publicity. I do not know anything about K1MAN, other than the fact he is trying to be the Howard Stern of Ham radio, or that is the way it appears to me.

What ever happened to simple plain DXing with other fellow hams?

Vinnie S.

that is what some of the postere want you to think at any rate looking
past the noise he seems to be an obnoxious fellow who has choosen to
test the limits at the FCC. not what I call wise to do so but US law
does not require wisdom of its cirizens (thank the gods or else there
would be no room in jail and kiley no one to gaurd them)

That is exactly what it appears to me from what I have been reading. He is doing nothing more than being anti-establishment or anti-government.

Everyone to his own, I guess. Like I said. I am perfectly happy DXing with other fellow hams, without testing limits or pushing authority.

Vinnie S.

The hatred being spewed here is all too common in ham radio today and represents what this once great hobby has degenerated into.

When rational minds prevail, virtually all informed sources, both in and out of the FCC, agree that legal precedent is clearly on the side of Mr Baxter, and in the final analysis, Mr Baxter will carry the day, much to the chagrin of his detractors.

right now my only concern with K1MAN is that him having largely coosen
to provoke this clash their are good reason he needs to brazen it

he may be making a principled stand on something but in any event
having started this he needs to see it through

Just Learn Morse Code has become very popular in a very short time.

Now there is a new version available. There are several new features in this version. Read the upgrade instructions on the download page if you have the previous version installed.

Any and all comments are welcome. You can reply to this message if you want to, as I'm posting with my real email address.

U.S. law requires obedience to that law for all who are "cirizens" or
"non-cirizens". If everyone is in jail, Kiley can "gaurd" them, Colonel.

as point of fact US Law does NOT require any to obey them is simply
provides for penalities if you choose to break them , and get caught,
and have DA (or other figure as approprate) choose to file charges and
after the full due process is gone through

proof of the exist in the way companies sometimes choose to pay fins
rather than comply with dumping rules for example.

BTW as I said NO US LAW or Reg requires or punishses a lack of wisdom

Not to complain, but how do you install it if you don't have Microsoft
Office?

Office isn't required. It's a Windows Installer package that requires
the MS Installer (free from MS and included with the latest OS).

Of course you don't need Microsoft Office to install this.

The Just Learn Morse Code web site does have a small Troubleshooting
section, and it seems likely that you'll find a solution to your problem
there...

Wrong, self admitted liar. You were locked up because you are
certifiably insane.

> 2 lies and now BUZZ you are getting more slack than Stevie

No, you are too stupid to know the difference.

2734. K1MAN ESSAY: E051028A - WELCOME AARA AND IARN - HAM RADIO WILL DIE WITHOUT THEM

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-28 20:41:33 UTC
From: netmanager2@yahoo.com
Message-ID: <1130532093.885944.310370@g44g2000cwa.googlegroups.com>
Source record: 47838
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.cb

K1MAN ESSAY: E051028A

I have heard some of my greatest detractors say on the air (when they didn't consider that I might just happen too be listening) things something like:

1. "Glenn is so talented, but ...."

2. "Glenn is so bright, but ...."

3. "Glenn has the best bulletin service, but ...."

4. "Glenn did such a great job on such-and-such emergency, but....."

5. "Glenn could be an alternative to ARRL, but....................."

6. "Glenn could have been so big, but........................."

The problem is that nobody can please all the people all the time, and if you try to do anything really significant in life, you are going to piss a lot of other people off, no matter what. Church politics is a good example of this, and I see no difference regarding hobby politics in particular and ham radio politics in general.

Typically, those who try to make major changes in the world get "hung," so to speak, (like Socrates, Galileo, or Jesus), or else THEY do the hanging (like Alexander the Great, Stalin, or Hitler). Other people just find some middle ground somewhere, while still others do next to nothing "spectacular" and cross their fingers while hoping they don't "get run over." Most people sincerely think that others would do much better if they just did it THEIR way.

The fact is that everybody is right and everybody is wrong. Whatever works best for you is all that you have unless you make major mid course "corrections" from time to time. Some make frequent minor "corrections" to best fit the changing world being experienced. Who has more fun than people?

Lots of people manipulate and even abuse their way around life. Everyone "manipulates" others to some degree, of course, but here again, this goes from one end of the spectrum to the other. If you buy flowers for your wife, aren't you trying to "manipulate" her? If you do unto others as you would have them do unto you, aren't you really trying to manipulate them?

One thing common to most humans in particular and mammals in general is the desire to be loved and accepted. People need to be recognized. Scientific American for November 2005 has an interesting article about how the brain comes up with the feeling of "self." The fact is that we have a very poor understanding of how the brain works, much less how the universe works.

I still cannot fathom why ALL hams don't welcome an on the air hf amateur information bulletin service on 20 and 80 meters. Free information! Listen to it in the shack while you are soldering a connection. Call in your comments, unedited, to an 800 number. A wide variety of information including Newsline and RAIN. Taped Dayton forums, interviews, hard hitting editorials, etc. etc. A great beacon station to evaluate propagation! The answer is simply "hobby politics" which overrides common sense. Jealousy! The human need to be recognized and to feel important. If the bulletin service threatens this self image the of the self importance of another person, that person is against it, apparently. This is why humans have wars and kill each other. They just can't agree on what is best for all concerned. They can't accommodate much at all. Doesn't make much sense to me, but I do recognize that it is a very common reality. Such is life! Being a wild animal wouldn't seem to be so bad, by comparison, it would seem to me!

Now, don't you feel more important already? Let's see, let's tune across 20 meters. Not much there anymore is there? Not much diversity. No wonder amateur radio is dying! 73 and GL.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 733
BID: $OPDX.733
October 31, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, K3GV, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, K8YSE, N0KE, 4Z4KX/4Z0X, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, HA0HW, HR2DMR, I1JQJ/IK1ADH & 425 DX News, IZ8CCW, JI6KVR & JA-IOTA Islands News, JT1CD, LZ1ZF, OH2BN, PA0KHS, and VA3RJ & ICPO for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 21st/October, through Friday, 28th/October there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4U1U, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9X, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XZ, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V5, TUNISIA. Operators YT1AD, YU1RL, YU1AO, YZ1BX, 4N1JA, 4N1NM, RW3QC and RK3AD will be active as 3V5A during the CQ WW DX SSB Contest(October 29-30th) as a Multi-Single or Multi-2 entry. QSL via YT1AD. The group will be there until October 31st. Outside of the contest, look for them on all bands and modes on CW, SSB, maybe RTTY. Also, they will try to spend as much time as possible on the WARC bands.

CU2, AZORES (Update/Press Release). Jarmo, OH2BN, provides the following update from Martti, CU2/OH2BH:
CQWW SSB: SEVERAL SINGLE-BANDERS ON FROM THE AZORES, CU-LAND
In spite of heavy rainfall and high winds, typical for the Azores in the middle of the Atlantic, a group of visiting OH contesters were able to set up their stations on the island. They are ready to provide you with a CU multiplier and observe the potential of this westernmost point of Europe for serious contesting. The OHs are the guests of Jose, CU2CE, at the northern end of the island with an open shot to the Northern Hemisphere. You will hear Jose, CU2CE, on 160M, Martti, OH2BH (CU2B), on 80M, Pertti, OH2PM, on 40M and Toni, OH2UA (CU2A), on 20M. Outside the contest you will hear them with a portable CU2 indicator. CU2A and CU2B QSL via OH2BH.

DXCC NEWS. Bill, NC1L, ARRL DXCC Manager, informs OPDX that the following operations are approved for DXCC credit:
6O0JT - Somalia, September 30th, 2004, through April 30th, 2005
5X1W - Uganda, August 3-12th, 2005

EA6, BALEARIC ISLANDS. Juan, EA6LP, is planning to participate in the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. Look for activity on 80-10 meters, possibly 160 meters. QSL via his home callsign.

EA8, CANARY ISLANDS. Valery, RD3AF, will be active as EA8EW during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSLs will be sent automatically via the Bureau.

EA8, CANARY ISLANDS. Operators from the Gran Canaria DX Group will be active as EA8ZS in the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via operators' instructions.

EK, ARMENIA. Operators SP9ERV, DJ0MCZ/SP9UON and SP9LJD (supported by EK6YL and EK6TA) will be acive as EK0B during the CQWW DX SSB Contest (October 29-30th) as a Multi-2 entry. QSL via SP9ERV.

H40, TEMOTU PROVINCE. Just a reminder that members of the Korea DX Club KDXC) will be celebrating the 50th anniversary of the Korea Amateur Radio League (KARL) by going on a DXpedition to the Temotu Province in the Solomon Islands, between November 5-11th. Six operators will have two stations active on all HF bands 160-6 meters (including the WARC band) on CW, SSB, RTTY and PSK31. The callsign H40HL will be used for their activity on Nendo Island (OC-100) in the Temotu Province. They will use H44HL on Solomon (OC-047) before and after their operation on the Temotu Province. The six operators mentioned are Choi Jong-Sool (HL5FUA), Kang Ho-Jun (Team Leader: DS2AGH), Lee Ju-Dong (DS2BGV), Yun Yong-Ju (6K2AVL) and Yu Byeong-Jo(6K2DJM). They will use five beam antennas, two

kinds of vertical antennas and one dipole antenna. QSL via their QSL Manager HL1XP direct to: Jeon Seong-Tae, 58-1 Nonhyeon-Dong Gangnam-Gu, Seoul, 135-815, Republic of Korea (or via the Bureau). For more details and updates, visit the following Web page at: http://kdxc.net/h40hl_2005/

HK, COLOMBIA. Pedro, HK3JJH, will be active in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign.

HR, HONDURAS. Dan, HR2DMR, will be active in the CQWW DX SSB Contest (October 29-30th) as Single-Op/All-Band (80-10m) entry. Also, look for him on 40 meters around 7225 kHz.

IOTA NEWS.....
NA-114. Operators Jacques/F1BCS, Jean-Marc/F1HDI, Gilles/F5JBE, Pat/F6CMH, Olivier/F6EIE, Daniel/F6EPD, Connie/F6GAL and Yves/F6JMV plan to be active as TO5S from Les Saintes Island, Guadaloupe, November 2-12th. Activity will be on HF and 6 meters CW, SSB and PSK-31. QSL via F1BCS.

J3, GRENADA (Update). Operators AC8G, N0VD, J37LR (VE3EBN), W8QZA/6 and N0KE will be active as J3A as a Multi-Op entry for the CQWW DX SSB Contest. Phil, N0KE, announced this past week that the group will be using a Cushcraft 8040 vertical modified for 160m and a couple of pennants for RX. If time permits they may try another xmit antenna. The team will leave the island on November 2nd. Look for them outside of the contest using their own J3 callsign, possibly operating as J3/homecall. Their sunrise is 0958z and the sunset is 2145z. They will spend some time on CW and maybe RTTY (probably not RTTY on 160).

JT, MONGOLIA. Khos, JT1CD, announced this past week that the following stations will active from Mongolia in the CQ WW DX SSB Contest:
JT1CJ - Single-Band (20m)/Low-Power JT1CH - All-Band/Low-Power
JT1DA - Single-Band (20m)/Low-Power JT1JA - Multi-Single
JT1BG - All-Band/High-Power JT1KAI - Multi-Single
JT1CS - All-Band/High-Power

JW, SVALBARD. Roger, LA4GHA, currently active as T98GHA until the end of November, informs OPDX that he will be operating from Bear Island (EU-027) between December 1st and June 2006. His callsign will be JW4GHA. His activity will be on 160-2 meters,and on CW, SSB and the Digital modes. QSL via his home callsign, LA4GHA, by the bureau or direct to:
Roger Bjoergvik, The Registry, Court of BiH, Kraljice Jelene 88,
71 000 Sarajevo, BiH.

NEW OFFICIERS FOR 2006. At their October meeting, the members of the National Capitol DX Association (NCDXA) elected the following officers to serve in 2006:
Dick Mayott, W2YE -- President
Terry Hines, N2ZH, -- Vice President
Brian Bayus, N1KC, -- Treasurer
George Vincent, K3GV -- Secretary

PJ4, NETHERLAND ANTILLES. Operators Jeff/KU8E and John/K4BAI will be active from Bonaire (SA-006) as PJ4R in the ARRL DX CW Contest (February 18-19th) as a Multi-Single. QSL via K4BAI.

QSL INFO AND NEWS.....
The log for the recent 3G1M DXpedition to Santa Maria Island (SA-069) is now online at: http://www.mdxc.org/logsearch1.asp

"Maccabiah 17 Award". The Award Manager 4Z4TL reports that all requested "Maccabiah 17 Awards" were sent out. If you are interested in this beautiful and colorful award, please check/search the Web site at: http://www.iarc.org/~4z4tl/Maccabiah17_award.htm
Also, the 4X17/4Z17 stations log search is now available on: http://www.iarc.org/~4z4tl/maccabiah_logs.html

SPECIAL EVENT. To commemorate the 2000th anniversary of the Roman City of Nijmegen (Noviomagum), a special callsign, PA2000N (PA "two thousand" N) has been issued. The callsign will be used during the period of November 26th until December 11th. This includes a Multi/Multi entry in the CQWW CW Contest. A crew of local hams will air the callsign as much as possible in the indicated period. A special QSL will be printed, and you can send your QSL via the Dutch QSL Bureau (R35) or direct to the manager PA0KHS: Henk van Hensbergen, Smaragdstraat 53, NL-6534 WN, Nijmegen, The Netherlands.

T8, PALAU. Operators Yutaka/JQ2GYU and Mihoko/JJ2VLY will be on vacation and will operate T88YU and T88LY from November 20-25th. Activity will be limited to their mornings and evenings. Look for them on 80-6 meters using CW and SSB. QSL via their home callsigns, direct or by the bureau.

TO4G, GLORIOSO ISLAND. Dany, F5CW, announced: "The Glorioso Islands CDXC DXpedition could finally take place from March 17th to April 7th, 2006, after the hurricane season. We cannot carry out this operation earlier because of various logistic and safety problems. We are expecting a team of 8 operators with, if possible, 5 all bands stations, all modes. I point out that the team is only made up members of the French forces which will travel by tactical transportation means. It is why the operation can at any time be postponed or be cancelled. We are conscious of waiting imposed for some time for the activation of this country but we want to carry out this operation under the best conditions." QSL Manager for this operation will be F5OGL. QSL via the French REF-Union Bureau or direct to: Didier SENMARTIN, P.O. Box 7, 53320 LOIRON, France.

TOP 5 QSL MANAGER SURVEY. Just a reminder that the annual "TOP 5 QSL MANAGER SURVEY" will begin on November 1st, and end January 30th (2006). The Golist, QSL Manager List sponsors this survey each year to bring recognition to those QSL Managers that gave "Outstanding Service" to the DX community in responding to QSL requests. This survey is not a "Popularity" survey, but a "Performance" survey. The 2005 TOP 5 QSL MANAGERS will be announced in February 2006 on the Golist reflector and published in the major DX bulletins. Please send your list of 5 QSL Managers to the following E-mail address and place in "Subject" line "Top 5 Managers". The E-mail address is: golist@golist.net

For more details, see OPDX.732 or visit the GoList Web page at:
http://golist.net

VP9, BERMUDA. Kurt, W6PH, will be active as VP9/W6PH for both ARRL Contests (CW - February 19-19th and SSB - March 4-5th). QSL direct only to W6PH.

YB0, INDONESIA. Gyuszi, HA2VR, is now active again as YB0/HA2VR from Jakarta, until November 4th. He will operate on 30 meters and the upper bands. He has plans to be in the CQ WW DX SSB Contest as well. QSL via HA2VR, by the HA-QSL Bureau or direct (QRZ.com).

YI, IRAQ. Gosho, LZ1ZF, informed OPDX that Ilian, YI9LZ, will be staying in Iraq until the end of January 2006. Remember to look for YI9LZ during the CQ WW DX SSB Contest (October 29-30th) as Single-Op/Single-Band (15m) entry. QSL via LZ1ZF. Visit his Web page at: http://www.qrz.com/lz1zf

---
The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 29-30th, 2005)

Thanks to Bill, NG3K, for providing OPDX readers the following consolidated listing of the participants in the 2005 CQWW SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/cqs2005.html

You're luckly because N5ZTW is really racking up the neg. feedback on
eBay..... He just got 8 negs. in the last 2 weeks.....

George - KI4FIA

2740. Procedure for reporting Interference from electronic devices?

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-29 01:41:10 UTC
From: GeorgeF <av8tor@removebeforeflight.com>
Message-ID: <WqA8f.1595$m81.1114@newsread1.news.atl.earthlink.net>
Source record: 47844

Been getting a strong datasignal (about 3KHz wide) on 144.277 MHz. I've been able to locate the house from which the signal is coming from, located about 700' from my home.

The people living in that home are not hams, I'm assuming its a spur, birdie or some type of sig being generated by a router, computer or something like that.

Two reasons this worries me:

1) 144.277 MHz is the freq of a new 2 meter propagation beacon located 60 miles south of me, this local interference makes sig-strength measurements of the beacon difficult.

2) I want to nip-this-in-the-bud before some interfering sig starts to show up on 144.200 MHz (SSB Calling freq) as 2 meter SSB is very active around here....

What 'channels' must I go through to have this problem looked into? FCC? ARRL? Knocking on the peoples door will probably be meet with resistance as this is the type of neighborhood where most of the neighbors are pretty well 'stuckup' and NO one, repeat No ONE speaks to their neighbors (so called high class thing I think).....

George - KI4FIA - Near Daytona Beach, FL

When I answered the original thread, I really didn't want to start all this.
I just mainly wanted to say that K1MAN's influence on me is minimal. Please
quit using my replies as a forum to controvery in this matter. K1MAN does
not merit the publicity.

2744. FT-530 mod / version help

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-29 16:11:49 UTC
From: arficus@yahoo.com
Message-ID: <1130602309.067675.166680@g49g2000cwa.googlegroups.com>

Just got my FT-530 (switching over from a VX-5R, where I've been
experiencing EXTREMELY bad UHF intermod; hoping the FT-530 will be an
improvement). My problem is that the jumper pad configuration on my
radio doesn't quite match the layout of any of the configurations I've
seen illustrated in any of the online mod instructions. So I'm a
little nervous about unsoldering what appears to be pad 13 given the
possibility this is some very early or late revision of the radio that
the extended tx/rx mod doesn't apply to. My radio's serial # is
3H250297 if anyone can help me ID year/revision by that.
Thanks,
Ethan

2745. Re: Is this _REALLY_ the public face that we want to present for Ham Radio?

As if you cared, I happen to be fairly technical. I have a BSEE and have been in the electromagnetic wave business for quite some time.

My argument is with the age old view that amateur radio is just for "gentlemen." This stance implies two biases. The first is that all participants must be male. I will leave this by itself. The second is that all participants must have keen technical prowess and a VAST memory store of useless facts. Today's technology opens the hobby up to people from all walks of life and technical ability. This is a win-win situation if ever I saw one.

More aptly put, amateur radio is a technically-based hobby and public service that is open to anyone who has been qualified.

Who gives a rat's ass!

<netmanager2@yahoo.com> wrote in message
news:1130358844.379780.147810@z14g2000cwz.googlegroups.com...
K1MAN BULLETIN - B051026A -

LEGAL UPDATE FROM THE AMERICAN AMATEUR RADIO ASSOCIATION (AARA) AND
INTERNATIONAL AMATEUR RADIO NETWORK (IARN) LEGAL DEPARTMENT:

AARA is literally flooded these days with E-Mails and calls regarding
K1MAN's on going battle with the FCC. A trip to a local law library
has been recommended to hundreds of people. Look at 47 CFR Part 1,
Subparts A and B. Of particular interest has been 47 CFR Pt. 1.62:

"(a)(1) Where there is pending before the Commission at the time
of expiration of license any proper and timely application for renewal
of license with respect to any activity of a continuing nature (such
as amateur radio), in accordance with the provisions of section 9(b)
of the Administrative Procedures Act, such license shall remain in
effect until such time as the Commission shall make a final
determination with respect to the renewal application."

The FCC has acknowledged K1MAN's timely filed renewal application on
their web site. Look up K1MAN on www.QRZ.com and click on FCC INFO.

If Hollingsworth and Company try and argue in court that Granting
K1MAN's recent timely filed renewal application and then "setting it
aside" the very next day constitutes "final determination with respect
to the renewal application," thus satisfying 47 CFR Pt. 1.62 and the
14th Amendment to the United States Constitution which guarantees due
process of law, they will lose in the D.C. Court of Appeals if not
lose in front of a Commission Administrative Law Judge. Just doing
nothing more than "setting the license aside," as they have so
pathetically tried so far, is not going to "cut it" at IARN and AARA,
and K1MAN has no other choices other than to "give up on America" (not
in this lifetime!) or to continue operating under 47 CFR Pt. 1.62 (2):

"A licensee operating by virtue of this paragraph shall, after
the date of expiration in the license, post, in addition to the
original license, any acknowledgment received from the Commission
that the renewal application has been accepted for filing.

Note that the FCC web site lists K1MAN's renewal application as
"PENDING." A printout of this has been posted next to K1MAN's

original (now expired) license per 47 CFR 1.62 (2), and K1MAN on air operations continue under this entitled authority.

Secondly, federal law does not allow anything alleged in an unpaid NAL to be brought up in any other proceeding such as a renewal hearing or revocation hearing. The April 2005 $21,000 NAL against K1MAN has not been affirmed by the Commission and is illegal anyway since the substantive issues therein are the same as the ones in the unpaid 1990 NALs illegally "deep sixed" by the Commission years ago.

America is a land of laws and not of cheap and corrupt men like Hollingsworth and Company. He must have been sick on the day they taught law at law school, wherever that might have been. He should have gotten a note from his mother and made up that ENTIRE day! How much of YOUR tax money has poorly educated Hollingsworth and Company wasted already on old K1MAN? If there are valid issues with K1MAN (or W1AW and ARRL), let's go to court and be done with it. I will even buy Hollingsworth's lunch! Until that day comes, K1MAN continues to operate on the air under entitled authority CFR 47 Pt. 1.62. 73 and GL de K1MAN

The expiration date which is being quoted for Mr Baxter's license is
meaningless. Mr Baxter's legal team has established legal precedent
that he can continue to operate legally past this date.

Anyone who thinks the ARRL, the FCC, or Hollingsworth have the
best interests of ham radio in mind, is in bad need of a reality
check.

The Yank Bachelor's degree is roughly equivalent to what the
Brit "A" Levels were 30 years ago. You need to get a Yank
Master's to get anywhere near the Brit Bachelor - except,
of course if we're talking about Open University because
in the early days you could do 6 unrelated elementary
subjects - one per year- and still get a degree.

Because of these early OU degrees, one has to consider
that _ALL_ OU degrees are the equivalent of 6 'O' levels,
and all of them in Cookery.

This NG is an international public forum
wherein one expects to see technical excellence.

It should be a place for enlightenment
and reasoned technical discussion. It
certainly used to be like that.

For some reason, best known only to
yourself, you have chosen to turn it into
an outpost of the infants' school
playground using behaviour and emotional
stances left behind years ago by mature contributors.

Such an exhibition by you does nothing for your
reputation, nor for the well-being of this NG.

Shame on you.

You should know better.

Stupid Boy.

All this bullshit gets back to my original point! What a bunch of pompous blowhards.

My BSEE allows me to calculate field strength of any EM field in 3D space using Maxwell's equations. I know the Brits degree is much better and the USA is just another English possession.

As far as bullshit goes, your article below,
being as it is a non-sequitur to the material
quoted, really takes the biscuit!

In Britland, everybody is permitted to use
Maxwell's equations, irrespective of any
qualification that they might have. To claim,
as you do, that your degree grants you such
a permission would seem to show you up for the
pompousness that you deride.

Gareth, isn't your real "problem" with these qualifications that you don't actually have a degree yourself?

Did an audit of qualifications by one of your employers not find some errors in a certain person's qualification records?

Did that same person not then try to do an Open University degree and get disqualified when caught cheating in his examinations?

Neil

Ah come on guys -- CB and Amateur Radio are both viable services for disasters

As well as any other radio service - FRS, MURS, GMRS as well as cell phones and regular phones (if they work)

Question for you -- over the years, which service do you think handled more local emergencies CB or Ham Radio

Lots more CB radios out there I spect

Yeah I know all about the range of these radios
But even with FRS good for a mile or two -- all it takes is someone to hear you.

--
CL -- I doubt, therefore I might be !

Ham repeaters typically have battery backup. During the Cedar fires in San Diego, we had the batteries go out after a day or so -- so Mountain Mike went to the repeater -- hooked up an gas alternator and refilled it periodically.
Bottom line -- the repeater was up and fully operational for the entire period of the fires

Listen to 52 simplex in most any large U.S. city, especially Los Angeles,
NYC, Atlanta, etc. You might just change your mind about what
2 meters is used for in big cities.

True...but the same with CB'ers. Just because theres a few bad ones out
there the Ham fraternity have no problem in insulting the majority of good
CB users. Theres good and bad in all and this constant bickering between the
hobbies is getting tiresome now.
How about concentrating on some Factual radio related threads and everyone
getting on ???..... no hope ??? nah i didnt think so....

Exactly. The same types of people the original poster claimed were using CB, (hookers, pimps, prostitutes, drug dealers, etc.), are in fact using two meters in several large U.S. cities. I travel a lot and have monitored this type of traffic in larger cities.

they do not last long on the air here in Arizona. bootleggers are often caught within 1 week of starting their chatter down here. also, all repeaters are setup with the new digital fingerprint identification system (each radio is unique, even in the same lot manufactured). It doesn't take long before someone slips up.

This was not the case in 1993 (took over 3 years to get a particular bootlegger off the air and there are still bad feeling about it on some of the more "loose canon" networks that spring up here).

Probably the HP-23. I'd look at ebay for one. Also, QST had an article within the last couple of years that detailed upgrading an HP-23 with modern components: caps, diodes, rectifiers, etc. It's well worth looking into.

The HP-23 was used to power, SB-100, SB-101, SB-102, SB-110, HW-100, HW-101, and probably the HW single band series, too. There may have been some others that it could supply, but those are the ones that come to mind.

Heathkit also used a couple of "odd" microphone connectors--nothing at all like the 4, 6, or 8 pin connectors today. That'd be something worth modifying (and easy, too).

Heathkit also used an RCA jack on several of their transmitters for RF output. Converting that to an SO-239 (VHF) connector is another worthwhile mod.

What did you buy?

You will probably find these on e-bay sooner or later.
Check often there

As to what models you need - tell us what Heathkit model you have.

It would probably help to have a manual

Manual URL's are at
http://ac6v.com/manuals.htm

Some free some pay

Once you know the model numbers you are looking for, You can also peruse the
classifieds at URL:
http://ac6v.com/swap.htm

Surely that cant just be dropped at the CB'ers door like the hint implies.
Just because some unsavories are using the band incorrectly its instantly
CB'ers to blame?. In fairness its illegal Amateurs not CB'ers. When does a
CB'er no longer get called a CB'er..... when he goes on the amateur bands
instead... hes not a CBer then..... hes as said previous.. an Illegal
Amateur ie. Unlicenced Amateur using the amateur bands.
Its like motorcyclists and car drivers.... if a motorcyclist drives a car
and has a crash people dont say aaaah its a bad motorcyclist..... they will
say oooh what a bad car driver he is..... well, you know what i mean ;o)

This is a value statement, obviously, but a meaningless one. Of course
by your actions ye shall be judged. But who is doing the judging?

>> If this Gospel truth offends you, TOUGH.
>
It ain't _my_ gospel, which is the point. I dispute the bible has any
real value when read as a literal document. In fact, a literal reading
of such documents diminishes their true value. It was written,
translated and collected by people who have little, if anything, in
common with modern people who call themselves Christians.

Belief is important, and I'm not suggesting that a belief in a Christian
god is somehow wrong. I'm just saying that I do not see the value in
making value statements based on ancient texts that may or may not have
anything with what private citizens do in the privacy of their own home
today.

Personally, my life changes not one bit if my otherwise friendly
neighbour happens to be gay. I just don't give a shit about, and I
especially don't give a shit about what he or she does in their bedroom.
The specifics of what or whom they do things with has absolutely no
correlation with anything else about them, and it is a logical error to
think otherwise.

The fact is that most people, gay, straight or otherwise are pretty much
all the same.

These are my values, and if it sucks for you to hear them, well that is
tough for you. If these values conflict with texts that have been
compiled imperfectly over the last 4000-5000 years, then that is even
tougher for those who expect otherwise. At this does is prove to me
even more how imperfect these texts are.

Given the bone-headed quotes you've posted here that appear (at the very
least) to defend racist and sexist ideals, I don't expect to change your
mind about any of this. I do call bullshit on your illogical and
unfounded assumptions about these subjects. I reserve the right to
counter your troll-mongering with sensible rebuttal.

However, I know when I'm tilting at windmills. And you, sir, are hardly
a dragon.

Not sure there is such a thing as an 'unlicensed' amateur. If they don't
have a license, they aren't an amateur radio operator. The folks
illegally using the band are unlicensed illegal users, some of whom
likely also operate on the cb band or even other frequencies where they
are illegal because of a lack of a license.

Precisely. The people utilizing two meters in several large U.S. cities
are neither hams or CBers, and the problem is growing, especially
the number of Spanish-language speakers. I am not going to out my
company here, but we have a pretty good handle on spectrum management,
and illegal activity is on the rise and not just in the 144 mHz range.

Ok lets take the discussion the other way. Is a CBer someone who uses a CB
with a licence or is a CBer someone who just uses a CB and doesnt give a
damn about a licence? If he has NOT got a licence.. in your style of
words... how can he be classed a CB operator??? see my point??
The people screwing around on Amateur frequencies may also mess about on CB
but if they arent licenced on CB they arent CB'ers.. they are just
```

abusers... same as if Amateur users arent licenced they arent Amateurs. They are also just abusers..

Graham, If I recall correctly, CBers in the USA are not FCC Licensed.

Amateur Radio operators are FCC Licensed.

Depends, here in the US there is no license requirement to operate a cb,
that was dropped some years ago, so anyone who purchases a cb and
operates it on the citizens band is a cber. If in your country a license
is required to operate on the citizen's band, then it is just like
amateur radio, if someone operates without a license then they are just
an unlicensed illegal radio operator.

> The people screwing around on Amateur frequencies may also mess about on CB

And that is often the case. Those that choose to operate illegally on
the ham bands or other frequencies often start out on cb where disregard
for any rules is the norm, purchasing radios that operate outside the cb
frequencies where the attitude is "I bought and paid for this here radio
and I can operate where I damn well please".

> but if they arent licenced on CB they arent CB'ers.. they are just abusers

Yep, if a license if required for cb.

> ... same as if Amateur users arent licenced they arent Amateurs. They
> are also just abusers..
> Regards,

They cannot be 'Amateur users' if they are not licensed, they would just
be unlicensed users. One *has to be licensed* to be an Amateur Radio
Operator.

Now if an Amateur operates illegally outside the Amateur bands, is he
operating as an Amateur, or just as another illegal user? The FCC can
and most likely will revolk the hams Amateur license if caught doing so.
Example, some hams have been caught operating just below 10 meters on
the so-called 'freeband' frequencies (there are no 'freeband'
frequencies as those frequencies are allocated), and have had their
Amateur licenses revolked.

I know that they used to be and I have one (KOH0767) and a ham license
(KE4MVU). I'm legal on both. I also have a general radiotelephone operator
license.

>
> Lee KI6AZS

These days the CW activity is normally in the lower part of the band (i.e. General & Extra portions). There are so few active Novices and Techs with code that you will seldom hear activity in the Novice CW portions of the bands. The active ones basically upgraded to General when the code requirement became 5wpm across the board. However, if you have passed the code requirement, I suggest checking the FISTS website and trying to call CQ on the FISTS calling frequency. There are sometimes people listening there for the express purpose of helping the new people.

The 15 meter band isn't "dead" but it is not open as often or as long right now while we are in the low part of the sunspot cycle. The best time of day is probably early afternoon.

Not sure how it works in your country but in the UK, CB users have to be licenced as do Amateurs... I know in the past you used to have to have an FCC licence for CB as i remember the application forms quite clearly being in the Boxes that they used to come in. That was back in the late 70's though.
My original point was that just because some dum dum decides to mess about on the Amateur bands the majority of the Ham fraternity immediately call them CB'ers.. basically as an insult. Ie.. anyone messing about and causing trouble must be a CBer. They arent prepaired to accept its either idiot Hams or their children messing about on their radios, or just someone who bought/nicked a radio and hasnt the brains to use it properly.

The majority of CB users are perfectly well behaved individuals as are most Amateurs but you know yourself in all walks of life there are the sort you could quite happily do without..

Graham,
The licensing requirement for CB radio operators in the USA was dropped
back in the 1970's when Jimmy Carter was president, he was responsible for
dropping the licensing requirement.

In the UK you Legally require a licence... no test is involved. Its
basically just a tax on the airwaves. But if thats the case, you say
unlicenced Amateurs arent Amateurs, they are just unlicenced users...
likewise anyone operating unlicenced on the CB isnt a CB'er. He, also, is an
Unlicenced User... I realise its a little different in the US.

> Now if an Amateur operates illegally outside the Amateur bands, is he

Seems a bit unfair really. The thing that put me off going for my ticket was
learning morse. I honestly cant see the point in it nowadays even though i
accept it had its uses and can still "get through" when other methods fail
but to be honest... as its only a hobby now.. why bother (use the phone)
Obviously theres an advantage using it in war of course but technology has
progressed.
The thing that put me off M3 was the fact i couldnt legally use 27MHz. That
and the fact i would be scoffed at in here probably more than being a CB'er
;o)

Most truckers in the UK arent that friendly. Theres a number of times ive
been nearly run off the road in my car because they see the CB antenna and
think... aaaah a skateboard user.... Dont know about the 27680 reference but
in the UK they hang about the 27.78125MHz slot eating bacon sarnies as they
ratchet.....

Hi hi!!!

Reagan was President of the United States from 1981-1989. I guess you
could call that the late '70's! LOL...

You actually still have your CB license? I doubt it has any validity any
more. OTOH I still remember my CB license # and it would be cool to get
an official copy of it...

You obviously haven't listened to cb in the USA. The cbers here have made 11 meters the sewer pit of the radio spectrum as well as the other frequencies they operate illegally on.

Exceedingly late 70's :o). I remember the banter between him and Maggie Thatcher. She was Prime minister in 79 which is where the confusion sprung from. I was more into girls, CB and music than politics so a lot of that went over my head... thank god.....

I can only go on what i hear in the UK and fortunately it isnt as bad as
that. We still have our moments with a few thickies but normally its down to
mouthy teenagers who have no mates to hang with ....

Very well stated, Graham. There used to be a license requirement for CB here in the US, but not anymore. (for a long time now)

I got my first CB license around 1972 or so..my dad had to sign for it. He thought I was nutz! (he still does) Had to search for someone to talk to ground wave back then..

It's not the majority of radio operators that are so quick to throw CBer's under the bus. In fact, many radio operators started with CB. A few high horse blowhards think 11 meters is only good for gutter snipes, (gutter snipes can be entertaining too).

It's a fun band, and invaluable on a highway trip.

/off soapbox

You really missed the point, I never made any reference to 'illegal cb
frequencis', I said *other* frequencies (meaning frequencies other than
the cb frequencies) they operate on *illegally*. Try to keep up.

HamPoll is here in order to give amateurs a chance to speak for themselves, and in time to provide reasonably accurate and significant polling data on a variety of issues related to the amateur radio service.

You are welcome to browse the polling data we have, but we especially encourage US amateurs visiting here to register with thier callsign and vote in the HamPoll Polling Station.

Whether you come to browse, to discuss or submit new polls, or to tender your vote, be sure to visit regularly as new polls are included from time to time, and the poll data changes as more hams participate day to day.

Stop by at: http://www.hampoll.com

Hey, Dude. It's already November.

> Roger Wiseman has begun holding shiva and will not fuck sheep for 40
> days after the 4th as tribute.
>
> Now, where the hell will LLoyd Davies take his incessant whining?

NIM Busters will continue, but the location of the new board will be a
closely held secret. According to the admin of the current board,
Lloyd hasn't posted since last April. The posts allegedly by him are
all by imposters.

The admin has not succeeded in dumping Wiseman in spite of eight
months of trying, so the regulars will move to a new, secret board
where Wiseman will not have access. The new board has added levels of
security which will prevent uninvited posts from people like Wiseman,
even if he does find its new location.

How do I know this? Simple: The new board has been in beta testing
for the last eight weeks. That's why the NIM Busters board known to
the public is receiving a much smaller number of posts than in the
past. The regulars have gradually been invited to the new board and
are posting there instead.

If you want access, install PGP on your computer, generate a key, and
have your key signed by three other NIM Busters regulars. After that,
you MAY be allowed to post to the new board.

Sorry, Woger. Your time is up.

thank you for the "heads up"

I use a text base browser here with cookies set session (one time) only. so
even if they plant one, it won't stick. :)

as for recording my IP, little hard to do as most of my http traffic is
routed through a TOR node (changes everytime I browse).

whats even better, I use linux. :)

I doubt that President Carter had much to do with dropping (dumbing
down) licensing requirements. In fact it is unlikely Carter even knew
what ham radio was unless they could help him with 'killer rabbits'!

He may have been pres at the time but the FCC has a history of
operating on their own.

unk

Indeed, when Georgie boy said lets go guys we were there with you... getting
friendly fired at.... lol. The thing is not being American i wouldnt really
```

follow your presidents with as much interest as you guys which is fair enough as you wouldnt follow the prime ministers of the UK with any real interest.
There was an interesting piece in the paper today about Americans being the most un-observant country of all to do with happenings outside the US because there was a survey to ask people in different Malls who a certain picture was of. It was Camilla Parker Bowles but hardly anyone knew her... which doesnt suprise me as who would be interested in her???? now if you were to say Diana Spencer most people would know.

I knew Regan was President in the 80's but i didnt know when he came to power. As it didnt really affect me i never took much interest.

This is how the fight for Legal CB in the UK went. It want until nearing the end that Margaret Thatcher told William Whitelaw to do something about it as it was becoming a bit of a hot potatoe. With all the things going on around the world and in the UK i doubt if CB was even an issue in her mind.

Betty Ford sent out "breakers" from the White House during the 1970s
under the CB handle "First Mama".
Former President Jimmy Carter's wife Rosalynn wanted to talk on CB radio in
the later half of the 1970's but she didn't have a CB radio license.
President Carter quickly got the FCC to change the law so that anyone could
instantly use as their CB callsign - K , their first and last initials and
their zipcode. Shortly thereafter the CB licensing requirement was dropped
altogether in the U.S.
CB frequencies and any other nearby frequencies quickly proceeded to go to
hell in a handbasket.

Care to comment on the conduct and character of ham radio
operators on 75 meters, after 10 pm ????????????
And while your are at it, fill us in on approximately how many
turf wars, on the average, are currently raging on 75 meters?
And dont wimp out and tell us this happens only occasionally,

cause we know better.

This .sig file will continue until Mister Fort posts a sincere apology
to all cancer victims and their families. His refusal to do so says more
about his attitude and upbringing than any of his thoughtless and
hurtful postings in rec.radio.shortwave. He seems to be very proud of
the fact that he can buy expensive radios using the refunded deposit
money from his empty beer containers and has frequently posted the fact.

It appears he is well on his way to purchasing his next radio. Anyone
caring about his well-being should mention the good work of Alcoholics
Anonymous to him. They may be able to help him restore his self respect
and dignity so he stops posting this drunken garbage on the internet.

Hello,
I am a swm, 31 years and blind. I am seeking a
male in the Phoenix
Arizona area for possible relationship.

My interests are: Hiking, camping, radio, sci-fi
and cooking (to name
a few). I have had very few experiences over the
course of my life
(one other sex experience in the last 5 years). I
tend to be a little
shy and my social skills are somewhat lacking. I
am not particular to
race (an advantage in my case). All I seek is some
understanding and
good times...

Remember Folks,

If you have a good Linux box with sound installed, just lift the
executable off of a Windows box and use the WINE emulator to run.
The helpfiles won't work but the program runs beautifully. 1.1 too.
I haven't tried it yet but possibly WINE .9 might do a successful
install. I have to use an older version of WINE as one of my necessary
WinBlows programs will only run on an older version.

This .sig file will continue until Mister Fort posts a sincere apology
to all cancer victims and their families. His refusal to do so says more
about his attitude and upbringing than any of his thoughtless and
hurtful postings in rec.radio.shortwave. He seems to be very proud of
the fact that he can buy expensive radios using the refunded deposit
money from his empty beer containers and has frequently posted the fact.

It appears he is well on his way to purchasing his next radio. Anyone
caring about his well-being should mention the good work of Alcoholics
Anonymous to him. They may be able to help him restore his self respect
and dignity so he stops posting this drunken garbage on the internet.

The trouble with Glendale Girls is that most have tenth grade educations and must take manual labor jobs to support their shiftless West Virginia husbands.
One such beauty
http://ww3.voyeurweb.com/main/fsg44/fs20051026-160079/index.html used to date Roger but left him after the third date. She said she "works too hard at my heavy equipment job to support a freeloader."
Why? She said she got tired of buying dinner and drinks at the Shipwreck Lounge while Roger spent most of his time in the men's room with his buddies.
She walked out after their last date and left Roger with the bill. Now, according to informed sources, the Shipwreck management has had to put a lien on Roger's house for payment.
Does she have tattoos on her belly button? Apparently not, but Roger never got close enough to find out.

It was twenty years ago today,
Roger Wiseman forced the boys to be gay
Heï¿½s been going in and outa their rears
And heï¿½s made them into raviniï¿½ queers.
So watch out or Iï¿½ll force on you
The act we've hated all these years,
Roger Wisemaniï¿½s Greyhound Meniï¿½s Room Band.

Weï¿½re Roger Wisemaniï¿½s Greyhound Meniï¿½s Room
Band,
Disciples of the Bucktoothed Choad,
Roger Wisemaniï¿½s Greyhound Meniï¿½s Room Band,
Sit back and watch us shoot a load.
Roger Wisemaniï¿½s Greyhound, Roger Wisemaniï¿½s
Greyhound,
Roger Wisemaniï¿½s Greyhound Meniï¿½s Room Band.
It's wonderful to be here,
But Wisemaniï¿½s full of crap,
The dirty goddamn pederast:
That fucker gave us syphilis,
That fucker gave us clap.

I don't really want to stop the show,
But I thought you had all better know,
That Wisemaniï¿½s going to play a song,
On a stickpin that he stuck through his schlong.
So let me introduce to you
The one and only Bucktoothed Choad
And Roger Wisemaniï¿½s Greyhound Meniï¿½s Room Band.

LLOYD'S A VIRGIN

(Madonna/Billy Steinberg and Tom Kelly/Les Paul)

LLoyd made it through 12th grade
Somehow he made it through
Never had a forum for his views
Until he found radio newsgroups

Lloyd is the the freak of the week
Everybody avoids that fatassed geek
But everyday's a brand new day
Yeah, it makes him feel
Shiny and new

Lloyd's a virgin
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

"I'm gonna post about you, boy
My Bible's on my side"
Lloyd's been bashed around
Because his stupidity is hard to hide

He's bald, obese and round
A weeble-wobble that won't fall down
Oh, when he went to the retreat
Yeah, he stepped on his own feet
What a fucking fool

Lloyd's a virgin <GAY!>
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

Oooh, oooh, oooh

He's bald, obese and round
He'll just follow you around

Because you make him feel
Yeah, you make him feel
He's got something to do

Lloyd's a virgin
Hasn't had pussy for the very first time
Lloyd's a virgin
Never tires of jacking off all the time

Lloyd's a virgin, ooh, ooh
He'd rather slurp nutsack goo
Lloyd's a virgin
What's a loser like him to do

Oh, oh, oh, oh, oh, oh, oh, oh, oh
Ooh, Lllllloyd
Can't you hire a whore
For the very first time?

I have used morse code with a key (ve3gqx) but have always wondered how
people sent and recieved code by tapping on pipes etc.
Can anyone explain how this is done? How does one distinguish between a dot
and a dash?

tnx
Wayne

2912. Re: CW using pipes

Newsgroup: rec.radio.amateur.misc

Message-ID: <rLPaf.4892$m81.1483@newsread1.news.atl.earthlink.net>
Source record: 47716

I think you strike the pipe harder for a dash than for a dot. But the real reason I jumped in was to tell a funny story. When I was in college 50 years ago I knew some of the local high-schoolers who were hams. One of them eventually came back here as a college professor. He told me how he and another of the kids were always getting in trouble at school for talking to each other. So they were put into separate classrooms with a wall between them. So they would carry on their conversation by tapping out Morse code on the wall.

I love that HP-23 PS except for 1 thing. That is, I wish that the B+ was capable of more than 100 ma. I like to use the one bought for a bench supply and sometimes I may need a little more that 400ma. Does anyone have any ideas, like swap the transformer with?? Any response will be most appreciated. Sorry to the original poster for riding on his original question.

(It is Sledders, just for the record.) They tossed Woger outta there because when he stood on a chair to "smooch the moose" he tried to French it.
Woger didn't much like the place anyway. That darned wood floor left slivers in his knees every time he'd crawl under someone's booth to smooch something else.
Darn. He didn't even get a t-shirt, either. I guess it is back to The Shipwreck Lounge for him!

a) They only do it in the movies. It's Hollywood and isn't real.
b) The original telegraph codes used sounders that clicked the code, it
wasn't the same code.

Brad.

No, the older ones (like mine) are not cell-phone blocked, the newer
ones are. The older ones sell at a higher price (even though picking up
digital cell conversations would be tough).
It's simple to check, just try to tune them in and see if they get any
signals.
None of the R-7000's cover past 2000 MHz (unless modified with
something I haven't heard about)

Another way is

For a dot -- a sharp tap

For a dash - a prolonged scrape

I used to send morse to my buddy in company meetings with a tapping pencil
Folks were so busy yakking -- no one noticed --- Typical message was BS or
GEE

Navy pilots captured and held in POW camps in North Vietnam could
communicate with each other in code while in their cells by tapping on a
wall or the floor.

See URL:
http://shipmodeling.info/morse_code.htm

Thomas Edison proposed marriage by tapping "Will you marry me?" into Mina
Miller's hand. Mina tapped back "yes."
See URL:

Don't tell that to the POWs

Pilots captured and held in POW camps in North Vietnam could communicate
with each other in code while in their cells by tapping on a wall or the
floor.
See URL:
http://shipmodeling.info/morse_code.htm

POW Jeremiah A. Denton sent morse by blinking his eyes -- see URL:
http://dentonfoundation.org/Jeremiah%20Denton.htm

Morse can be sent over radio waves, by a light source, a mirror flashing the
rays of the sun, or tapping on a wall or the floor or any sound method such
as pipes (a good conduit of sound)

I can send code by tapping a pencil on a desk
dot = a sharp tap
dash = a prolonged scrape
Have done it many times in various situations like a company meeting

Or even by tapping code by feel --- tapping my finger on one's palm
such as Thomas Alva Edison did in proposing marriage to Mina Miller see URL:
http://www.ieee-virtual-museum.org/collection/people.php?id=1234723&lid=1

dah dit dit dit dah dit dah dah dit

Here is a real life example of using morse code by beating on a sunken submarine hull -- The USS Squalus in 1939

"Two ships arrived on the scene during the afternoon. Their propellers could be heard clearly in the Squalus. One had an oscillator for generating underwater sound, making possible Morse code transmissions. The Squalus responded by laboriously beating out answers by hammering on the hull. One blow was a dot and two a dash."

Falky foo posted:

"slight pause after the dashes & using context"

Precisely, just as how the traditional telegraph clickers were used to communicate.

I learned to read traditional Morse courtesy of the Pennsylvania Railroad at the ripe old age of 6, well before I developed any level of competence in reading the printed word. IIRC, it took only about 2 or 3 weeks of exposure before I could print every character being sent though their telegraph line. (My grandad was retired from the PRR, but on several days a week he would walk down to the BO shack, an interlocking and route control station in Bordentown, NJ, to play poker, while hauling me along.

It didn't take very long before one of the signalmen decided to turn me from a liability into an asset by teaching me how to copy the language of the 'clicker', which I dutifully did, printing every character that came acoss the line very neatly on a pad of paper that the workers there had provided for this purpose, so the card game could continue without interruption.

Later, at around age 8, I could operate the BO interlocking all by myself, setting up the switches and locks for the next oncoming train. It was great fun, although I had little doubt that one of the card players was watching over my shoulder the entire time.

IIRC, here's the consist of typical train orders that were received by telegraph: "1215Z TRN1025 9PASS RT TRENTON JDR SK" and "1411Z TRN1140 XX 21FRT RT DIX RBD SK".

The first message indicates that it's a 9-car passenger train that is to be routed on the mainline to Trenton, and the latter pertains to a 21-car freight that is to be routed to Fort Dix, NJ. The XX would alert each location along the route that this train is carrying explosives or hazardous materials that could present a threat to residents or communities along the track route were an accident to occur. (The very worst train classifications are the dreaded "XXX" (extreme explosives, liquified toxic gas, etc.) and "XXN" (nuclear) designations, which require local authorities to be contacted prior to the train's passage.

I would respond to each keying "ACK TRN1140 RT DIX JVC SK", then set up the switch route for the train. (JVC was my grandad's line ident.) If the train orders contained an XXX or XXN designation, it was time to interrupt the card game!

The key to reading Morse Code is the timing of the characters, and their very unique rhthms. Even today, more than 50 years later, I hear that summary "SK" (end of transmission) as, click, click, click, clack, click, clack". Similarly, "AR" (over to you) is "click, clack, click, clack, click". Run either of these two common phrases across your tongue quickly, and you'll remember that unique sound for the rest of your life with absolutely no memorization required. Curiously, when you hear dit-dit-dit-dah-dit-dah or dit-dit-dah-dit-dah, you'll also automatically recognize what this very different type of sound mean as well.

SK and kindest regards, Harry C.

It's all in the rythm.

A dot is a single tap. A dash is two closely separated taps.

Think of a telegraph clicker. A dot makes a click, a dash a clack.

Now we know what is wrong with Woger. He suffers from Asperger's Syndrome. This would explain his lack of social and communications skills. Now, don't you feel sorry for him?

A. Qualitative impairment in social interaction, as manifested by at least two of the following:

1.. marked impairments in the use of multiple nonverbal behaviors such as eye-to-eye gaze, facial expression, body postures, and gestures to regulate social interaction
2.. failure to develop peer relationships appropriate to developmental level
3.. a lack of spontaneous seeking to share enjoyment, interests, or achievements with other people (e.g. by a lack of showing, bringing, or pointing out objects of interest to other people)
4.. lack of social or emotional reciprocity
B. Restricted repetitive and stereotyped patterns of behavior, interests, and activities, as manifested by at least one of the following:

1.. encompassing preoccupation with one or more stereotyped and restricted patterns of interest that is abnormal either in intensity or focus
2.. apparently inflexible adherence to specific, nonfunctional routines or rituals
3.. stereotyped and repetitive motor mannerisms (e.g., hand or finger flapping or twisting, or complex whole-body movements)
4.. persistent preoccupation with parts of objects
C. The disturbance causes clinically significant impairment in social, occupational, or other important areas of functioning

K1MAN BULLETIN - B051026B -

UPDATE FROM THE AMERICAN AMATEUR RADIO ASSOCIATION (AARA) AND
INTERNATIONAL AMATEUR RADIO NETWORK (IARN)

K1MAN and his team at AARA/IARN, being America's largest amateur radio society are going to take on the big guns and challenge bpl. They, with all their vast experience and technical expertise plan to challenge the FCC and the BPL operators. This is revealed in the latest issue of K1MAN's newsletter that promises tells all that cannot be published elsewhere. He is naming names and telling it just like it really is for 45 US a year. Jesus christ, MAN, it's what, 2 pages of photocopy paper and a stamp x 12. Damn expensive dunny paper mate.

AARA President, Glenn Baxter, K1MAN, says that the "ARRL haven't done enough" and lack the skills necessary to challenge bpl and the big power companies. K1MAN believes the AARA have the people and skills to lead a fight against the BPL operators. Glenn Baxter believes he can become the savior of amateur hf communications, given his vast experience in fighting and dealing with the FCC and communications legislation. The AARA, like all other amateur societies across the globe have carried out extensive testing, research and debate on BPL since it's early days. AARA was active in filing complaints with regulatory bodies across the world, reinforcing the position taken by local amateur bodies.

K1MAN says, unlike the ARRL, the key to it all is lawyers, lawyers and more bloody lawyers. K1MAN plans to solve the problems with the FCC, both the BPL and his own by using lawyers. That's right K1MAN, when there's a problem a lawyer can fix it. "Just what the world needs son, more bloody lawyers."

Others argue that K1MAN and his love for lawyers may actually be more of a problem than a benefit. It must cost the AARA a bloody fortune for legal advice every five minutes. I wonder if K1MAN is also head of the AARA's lawyers department. I have a landline in my bedroom, in MAN Land that's called a switchboard.

As can be seen from the extensive web site and submissions on bpl to regulatory bodies, the AARA will be the body to fight bpl, and K1MAN will lead the fight. From his gaol cell that is.

K1MAN has team with Toadfish and the N9OGL Show to provide updates on BPL operations from the audio room....of the local prison. Listen for the "MANTOAD" Bulletins....

After release K1MAN plans to be the next President of the US, an astronaut, astronomer, radio broadcaster, engineer, research scientist, tv news anchor, dj, and whatever else he may wake up each day, wishing he was, on his way to the welfare office.

When I was a kid I used to pull up weeds, put them in pots and pretend to sell them. I grew up. Stop pretending to be something you aren't Glenn.

BTW, as your AARA/IARN is an amateur society I'm wondering who on your committee represents your members to the IARU and World Radio Conferences.

Perhaps the ARRL were behind your latest NAL K1MAN, you know with you been such a hugh threat to their numbers and all.

Any nong can form a company and be a director of it. Gee, I can go out today, go to a government office hand them AU$60 and get a Registered Organisation Certificate for, let's say "Australian Amateur Radio Association-or AARA" and make myself President, Director, Manager, whatever the hell I like. It does not mean that I am actually good at it or can serve any real purpose.

Seems that K1MAN is the "George" (aka 'Sienfield') of Amateur Radio. Next he'll be printing a daily newsletter on his laser printer and calling himself a metropolitan daily newspaper that's circulating across America, when in fact he means his street.

When down, visit http://www.k1man.com for a good ol laugh. It's bloody hillarous.

73
VK3HAG
Future AARA President :)

Now we know you have a homosexual attraction for Roger, Lardass! But
then you are the one who posts shemale pictures and spams when you get
your ass handed to you.

"Whinyng"?? There's another one for the West By God Virginia dictionary.

And where is YOUR girl friend, Woger? And I don't mean the inflatable one, either.

Still posting your photo in the Yahoo! singles groups and hoping some mope will come along and feel sorry for you?

"Whinyng". What?

"Plagairizing". Geesh

"emnpty" The inside of Roger's head.

BUAHAHAHAHAHAHAHAHA!!!!!

Ohio/Penn DX Bulletin No. 734

The Ohio/Penn DX PacketCluster
DX Bulletin No. 734
BID: $OPDX.734
November 7, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, WA2IQE, NG3K, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, W6LD, K8YSE, DL1EK & The DX News Letter, F5CWU & La Gazette du DX, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, IT9BLB, IZ8CCW, JI6KVR & JA-IOTA Islands News, LA9VDA, OM3JW, SP3FAR, TA3J, VA3RJ & ICPO, VE6LB/VA6XDX and VK2JLX for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th/October, through Sunday, 6th/November there were 235 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH5, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VK9X, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Operators Richard/OM2TW, Rudi/OM3PC, Joe/OM5AW and Bebo/OM5RW will be active from November 18-28th, as 3B8/homecall. They will be active on CW/SSB/RTTY/PSK and SSTV with two separate stations on 160-10 meters (especially on 160/80 meters). QSL via their home callsigns.

More information and their on-line logs will be available at:
http://www.vhf.sk/3b8

3W/XV, VIETNAM (Work'em Now). Charles Harpole, K4VUD, reported the following: "Best to work Vietnam now-a-days because rumor has it that at the end of the year, some or all Vietnam hams will be without license.... or may have to renew via some delayed process. This could change for the better at any time, but work those XV and 3W now if u can."

4U1UN, UNITED NATIONS HQ. Operator Seppo, OH1VR, during his world tour with Juhani, OH3SR, will stop in New York City and operate from 4U1UN during the last 7 to 8 hours of the CQWW DX CW Contest on Sunday, November 27th. QSL via HB9BOU.

5H, TANZANIA. Hans, DL7CM, will be on holiday with his wife from the Lodge in Uroa, Zanzibar Island (IOTA AF-032), from November 23rd to December 18th. Since this is a holiday operation, look for him to be active as 5H1CM during his spare time on 160-6 meters on CW, SSB and RTTY. His equipment is an IC-706 w/amplifier and 27 meter slopper and other wires. QSL via DL7CM. For more details, visit Hans's Web page at:
http://www.qsl.net/dl7cm/5H1.htm

5X, UGANDA. Vlad, UA4WHX, who has recently left Kenya and was active as 5Z4/UA4WHX, is now active as 5X1VB from Uganda. His activity over the past week has been on 20/15/12 meters SSB and 30 meters CW. The length of his stay is unknown. QSL via UA4WHX, by the bureau or direct.

9V, SINGAPORE (Also HS). Remember to look for Seppo/OH1VR and Juhani/OH3SR to be active from 9V1PC's QTH November 9-10th. Activity will be on all bands, SSB, CW and RTTY. QSL direct only to home calls. The duo will head to Thailand next and operate from the QTH of HS0AC November 10-13th.

A5, BHUTAN (Update to OPDX.728). Members from the Clipperton DX Club team that will be active from Bhutan between November 18th and December 3rd, have announced they will be in the CQ WW DX CW Contest (November 26-27th) as A52CDX. Operators mentioned are: Gerard/F2VX, Jean-Louis/F9DK, Vincent/G0LMX and Alain/F5LMJ. QSL via F9DK, direct or by the bureau.

A6, UNITED ARAB EMIRATES. Witek, SP9MRO, will operate as A61/SP9MRO from Dubai, November 15-26th. His equipment will be an Icom-756 and 3-element beam for 20/15/10 meters. He also plans to be active from the local university club station A61AX. QSL via his home callsign.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, has informed OPDX that the following operation has been approved for DXCC credit:
DX0K - Spratly Islands, February 1, 2005, through April 30, 2005.

IOTA NEWS.....
AF-018. After 7 years of top results in the SSB leg of the CQWW DX SSB Contest, the Tikirriki Contest Club will participate in the CQWW DX CW Contest as IH9P from Pantelleria Island (African Italy, Zone 33, IIA TP-01) as a Milti/2 entry. QSL via KR7X. The operators will start arriving on November 20th;

expect some to be active as homecall/IH9 on SSB and the Digital Modes before the contest. Operators mentioned are: I2IFT, IK2AHB, IK2ANI, IK2CIO, IK2HKT, IK2RZP, IK7JWY, IK8ETA, IN3QGY, IV3SKB, IT9BLB, IT9VDQ, IT9WPO and IT9ZGY. Visit the IH9P Web page at: http://www.ih9p.com

KH5, PALMYRA. Kimo/KH7U and Mike/KH6ND are now active from Palmyra and will stay until Saturday, November 19th. Kimo is expected to operate on SSB and Mike will be working CW and RTTY. They will have amplifiers and will be putting up some vertical arrays for 80-10 meters. If they can get an antenna up for 160 meters, they will also be trying that band. Operating time will be limited because this is a working trip. Operators will be signing KH6ND/5 and KH7U/5. It was reported that the "shortened" suffix is "legal" since the prefix for Hawaii and Palmyra is "KH" and is acceptable. QSL KH7U/5 via AH6NF and KH6ND/5 via K2PF. Don't forget the SASE or SAE with funds for return postage.

LIGHTHOUSE ACTIVITY. Yves, HB9AOF, and some of his friends from Geneva will be active as HE1G from the Geneva Harbour Lighthouse (ARLHS SWI-001) on Leman Lake, on November 12-13th. Look for activity on the HF bands mainly on 20 and 40 meters. There may be activity on 2m and 70cm. QSL via operator's instructions.

LN8, NORWAY. Operators Lech/LA7MFA, Oystein/LA6YEA, Bjorn/LB1GB and Olaf/LB8IB will be active as LN8W in the CQ WW DX CW Contest (November 26-27th) as a Multi/Single entry. QSL via LA9VDA.

MD4, ISLE OF MAN. Operators David/G3NKC, Peter/G4MJS, Martin/G4XUM and Tim/M0BEW will be active as MD4K during the CQ WW 160 CW Contest (January 28-29th) as a Multi entry. QSL via G3NKC.

P4, ARUBA. Operators John/W6LD, Denny/KX7M, Rick/N6XI and Mike/N7MH will be active as P40L during the CQ WW DX CW Contest (November 26-27th) as a Multi/Single entry. QSL via K5WW. The team of operators will be on the air from the evening of November 22nd through the morning of November 29th. Activity outside of the contest will be on all bands, CW and SSB, but no RTTY.

QSL INFO AND NEWS.....
CURRENT NOMINEES FOR TOP 5 QSL MANAGER. John, K1XN, from the GoList has announced that nominations have begun to come in and here is the latest list (as of October 31st): DJ2MX, DL7AFS, EA4KB, EA5KB, EA7FTR, F6AJA, G3SWH, G3SXW, G3TXF, HB9BOU, IT9DAA, IT9YRE, IZ8CCW, IZ8CGS, IZ8FWN, K1BV, K8LEE, KB6NAN, KU9C, LU4DXU, M5AAV, N1WON, N2OO, N4AA, N5FTR, ON5NT, PA3GIO, RU6FZ, RZ3EC, VE3XN, W3HNK, W5UE, WA3HUP, WA4WTG, WV7Y and YB9BU.

QSL LB8IB (ex-LA8SDA) via LA9VDA.

You can view a picture of the 5R8HH QSL and pictures from the Nosy BE Island (AF-057) DXpedition by I5JHW online at: http://www.mdxc.org/5r8hh/

SILENT KEYS.....
Ray Small, G3ALI, became a "Silent Key" suddenly on October 26th.
He was RSGB IOTA Awards Checkpoint.

Gerry, VE6LB/VA6XDX, informs OPDX that Vitaly "Willy", VE6JO (aka 3C2MV) passed away on October 30th after a brief illness. All outstanding and new QSLs for VE6JO and Willy's 3C2MV operation will be answered by Gerry, VE6LB, in due course. It may take a while to get the logs organized and additional cards printed for his 3C2MV operation. Please be patient.

Robert Reed, W2CE (ex-WN2DIN and WB2DIN), became a "Silent Key" on October 30th. He was 55 years old. Robert, over the past several years, has been one of the moderators and input person on one of the major DX Mail Reflectors.

** OPDX and its readers would like to send out deepest sympathy to the families and friends of the above mentioned.

V4, ST. KITTS AND NEVIS (Also, 6Y and ZF). Kan, AB2RF (JJ2RCJ) is expected to be active this month and next month from a few Caribbean islands. Look for him to activate St. Kitts (NA-104) on November 23-24th and Nevis on November 25-26th. His callsign from both islands will be V47CJ. His activity will focus on the Digital modes(RTTY/PSK) and CW, also, on the low bands (30/40/80m if possible). QSL via AB2RF. ADDED NOTE: Kan will be on the Cayman Islands as ZF2CJ from December 28th to January 1st. Also, look for him to be active as 6Y5/AB2RF from Jamaica, January 2-4th.

V63, MICRONESIA. Operators Sasi/JA1KJW (V63JQ), Hiro/V73VE/JF1OCQ (V63VE) and Shigeo/JA1JQY (V63JY) will be active from Pohnpei Island (OC-010), November 19-24th. Activity will be on 160-10 meters CW/SSB. QSL via their home callsign, direct or via the bureau.

V73, MARSHALL ISLANDS. Operators Sasi/JA1KJW (V73KJ) and Shigeo/JA1JQY (V73JY) will be active from Majuro Island (OC-029) in the Marshall Islands group, November 17-18th. QSL via their home callsign, direct or via the bureau.

VK9C, COCOS-KEELING ISLAND (Update). Just a reminder and update that Charlie, W0YG, will be active from here between November 8-21st as VK9CG. Reports indicate that Burt, W0MY, will be joining Charlie on the island. Look for Charlie to be mostly on the lower bands, 160 and 80 meters, but he will also do some HF RTTY and CW. All QSLs go to W0YG. Please, direct only.

VK0, ANTARCTICA. Paul, VK2JLX, announced this past weekend that he will be arriving at the Antarctica Davis station Monday morning, November 7th, and he will be there during the winter. After he settles in during this week, he will be active with the callsign VK0JLX. Paul will be active on HF along with another expeditioner who has the callsign VK0AG. Paul states, "I will be at Davis over the 2006 winter and will be active until around December 2006. I look forward to working you on the bands."

VP2M, MONTSERRAT. Operators William/W3WH, David/K9UK, Kirby/N7NM, Carl/K9CS and Larry/K3VX will be active in the ARRL DX CW Contest (February

18-19th) as a Multi/Multi entry. QSL via N3ZNI. The contest callsign has yet to be determined, but it will probably be on of the personal callsign.

><more of Lardass' post edits>

Drunk on a Sunday again fake xtian? Go back to jacking off your tiny dick to the shemnales you like to post on Nimbusters and dream of sodomizing those sheep that you love to talk about having sex with fatso.

How to speak like a retarded genetic reject like Mongolloyd Davies:

"breaddead" - LLoyd hasn't got anything upstairs in the oven
"defenseive" - Lardass is "defensive" of his ignorance
"counter-offenseive" - When LARDASS LLoyds attack
"nights" - Athens ASSHOLE was referring to last "night's" masturbation session

"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity
and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't
care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to,
to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe
illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get
rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that
I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not
here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby
tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the
impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS
Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile

"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never
are though.
"I wear if with" - Davies wears his stupidity well
"You need to get al ife and a job." Mongolloyd retardo Davies needs to
get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never
had to pretend to be stupid, either!
"...what your life must me like..." - Mongolloyd's life of pizza
delivery and trashcan robots is really something
to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in
the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies
makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the
English language.
"conquor" - Lardass Lloyd has yet to "conquer" his idiocy.
"I always new that your stupidity would trip you up, Mr. Wiseman."
- I just "knew" Llardass Lloyd couldn't pose as "Christy
Davies" without fucking it up and outing himself.
"I have given it some though and decided to come back" - Mongolloyd
has never given anything any "thought." (from another "I'm
leaving" speech/lie)
"usaul" - As "usual" Lardass lloyd Davies fucks up!
"Secwet Woger " Llardass Llavender Llad Lloyd's been sucking so
many cocks he's got a lisp!
"douters" - Even though he has his "doubters", it's
"doubtful" Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a "bipolar bisexual".
"desperite" - Lardass Lloyd is so "desperate" to win at something,
anything.
"situtation" - Most people get in "situations, " but not our total
fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets "a hold" of himself on a
Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, "mysterious" survivor of a coat
hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time"
now.
"mommie's" - When Mongolloyds say "Mommy's" as in "Mommy's house."

"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.
"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!, and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self esteem," that is.
"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.

"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites by now
"red head" - Little Red is shoving his big ole black dickhead in Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets "harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide "whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck ups.

"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".
"Activatiuons" - Lardass Mongolloyd always has his stupidity
"activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a
pizza order taker seriously.
Woger" - Mongolloyd shows off his cocksucking lisp!
"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never
get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good
spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates
the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the
eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
"turd in the punch bowel." - Mongolloyd knows about bowels, not
"bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one
get "refused" by any military? Especially when he was honorably
discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a
90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking
imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is
still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off"
himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless
self." - Mongolloyd has no listeners or anything useful to say. He's so
"useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is
useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people
flush "used up toilet paper, " Mongolloyd eats used up toilet paper,
"don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart
as a rock.

"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!

"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his stupidity!!!

"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.

"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."

"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.
"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!

You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!

"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.

""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."

"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.
"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....

"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.

"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!

"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat faggot.

"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English language!
"Wait till" - Mongolloyd we will "wait until" you compose a coherent sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so "we won't" see it ever again.
"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue around a nigger's asshole!
"hig" Who knows what the Athens Asshole means?????
"teir" - Mongolloyd is Belle Plaine's "Forrest Gump," As to his retarded peers, he's "their" Camp-We-Can-Do's star pupil.
"tribes" - Mongolloyd's "tribe's" name is Retardos!
"abou" - "About" this time, Lardass the alcoholic fucks up!
"till" - "Until" Mongolloyd learns English, he'll always be ridiculed.
"din't" - Mongolloyd "didn't" ever finish high school!
"stuipd" - Lardass Davies is really "stupid," isn't he?
"are we know" - Mongolloyd has a hard time posting in English. Being more stupid, "are we now," Lardass?
"I just you like a brother" - Mongolloyd would take it up the ass from you just like he did from his brother, too.
"I've been to two Hamfest" - Mongolloyd's never been to two English classes, though!
"Wogie" - Mongolloyd shows off his cocksucker's lisp.
"his paint size" - Mongolloyd wears size 50 "pants," does he also wear "paint" because he is a walking billboard for obesity?
"HAMFEST'S" - Mongolloyd has never shown at any "hamfests"! He's too big of a coward!
"Woger" - Lardass likes to think of "Roger" when he sucks nigger dicks!
"West Vagina" - Yes, "Virginia," Mongolloyd hasn't ever seen any vagina, west or east, north or south.
"reconize" - Mongolloyd, your fuckups are easy to "recognize"
"thopught" - Mongolloyd never has any "thoughts", except to show off his lisp again!
"Who hear likes" - Mongolloyd nobody likes you, "here" or anywhere!
"Wogie" - Lardass Lloydie's lisp exposes him again!
"really beated" - Mongolloyd really "beats" off, since he can't get a

woman.
"Woger" - Mognolloyd makes like faggot.
"Curtain's" - Mongolloyd always fucks up when he hides behind his "curtains" of sockpuppets.
"cocksuckers" - Lardass always fucks up and punctuates incorrectly, must be his "cocksucker's" lisp.
"spinctor" - Mongolloyd has the "spinchter" muscle the size of a #10 washtub, since his drunk daddy, his felon older brother and his mommy's dildoe has stretched it out.
"reconized" - Lardass Davies stupidity is easily "recognized".
"porpuse" - Mongolloyd's stupidity is on "purpose"!
"worlds" - Mongolloyd is the "world's" worst speller!
"comfortbale" - Mongolloyd confessed he is "comfortable" looking at dicks all day long.
"For the recod" - For the "RECORD," Mongolloyd is retarded!
"all these yours" - "All these years" of posting, and Lardass has yet to post in English.
"I have no worked for 22 days straight" - Too bad you don't concentrate on your English for the same legnth of time, Porky!
"Roger'" - "Roger's" what's always on your little mind, Porky!
"Shittpacker" - Mongolloyd has a "shitpacker" for a father.
"revoaked" Mongolloyd your life will soon be "revoked."
"Upeset?" BWHAHAHAHAHA..Mongolloyd you get "upset" so easily, BITCH!
"knumskull" - Mongolloyd, I could fucking care less since I'm not Catholic, you fucking "Numbskull"
"BEVERY FUCKNH AWARE" - Mongolloyd should "BE VERY FUCKING AWARE" of his surroundings and who is watching him!
"orafice" - Mongolloyd has had a big greasy dick stuck in every "ORFICE" in his obese body.
"YOUR STILL" Mongolloyd, "you're still" a fucking imbecile!
"Funn" - Mongolloyd's face sure is "FUNNY" looking.
"Your whole life has past you by." - Lardass, your life has already "passed" you by the minute you were shit out of your whore mommy.
"Eldery" - If you were a bit more "ELDERY," Porky ,you would be a better speller.
"Jelous" - Nobody, I repeat nobody is "JEALOUS" of a retard like Mongolloyd Davies!

"He 4F for the Air Force" - Wrong, Mongolloyd, you are 4F for LIFE!
"plagarize" - Mongolloyd, you couldn't even "plagiarize" from "See Jack Run" correctly.
"Is like our her Steve and Lloyd" - Mongolloyd fucks up again! Mongolloyd calls himself and Holstan a "her."

"to much" - Mongolloyd tries to communicate in English but it's just "too much" for his tiny brain to handle.
"beutiful" - Mongolloyd is as "beautiful" as a WART HOG!
"Trough" - Mongolloyd can't get that everybody sees that he is fucking stupid "THROUGH" his malformed skull.
"would all upset" - Try posting in English, DUMBFUCK Davies!
"backpedd;e" - Mongolloyd "backpedals" when he gets upset and misspells

words!
"Good are you ever pathetic" - Mongolloyd, Goddamn, are YOU ever pathetic when you fuck up like that.
"Make ne" - Mongolloyd is trying to say "make me" like a little girl, but naturally, he fucks it up! HAHAHAHAHAHA!!!!!!
"I'm not into, unlike you" - Mongolloyd isn't into looking smart, either.
"Rare end" - Lardass, you "rear end" is so big, when you back up, you beep.
"hygienne" - Mongolloyd hasn't got any "hygiene" habits.
"suprise" - "SURPRISE", Mongolloyd fucks up again!
"poved" - Mongolloyd "proved" he is a fucking idiot once again!
"Momma" "marbels"- Your Crackwhore "Mama" knows you don't have all your "marbles", Porky!
"secoondly" - Mongolloyd is trying to count the times he has given blowjobs "secondly"
"atten" - Lardass you didn't "attend" school, either!
"backwerds" -Mongolloyd is always ass-"backwards!"
"Were" - "We're" sure you are a fucking moron, Mongolloyd!
"he's laugh and go on" - Lardass we laugh at your fat dumbass, and go on with our fucking lives, but you don't have a life!
"tradion" - Mongolloyd's "tradition" is to fuck up!
"Mitzah" - Porky the Jew didn't have anything to cut off at the Bar "Mitzvah!"
"mines for his baby batter" - Mongolloyd shouldn't drink , take drugs and post!
"Ralley" - Mongolloyd should try to "rally" his few remaining brain cells!
"Vagina" - Something Lardass Davies has only sees when his whore mommy shit him out.
"Your welcome" - Mongolloyd, "you're" one stupid fucking retard.
"Llouyds" - "Lloyd's" such a fucking DUMBASS, he can't even spell his own name correctly!
"stagnanat?" - Do you mean "stagnant" like what is between your fucking Dumbo ears, Mongolloyd?
"accomadations" - Do you mean "accommodations" which are quite unlike your flithy HUD apartment in the Athens, AL ghetto?
"oppurtunity" - Mongolloyd never misses an "opportunity" to be stupid.
"Stubbenville" - Mongolloyd couldn't find WV on the map much less "Stubenville, Ohio."
"copy & past" - Mongolloyd spams with his "copy & paste" of every fucking idiotic thing he sees!
"appretince" - Mongolloyd makes good spell for a quarter-wit "apprentice".
"glorius" - Mongolloyd make "glorious" FUCK UP!
"weekened" - Mongolloyd's "weekend" consists of getting drunk and whining about another man! That is, between delivering pizzas.
"Woger mkae" - "Roger make"s Mongolloyd look like a fool, time and time again!

"noddle" - Lardass your little "noodle" of a dick is like a fucking shard of thin spaghetti!
"usae" - Mongolloyd never "use"s any fucking sense or correct spelling.
"I ambored" - Mongolloyd, you are an idiot as well!

Mongolloyd make good spells!

Hey all. I just finished Ten Tec QRP monoband rig and am trying to align the xmit and rcv, so I am xmitting and rcving on same freq. The manual says to xmit over a reference signal in a second receiver until the pitch is the same. I tried that with my Kenwood TS-180S as the signal source, and wound up being 800 hz away from the Kenwood frequency, even though I zero beat both transmitters in the second receiver.

Then I tried just using the Kenwood and the Ten Tec, and was able to sync them alright, and heard both about on freq in the second receiver. But while I was doing this, I noticed that the Kenwood frequency changes (according to the display) 800 hz on transmit in CW mode, which just confused me more.

I know I'm probably being anal about it, and everyone uses his VFO on CW anyway, so +- 1kc is not a big deal. I was just hoping someone might shed some light on the subject, so my understanding could improve.

Hi Lee

I am by no means an expert in this but of course to receive a CW signal on an SSB receiver one has to set the RX frequency at some difference to the TX frequency so that you can hear a tone from the radio. With a 800Hz difference that would seem to be the heard tone frequency.

I have also heard that different radio manufacturers use dfferent setups for displaying their operating frequencies in SSB/CW mode. For SSB some will show where the carrier "would be" had there been one and others show the centre of the actual passband. (A SSB signal being about 2.4kHz wide, thus the difference being 1.2kHz)

From your remarks about the TS-180S I would surmise that Kenwood show the "carrier" frequency and thus must change between TX and RX in CW mode.

Hope you find this useful

Cheers Bob VK2YQA in W5

I learned how to cuss from my shemale friends over at the Shipwreck Lounge in Glendale. Toad should go to Bottoms Up at 2100 W Spresser Street in Taylorville and find some shemales of his own. They aren't called "Bottoms Up" for nothing, and Toad will find out why when he goes.

Who's Your Daddy, BITCH? wrote:
>Well,

Well, it seems Lardass is posting under his two dozen different names
again!

My dearest fellow underaged child lover,

I am a fan of child pornography and for the past 14 years,I have been
able to gather quite a collection of it.
I have pictures, VHS tapes, posters, audio recordings, and games based
on child pornography.

I am selling my products (or trading for other child pornography).

I have a complete color catalog of all products now available. You can
purchase pictures (both normal kodak and computer JPEG's). Also, you
can purchase posters, VHS tapes, used boys underwear, and audio
recordings.

There are many products and services. Here are some prices:

Complete Color Catalog (160 pages).....$5.00
100 Pictures Little boys age 7-12.....$9.95
120 Pictures Little boys age 13-17.....$11.95
VHS tape, little boys "Bath Time for Uncle Lloyd".....$49.95
VHS tape, little boys "Happy B-day, Uncle Lloyd".....$49.95
VHS tape, teenage boys "Naked Pizza Party!".....$49.95
Personalized Audio tape.....$2.99

If you have child pornography, preferably little boys ages 7-9, I will
trade or buy them from you. If they are action shots, of an adult with
a little boy having sex, I am willing to trade big, or pay you a lot.
Please write to me for more details. Thanks.

You can send cash, checks, or money orders made out to FUN WITH
CHILDREN.

Please send your order to:

Get your attributions straight. That post was by someone from Glendale
who calls himself Secwet Woger and who spends lots of time in the Shipreck
Lounge. He says so, and we believe him.

That's rich, from a fatass who can't even find the right ARES website,
not to mention the fucking imbecile who thinks one "operates" a
dictionary instead of reading one.

"FUCKUP Lee" <SLee@houston-hunks.com> geography idiot and imbecile
fucks up
as usual when he thinks Marshall County, Alabama
and Marshall County, West Virginia are the same place in message
<afvsc2$6aa$1@pita.alt.net>:
" Then what is at http://www.geocities.com/skywarncanwarn/ doodle
brain?
It sure looks like the Marshall County ARES, and it even has a place to
send email."

Saggytits Lee steps on his own tiny dick when he tried to correct
somebody else's English use first by saying one "operates" a dictionary
instead of reading it, then uses "things" instead of "thinks" in
<jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

Except you posted the original post, fatass, and it wasn't from
somebody from Glendale. It was YOU, a 32 year old virgin genetic
reject/inbred from Athens,AL ! BTW, shit for brains, Roger doesn't
spend ANY time at the Shipwreck Lounge, and never did. You are such a
fuck up!

<end restore>

So what's your theory? Do you think that, if you change the text of
your posts in your followups, no one is smart enough to read the
original post? I BELIEVE THAT YOU DO! It's the only possible
explanation. All that time in the Shipwreck Lounge has caused you to
addle your brain with alchohol. You should switch back to pot.

2977. Where can find Kenwood power connector pins.

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-07 18:25:50 UTC
From: tj <wd4nmq@comcast.net>
Message-ID: <t4GdndmiCZq6AfLenZ2dnUVZ_s6dnZ2d@comcast.com>
Source record: 47681

Can anyone tell me where I can find the female pins for the Kenwood HF rig's 6 pin power connector. These ARE NOT Molex brand In fact, the pin's measurements do not match any Molex pins I know of. The Molex pins are made in the sizes, .093", .084" and .062" diameters. The diameter of the Kenwood connector pins is more like .075/.076". These are reportedly made by Japan Terminal Company (JTC), not Molex.

Also beware of some suppliers selling these power connectors, but using Molex .093 female pins instead of the real ones.
Tower Electronics did this to me at the Shelby hamfest. I bought one and when I test fited the supplied female pin, before attaching the wire and inserting it into the housing, I found it had so much slop that if centered, it did not even make contact along the barrel. This started my quest on finding out actual dimensions. I made a pin extractor and removed a pin from my factory Kenwood cable and measured it to find out they were .075" ID. Actually , before I removed the pin I thought they might be the Molex MLX line .084" pins. But that was proved a wrong assumption.
So BEWARE TOWER ELECTRONICS for 6 pin power connectors.

So now I have a housing and cover, but no pins of the right size, thanks to Tower Electronics

I contacted Tower and was told to send it back and THEY would test it. But, of course that was on my nickel.

So, anybody know where I can get just female pins?

Roger doesn't live in a trailer, dumbass. Looks like Lloydie the Tool
Fellator Davies fucks up again!

TOOL FELLATOR
Vocal by Sade
Words and Music: Sade Adu and St. John and Lloyd's Owner

He whining like another girl
And smelling his own farts.
Placing stupid posts, mistake after mistake.
He's hated on seven continents.
Dalek dolls and stained underpants, high on pussy bud lite.
Heaven help him, when he falls.

He has no life, sad pizza boy.
He sucks them off with minimum waste and maximum joy.
Athens City lights and Llloyd'll suck you right.
When you require sexual desire for homosexual nights.

No place for beginners or sensitive hearts
When Lloyd blows you nothing is left to chance.
No place to be ending but somewhere to start.

No need to ask.
He's a tool fellator,
tool fellator,
tool fellator,
tool fellator.

Coast to coast, LA to Chicago, Lloyd'll suck any male.
Across the north and south, to Key Largo, Lloyd the cocksucking whale.

Face the facts, Lloyd's a mental case.
He shadow boxes and double posts,
Yet needs the asskickings.

No license to love, no girlfriend to hold.
Makes sniveling whines and is certainly owned.
His eyes are like a pig's but his stupidity is shown.

No need to ask.
He's a tool fellator,
tool fellator,
tool fellator,
tool fellator.

Coast to coast, LA to Chicago, Lloyd'll suck any male.
Across the north and south, to Key Largo, Lloyd's love for sale.

tool fellator,
tool fellator,
tool fellator,
tool fellator,
tool fellator...

You are in full denial. My good friend John is from Glendale, and he
sees Roger go into the Shipwreck all the time. It's on a dead end
street, so he knows when people come and go. He even knows about the
time you got shut off by the bartender for being a little too drunk.

Learn about the 12 steps before its too late.

>>

Your drinking cost you a marriage, Woger. It also resulted in more than a
few visits from the police and, ultimately, a court ordered therapy course.
Of COURSE you no longer drink. You can't, and it is because of the
anti-depressant medications you must take. We understand that, Wogie.
We'll say a prayer for ya'.

You have to do what is best for you but if she isn't a shemale she could put conditions on everything the way that women do. Before you got back home for lunch the next day, she may have made you sign your soul away just for a little goombah. I learnt long ago to date shemales because they are mostly guileless. Not Lurlene, though. She is telling me that she is pregnant and that she will go to Chief Norman Stenger of the Glendale Police Department if I don't marry her. But I know she is lying. culaterhulin.

You're dumber than markie and toddie put together, and that's really dumb, 2test wogie. First you say I don't have a pilots license, then you make some half-witted claim that I must be K8RI, who according to his web site, certainly has a pilots license. Guess your crack addled brain just can't keep up can it? Poor 2test.

2991. Add WARC Bands - 12M and 17M to Hustler 4-BTV, 5-BTV, or 6-BTV

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-08 04:22:27 UTC

Takes about 1 hour assembly time and costs less then $15. Takes legal limit and requires no permanent modifications to original Hustler BTV antennas. SWR on 12M and 17M < 1.2:1 This mod adds a 12M and a 17M vertical radiator on each side of the existing Hustler antenna. Minor retuning of original bands required after 12M and 17M are tuned. It's EASY!

This works a treat and is a great way to get an extra 2 bands from an existing antenna structure.

One my coworkers is interested in getting a license. I gave him a copy of the ARRL technician book and am looking around for local classes he can take. But while reading the book he can across something he doesn't understand - SSB vs AM vs FM modulation. I have to agree with him that the diagrams in the books aren't very clearly explained (though the ones in the General class book are better than the ones in the Technician book).

So here's my question: is there a Windows application or web app that will display a carrier and its sidebands, along with the modulation, in a useful way?

It doesn't have to take arbitrary audio input - a sine wave, a DTMF tone, a slowly rising tone, and a small voice sample would be enough. It should show something like an oscilloscope plus something like a spectrum waterfall.

Does such a thing exist, perhaps as a Flash application?

Here is a list of several Java Applets which are doing what you
are looking for:
http://users.pandora.be/educypedia/electronics/javamodulation.htm

Some broken links, but for all three, AM, FM and SSB there are
very nicely working applets.

Hint: The above link was the first Google hit for the search term
"modulation java applet FM AM SSB".

Oh yes it does, Lardass. You are the fuckup as usual. I got my
advanced degree in business administration, just like it says at
http://www.devry.edu/keller/programs/m_business_administration/about.jsp
and then I got an advanced fry cook job at a Glendale eating
establishment located at an elegant spot near the river.

You should get out of the house more before you make idiotic
statements like "DeVry doesn't offer Master's degrees." What a
dumbass you are, pizza boy.

K1MAN BULLETIN - B051109A -

K1MAN RESPONDS TO THE MOST TRUSTED MAN IN AMERICA, WALTER CRONKITE

9 November 2005

Walter Cronkite, KB2GSD
51 W. 52 St. Suite 1934
New York, N.Y. 10019

Walter,

I enjoyed the Neil Armstrong piece on "60 Minutes" yesterday. You were sure at the top of your game back then, for sure!

Dan Rather lectured at the University of Maine last week and suggested that journalists should get a "spine transplant." I immediately thought of you, caving in to anonymous hams and or unconfirmed false reports threatening to implicate you as well me with child molesting. Check your sources, Walter.

Perhaps you simply handled the matter wrongly. You did an ID for me when you were trying to promote your new autobiography. OK so far. You attached no limitations to my use of the ID. I used the ID on my world wide short wave program. Many of my detractors wrote to you and, of course, said I was illegal, etc., and that I was a convicted child molester, etc., which you would be associated with. Your secretary called me about the child molesting issue. You then wrote and asked me to stop using the ID. I agreed if you would come on my program and explain your reasons. You declined. I continued using the ID so as not to cave in to the blackmail as you were so willing to do. Then you call ME unethical?! Who is being unethical here?

You hypocrite! You lobby the FCC to revoke my license after John F. Kennedy threatened you and CBS with trying to influence the FCC when you insisted on running his flubbed remarks during a presidential campaign interview with you. You didn't cave in then!

Here is what you should have done with K1MAN. Ignore the idiots or else publish a disclaimer. Yes, you did the ID but no, you do not endorse AARA, or whatever; not publish a letter on the internet that Glenn Baxter is "unethical." Pretty strong word, Walter!

Believe me, if I were illegal doing what W1AW has done for almost 100 years, the FCC and U.S. Government are smart enough and powerful

enough to do something about it other than defame me with their silly and anemic notices of APPARENT liability. Let's go to court, Walter, and I will call you as my first witness! God bless America, the land of the free and home of the brave.

The FCC is a corrupt agency. Big deal. This is America, and we do have some corruption. We also have laws. I am protected by our wonderful laws.

I am devoting a very critical chapter about you in my new philosophical autobiography which is being published on the internet as I write it. See www.K1MAN.com. Your scurrilous letter about me will be all over the internet for many years. You and your employee, Brian Crow, sure do take some real cheap shots! I feel truly sorry for both of you, but I forgive you both.

God bless you and your family. You looked just great on TV last night.

73,

(signed)
Glenn Baxter, K1MAN

P.S. My book covers your many good traits as well as your very bad ones. Let the readers and history be the judge.

Paul wrote to the Philippians, New Living Translation:

1-28. "Don't be intimidated by your enemies. This will be a sign to them that they are going to be destroyed, but that you are going to be saved, even by God himself."

And, in the King James Version:

4-8. "Finally brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things."

Hi, I have a Yaesu/Vertex VX-150 & VX-6R. Was looking at the manuals the other day and noticed the different emission types. Essentially the 150 uses Phase modulation (G3E) and the 6R uses FM (F3E).

Will there be any appreciable difference in the performance of these radios because of this?

I have noticed that, using an interchangeable antenna, the 6R has a greater range than the 150, even though they're both supposedly putting out 5 watts. Could the different emission types be the cause of this?

The modulation type won't cause this as you wouldn't be able to tell
the difference in a reciever. Phase Modulation and FM Modulation with
75 uS pre-emphasis sound exactly the same. 75uSeconds is the time
constant of the RC network in the FM microphone audio circuit.

It's likely a difference in the receiver sections or antennas.

3025. Tube Bench Supply

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-10 05:37:06 UTC
From: west <westley@tampabay.rr.com>
Message-ID: <60Bcf.2013$2T3.1841@tornado.tampabay.rr.com>
Source record: 47579

I need to buy or build a bench power supply to test & design various tube equipment (audio & ham). I would like it to be something like a Heathkit HP-23 with voltage & current meters. The major problem with the supplies I've come across such as the HP-23, is that the B+ current is appx. 100ma. The bias & filament supplies are OK, but at times I need around 400ma for the B+ out. Is there such a PS available, perhaps with tube regulation & rectification or do I need to build from scratch? Any answers will be most appreciated.

Cordially,
west

Why do you hams continue to cross post this shit to rec.radio.cb? Most of us and in particular ME could give a rats ass less about K1MAN, Baxter, the FCC, the ARRL. None of this shit has anything to do with 11 meters which is all I am concerned with.

Most of these guys are arguing with one another about the law.
Remember that: the law? Nawww, being a CBer you probably don't give a
rats ass about the FCC or any other law enforcement body. Does it
tick you off that we're reminding you that rules exist, because we're
so passionate about them?

I hope so.

K1MAN is a great man because he's passionate about the real law and he
defends the little guy against the FCC toadies with his own lawyers.
The FCC bureaucrats are scared to death of K1MAN.

Now go play in the traffic, "Dr Death."

Beat It! (Lloyd Davies'Theme)
M. Jackson/?

Lloydie Davies can never get a date at night
"I'll just order up some food, I'm sure I'll be alright."
He goes under the stained sheets and he turns off all the lights
So beat it, Lloydie, just beat it.

He's got his shemale tapes, he's got a few gay porn DVDs
He's got the Daleks, he never needs real pussy!
The time is right, I'd better use the pics on the PC
So beat it, choke your dick like it owes you money!

Lloydie will Just beat it, beat it
'Till the urge has been defeated
Show them how lonely and sad is your life
Hearin' it's wrong, but feelin' so right

Just beat it (beat it.)
Just beat it (beat it)

His mom came by, she needed to get her makeup bag
She went to check on him, if just to be a nag
She opened up his door and she started to gag
Lloydie, don't beat it! Don't beat it!

A girl invited him to come see her favorite band
"I think that would be fun, why won't you be my man?"
He told her and he told her, "You just don't understand,"
"I just beat it, I make love to my hand!"

So Lloydie, beat it, just beat it
Soon your inferior genes will be depleted!
Show them how lonely and sad is your life
Regular sex to you it's wrong but jacking off is so right
Just beat it, beat it
'Till the urge has been defeated
Show them how lonely and sad is your life
Regular sex to you it's wrong but jacking off is so right.
Just beat it (beat it)
Just beat it (beat it)

(Continue to fadeout)

3036. Help with Kenwood ts-180s AGC Problem

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-11 02:26:07 UTC
From: Rockinghorse Winner <rockinghorse@anonymous.to>
Message-ID: <4374013f$0$75755$742ec2ed@news.sonic.net>
Source record: 47591

Hi, I'm having an intermittent problem with the AGC on a Kenwood TS-180S that I picked up on the Internet a week ago. The problem is this: most times the S-Meter is very insensitive to signals, and the AGC switch does not work. Also, the AF Gain control does not increase the volume very high, and you have to turn it all the way up to get any volume out of the speaker. Then, all of a sudden, the AF gain will get very loud, and the AGC switch will start to have an effect (fast/slow/off), and the S-Meter show true signal levels.

I was hoping maybe someone could offer a suggestion as to what might be occurring.

Thank you

Lee KI6AZS

I don't know but I would suspect it is simply design considerations by
the design engineers.

k1man needs to see a headshrinker, and I mean FAST !

I mean it folks.

One minute he's biting your ankles like
an enraged Chihuahua dog, the next minute
he's on his back wanting you to rub his tummy
and then wants to lick you like a puppy.

This guy is definitely got a BIPOLAR DISORDER.

For Glen's own good, I really hope he's on Prozac, Paxil, Luvox,
Valium or some other orally administered psychotropic drug.

If not I am afraid he'll show up on the 6:00 news some night as
the latest ham op who went apeshit someplace......(you know
hams...their usually crazy SOB's to begin with !!)

This is SCARY SHIT folks !!

Quoting from the above link:

"Among a fringe community of paranoids, aluminum helmets (tinfoil hats)
serve
as the protective measure of choice against invasive radio signals. We
investigate
the efficacy of three aluminum helmet designs on a sample group of four
individuals. Using a $250,000 network analyser, we find that although on
average all helmets attenuate invasive radio frequencies in either
directions (either emanating from an outside source, or emanating from
the cranium of the subject), certain frequencies are in fact greatly
amplified.
These amplified frequencies coincide with radio bands reserved for
government use according to the Federal Communication Commission (FCC).
Statistical evidence suggests the use of helmets may in fact enhance
the government's invasive abilities. We theorize that the government
may in fact have started the helmet craze for this reason..."

Jeebzus-H-Christ on a kaiser roll with cream cheeze folks !!!!
Perhaps the loons on domestic short-wave radio who have
been selling those grossly overpriced questionable gold coins, dollar
store LED keychain lights for $49.95 as "Berkie Illuminators"
and colloidal silver south pole magnetic piss-water as magic
curatives for baldness.....were right all along!

(Alex Jones must be whacking off like a chimpanzee with a bunch of
bananas in a glass cage at the Cleveland zoo right now.....)

3044. Poor AB8MQ and his Sockpuppets

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-11 09:09:25 UTC
From: Quasimodo of Devry <Malformed@Glendale.wv>

"Poor fuck up, that Business admin "degree" helps you be the assistant manager at McDonald's, does it? BWHAHAHAHAHAHAHAHAHAHAHAHA"

(typical lame-brained Woger post..)

Is Woger not a hoot? Look at his posts. Look at them and laugh.

One really DOES have to feel sorry for Woger. Really..the guy is a Sad Sack. He sits in a two bedroom shack, all alone, and pounds away on his keyboard night after night while peering from within to be sure nobody from the Web World comes to pay him a visit.

He is fifty years old and has nothing.nothing! No wife, no family, no friends, nothing!

Were it not for his adoptive mother (and inheritance) he would not even have the house he resides in.

Wogie hides behind his keyboard, hides behind anon remailers, and this coward has the audacity to make light of others??? One must laugh at this pudgy little dwarf.chubby cheeks and greasy hair and all.why not? .

Woger is short in stature. Five foot six inches in his stocking feet. He is rather chubby and thick around the middle. His fat cheeks are indication enough but his waist size of 38, 40, to 42 inches give it away. He is built rather like an upside-down water balloon.pear shaped.

Woger's blood pressure runs anywhere from 155/105to 160/110, yet he maintains the chimera that he is in the best of health. Prescription drugs for mental problems notwithstanding.

If Stagger Lee, Cmdr Buzz Corey, Ambassador Heil, N9OGL, Vince, Secwet Woger, Not Lloyd, Crazy_Roger, whinyslit woger, Not Lloyd 2, Digital, and Who's Your Daddy? along with Arf! Arf! don't stop making fun of Roger Wiseman soon..well, that leaves Roger to his own devices. And guess what? Woger will continue to be forever mentally warped and the rest of us, no matter the name, will forever be Lloyd in Rogers's small, Devry mind.

In all honesty? While I enjoy picking on Wogie, one must, by the same token, feel pity for him. Wogie is fun, but he is "not all there". Something is seriously wrong with him.

Roger ain't right in the head.

Arf! Arf!

.

It is common knowledge that governments have burried underground
transmission stations.
These beam up in the microwave range, and the hats focus (like a dish)
the radiation in the brain.

The recommended solution is to glue the hat on, and walk on your hands,
upside down.

3047. Need CES 5200 Interconnect manual

Message-ID: <keue43-7r4.ln1@p400bob.personal.cox.net>
Source record: 47603

Hi Lee

So it sounds like the AGC loop is broken somewhere. The S meter is pretty well always derived from the AGC voltage. Since you have low AF gain this also reinforces the idea.

The RF gain control is often also plugged into the AGC loop. Have a look for mechanical damage, slide/turn the pot back and forth a few times, tap the chassis with a non conductive rod, flex the PCB's etc. Sounds like a dry point to me..

Cheers Bob VK2YQA

well, you could always wear the hat on your ass, and it would block out the radiation from these "underground" sources.... but of course, this would open you to other radiation from other directions, unless you also wear one on your head. the best solution to looking "normal" here would be to line your grundies with tinfoil....

So, what are you saying? Are you implying you have access to
K1MAN's medical records? Please explain how you gained
access to Mr Baxter's medical records or how you are qualified
to make a psychiatric diagnosis? Where did you do your
residency in psychiatry?

Ii like the looks of the Deluxe Shielding Dress Shirt. I wonder how that would go at airport security? Then there's a shorts. You'd be stripped to nothing but socks and still setting off alarms!

And the hat, wow. "Many people can actually sense the differences in the levels of "mind noise" from RF radiation. Provide your brain a quiet place without interference to your mental processes from RF radiation." I'd love to do a double blind test with placebo hats and see the results!

B

Yes "doctor," of course your "diagnosis" is beyond question.
Good luck in the contest, AND your obsession with K1MAN's
personal affairs.

I don't care anything about his personal affiars, no interest at all.
My interest in K1MAN is limited to the interest I think we all should
have in the FCC trying to use and exploit someone less able to mount an
effective defense of himself to establish precedent that might be used
against the rest of us

as to his pesonal affiars, I don't care he ma be bipolar (except as
above) or for that matter if he fucks chickens (as long as he own said
chickens

I don't hate K1MAN. I don't know him personaly

Indeed I support his principled stand against the FCC. I do wish the
fight was between a man less limited in his abilty to defend
himself/make his case. I hope he prevails in this matter

You sir appear to one of those Fellows we see so often in here. If you are 178 percent something then you Hate it. I am more 74 percent supportor of K1MAN but I also yes the man has his faults. Who doesn't? I am concerned his faults may affect the outcome in ways that the FCC should be allowing

wether the Nurse that first comented on his Bipolar was attacking him or not we;; the nurse will have to answer

I am disgusted with the FCC targeting him for this sort of attack, and not moderating ait actions to accomodate his condiction

Ah yes, the being a CBer defense. That'a as old as the crust in your
underwear.
I have friends in law enforcement and I also at one time in my life worked
security in a maximum security unit.
But you are correct about my feelings about the FCC, as they are a worthless
bunch of fucks.
I'm not pissed about being reminded of rules, but K1MAN is a ham, not a
CBer. It's YOUR problem so go post YOUR problem in the proper forum.

Thank's for the suggestion, Bob. Yes, I think I'm going to bring it
down to Kenwood service, which is about an hour's drive from my house.
I really like the rig, otherwise. It has excellent audio, and the AGC
doesn't seem to be affecting how many signals I can hear, just how loud
they are in the speaker. I.e., I can compensate somewhat by turning
the AF gain way up. It doesn't sound like a real complicated fix,
probably as you say, a cold solder joint or failing PCB component.

Then kindly explain why so many Amateurs hold so much interest in
rec.radio.cb ? Theres plenty in there..some are even nice people... I
personally have no interest in K1MAN in one way or another. I also have no
real interest in the backstabbing and bitching that goes on amongst your
fellow Hams and Hams/CB'ers, I just read some of the threads and unless I
see something that aggrieves me i simply let it go... im not aggrieved now
btw. im simply trying to say you are wrong and a few Hams are interested in
things 11 meters.

The Georgia SSB net has been causing malicious intentional
QRM to K1MAN for years. You can hear them on other
frequencies, planning and coordinating how they will jam
K1MAN.

The Day I Learned Some Humility

or "Don't Ever Send QRQ To SUQ"

Uncle Sam kept me busy in my youth as a Navy radioman, sending me on many expense-paid cruises to all manner of exciting places, including several cruises to the Mediteranean Sea as part of the 6th Fleet.

After a few years at sea I fancied myself a pretty hotshot Morse operator.

Some of you out there who sailed in the 6th Fleet during the late 50's/early 60's may remember the famous "Task Group Commanders Circuit", commonly called "SIXES-ALFA". This was a high speed Morse net which routinely clipped along at 40WPM with busy spurts somewhat faster. It was a matter of some pride that only holders of an official "Speed Key Certificate" were allowed on the circuit, and only the best of those were qualified as NCS. (Yes, before you could use a Vibroplex on a Navy circuit, you had to pass an examination and obtain a certificate.)

Anyhow, as a qualified NCS on SIXES-ALFA, there was no doubt in my inflated ego that I was one of the hottest seagoing ops to ever key up a TBL. (TBL was a big black 100W MF/HF CW transmitter fitted in WW-II/Cold War era destroyers.) Certainly there was no mere civilian radioman out there to challenge my skills.

In those days the US Navy maintained a small presence in the Red Sea/Persian Gulf called the "Mid East Force". The Commander of this force was a Commodore who maintaned his flag not on a warship, but on a seaplane tender (mother ship for seaplanes, which the Navy no longer even flew) docked at the Brit base on Bahrain. It was a pretty low-key military backwater. His "force" usually consisted of a couple of destroyers on loan from the 6th Fleet in the Mediteranean. These destroyers rotated to this duty for about 2 months by by a transit of the Suez Canal.

Vessels transitted the canal in convoys, northbound and southbound, which were coordinated to meet and pass at a "wide spot in the road" at the Great Bitter Lake. If there were any warships in the convoy, they were the lead ship, and the lead ship carried a UAR canal pilot.

Communications between the pilot and the Suez Canal Authority was via an MF (420 Kc/s) Morse circuit between the lead ship and the UAR station SUQ at Ismailia.

In early October of 1961, my ship, USS Henley DD762, drew the short straw and was sent off on Red Sea patrol.

After a last liberty port at Piraeus, Greece (remember "Fix" beer) we transitted to Port Said and embarked our pilot for the trip through the canal.

The pilot had me file a departure report to SUQ and promptly at 0700 we started our transit. Periodically (at passing El Ferdan and Deversoir, if I recall correctly) he issued short progress reports which I sent to SUQ.

In due time the convoy entered Great Bitter Lake and anchored to allow passage of the north-bound convoy coming up from Port Suez. Prior to weighing anchor for the remainder of the passage, the pilot was required to obtain updated instructions from the Canal Authority. Turned out this happened just as I was due to be relieved on watch for noon chow.

Wanting to turn over a "clean" log to my relief, I was somewhat impatient that the operator at SUQ was operating at a rather leisurely pace (perhaps "only" 25WPM). Surely this lowly civilian operator could send just a bit faster?

So I slid the weights back to the reaR stop on my Vibroplex and sent...

"SUQ DE NHXW QRV QRQ K"

What happened next still causes me regret every time I contemplate that short cocky transmission. An image comes to mind of a swarthy-complexioned mustachioed Egyptian with a wicked gleam in his eye, chomping an unlit cigar, pulling the weights completely off his key, and muttering "I'll show this gob some real QRQ!"

The crisp Morse transmission which came back to me was utterly off the chart in terms of speed. No operator on the vaunted SIXES-ALFA had ever even caused me to really concentrate, but I was missing every other character this fellow sent. In embarrassment, I sheepishly unplugged my speed key, broke in, and on the pump handle sent..

"SUQ DE NHXW QRX OPERATOR CHANGE QRS"

... and turned the circuit over to my relief.

Never again, and I mean NEVER again, has the opsig QRQ ever passed my fingertips.

Yup, Mr Baxter does laugh. As the owner of several hundred
acres of prime Maine real estate, a large estate home, an
extensive well-stocked ham radio shack, owner of a
multi-million dollar trust fund, and having earned an undergraduate
and a graduate degree in engineering with honors, Mr Baxter sure
does laugh, *All The Way To The Bank* And he laughs at
you, sitting there in your 800 sq ft rented hovel, spewing hate
on the internet with your low-end computer and your dial up
connection, drinking cheap beer and waiting for your next
welfare check to arrive.

ROTFLMAO!

What freq does his group hang out on?
Perhaps they should go to 14.313 as the un-confirmed
'reports' says the recent tornado in evansville
has blown the "kooky jooish injun" off the air
for the forseeable future. Oh well, one less ham
radio nutcase to listen to on 20. Come to think of it
I ain't heard the slack-jawed moron weed-whacker
pilot from ga in a few weekends or his babbling cohort
from mn either. Are they gone too? Come to think of it
even the "great liberty net" was MIA from 75 meters
last night also. What gives? Are they all droppin like
flies in the fall season? I really missed hearing the
Ypsilanti kookenschlong last evening. Ole gnq really is
a class-1 fruitcake and a dyed-in-the-wool larouche
supporter also who's elevator don't go to the top floors.
If you never heard him pontificate you're missing some
great humor folks, nuttier than a nest of cukoo-cukoo
birds on april the 1st.

When you say Range what exactly are you talking about?
Range is a combination of transmit power, receiver sensitivity and
propagation path.

Do you know what power the radios are putting out
Did you measure there output?
Do you know the receiver Sensitivity for these particular radios?

Published specs are for comparison only, actual production radios will
differ from published specs by significant amounts.

Didn't do detailed analysis.. just realized that the VX-6 was hitting
repeaters better than the VX-150, even when using the same antenna.
Wondered if that difference was because of the different modulation types.

Why did markie morgan jerk off into a paper bag and hand it to his lover?

He was packing him a lunch.
```

3119. Ohio/Penn DX Bulletin #735

SB DX @ WW < KB8NW $OPDX.735
Ohio/Penn DX Bulletin No. 735

The Ohio/Penn DX PacketCluster
DX Bulletin No. 735
BID: $OPDX.735
November 14, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, W2YR, K3BZ, NG3K, W3UR & The Daily DX, K4HB, N4AA & QRZ DX, K8YSE, K9EL, K9NW, N0VD, W0TT, CO8TW, DD6VSF, DL1EK & The DX News Letter, DL1HCM, DL5CW, DL6KAC, EC8AUA, F5CWU & La Gazette du DX, F5NQL & UFT, G3SXW, HA0HW, I1HYW, I1JQJ/IK1ADH & 425 DX News, JI5RPT, JI6KVR & JA-IOTA Islands News, OH5DX, UR5DEM, VA3RJ & ICPO and VE3VHB for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th/November, through Sunday, 13th/November there were 218 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FW, FY, G, GD, GI, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH5, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V7, V8, VE, VK, VK9C, VK9N, VP2E, VP2M, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND. Mike, K9NW, will participate in the CQ World Wide DX CW Contest (November 26-27th) as 3DA0NW and as a Single-Op/All-Band/High-Power entry. He will be active from Swaziland between November 20-29th. QSL via K9NW.

5T, MAURITANIA (NEWS/ACTIVITY). Jean, ON8RA/5T0JL, who is a resident in Nouakchott since last January, reports that there are only three licensed hams in Mauritania. The operators are Nicolas/5T5SN (CW+SSB+EME+VHF), Bernard/5T5BN (SSB only but actually inactive), and himself 5T0JL (99% CW on all bands except 160m; not enough room for a long antenna, and planning to get on PSK soon). Jean states that he is planning an IOTA DXpedition to the Island of Banc d'Arguin (AF-050); now a World Protected Wildlife Reserve, so it's not so easy to get permission, but he still hopes to activate this one (some day). Jean's good friend Hugo, ON6ID, has left Belgium via a 4x4 mobile and has arrived in Mauritania. Hugo is currently signing as 5T0ID/M. He is expected to be active on all HF bands; however, his current activity is mainly on 20/15 meters SSB.

6W, SENEGAL. Tibor, HA7TM, will be going to Le Caola, Senegal, on December 15th. He plans to operate from 6W7RV's QTH as 6W/HA7TM for a week. There are radios and several antennas there to use, such as a 3 element mono-bander Yagis for 20/15/10m and a V80 Titanex vertical for 160/80/40m (as well for the WARC bands using a matching box). He will try to do something on RTTY too, but his main operations will be on CW and SSB. QSL via the HA QSL Bureau or to the address on QRZ.com. An online log will be available after his trip at: http://ha7tm.uw.hu/

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via NN1N.

9K, KUWAIT. Look for Kees, PA5CW, to be active as 9K2/PA5CW between now and November 30th. Activity will be on all the bands on CW. He was heard this past week on 40 meters CW. QSL via his home callsign.

9Q, DEM. REP. OF CONGO. Pierre-Luc, F5HRH, will be here between January 15-22nd. He has currently applied for a 9Q callsign and is awaiting for it. He is not sure at this time what kind of equipment he will take. More details/information will be forthcoming.

ANTARCTICA NEWS. Dr. Bhagwathi, VU3BPZ, continues to be active from the Antarctica's Maitri Base (WAP IND-03) until the end of March 2006. Activity is mainly on 20 meters SSB between 1700-1830z. His QSL Manager is VU3MKE, his boss at the IAE. VU3MKE's correct address is: Mr. Manoj Kumar Dhaka, Trupati Valley No 7, D-Lane , Kewal Vihar DEHRADUN, Uttaranchal - 24001, INDIA. The address on QRZ.com is wrong as Mr. Kumar Dhaka has moved from this QTH. VU3BPZ's QSLs are printed and donated by WAP (Worldwide Antarctic Program) and have been sent to South Africa to a pilot who was expected to fly to the Novolazarevskaya Base on November 10th. QSLs will be forward to Bhagwati.

C6, BAHAMAS. Yuri, UR5DEM, will be active as C6AUR in the CQ WW DX CW Contest (November 26-27th) as a Sinle-Op/All-Band/Low-Power entry. QSL via his home callsign. Yuri informed OPDX that he will be there/active between November 24-27th. Activity outside of the contest will be on 80-10 meters CW/SSB. He states that he will be taking a GapTitan antenna and an IC756.

CN, MOROCCO. Patrick, F6IRF, will fly here on November 23rd and plans to be active as CN2PD. Look for him to be in the CQ WW CW DX Contest (November 26-27th) as a Single-Op/Single-Band (20m) entry. QSL via EA7FTR. Visit the following Web page to see a copy of his license at: http://f6irf.blogspot.com

CO8, CUBA. Eduardo, CO8LY, will be active in the next CQ WW CW Contest (November 26-27th) as Single-Op/All-Band/Low-Power entry. His QSL Manager is EA7ADH. Also, look for Juan, CO8TW, to be in the contest as Single-Op/ Single-Band (20m)/Low-Power entry. QSL via info on QRZ.com.

EA8, CANARY ISLANDS. Mauri, OH2BYS, will be active as EA8/OH4NL during the CQ WW DX CW Contest (November 26-27th) as a Single-Band (40m)/High-Power entry. QSL via OH2BYS.

EA8, CANARY ISLANDS. Operators as Peter/EC8(???), Edu/EC8AUA, Manolo/EA8BYG, Andres/EA8AMY, Paco/EA8AAG and possibly others will be active as ED8CSC from the Saint Christobal Castle in Las Palmas de Gran Canaria City. Here are some reference numbers: Grid Locator IL28HB, DME 35.016, DCE GC003, IOTA AF004 and D.I.E. S05. The activity will mainly be on 20/15/10 meters, possibly on 12/17 meters and a little of PSK 31 and RTTY. QSL via EC8AUA, direct or via the URE Bureau. Check out the QSL on QRZ.com.

FS, SAINT MARTIN. John, K9EL, will be operating as FS/K9EL from November 30th through December 7th. This is a family vacation, so his operating activities will be balanced with beach time. John will be using an FT100 barefoot and vertical antennas for 80-10 meters. No PSK or RTTY. 160m operations are unlikely. QSL to his home callsign. Skeds are OK - see QRZ.com for E-mail address. ADDED NOTE FROM JOHN: All QSLs received to date, including bureau cards, from his last FS operation have been answered.

HI, DOMINICAN REPUBLIC. Stefan, DL5XX, will be active as HI9T during the CQ WW DX CW Contest (November 26-27th) possibly as a Single-OP/Single-Band or All-Band entry. QSL via KU9C.

HS0, THAILAND. John, W2YR, informs OPDX that he will be leaving for Thailand sometime this week. He plans on staying until sometime in late March and will be active using his Thai callsign of HS0ZDJ. John plans to be very active in the CQWW DX CW Contest in a few weeks, and he is preparing for a major effort on 160 and 80 meters. John states, "I am bringing over some low band receive antennas and hopefully, that will enhance my ability to copy some of the distant signals." All QSLs go to his home callsign of W2YR, and he will answer them when he returns home.

IOTA NEWS.....
AF-032. Members of the Provins ARS will be active as 5H1C from Zanzibar Island, January 24th to February 2nd. Their activity will be on 160-10 meters, CW, SSB and digitals (PSK, RTTY, SSTV ....). Operators mentioned are: Franck/F4AJQ (SSB), Serge/F6AML (CW/SSB), Pascal/F5JSD (CW/SSB Webmaster), John/F5VHQ/0E5TGL (SSB), Bernard/F9IE (CW/SSB), Jean Paul/F8BJI (Digit/SSB), Romain/F8BUI(Digi/SSB/CW), Gerard/F2VX (SSB) and Jean-Marc/F8IXZ (CW). QSL via Franck, F5TVG, by the Bureau or direct to:

Franck Savoldi, BP 92, 94223 Charenton Cedex, France.
More info on the DXpediton can be found on the Web page at:
http://5h1c.free.fr/index.html

EU-047. Sven, DD6VSF, will be active between December 26th and January 3rd, from Norderney Island. He is planning CW activity on 40-10 meters including the WARC bands. QSL via the bureau or direct. For further information, visit the following Web page at: http://iota.uni-humbug.de/

NA-NEW. See YN4 below.

NA-066. Operators Rich/W6VX, Jim/N6KZ, Frank/N6FH, Skip/KJ6Y, Don/N6IC, Dick/W8DX and Jay/WB9AWX to be active from Santa Catalina Island (USI CA-016S, Los Angeles County, California), December 2-5th. They will operate from "Two Harbors" on Santa Catalina Island. Activity will be on 80-10 meters, the WARC bands included, with 100 watt rigs and beams. QSL via the individual operator's home callsign.

J7, Dominica. Operators Andy/DL5CW, YL Marina/DL5DYL and Andi/DL9USA will be active as J79CW, J79DYL and J79AG, respectively, from Dominica (NA-101) between November 18th and December 5th. Andy informs OPDX that their activity will include the CQWW DX CW Contest (November 26-27th). Look for them outside of the contest on the HF Bands, CW, SSB and RTTY. QSL via operator's instructions.

JD1, OGASAWARA. Operators Toru/JI5USJ and Makoto/JI5RPT plan to operate as JD1BLX and JD1BLY from Chichijima Island (JD1-Ogasawara), between February 19-28th. Activity will be on 160-10 meters and satellite (VO-52, FO-29) CW, SSB, RTTY and PSK31. Their focus will be on the low bands and CW. QSL via their home callsigns, by the bureau or direct. More information is available at: http://www.aa.alpha-net.ne.jp/ji5rpt/jd1/

KH5, PALMYRA. Mike/KH6ND and Kimo/KH7U continue to be active on Palmyra until November 19th. Listen for KH6ND/5 on CW/RTTY (QSL via K2PF) and for KH7U/5 on SSB (QSL via AH6NF).

KH6, HAWAII. Remember to look for Seppo/OH1VR and Juhani/OH3SR to be active as KH6/AE6PP and KH6/OH3SR this week between November 15-19th. Activity will be on all bands, SSB, CW and RTTY. QSL direct only to their home callsigns.

LX7, LUXEMBOURG. Operators Marcus/DL1EKC, Jorgen/DL4SDW, Ralf/DL5SEJ, Bernd/DL8SCG and Philippe/LX2AJ will be active as LX7I in the CQ WW DX CW Contest (November 26-27th) as a Multi-2 entry. QSL via LX2AJ.

OA, PERU. Daniel/DL5YWM and Eric/W0TT will operate from the Radio Club Peruno in Lima, from November 20-28th. Callsigns will most likely be OA4/DL5YWM and OA4/W0TT. Additionally, they plan to operate all bands in the CQ World Wide DX CW Contest. QSL via their home callsigns.

OH0, ALAND ISLAND. Two Finnish operators will be active from here during the CQ WW DX CW Contest. Look for Juha, OH1JT, to be active as OH0Z as

a Single-Op/Single-Band (80m) entry. Also, look for Ari, OH5DX, to be active as OH0M as a Single-Op/Single-Band (15m) entry. QSL OH0Z via W0MM and OH0M via OH1MM.

QSL INFO AND NEWS.....
CURRENT NOMINEES FOR TOP 5 QSL MANAGER. John, K1XN, from the GoList has announced that nominations have begun to come in and here is the latest list (as of November 7th): DJ2MX, DL9ZB, DL7AFS, EA4KB, EA5KB, EA7FTR, F6AJA, G3SWH, G3SXW, G3SXX, G3TXF, HB9BOU, IT9DAA, IT9YRE, IZ8CCW, IZ8CGS, IZ8FWN, JE1LET, K1BV, K2PF, K3PD, K8LEE, KB6NAN, KU9C, LU4DXU, M5AAV, N1WON, N2OO, N4AA, N4XP, N5FTR, N6RT, ON5NT, PA3GIO, RU6FZ, RZ3EC, VE3XN, VK9NS, W2GHK, W3HNK, W5UE, WA3HUP, WA4JTG, WA4WTG, WV7Y and YB9BU.

Those who have been waiting for CW5R QSL (SA-039) to show up, you may be happy to know that the CW5R logs are now on LOTW. This should make a few people happy. Doesn't help for the IOTA chasers, of course, but maybe one day the cards will come through.

Carl, N4AA, from QRZ-DX, reports that the present KH6ND/5 on Palmyra goes to K2PF. The KH6ND/KH5 2000 operation still goes to K4TSJ. However, any KH6ND/5 received for this current operation at K4TSJ "will be forwarded without hesitation, no need to resend."

NEED A QSL MANAGER. Petr, OK1DOT, is willing to offer his services as QSL Manager. He states, "I provide all QSL printing and cards to stations I manage at no charge. Paper logs are OK. Electronic logs are preferred. Please contact me if you are interested, and we can then work out any other details." Contact Petr at: petr.gustab@seznam.cz More info is available at: http://www.qrz.com/ok1dot

CURRENT QSLS BEING REJECTED BY THE DXCC DESK (Due to "No Documentation Received"): TT8PK (April 2004), EZ4XX (October 2004), 9Q0AR (February 2005) and HZ1YB (March 2005).

TI5N QSL ROUTE. John, K1XN, from the GoList, advises: "Please be aware that the 2005 October operation at TI5N, QSL requests MUST goto N8JE and not to W3HNK. Joe is getting flooded with requests to confirm contacts for this period and HE CAN NOT, HE DOES NOT HAVE THE LOGS. Please pass this information to all your friends and reflectors to help Joe out..... Thanks".

R1MV, MALYJ VYSOTSKIJ ISLAND (MVI). Look for a multi-national team to be active from here starting November 15th and lasting through November 28th. Activity will include an entry in the CQ WW CW DX Contest. They will have equipment for 160-10 meters and 2 meters scatter. There will not be any 6 meters operations as their license does not include 50 MHz. Modes of activity will be on CW, SSB, RTTY and PSK31. PLEASE NOTE: The first week, between November 15-20th, look for activity on VHF/UHF and satellites. The team of operators will use two different callsigns there. For activity before the contest they will use R1MVW. For the first time ever the team will activate MVI during the CQWW DX CW Contest, and they will operate as

R1MVC as a Multi-Multi entry. Team members mentioned are: DL3DXX, DL5LYM, IW9BBX, LA8AJA, LA9VDA, OH5LID, OH5NE, RA1AR, RA2FW, RA6LBS, RK3FA, RN9XA, RU1AS, RV1CC, RV1AC, RV2FW/1 (team leader), RX1CQ, RX1AX, UA2FB, UA2FF, UA2FM, UA2FZ and UA9XC. QSL via DK4VW (for direct cards - maildrop) or via the UA2 QSL Bureau. Anyone donating 100 USD will be listed on the QSL card. Also, a special color QSL will be available for anyone donating 5 USD with their QSL card. A Web page and online log will be available at: http://www.r1mvi.com

R3, EUROPEAN RUSSIA. Operators Andrei/UA3DPX, Helen/RV3ACA, Alex/RL3DX, Yury/RL3FT, Vyacheslav/UA3DK and possibly others will be active as R3R in the CQ WW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL will be sent to all contacts automatically via the bureau.

SPECIAL EVENT. Member of the Metz Frescaty ARC at the French 128th Air Base (not Airborne) will be on the air as TM50OBA from November 26th to December 10th. Activity is to commemorate the 50th anniversary of the Base. Activity will be on all bands and modes HF and VHF. Each QSO will be confirmed automatically. The normal QSL route is via the French Bureau to F6KAT ARC.

SU8, EGYPT. Gab, HA3JB, will be head here and will be active as SU8BHI between November 22-29th. Activity will be on 80-10 meters CW, SSB, SSTV, PSK and RTTY. He will also take part in CQ WW DX CW Contest too. QSL via HA3JB, via the QRZ.com address or via the HA QSL Bureau.

T9, BOSNIA-HERZEGOVINA. Zrinko, VE3ZIK has plans to be active as T9/VE3ZIK in the CQ WW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (40m - subject to change) entry. QSL via DL3PS, direct or by the bureau.

TZ, MALI. The VooDoo Contest Group will take part in the CQ WW DX CW Contest as a Multi-Multi entry and they will be signing TZ5A. The group will be active with seven one-kilowatt stations and mono-band antennas. This is their 12th straight year operating from West Africa, and in their sixth different country. They will have ten operators. Before and after the contest, operators will use their own personal callsigns:
AA7A - TZ6NS K5VT - TZ6VT
G3PJT - (???) K7WP - TZ6CW
G3SXW - TZ5A KC7V - TZ6MF
G4BWP - TZ6WP KY7M - TZ6LF
G4IRN - TZ6RN N7NG - TZ6NG
QSL the contest callsign, TZ5A, via G3SXW. All other callsigns, QSL via the operator's home callsign.

V31, BELIZE. Mike, DL1HCM, will be active as V31TM between November 22-30th. His activity will include the CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. Outside the contest, Mike will operate on CW and PSK on the low bands and the WARC bands. Visit his Web site at: http://www.dl1hcm.com

VE3, CANADA. Laci, HA0HW, will be in Canada from November 13th to December 15th. He will try to operate as VE3/HA0HW and take part in the CQWW DX CW

Contest from VE3NE's QTH. Laci states, "It isn't a 'DXpedition' it is a work-trip (on the job training)." QSL via the HA QSL Bureau or direct to the QRZ.com address.

VP2M, MONTSERRAT (Update). Operators William/W3WH, David/K9UK, Kirby/N7NM, Carl/K9CS and Larry/K3VX will be active in the ARRL DX CW Contest (February 18-19th) as a Multi/Multi entry. QSL via N3ZNI. The contest callsign has yet to be determined, but each operator will have their own personal callsign. Larry informs OPDX that the five operators will "concentrate on the WARC bands during the non-contest times. And, being CW nuts, there doesn't seem to be much interest in SSB operations." He also states that the team will arrive late on February 14th and leave early on February 22nd.

VP5, TURKS AND CAICOS ISLANDS. Look for Kelly, N0VD, to be operating from here December 3-10th, with an entry in the ARRL 10m Contest as VP5D. Before and after the contest, Kelly will be signing VP5/N0VD with a concentration on the lower bands. A special effort will also be made to activate various digital modes on all bands outside of the 10m contest. QSL both VP5D and VP5/N0VD direct, via the bureau or LoTW.

VR2, HONG KONG. Operator Yoshiyasu, JH4JNG, will be active as VR2JN in the CQ WW DX CW Contest (November 26-27th) as a Single-Op entry. QSL via JN4ASA.

XE1, MEXICO. Christian, DL6KAC, informs OPDX that he finally got his licence in Mexico. Look for XE1/DL6KAC to be active until the end of February 2006. Activity (mostly on weekends) will include all bands from 80-10 meters on SSB and PSK31/RTTY. Updates and news can be found on his Web page at: http://www.dl6kac.de/blog/
Christian states that he will later add an XE1 section to the page, but right now the blog serves as a news channel. A Logsearch will be also provided later. QSL via DL6KAC (direct or by the bureau).

YN4, NICARAGUA (IOTA Op). Mike/K9AJ and Bruce/KD6WW plan to operate from the Caribbean Sea Coast North Group (NEW IOTA) from November 16-18th, using the callsign H79W/YN4. QSL via K9AJ, either direct or via the bureau.

Looks like he's got ya bottled up, Markie.

And no, "Steveo" is NOT me....But it's pretty obvious he's got
your number...As if THAT was hard to do...

Steve, K4YZ

really how so
>
> And no, "Steveo" is NOT me.
maybe he isn't but Ill not take your word on it

>...But it's pretty obvious he's got
> your number.
how so?

he going on about something I have admited to years ago.

I am completely at ease with my sexuality but there is a time and a
place for the discusion USENET povides for gruops devoted to the
subject

but how I have sex is not realted to radio

I try to stay on topic

unlike you you and Steveo

indeed I have either of you (or should i put that in the singular? who knows) post anything on topic in several days

Other things enter into the equasion: includeing how WIDE the signal
is-- Most repeaters have recieve filters that accept modulation to:
+- 4.9 KHZ (and that ONLY if you are relatively close to the input
frequency) over +- 800 HZ can accentuate clipping of your signal-
if you exceed +- 5 KHz, you will lose some audio, due to "clipping",
and it gets worse , if you are off frequency ! "tis a case of TOO MUCH
audio being WORSE than too little! Essentially, Phase modulation
is the same as Frequency modulation, and there should be little diff.
between the 2, as far as the recievers are concerned. The "Modulation
Index" is the limiting factor- Keep in mind that a Commercial FM station
(150 KHz +- deviation) , has also , many subcarriers in the signal, that
you don't hear (like background music for stores, sterio piolets, stock
market data, ect) ALL in their carrier- you can detect those with
filters at the appropriate freq, and BANDWIDTH. and, there are outfits
that sell adapters for fm recievers to decode them (but you wont hear
the normal broadcast, thru them!) Television stations do similar things
with their audio, and video! These are called SUB CARRIERS. In sum
total, IF your modulation index exceeds the bandwidth of your reciever
,the audio will be limited (or eleminated)! But that doesn't mean that
your audio isn't there, only that the reciever refuses to accept your
overmodulation-- dont try to speak LOUDER, try whispering, and see if
you get a response! Jim NN7K

NLB - Oh No You Didn't Mention "Aluminum Helmets" - AKA : Tin-Foil Hats

Off in the distance there it was . . .
all shinny and strangely out of place.

Slowly I crept-up-on-it - foot-by-foot - inch-by-inch
CREEP ! Creep. creep,
Then I could see it clearly - - -
It had been worn, deformed and discarded - alone !

I knew what I had to do - - -
So I Leaped and Wrestled with It
and finally with much screaming and yelling I had it
Firmly on My Head - At Last I was Safe - We Were
Once Again United and Free from Them - The Outside
was Out There and Now Only 'i' was with-in
- Free to Be Me : hee, Hee. HEE ! {Mad About Me :o}
[We Are We An We Be Three :<] ~ RHF

WARNING: Aluminum and Tin Foil Deflector Beanies simply will
NOT get the job done in today's High RFI and EMF Environment.
When one wears a Tin Foil Hat . . .
.
Tin Foil Hat firmly ensconced :
One tries to impress, by the Waving of Hands and Shouting
without making a single concrete point, or any point at all.
Yes it is an Art Form of Pure Hand Waving Rhetoric without
a single meaningful idea to get in the way of the Craziness.

IASF: Aluminum and Tin Foil are poor substitutes for solid Copper !
The Inverted "CK" Antenna (Patent Pending) is the Ultimate
Solution for All Your Cranial Reception and Cerebral
Interference Needs. CAUTION: When Properly Installed :o}
"Near Field Mode": "Tune-In-the-Truth"
(What Ever It May Be)
- - - A-n-D - - -
"Far Field Mode": "Tune-Out-the-Absurd"
(I Don't Know What You Call It... But I Know It - When I Hear It !)
YES- The Inverted "CK" Antenna - For that Rumble Bumble in Your Head !
One-Moment-Please:
Time to Check and Adjust my 'Inverted "CK" Antenna'
AHaaa... Now I Am Safe :o)
NOTE: With the 'Inverted "CK" Antenna' I have been able to Cut My
MEDs in Half: But they still won't let me use sharp objects yet ;-{
OBTW: A Non-Inverted "CK" Antenna when half filled with Ice

makes a great 'Chiller' for a Six-Pak of Beer ;-}
So Say I ~ RHF
The Inventor of the 'Inverted "CK" Antenna'. {Patient Pending ;-}
.
FWIW - Screaming Howard Dean head of the DNC wears
a "Tin Foil {Hat} Beanie" to Bed Every Night as part of his contract
with the DNC.
DNC = Democrats kNow Crazy
.
It Is So Simple to use the 'Inverted "CK" Antenna':
1. Go to your local Flea Market / Swap Meet.
2. Find a "Cazo de Cobre" Copper Kettle [Pot] that will cover
your Head (either partially or completely).
3. Clean it up and Polish it so that it Shines inside and out.
4. Invert the "CK" [Copper Kettle]
5. Place the "CK" on your Head. {Inverted "CK" Antenna}
never mind, - For the Voices and Noise are Gone.
Never Mind. - For the Strange Thoughts and Ideas are Gone.
NEVER MIND! - For Your Reality is with the Boundaries of the "CK" and
within the "CK" Your Mind is Your Own and... That Can Be Frightening !

I was going to say... im hetrosexual but find the thought of a woman pissing on me a bit offputting to say the least. Is it a "Gay" thing or is it just a "Sicko" thing? Also the people who go on about men taking it up the butt seem to have no problem with women taking it up the butt. So its not an anal thing as such. Strange old world isnt it.

Graham

Published on Sunday, November 13, 2005 by The New Republic
The Worst Speech of Bush's Presidency
by David Kusnet

For speechwriters drafting a presidential address for a patriotic holiday such as Independence Day, Memorial Day, or Veterans Day, there are three rules: Don't be wordy; don't be wonky; and, most important, don't be partisan. In his Veterans Day remarks today at the Tobyhanna Army Depot near Wilkes-Barre, Pennsylvania, President Bush and his staff broke all three rules, producing a strident speech that went on for almost 50 minutes, included a lengthy comparison of "Islamic radicalism" and "the ideology of communism," and concluded by attacking "some Democrats," while taking an implicit shot at "my opponent during the last election." It may have been the worst speech of his presidency.

At a time when Bush would benefit from sounding cheerful, forward looking, and above partisan politics, just as Ronald Reagan did during his second term even in the midst of the Iran-Contra scandal, Bush instead sounded like Richard Nixon or Lyndon Johnson during the worst days of the Vietnam War, although neither is remembered for flubbing a speech on a national holiday. It's as if Bush was reading from a cue-card that proclaimed, "Message: I'm embattled and embittered."

When a president speaks angrily and defensively for almost an hour, he might well be extemporizing, but that clearly was not true of this president and this speech: We know this because while the address may have seemed interminable, it was not ungrammatical, and it subjected listeners to a lecture about a bewildering array of personalities and events, including "Al Qaeda's number two man, a guy named Zawahari"; "his chief deputy in Iraq, the terrorist Zarqawi"; the Syrian democracy advocate Kamal Labwani; and "the Mehlis investigation into the assassination of Lebanon's former prime minister."

There is a time and place for such a detailed explanation of world events, but it is a formal speech at a major academic institution such as Georgetown or West Point -- not a commemorative occasion such as today, when the president should speak as the leader of the entire nation.

Moreover, Veterans Day is certainly not the venue for a president to attack the opposition party or single out a defeated opponent, as Bush did today. Towards the end of his speech, Bush declared, "While it's perfectly legitimate to criticize my decision or the conduct of the war, it is deeply irresponsible to rewrite the history of how that war began." He criticized "some Democrats and antiwar critics" for "claiming we manipulated the intelligence and misled the American people about why we went to war." Then he did something that no president in recent memory has done: He took what could be read as an implicit shot at the man he defeated, explaining, "Many of these critics supported my opponent during the last election, who explained his position to support the resolution in Congress this way." Bush then quoted Kerry's statement defending his vote to authorize the use of force in Iraq -- essentially holding Kerry up for ridicule, since Kerry is now a war critic. Do you remember Clinton criticizing Bob Dole in 1997; or Reagan criticizing Walter Mondale in 1985; or even Nixon criticizing George McGovern in 1973? Of course not -- second-term presidents tend to co-opt, not condemn, defeated opponents.

Bush's speech also adopted two of Nixon's smarmiest rhetorical techniques: attacking the nameless but nefarious "some," just as Nixon used to disagree with "some who say"; and lumping together very different people--the villainous "some Democrats," the "antiwar critics" who could be anyone from Russ Feingold to Ramsey Clark, and, finally, Kerry himself.

What's most remarkable about this speech is how Bush has bungee-jumped from the rhetorical high-road he usually takes to the lowest road any recent president has taken on a national holiday. Unlike previous presidents from both parties, Bush up until now has rarely attacked the opposition party, individual adversaries, or even ideological categories. (For instance, unlike Reagan and Nixon, he has rarely if ever criticized liberals or secularists.) So it is especially surprising that a president who generally avoided attacking his opponents in State of the Union speeches is now attacking them in a Veterans Day address; and it seems a sign that his shrewdest advisers -- Karl Rove, Karen Hughes, and Michael Gerson -- had no input into this speech.

As for the substantive points in the speech, they were either familiar or flimsy. Once again, Bush defended the Iraq war only after reporting on less controversial endeavors, such as the response to 9/11, the Afghanistan war, and efforts to destroy Al Qaeda.

Less familiar was Bush's lengthy comparison of Islamic extremism with the Communism of the Cold War era. Both, Bush said, were violent, dictatorial, and "dismissive of free peoples." But Communism was also atheist and internationalist, while Al Qaeda is neither. If current enemies have to be equated with twentieth-century totalitarianisms, why not compare Islamic extremism with fascism, which made more use of nationalist emotions and was less hostile to religion?

This was a speech that presented Bush's case implausibly and inappropriately. It's hard for a president to sound unpresidential on a patriotic holiday, but Bush achieved that dubious distinction today.

David Kusnet was chief speechwriter for former President Bill Clinton from 1992 through 1994. He is writing a book about workplace conflicts in today's America, Love the Work, Hate the Job, for John Wiley and Sons.

It doesn't much matter what you believe. Any moron that posts from webtv doesn't have a clue to begin with. So what you believe or say is inconsequential.

Notice I didn't have to stoop to your level to call you STUPID? I didn't think so.

3151. Q: Rebroadcast WWV?

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-15 04:10:44 UTC
From: stevenchristensen@gmail.com
Message-ID: <1132027844.929474.26820@f14g2000cwb.googlegroups.com>
Source record: 47455

Consider the following:
1) I have a lot of clocks which can set themselves automatically based on the WWV time signal - cf. http://tf.nist.gov/timefreq/stations/wwv.html
2) Where I live this WWV signal is very weak to non-existant.
3) I have multiple computers connected to the internet through an always-on Cable Model connection (Windows and Linux)
4) I have those computers stay synchronized with NTP time servers

The thought occured to me that I could solve my problems with my out-of-sync WWV clocks in my house if I were able somehow to rebroadcast (at low power) the WWV time signal, controlled by one of my NTP-synced computers.

Has anybody done such a thing? Do radios exist for transmitting the WWV signal?

Where can I find the specs on the format of the WWV signal? What I found initially is that it is in the 60Hz range.

My purpose is not to become some WWV station; I just want my clocks to stay synched!

Thanks - Steven

Hi Steven

The URL you gave has info on the signal itself....

http://tf.nist.gov/timefreq/stations/iform.html

I havent come accross software to do it but I'd suspect that it would be pretty wasy to write a batch/shell job that outputs a series of linked wav (sound) files) to a small transmitter. (eg using aplay under linux. Use Audactity etc to create the raw files) You would need to pre-empt the timing somewhat with (say) a 10 second offset. If you applications are very time critical the async nature of your OS could lead to small time errors.

You could also obviously write code directly to output to the soundcard.

Then amplitude modulate a very low powered TX. Make sure you dont interfere with any other users! (Not to mention the legal aspect!) Might be worth running the signal close to each RX with coax. AM TX's are pretty simple. You might even find a single chip that will do it. If you want it in discrete components, one of those chip size xtal oscillators on the right frequency (5, 10 or 15Mhz) followed by a single transistor biased AB and the soundcard output as the (decoupled) collector power supply might do it. I shd describe that a little better but it really is simple!

Cheers Bob VK2YQA

3158. Need help with Swan 350

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-15 21:32:30 UTC
From: w4sef@bellsouth.net
Message-ID: <437a53e5.1449375@newsgroups.bellsouth.net>
Source record: 47462

Hello All,
I picked up a really nice working Swan 350 at a hamfest this past weekend. I bought it for nostalgic reasons as it was the kind of rig my dad bought for me in 1965. I need info on how to fix the infamous "Swan drift problem". Anyone have any websites I can go to get mods for this rig including the drift fix?
Any help will be appreciated!

Steve W4SEF

Bob Bob <bob3bob3@cox.net> wrote:

| The URL you gave has info on the signal itself....
|
| http://tf.nist.gov/timefreq/stations/iform.html

Though of course you probably want WWVB, not WWV, and if so,
http://tf.nist.gov/timefreq/stations/wwvbtimecode.htm is better.

WWV and WWVB are different. WWV is what you pick up on your HF/SW rig
and is AM. WWVB is at 60 KHz and is what is used by most of the
`atomic clocks' out there, and is not meant for human listening.
Looks like it's CW (but not Morse Code -- instead, the encoding scheme
is described on the page I gave.)

| I havent come accross software to do it but I'd suspect that it would be
| pretty wasy to write a batch/shell job that outputs a series of linked
| wav (sound) files) to a small transmitter.

That wouldn't work for WWVB. Instead, you'd make a 60 KHz CW
transmitter that you could click on and off at appropriate times. It
would have to be very low power to avoid interfering with other people
around you who may be able to pick up the real WWVB signal.

| Then amplitude modulate a very low powered TX. Make sure you dont
| interfere with any other users! (Not to mention the legal aspect!)

I do believe that FCC regulations would permit such a transmitter as
long as the power was low enough, and the antenna was small enough.
(I guess that 2500 meter 1/2 wave resonant dipole is out.)

| AM TX's are pretty simple.

And CW TX's are even simpler :)

And the bit rate is very slow -- looks like one bit per second. You
could probably rig up something to control that via a serial or
parallel port very simply.

Could be a fun project. Not very practical, but fun :)

| > Where can I find the specs on the format of the WWV signal? What I
| > found initially is that it is in the 60Hz range.

As before, it's WWVB you want, and it's at 60 KHz. (60 Hz = your
power lines.)

Ok, that's wrong. It's pulse width modulation -- close, but not
quite.

http://tf.nist.gov/timefreq/stations/wwvb.htm tells more.

Still, would be an interesting project.

It would, but there's a few problems --

1) It would probably qualify as harmful interference and would
probably annoy the FCC, no matter how low your power. (On the other
hand, it would be next to impossible to pin it on you unless your car
had some massive antenna array on top.)

(Sidenote: with an appropriate antenna and 100 watts, you could
probably reprogram the clocks in the entire city. Though a sutiable
antenna could be very difficult to come by, since 1/4 wavelength =
1250 meters.)

2) most of those clocks only sync up a few times per day (and often
only at night), and almost all of them require several `cycles' (and
each cycle lasts a minute) to do so. So you'd have to catch them
right when they're syncing up, and they'd have to receive your signal
the entire time.)

And if the clock does continuously re-sync, then it will go back to
the correct time signal the moment it stops picking up your signal.

But yes, it could qualify as a good `hack' if done properly. :)

Many amateur radio operators have experienced "sync birdies' from TV sets that interfere with ham band reception. I presently have interference from the switching regulators in the older APC uninterruptible power supplies common to many computer installations. I want to buy one of those newfangled HDTV sets however I am concerned with interference that these high tech receivers may generate. I suspect there would be minimal interference from the LCD types but the plasma and projector types may present some problems. Anyone have any experience in this area?

Yup, this is a good example of a "data poisoning" hack. For those receivers that only sync up to a single source (and with the caveats you mention regarding when and how such receivers sync up) this is a definite hack.

For those of us who rely on upstream NTP sources for their computers, that protocol is relatively more robust. Even if some of the so-called upper strata servers use WWV (or local equivalent) to get their time, the protocol is designed to rejects times that obviously out of sync with others. So those coincidental upper strata sources would have to sync up at the same time to these radio sources for it propagate. I've seen my local NTP server reject entire subnets because it was a few seconds off. Eventually those subnets are trusted again.

Recently, wasn't there a problem with some of these signals? I recall that folks who have those fancy set-themselves watches did not have accurate time for a few weeks.

Quit lying, you fat mentally ill retard.

Behold he shall ride upon a hard dick and his name shall be Lloyd
Austin Davies.

And it came to pass that the king of knob jobs in Alabama, (as Lloyd is
known) was gone for a long time, and some of the people celebrated and
some speculated that he had died, some speculated that he was ill, some
speculated that he was in Maryland at Ray Chason's apartment, and some
even thought that the king of knob jobs in Alabama had been made a sex
slave by Ray Chason and his butt buddies. It was then the people
started to rejoice.

And when the niggers and crackheads heard the murmuring and rumours of
the people they assured them that the king of knob jobs in Alabama was
just busy sucking on one of his nigger neighbors big black dick and
would address the people as soon as he could swallow that big load if
nigger jizz. The neighbors in his hud apartment complex also knew that
the project was the sucking of nigger dicks and telling lies and more
lies, but they did not tell the people this for they did not desire to
have a vice squad nightmare in the city of Deliverance Extras. Alabama
liked to hear about the fat retarded one who proclaimed he was the king
of knob jobs in Alabama.

And the niggers and crackheads reassured the people that everything was
all right, and told them to prepare pyres and to cook meat, and to ice
down beer and nehi soda, and to go out and buy potato chips and other
unhealthy snacks from the traders who had immigrated to the kingdom
from vietnam and the land of gaza. and so the went down to these little
stores owned and bought these things. and they went home and warmed up
their tv's, for the sabbath approached and the sabbath would bring more
action from the mediocre football team at u of alabama, and the sabbath

would bring plenty of exciting nob gobbling action and goo gobbling from the king of knob jobs in Alabama.

The king of knob jobs in Alabama in reality is a ghastly pale porker who stands only 5'6" and weighs an unhealthy 290 Lbs. His skin is as white as copying paper due to his night job of delivering pizzas to the ghetto neighborhood where he dwells in a filthy, roach infested hud hovel. He doesn't venture outside during the daylight hours, instead preferring to play with star trek and dalek dolls, post lies and filth on the internet and jack off and dream of finally actually getting some pussy. Not stick pussy which his homosexual lover Steve Holsten feeds him several times a year when Lloyd goes for his visits, usually around Thanksgiving.

Lately, the king of knob jobs in Alabama has been consumed with posting pictures of someone he says is Roger Wiseman. In fact, the obviously botched purple rendering of somebody else has been cut and pasted, photoshopped and distributed all over the internet by the king of knob jobs in Alabama and his homosexual fantasy lover Ray Chason who is the king of knob jobs in Maryland. Chason who is also a porker has set up a blog of Roger's ex-wife "Regina" telling even more lies. Roger wasn't ever married to anyone named Regina. Of course Chason and Lloyd refuse to let truth get in the way of their lies, like their butt buddy friends who post lies, lies and more lies about anybody who reveals the truth about this band of homosexual predators.

3181. Geophysical Indices - "at a glance" freeware

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-17 22:28:17 UTC
From: J Tabor <denews@taborsoft.com>
Message-ID: <11nq109tonbfh8c@corp.supernews.com>
Source record: 47485

Greetings All,

You are invited to download and use the new version of GeoAlert-Extreme Wizard. The default download is known as QSL-ware. Which basically means freeware. <G>

The QSL-ware version has no time limit and automatically downloads and displays solar indices in a friendly - at a glance - manner.

www.taborsoft.com/gawiz/

Although many will be satisfied with the default version, advanced features are, of course, available when registered. Free 60-day trial also available.

Cheers,
Jim - KU5S

Message-ID: <1132267339.919600.15550@g43g2000cwa.googlegroups.com>
Source record: 47486

Can anyone provide any information on modifications that are available
for the RELM Mini-Comm MP32 , specifically the MPU32A. I am especially
interested in extending frequency range., The specs on this radio put
the frequency range for the MPU32 (A) at 403 to 430MHz and the MP32 (B)

at 450 t0 480MHz, I would like to see if I can extend the (A) range
into the (B) range. Any suggestions, especially web sites with the info

would be helpful.

3187. ESI 252/253 Impedance Meter Part Number request

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-18 17:22:14 UTC
From: Mark <mark@sarsradio.com>
Message-ID: <1132334534.211603.319130@z14g2000cwz.googlegroups.com>
Source record: 47391

Hello,

New to the group. I purchased an ESI 253 autoranging digital impedance meter at the Lawrenceville Hamfest (252 with autorange feature added). It is missing a 4-pin component U2 with a heat sink tab to the motherboard. The location of the component can be seen in a diagram on page 48 of an on-line manual located at

http://www.tegam.com/pdf_files/MANUALS/253_MAN.pdf

Anyone know the identity of this component? Could not find schematic on line and it is not available from mfgr.

Tnx

Mark in Atlanta

3188. help with choosing parts for project

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-19 00:27:03 UTC
From: Amol Desai <gtg680m@mail.gatech.edu>
Message-ID: <dllrglokr1@news-int.gatech.edu>
Source record: 47392

I'm looking to design and develop a remote controlled motor. The way i want to implement is to have a RF transmitter chip which will recieve digital inputs (pushbuttons) convert it to analog signal and the transmitter will then transmit the signal to RF receiver chip which will then convert it back to digital signal and send it to a PIC microcontroller (16f818, specs: 3V, 4MHz oscilator and 1 Mhz internal clock). The PIC microcontroller will then understand the signal and increase or decrease the speed of the motor accordingly. (Basically the concept is based on a remote control cars which kids play with).

I'm interested in knowing which kind (specs,brand etc) of RF receiver and transmitter chips can i use to work in this project. Obviously being a college student i would like to purchase cheap parts :) Any input will be higly appereciated.

I'm not going to try and jam you either...

Just record your "show" as evidence that it violates the one-way
transmission regulation.

Your above statement that you intend to "...give my views..."
removes your intended broadcast from the realm of "information
bulletin" and makes it an editorial.

Just one more step closer to getting yet another junior
broadcaster off the air.

Steve, K4YZ

You need to get K1MAN and Walter Cronkite on your show to debate each other with Geraldo Reveria as moderator. Every ham in the world would tune in to listen. And you might even get CBS to send a reporter since it has an interest in Cronkite.

An essay

by

Glenn A. Baxter, P.E., K1MAN

(Copyright 2005, all rights reserved)

DIFFERENT ORDER AND DIFFERENT RESULTS

Why do we send a kid to college and spend $30,000 (plus or minus) per year for four (plus or minus) years? Is there a difference whether we do it right after high school or after a stint in the "real world" such as the military, etc? Lots of kids come out of college (attended directly following high school) and cannot find a "good" job because they have no real and immediately marketable skills. Another kid, who learns a trade such as carpentry, on the other hand, can always find a "good" job which cannot be done "over the phone" by a competitor in India. These are tough choices and expensive ones at that.

Kids learn moral habits in their childhood, personal habits during their teens, and professional habits in their early 20s. Because of this, there will be big differences among kids who do college right after high school and those, for example, who do college after an enlisted stint in the military. You can combine both effects by doing much the same together, such as at West Point or Annapolis. Our magnificent U.S. World War II effort was run by Franklin Roosevelt (high school directly followed by college) and Dwight Eisenhower (a West Point graduate), and not by skilled carpenters or enlisted men

who later went to college. It does make a big difference on how you organize and the order of someone's education.

Another issue is grades. Many kids focus on grades at the expense of education, and others focus on education at the expense of grades. I once interviewed a kid at a top mid west university and asked him, as I the did all the other kids, what was his (or her) greatest defeat in life? He said "Well I got a B on a paper rather than an A; I thought I knew what the professor wanted, but I guess I didn't." Compare that with me. I would have said "Look at this, I got a B instead of an A; the professor is a 'moron'!"

The kids always argue that they need grades to get into professional school (they do), and I argue that you need a good education to get through a professional life. They counter with "Well if you don't get into medical school or law school or engineering school, you will never get to be that type of professional, for example, at all. Yes, this is obviously true. And the debate goes around and around.

One thing I have found about the engineering profession in particular and all professions in general: You are either an engineer or you are not. We rarely, no never, look at where that professional trait was acquired or what his or her grades were. Then, you are either a good engineer or not. You are either a good doctor or not. You are either a good dentist or not. You are either a good lawyer or not. You are either a good officer or not. You are either a good teacher or not. Etc. I guess we do distinguish whether professionals can pass the state exams, etc. to be licensed to practice. This is always a matter of getting the license or not. You already have the tools to get licensed; you simply have to use those tools and study hard enough to pass the comprehensive professional exams. For some it comes easier than for others. John Kennedy, Jr. had to take his bar exams many times before he passed.

BRIAN CROW, K3VR

One thing about college right after high school is the acquisition of disciplined professional thinking such as Franklin Roosevelt or Dwight Eisenhower had. Anything else is so easy to spot such as with (Brian Crow, K3VR*, and)
so many people I have encountered throughout life. Adolf Hitler was politically brilliant because his thinking was not professionally disciplined and thus "hindered." Look what happened to him! By the way, Alexander the Great was pretty ruthless also and killed quite a few people in his conquering escapades as well, and I do not approve of either military leader, despite the positive effects of spreading civilization and commerce as was true with Alexander or advancements in science as was motivated by Hitler. World War II had many positive effects on our world, but millions of lives, including those of our precious animals, is far too steep a price to pay for progress. Humans seem to make war and will continue to do so whether or not I approve, however!

Brian "fakes it" and fools many (fools), I imagine. He may be good at taking information in at a school like U. Mass and regurgitating it back to indifferent teachers for a grade of A. It is the lack of professional habits that kills Brian. His indifferent teachers (if his diploma is not a fake) did him a disservice. But, like the guy in the movie "Catch Me If You Can," diplomas and much else can be faked. Brian claims to have worked for NSA, and they create phony people all the time. Getting a ham license by fraud would be quite easy for an NSA type. I heard Brian calling CQ on 14.275 the other day, and he did not come back to a strong CW response. I question whether he can copy CW at all?!!! K3VR is listed an Extra class.

Let's look at Brian Crow specifically. He publishes all his stuff anonymously. He creates a "political cartoon" about K1MAN on a free anonymous web site and then says "Hey, I just 'saw' this, take a look at it yourself." He makes up phony experts like "Dr. Hasenfus" (an alleged attorney) who then states a legal "opinion" obviously not the work of a real attorney. Brian could easily find a real attorney; he does not need a phony one UNLESS he is trying to fool a few fools.

If Brian was not required to write a thesis at his alleged university for his Master's, just say so. His third grade grammar would never have gotten him a Master's if a thesis had been required. I believe the University of Maine will also confer a Master's in Education without a thesis. It is embarrassing for a "Master of Education" in this country, with the sorry state of education here, to write and publish on the internet (no proof readers) with very poor grammar. I say "embarrassing." If Brian has something to say that is important, then to heck with the grammar.

Brian is probably smart, but his undisciplined thinking prevents him from making it when up against professionals. I wonder what Riley Hollingsworth REALLY thinks about Brian Crow? Yuk, yuk yuk! I wonder what Riley Hollingsworth REALLY thinks about Glenn Baxter? Chuck O'Neal, K1KW, an engineer, can't think clearly at all about Glenn Baxter because of "Radio Rage" akin to "Road Rage." In this case, all bets (and the gloves) are off.

Brian is obviously obsessed with Glenn Baxter, and this clinically abnormal behavior (in my engineering opinion) is most likely a very severe case of "Wannabe." If Brian is happy with his pursuits, then I guess it is OK. I believe the most important thing is to be happy.

GLENN BAXTER'S EDUCATION

Now let's get to Glenn Baxter. Not a traditional education, really. In college I spent all my time studying the book and did problems for the first time during the exams. The other kids studied the theory little and worked on problems with other kids in groups. At Northwestern, my fraternity brothers (Lamda Chi Alpha) were always talking about old exams that were in the house files. I never bothered with them. Dwight Eisenhower forced the Army Department to

release old West Point entrance exams, and he and another kid worked all summer studying them. Now that IS very smart indeed! I would do that if I thought of it. No wonder General Eisenhower ended up with five stars! He was smart, and I don't mean IQ. Different kids learn different ways. I would study the book and then look at other books and "make connections" among them. This is how I preferred to learn. I would flunk all the exams and then get an A or B on the final and end up with a C in the course. I ended up with an engineering school 2.35 GPA (pre Viet Nam "grade inflation"), but I was honored upon graduation because of my First Place (Second Place nationally) and Third Place Awards for written and oral presentations of technical papers in Boston and Syracuse, and my 4th place Award at the Annual Boston University Debating Contest.

PROFESSIONAL ENGINEERING EXAMINATIONS

Six years after graduation, I studied for six solid months for my professional engineering exams and pulled all of those "connections" together. It was great fun and the best investment of six months that I have ever made. I put numbers on pieces of paper in an oatmeal box. I shook the box, picked out numbers, and that is how I selected the next problem to work on out of my book of sample professional engineering exam questions. Each morning I would say to myself "It's time to go out to the 'snake pit'!" I loved it, really! The very first problem I worked on took me two weeks to solve. At the exam, you had only 45 minutes, on average, to solve a similar problem! I got through engineering school with a six inch K. & E. slide rule and then literally breezed through the P.E. exams with a fairly new HP 35 scientific calculator and HP 80 financial calculator, each costing $400, like $4,000 each today! Now you can get the same calculating power for less than $10 each! God, what a huge difference!

I had those little red HP 35 numbers dancing around on those ten digit displays, and this was like cruising down a super highway in a brand new Rolls Royce with the radio on a classical music station.

I took the P.E. exams in Illinois, at that time the most difficult state, and passed the first time with honor grades. Many, if not most, PhDs are somehow unable (or too specialized and/or too arrogant and unwilling to do the tedious review work) to pass the state Professional Engineering Exams. PhD engineers at more research scientist and university teaching orriented while BS engineers are more applied scientists or else go into management, etc. The P.E. Exams are two full grueling days and are like taking final exams (7 years after graduation) in the 10 most difficult engineering subjects; Mathematics, Physics, Chemistry, Statics, Dynamics, Strength of Materials, Fluid Mechanics, Thermodynamics, Electricity, and Engineering Economy. This, a kid, me, who had flunked his first Novice, Technician, General (code), Extra, and First Class Commercial FCC tests.

NON TRADITIONAL EDUCATION

As I said, not a "traditional" education. I "screwed around" through my first 8 grades of school (I had a chemistry lab, photography dark room, and amateur radio station) and then needed 11 1/2 years to finish 8 years of high school and college. At today's prices of $30,000 per year, that's a difference of $105,000 in costs and (at $100,000 per year for today's typical engineering graduate) $350,000 in lost income for a total of $500,000 in today's money.

I could afford it; most kids can't. I feel that my abilities are well worth the extra $500,000, but I don't recommend this approach to kids today. I tell them to do their homework, and if you get to 8th grade without doing this you will be "screwed" as 99.999999% of them would be for sure.

HIGH SCHOOL TEACHER

I have taught high school physics, chemistry, algebra, trig, advanced math, and general science. As a substitute teacher, I have taught kindergarten through 12th grade advanced placement physics and also AP statistics. As a sub I have tagged with kids through all those grade levels and have never been in a classroom in any capacity where I didn't also learn something new and significant. Whenever I visit Vermont Academy, I always attend a few classes. I was even a chemistry lab partner on one bright Saturday mourning at V.A.. I could gleefully repeat 6th through 12th grades all over again and learn a great deal. I would not care to repeat college, however! Too much work for the gain that I would reap. Actually, I find graduate courses to be a huge drag; I prefer self study, reading, and writing now. I have a lot of this latter type of academic and research work that I want to do in life, and I am running out of time.

PRO SE LAWYER

In court, I am also not traditional. Traditional is to get in trouble like O.J., Monica, John Dean, or Martha Stewart and end up with attorney's fees in the millions. I do it all myself for free and get the same results, basically, as a team of expensive attorneys would get for me. You don't have to win each individual case in order to win the war. Some cases are for softening up the opposition so that you CAN win the war. I always win the wars. I have great flexibility in court that counters the prejudice afforded by judges to licensed attorneys. I audited ONE law course in college, and I go up and win big in the important cases against the best attorneys in the country. You have to be right, and you have to understand the United States Constitution. As with debating in college, you also need to go to the library and get good "evidence" as we called it. I was First Negative in college debating and pretty good at it. My debating partner, Second Negative (Sheila O'Malley), would then come in and clean up the mess, so to speak.

I really love "legal" movies such as "A few Good Men," "Rainmaker," the one with Paul Newman, "The Jury," I think it was called, and half a dozen others. The basics are all the same in these films with the same theme of good versus evil. I view Baxter vs. the FCC as good versus evil. Most people view this the same way with the extremely interesting twist of which one is good and which one is evil?

I became a pro se lawyer on the advice of my own attorney and out of necessity. At some early point in the Baxter Electronics litigation I hired an attorney, Clinton Townsend, and paid him a $300 up front retainer. It was my idea, and he was happy to get it. $300 was a good hunk of change back then. He said to me "This is a nice way to start!" When that $300 retainer quickly ran out he taught me how to file my own legal pleadings and briefs. Most importantly, I learned, from a licensed attorney, that I could, indeed, represent myself in all courts, which I have done, myself, ever since, all the way to the United States Supreme Court. I have often wondered what Maine judges would do to poor old Mr. Townsend if they ever found out what a monster he had thus created!

A lot of my court appearances and pleadings were just "warm up" exercises for the present challenges, here in 2005.

It all really started, however, with my cheap skate brother in law George Sternad. I was driving to Maine from Scarsdale, New York the Summer after my Freshman year at Northwestern's Technological Institute. I was in the passing lane on a two lane highway. There was a state truck in the same passing lane spraying crab grass and going 4 miles per hour. The sky was bright ahead of the truck, and I was, perhaps, day dreaming a bit. I realized the truck was almost stopped, and I slammed on the brakes, making 100 feet of skid marks. The brakes in my 1959 American Rambler faded 20 feet before the truck, and I hit it hard. I pushed the steering wheel into the metal dashboard and thus made two dents. My head slammed down on my arm, and I opened a huge gash over my eye. I was not knocked out, just bleeding a lot. I went out to "supervise" the measuring of the skid marks. Look at a current photo of me, and you can see that one eye is a bit screwed up, so to speak. It also loosened a few screws in my head, I gather, as well! I went to the hospital for a day and for observations. Actually the "Candy Stripes" seemed the most interested in observing me, it seemed! I hitched a ride back to Scarsdale. I stood in the middle of an entry ramp and literally stopped a car. The guy said "Are you legitimate?" My messed up eye got me a ride to within a block of my house on 31 Claremont Road.

My mother was putting my sister's kids to bed that evening and said "We are so happy that Uncle Glenny is home safe, aren't we? Pookie then said "Yes, but we are not happy about his eye!" I found another car and headed back to Maine. I was wearing sunglasses to hide my new "shiner." I fired up the big boat (1956 Century) to motor up to see my best friends Nancy and Paul Corman. It was getting dark, and I forgot to take the sunglasses off. I nearly ran over Lee and Marge

Frank, fishing in my travel lane up the lake. Marge let out a blood curdling shriek, and I turned away just in time. Forever after that, the Franks considered me to be totally insane! Many hams would agree!

Back to the car accident:

I was charged by the Connecticut State Police with reckless driving, a serious offence. I wanted to get an attorney, but my cheap brother in law (our estate was still in probate) advised that I didn't need a lawyer. "OK," I thought, "No big deal."

I appeared in court weeks later. The state attorney talked to me and tried to give me a line of crap as I remember it. Then some stooge sitting next to me tried to convince me that I should plead "Nolo Contendere," as he put it, abbreviated "Nolle," as he put it. "Let the court decide," as he put it. "BS," I thought. I guess the hell! I would have pleaded guilty!!

At trial the state attorney put the state truck driver on the stand and asked him the usual BS questions about the last time they checked the lights on the truck, etc. I cross examined the driver. "How fast was your truck moving?" "Four miles per hour," he replied. "What were you doing," I asked? "Spraying crab grass," he replied. "Did you put out any special lights and warning flags behind the truck AFTER the accident," I queried. "Oh yes," he replied, "We put out lights and flags for over 1,000 feet." "Why did you put out those lights and flags," I went on. "Well, to prevent another accident," he replied. I knew that I had him, the lawyer "killer instinct" coming out in me for the first time in a court of law, and I had begun this quite serious trial by "winging it" with no pre plan whatsoever. "Tell me this," I continued, "what is the difference between your four miles per hour and my 60 miles per hour compared with your zero miles per hour and other cars going 60 miles per hour that prompted you to put out all those warning lights and flags?" He sat there in baffled silence. You could hear a pin drop in the court room. I repeated the question again and again. Baffled silence. The judge finally rescued the truck driver and answered "The difference is four miles per hour. My
ruling is that Defendant Glenn Baxter is not guilty of the charge of reckless driving." "BAM" went his gavel. I talked with the judge afterwards and asked him that even though I won, would I be better off if I had never been charged in the first place? I had to press him hard for an answer. He finally said "Yes, certainly."

He was right. I later got a letter from the state truck driver's attorney saying that his client was suffering "neck pains." I was now back at Northwestern. I wrote back telling him to "stuff it," since my insurance company and theirs was the same company. I never heard from them again!

BAXTER ELECTRONICS

Then my company, Baxter Electronics (Inc.) went into receivership in 1970. Kenton Quint (owner of the Somerset Telephone Company and Chairman of the Baxter Electronics Board of Directors) had invested $60,000 in BE and, as he put it, didn't want to share a loss with Baxter Electronics. He simply wanted to take 100% control through court "muscle." He and his attorney, Frank Southard, a judge at age 25, had enormous influence. My corporate attorney, Bob Williamson, suddenly developed "laryngitis" and let me hang out to dry. I hired Bob Marden. Marden's dad, a Maine Supreme Court judge, was to be our judge. We got another judge, Judge Reed. I felt Marden was selling me out, so I fired him, post haste. He then sent me a bill for $150. His brother, Don Marden, now a Superior Court judge, sued me, personally, for the $150 dollars, and I argued that they should join the other unsecured Baxter Electronics creditors since they were all so eager to put my company in receivership and discontinue all manufacturing and marketing operations.

To side track a bit:

District Judge Pooler ruled against me in this $150 lawsuit. I appealed to Superior Court. While on appeal, I was dragged back into District Court for an asset disclosure hearing. My car was at VW for servicing, and I had a copy of "War and Peace" with me, just in case, if you get my drift. I get one phone call, right? "Hello VW? I won't be in today to pick up my car!"

I was sworn in, and the opposing attorney, Billy Dubord, (we grew up on the lake together) asked me if I was married. I pulled out a 3 X 5 card and read: "I refuse to testify on the grounds that to do so might deny my rights as guaranteed by the Fifth Amendment to the Constitution of the United States."

Judge Pooler came up out of his chair! I will never forget it. "All right Mr. Baxter, do you want to go to jail?" The Sheriff was in the courtroom drooling at me. I read from the card again and again. The judge asked if I understood the consequences of my actions. I said that I did understand the Constitution of the United States. He finally gave up and called a recess. He went to his office to read up on law, I guess.

He came back out in civilian clothing to talk to me. We chatted at length. He finally said "Mr. Baxter, I don't know what you are, but whatever it is, it STINKS. You should have been a lawyer!"

Then Donald Marden (now a Superior Court Judge) wrote the court and tried to get them to issue an execution. I turned him in to the bar association, a joke then as the Board of Overseers of the Bar is now. The case died in appeal, and the $150 was never paid, I gather. Marden then dropped out of his bid for District Attorney, a newly created $25,000 per year paid position, "for personal reasons." Joan Sandy, an old friend of mine from my teens, got that job instead.

Back to the original train of thought:

We had several hearings, and Judge Reed signed a Southard drafted ORDER of receivership. I called the judge, pissed as hell. He said he had signed the order to "pin this thing down," as he put it. The local town drunk (according to my Secretary, Maryse Price) had been appointed as the Receiver. I protested to Judge Reed. He then appointed Maine Supreme Court Chief Justice Williamson as the Receiver. Judge Williamson was the father of my original attorney, Bob Williamson, the one who dropped out because of "laryngitis." Bob really dropped out because this was going to be a "dirty deal," with Frank Southard in the mix. Bob Williamson had dated my oldest sister Betty when he was a counselor at Camp Winona, and she was a counselor at the sister Camp Wyanogonic, both in Denmark, Maine.

Anyway, Chief Justice Williamson came to see me in my radio studio building and sat in my big blue easy chair. What a sight! When he found out that Baxter Electronics had no money, he resigned. He had visions, he said, of writing a Baxter Electronics check, an "adjustment" as he worded it, and getting Kenton Quint off my back. Judge Reed (an icon on the Maine bench) then appointed Bob Viles, who was looking for employment for his son. More hearings, of course.

Let's backtrack to the first court appearance before Judge Reed. There was a trial going on. I walked into the courtroom. Then Quint's Attorney, Frank Southard, walked into the courtroom. Judge Reed spotted Southard and stopped the trial on a dime. He asked Southard if HE wanted to adjourn to chambers. Southard, clearly embarrassed, said "No, I think there will be evidence introduced." How do you spell C L O U T?

I went to SCORE to get a volunteer advisor. He told me a lot. One thing he talked about was criticizing those in authority. He said to do it like this:

"With all due respect to your high rank Admiral, your ass is blowing in the wind."

One time in a hearing in chambers with Judge Reed, the judge said: "Mr. Baxter, now you are criticizing the way I do business, and I don't like that!" I said: "Well, your honor, I certainly don't mean to criticize the way you do business, but....." and then I went up one side of him and down the other, all over again. After the hearing the Bailiff mentioned to me "Jeese, we could you shouting at the judge all the way out in the courtroom!" He was totally mortified.

Another time a court bailiff tried to kick me out of the law library at Kennebec County Courthouse in Augusta, Maine. Excuse me? He had no success.

Finally, we ran through Judge Reed, so to speak, and Supreme Court Judge Webber took over the case. Several more hearings and finally Supreme Court Judge Delahanty took over the case as the last judge in the matter.

I remember a hearing in chambers with Judge Delahanty. At one point I reached to pull out my brand new HP 35 engineering calculator (I would later use it in Chicago to pass my Professional Engineering exams) which was in a leather belt holder kept closed with Velcro. Everybody in the room bolted; they thought it was a tape recorder! I find that all Maine judges are terrified whenever I pull out a tape recorder, which I often do. They always threaten to take it from me, and I always shut it off. In a deposition, however, my trusty tape recorder rolls!

I argued that now court controlled and therefore "shut down" Baxter Electronics had abandoned the "E-DAC" trade mark that and that I could "grab it" if wanted to. The judge asked if I knew how long it took to legally abandon a trade mark. "Yes, I replied, two years."

Remember Ipana tooth paste and Bucky Beaver? "Brusha, brusha, brusha, new Ipana toothpaste, brusha, brusha, brusha, it's better for your teeeeeeeeth?" Their TV and radio ads costs millions, and then they folded. Some outfit then stuffed tubes with generic toothpaste, called it Ipana, and made a bundle.

I took the same position when I grabbed the Collins trade mark. You can actually see in QST where Rockwell airbrushed the Collins "meatball" logo off the front of S-line gear. So, for years, I owned the abandoned Collins trade mark. Rockwell bitterly complained to me long after I was through with it, and I said, "Look, let's just both move on to other things." I never heard from them again after that. They could have bought a lot of influence in court, I suspect. If I had had any further use for the Collins trade mark, I would have duked it out with Rockwell.

Also in that chambers hearing before Delahanty, Judge Reed kept sticking his head in the door and inviting us all to come down to the court house Christmas party. I gathered he was just curious about the Baxter Electronics case, long ago taken away from him. His portrait and (now Judge) Donald Marden's hang in honor in the small courtroom in the Kennebec County courthouse in Augusta, Maine. You spell C L O U T this way: C L O U T!

Anyway, with Baxter Electronics tied up in Receivership and Baxter Associates, Inc. (which owned all the office equipment), now controlled by my Baxter Associates, Inc. stock holdings (I paid myself my salary in Baxter Associates, Inc. stock), I then "fired up" as G.A. Baxter Electronics and continued the E-DAC business for years as usual. There is more than one way to skin a cat! Delahanty finally dissolved the old Baxter Electronics, and Quint bought all BE assets for the tidy sum of $2,000. He later tried to sell me the warehouse full of parts, but, "Sorry, pal, I'm not interested!" Anybody need a few million 1N4002 diodes?

Now I have a major case pending before, guess who?, Supreme Court Judge Delahanty's son, a Superior Court Judge. Judge Donald Marden has recused himself from all my cases because I sued him for altering

a sworn deposition, an alleged criminal act of perjury, of course. After considerable litigation and depositions, we both settled out of court. I let the guy off the hook. His attorney, Jerry Fournier, mentioned to me during the settlement discussions that my lawsuit against Don Marden was really draining his firm, Marden, Dubord, and Chandler. It was also wearing me down! Don Marden is now a Superior Court Judge, and a very good one, from what I hear.

At one deposition, Don Marden brought in a cold can of Tab for me, with a plastic cup over the top, during the break. I will never forget that moment. My mortal enemy serving me a soda! I thought to myself, "This is a classy guy!"

One time senior Judge Delahanty wanted to meet me under the steps of the Augusta Civic Center "to talk." I called Supreme Court Judge Webber at home to discuss this. He told me I didn't have to go and that Delananty couldn't hold me in contempt. I didn't go, and guess what? The toll call I made to Judge Webber did not appear on my telephone bill. I can't prove in court that I ever talked to Judge Webber that night, now can I?. I remember the call well. His wife answered the phone, and I asked to speak with "Judge Webber." She seemed tickled at the respectful way I had referred to him, I thought to myself at the time. Wives are funny that way, aren't they?

FEDERAL COMMUNICATIONS COMMISSION

By comparison, dealing with punks like FCC attorney Riley Hollingsworth seems like child's play, doesn't it? Riley writes his silly letters, etc., but there are no court appearances where he could be confronted in public, and there are rules of procedure, rules of evidence, etc. Hollingsworth makes up his own rules and is quite effective with intimidating 99.9999% of the general ham community. This is not my idea of an America where there is liberty and justice for all. What irritates me is that I am paying Hollingsworth's salary! It is, however, the American way, in total, corruption, politics, and all.

Let me end this essay with the wisdom of wood carver David Holmes. He carved the State of Maine logo that graces the Maine legislature Senate chamber. I was complaining to him about the FCC and why can't they make their calls with the same honesty and integrity as an umpire during the World Series? He said "Glenn, that is politics, this is baseball." We were watching the World Series at the time. I repeated my plea, time after time. He repeated his response, time after time, "Glenn, that is politics, this is baseball." "Oh, I get it. The FCC is politics, THIS is baseball." I am pretty darn smart, wouldn't you say?

* We really don't know very much about Brian Crow, K3VR. Drop his name or his alleged company (Stockbridge Consulting - no letterhead) into in a search engine, and nothing comes up. Brian (or who we know as Brian) says he was with NSA, and they create fictitious people all

the time. Identity theft is also quite common these days. Perhaps he is in the witness protection program or his name was taken off of a tombstone and he is not Brian Crow at all. Would the REAL Brian Crow, K3VR, please stand up? Has anyone ever seen Brian personally? Has anyone ever snapped a picture of Brian? Has he ever attended a hamfest? Does he have a phone number? K3VR@hotmail.com is not exactly traceable, now is it? Has anybody stopped at his FCC listed address to see what is there? He dropped his own web site years ago (it showed more than a passing interest in little boys), and now he creates many free anonymous pages, all about K1MAN. He seems to create dozens of anonymous E-Mail addresses as well and sends me stuff all the time (I assume it is Brian).

He E-Mails me several times daily from K3VR@hotmail.com and then turns me in as SPAM when I reply! What's with that?

Drop K3VR in a search engine and all that comes up is K1MAN stuff!

On the air, Brian appears to lack the ability to copy CW although listed in the FCC data base as an Extra. NSA types would have no problem getting a ham license by fraud. Brian appears to know little or nothing about electronice or amateur radio theory. On QRZ he has a photo of a big Eimac tube, yet he has bever built an amplifier. What's that all about?

He creates phony "experts" like "Dr. Hasenfus" (an attorney who also does not come up when dropped into a search engine) when a real expert would do just as well, and he even authored a printed nasty letter about K1MAN to the editor in local Maine newspapers by pretending to be from Manchester, Maine. He has filed complaints about K1MAN to the Maine and Illinois professional engineering boards, the Maine Attorney General, Maine State Senators and Representatives, the FCC, Vermont Academy, the SEC, the FTC, etc., etc. ad infinitum. He has a copy of my University of Rhode Island engineering school transcript. How did he come by that?

He sometimes writes with third grade grammar and yet claims to have a Master's in Education from the University of Massachusetts. He is K1MAN's number one detractor, and I am flattered by all the attention. The FBI says that such extensive activity is usually paid for by some organization with lots of money and an axe to grind. Who would pay Brian to stalk K1MAN? ARRL? The FCC? The CIA? NSA? The telecommunications industry wanting to grab amateur radio? Walter Cronkite? Who? Perhaps the FBI is wrong. Perhaps Brian Crow, K3VR, is just a super sick "wannabe" with a legitimate Master's of Education degree from the University of Massachusetts who obtained his ham ticket by fraud (quite easy really). I forgive you Brian. 73 and GL de K1MAN.

So true, I downloaded a copy of The ARRL Bulltin and what do you know
"visit our website at www.arrl.org.." and the ARRL IS avertising on
their website, they ARE making money. So the rule should apply to them
as well, but I've not once seen them get a NAL.

I'm glad I'm not a ham or CB, er, CBer(?), so I don't have to read this
crap.

I wonder if a ham or CB(er) "MUST" send in the $45 "NOW"?

Greg

You need to get K1MAN and Walter Cronkite on your show to debate each
other with Geraldo Reveria as moderator. Every ham in the world would
tune in to listen. And you might even get CBS to send a reporter since
it has an interest in Cronkite.
.

Yeah! Perhaps they could send Dan Rather to report. Only problem with Rather
is that he cannot separate facts from lies.
He'd be right at home with Baxter.

3204. WANTED! Motorola MIB Schematic

What is the TIME and FREQUENCY for the above show?
I ain't heard a good 'radio war fun' since the heydays of
the 14.313 net wars. Ham radio needs another 'master clown
frequency' where one can tune in and have a good laugh.
This keyclown crap is boring, it's much better listening in
to the screwbally live on the air where one can have a good
belly laugh at them and poke-em-with-a-stick on occasion
thrh the monkeybars.............

Hello David

Sry om, but most radio magzines do not sell
QST's from 60's, 70's, 80's ect are common as dirt
have more than once
tryed to sell amateur radio magzines on e bay
to have, not one single bid

yours truly de Mac

Herb and his band of sociopaths *were* very entertaining.
Only big problem was when some of Herb's sociopaths took
things to real life. Herb was well aware he was recruiting
dangerous people into his BARF organization. He regarded
them as "useful idiots," who did his dirty work for him.

Rabbi Phil

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1AC, K1FK, K1XN & GoList, N1RR, NG3K, W3AWU, W3UR & The Daily DX, N4AA & QRZ DX, W4VQ, K8ND, K8MM, K8YSE, 9A6AA, DL1EK & The DX News Letter, F5NQL & UFT, F6AJA & Les Nouvelles DX, F8DVD, I1JQJ/IK1ADH & 425 DX News, JE8KKX, JI6KVR & JA-IOTA Islands News, JT1CD, LA5YJ, OH2BH, OH2BN, OK1DOT, ON7ZZ, PY7RP, UA9CDC and VA3RJ & ICPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th/November, through Sunday, 20th/November there were 216 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J7, JA, JD/o, JT, JW, JY, K, KH0, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1MV, S0, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V5, V6, V7, V8, VE, VK, VK9C, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7,ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS (Update). Operators Richard/OM2TW, Rudi/OM3PC, Joe/OM5AW and Bebo/OM5RW will be active from November 18-28th, as 3B8/homecall. They will be active on CW/SSB/RTTY/PSK and SSTV with two separate stations on 160-10 meters (especially on 160/80 meters). They will also be active as 3B8/OM3PC in the CQ WW DX CW Contest (November 26-27th) as a Multi-2 entry.

QSL via their home callsigns. More information and their on-line logs will be available at: http://www.vhf.sk/3b8

3Y0X DXPEDITION UPDATE. On November 13th, the Peter I DXpedition's team co-leaders Ralph/K&#65533;IR and Bob/K4UEE posted a new press release (#2006-4) on the DXpedition's Web page. The OPDX InterNet Subscribers will receive the complete release as an additional bulletin. Excerpts from the press release indicate that much has been accomplished toward their goal of activating Peter I Island early next year. Since the team meeting in September, the DXpedition team is now up to twenty men with the possibility of adding two more operators and as many as four "other" travelers who may want to go along for the trip. They also mentioned that a 40 foot shipping container (containing exactly 11 tons of equipment, and personal gear) has been packed and is now on its way to Chile. For the first time they can give approximate dates of their operation. They hope to arrive at Peter I around February 6th to begin their 16 day stay. Please remember that these dates are approximate and depend on many variables including, of course, the weather and sea ice conditions. They are projecting to be on the air for 12-14 days. The team has developed a quick strike plan that will enable two stations on the air quickly even if they have weather conditions that prevent the entire camp from being constructed immediately. Ultimately, they plan to have nine stations on the air and a complement of 23 antennas. This doesn't include the recent decision to make a real effort on 6m, 2m and 70cm EME. QSL via N2OO. This may be the most expensive DXpedition ever. They solicit your support! Please check out the Peter I Web site, and catch up on the news. There are many pictures of their recent training session in Atlanta and of the container packing and shipping. Also, if you want to be a part of the adventure by contributing financially, click on one of the yellow "Contribute" buttons. Visit the Peter I Web page at: http://www.peterone.com

4U60, UNITED NATIONS HQ. By the time you read this the United Nations HQ station might be on the air using the callsign 4U60UN to celebrate the 60th anniversary of the United Nations. QSL via HB9BOU. Length of activity is not known. Some sources are stating 24 hours (maybe longer).

4W, TIMOR-LESTE. Jon Rudy, DU9/N0NM, will operate as 4W3ZZ from November 24-28th on CW only. He will also operate during the CQ WW CW Contest (November 26-27th). The emphasis of the operation will be on 160 and 80 meters. He has access to a 150 foot tower and intends to use a 160 meter sloper and a full sized loop on 80 meters. Jon is a full time church worker and could use a little help in pulling this off. John, W4DR, will collect small donations for him and forward them through his church agency. Many of you have worked him on the low bands from 3DA0CA, C91CO and currently from DU9. QSLs direct only via W4DR. His license has already been approved for DXCC credit.

6Y, JAMAICA. Kari, OH3RB, will be active as OH3RB/6Y5 during the CQ WW DX CW Contest (November 26-27th) as Single-Op/All-Band entry. QSL via OH3RB direct.

6Y, JAMAICA. Kenny, K2KW, will be active from here between November 26th and December 5th. His activity will include the ARRL 160M CW Contest (December 2-4th) as 6Y0A as a Multi-Single entry. He reports that he will be running a 2 element vertical array with 76' elements with top loading and a large radial field... this will be the biggest 160 array he has installed to date. He will be running 1200w.

7X, ALGERIA. Operators Frantisek/7X0RY, Vladimir/OK1CW, Zdenek/OK1FIA, Karel/OK1TA and Slavek/OK1TN will be active as 7X0RY during the CQ WW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL via OK1DYW. More QSL info at: http://www.ok1df.nagano.cz/7x0ry/

8Q, MALDIVES. Operators Vadim/UA9CLB, Igor/UA9CDC, Vladimir/UN9LW and Igor/RA9CMO will be active as 8Q7DV during the CQ WW DX CW Contest (November 26-27th) as a Multi-? entry. QSL via UA9CLB. Igor, UA9CDC, informs OPDX that they will be on Sun Island for 10 days starting November 23rd. Apart from the contest, they will operate after the contest on all the bands with some emphasis on 80 and 160 meters CW. Less attention will be given to WARC bands and DIGITAL modes. Igor states, "We mainly go there for the contest. The rest of the operation will be just for pleasure in between the water sports and other beach activities."

9A, CROATIA. Croatian members of Mediterranean DX Club (MDXC) will use a special callsign 9A0MDC during MDXC Trophy (February 3-5th). QSL Manager will be Corrado, IT9DAA. He will send all cards via bureau after he receives the log from 9A6AA (leader of 9A0MDC). Direct requests can be sent to IT9DAA.

A52, BHUTAN. Members of the Clipperton DX Club are now active as A52CDX until December 3rd. QSL via F9DK. The operation's Web page is available at: http://www.f5lmj.net/Bhoutan2005/a5-05en.htm

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R in the CQ WW DX CW Contest (November 26-27th) as a Multi-Op/Single-TX entry. The operators mentioned are: Aki/JI3ERV/NH2C (Leader), Toshi/JR7OMD/WI3O, Sam/JR8VSE/N2HN and Nozomu/JE8KKX/AH2K. Their Sunrise/Sunset is: 2026/0750z. QSL to JH7QXJ via the JA Bureau or direct (see QRZ.com).

CT9, MADEIRA ISLANDS. Jussi-Pekka, OH6RX, will be here between November 24-28th. He will be active as CT9A during the CQ WW DX CW Contest (November 26-27th) as Single-Op/All-Band/Low-Power entry. QSL via OH6RX.

CU2, AZORES (CU2A PRESS RELEASE, November 15, 2005): "A one-year building effort is completed and CU2A will hit the airwaves from this new - still tentative - site in the CQWW CW Contest, all-band, high-power category piloted by OH2UA, Toni. The brand new multi-directional site will be on for the first time from the westernmost point of Europe. Signing CU2/OH2UA from November 21, Toni will appreciate observation reports through the new website www.cu2a.com. The site also features a log search as well as some pictures and audio files from the CQWW SSB operation. QSL CU2A via OH2BH."

CX, URUGUAY. Operators Pedro/CX5BW, Frederick/K9VV and Calvin/K6CT(CX7TT) will be active as CX5BW during the CQ WW DX CW Contest (November 26-27th) as a Multi-2 entry. Listen for QSL instructions.

D4, CAPE VERDE. Stefano, IK2JUB, will be active as D44TD during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (20 or 15m) entry. QSL via CT1EKF.

FP, ST. PIERRE AND MIQUELON (Update). Ian, K8MM, will be active as FP/K8MM from now until November 30th. Grids GN16 on St. Pierre and GN17 on Miquelon will be activated. Operations are planned on FO-29, VO-52, AO-07, AO-51 and SO-50. Ian states that he will be using CW and SSB, depending on how well he hears the analog birds. The group he is going with (See OPDX.726 and OPDX.731) will also be on 160-6 meters and CW, RTTY, PSK31 and maybe SSB. They will also be active for the CQWW CW Contest (as FP/K8DD). QSL with a SASE direct for any FP/K8MM contacts via CBA.

FT5X, KERGUELEN ISLAND. Gildas, TU5KG, is currently on board a fishing boat in the Austral Sea near Kerguelen. He has the callsign FT5XP and hopes to be active from Kerguelen when he stops at Port au Francais. He is expected to be there until December and back again for a 3 months period in January. He is using a IC-706 and MA5V antenna.

FT5Y, ANTARCTICA. Jean-Paul, F5BU (ex-FT5WJ on Crozet Island), will be going to Adelie Land in a few weeks. He will stay at the French Antarctic Dumont d'Urville station from mid-December to the end of February 2006. He hopes to be active during his free time on 20 meters SSB and has actually asked for the callsign (like) FT5Y**. The QSL will be printed a few weeks after his return and will be via his home callsign F5BU. This French Antarctic station has been off the air for a long time.

GJ2/MJ0, JERSEY. Richard, K2WR, will be active as GJ2A during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via K2WR (Also, from non-USA to GJ3DVC). Look for Richard outside the contest as MJ0AWR. QSL via to K2WR.

HS0, THAILAND. Tony, G4UZN, will be in Bangkok as HS0ZGH from November 23rd to December 7th. He is expected to participate in the CQWW DX CW Contest.

IOTA NEWS.....
AF-019. Look for Fabio, IT9GSF, to be active as IG9A from Lampedusa Island in the CQ WW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (160m) entry. QSL via IT9GSF/KB1LNF.
NOTES FROM FABIO: "I will try to reach the island as the sea is going to be strong and the ship doesn't go to Pantelleria and Lampedusa...but maybe with some luck you will listen to the signal from IG9A again this year. THIS CANCELS PREVIOUS ANNOUNCEMENT OF IT9GSF SO2R FROM SICILY."

AS-076. Operators JA5BEX and JN4MBO will be active from Naoshima Island (JIIA AS-076-New) in the JA5 Shikoku Islands Group, December 3-5th. They will sign homecall/5. QSL to their home callsigns, direct or by the bureau.

NA-048. Al, W3AWU, is thinking of undertaking a 4 to 5 day DXpedition to the rare Bimini Island in the Bahamas Island Group to commence a couple of days before the IOTA Contest and then participate

in it which will be scheduled for end of July, early August 2006. He states that this will be a modest operation with maximum of two stations and perhaps 3-4 operators running SSB and CW with wire antennas or verticals. Al is looking for input, comments and operators. He can be reached at: italiancookbook1@juno.com

SA-023. Operator Cris, PY7GK, will be active from Itaparica Island as ZY6GK between December 27-60th. He hopes to be active on 40/20/15/10 meters on both CW and SSB. QSL is OK via the bureau or direct via QRZ.com.

IS0, SARDINIA. Mauro, IN3QBR, will be active as IS0/K7QB (or possibly as IS0U) during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/ Single-Band (160m) entry. QSL via IN3QBR.

IS0, SARDINIA. Martin, OL5Y, will be active as IS0/OL5Y (or possibly as IS0N) during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/ Single-Band (80m) entry. QSL via Ok1MG.

KP3, PUERTO RICO. Felipe, NP4Z, will be active as KP3Z during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band (160-10m) entry. QSL via WC4E.

OA, PERU (Update). Daniel/DL5YWM and Eric/W0TT will operate from the Radio Club Peruno in Lima (OA4O), from November 15-29th. Callsigns will be most likely be OA4/DL5YWM and OA4/W0TT. Additionally, they plan to operate all bands in the CQ World Wide DX CW Contest as OA4O. QSL OA4O via OA4O. QSL activity outside the contest via their home callsigns.

OJ0, MARKET REEF. A Press Release (November 17, 2005): "ATTEMPT TO ACTIVATE MARKET REEF ON LOW BANDS: The Finnish quartet of OH0RJ, OH2BH, OH2BO and OH2PM will attempt a boat landing onto this barren rock from November 22-24, 2005, in their effort to put OJ0B and OJ0J on the low bands, both CW and SSB, for one week, including the CQ World Wide DX Contest. If landing is not successful by Thursday, the 24th, the operation will not take place this season. The last winter season low-band activity from Market Reef was in 1988. One of the team members in that year, John, W2GD was injured and had to be airlifted out of the rock by rescue helicopter. With tightened aviation regulations, it is now impossible to carry petrol or any sizable objects, such as antenna masts, alongside the helicopter body; hence small boat landing remains the only potential choice. The ground temperature is below freezing and the sea is ice-cold and about to freeze, with high winds at this time of the year. As of November 17, first snow of about 4 inches fell on the Aland Archipelago. You can monitor the Market Reef weather at: http://www.kolumbus.fi/oh2bn/pagemarket.htm
With no jetty or other potential landing point, the group is forced to use a zodiac and land at whatever corner of the reef they find calmer, and send their boat back to Aland Islands immediately after a successful landing. They will be taken back by helicopter, weather permitting, after the contest, November 28. The high cost of the overall transport is partly offset by the Northern California DX Foundation (NCDXF). Please note that at the very best, the challenge will also be at your end of the circuit.

Market Reef along with Finland is located at 60 degrees North inside the aurora oval. According to the statistics, the area is usually suffering the aurora for an average of 100 days a year. This time the geomagnetic conditions are expected to be favorable for LF since the operation is scheduled to take place between the impacts of recurrent coronal holes 194 and 195 (STAR tags). Operating frequencies are harmonized with the R1MVW group and are as follows:
CW: 1812.5 and 1834.5, 3512 and 3544, 7012 and 7034, 10112, 14034, 18082, 21034, 24894 and 28034 kHz
SSB: 1855, 3798, 7080, 14190, 18140, 21290, 24940, 28490 kHz

QSL routing: OJ0B via OH2BH and OJ0J via OH0RJ."
ADDED NOTE (OH0, ALAND ISLAND): During this past weekend Martti/OH2BH and Ville/OH2MM were on Aland Island (OH0) making preparations for the Market Reef outing and the CQWW CW Contest. Both were active from here. OH0B was heard on 30/20 meters, while OH0MM was heard on 80 meters. Look for Ville to activate OH0MM in the CQWW DX CW Contest as an All-Band category. QSL OH0B via OH2BH and OH0MM via OH2MM.

PJ2, NETHERLANDS ANTILLES. The Caribbean Contesting Consortium (CCC) will operate as PJ2T from the Signal Point station on Curacao, with operators Jeff/K8ND, Dan/N1ZZ, Mark/N5OT, Steve/N8BJQ, Leo/S50R, Scott/W4PA, Jim/W8WTS, Noel/W9EFL, Jim/W0NB and Kyle/WA4PGM. QSL PJ2T via N9AG. Before and after the contest (November 17-29th), operators will use "PJ2/homecall" for callsigns, with all QSLs via their home address. The CCC just observed their fifth anniversary of the purchase of the former PJ9JT contest site, and sometime during the upcoming CQWW CW Contest, the 200,000th QSO using the PJ2T callsign will occur! In celebration of this landmark, they have arranged for propagation to be better than expected on all bands, and especially so on the lowbands (160/80/40m). Everyone is invited to make use of this gift!

QSL INFO AND NEWS.....
JW5YJ QSLS DELAYED. Hugo, LA5YJ, informs OPDX that anyone who worked him as JW5YJ and sent their cards to Norway will have to wait a little for their QSLs. Hugo had to leave on very short notice to Pakistan to help out with the emergency communication. He has been there since about November 2nd. Hugo states that he is really sorry but there is nothing he can do until he gets back. This also counts for the bureau cards for 9N7YJ and XU7ACW. He thanks you for your patience.

QSL ZS6CCY via OK1DOT, by the bureau or direct to: Petr Gustab, P.O. Box 52, CESKY BROD, 282 01 Czech Republic. QSL cards received by the bureau are answered via bureau. Cards received directly with SAE and 1 USD/IRC will be answered directly (do not send old IRCs please).

Jean-Michel, F6AJA, Editor of the LNDX, reports that his log from his recent activity from Bucarest as YO/F6AJA is online at: http://LesNouvellesDX.free.fr

R1MV, MALYJ VYSOTSKIJ ISLAND (MVI). The multi-national team is now active through November 28th. Activity will include an entry in the CQ WW CW DX

Contest as R1MVC. For any activity before and after the contest, they will sign R1MVW. A better URL Web address for this activity has been pointed out to OPDX. Please visit: http://www.r1mvw.com/eng/info.php
QSL via DK4VW (for direct cards - maildrop) or via the UA2 QSL Bureau. Anyone donating 100 USD will be listed on the QSL card. Also, a special color QSL will be available for anyone donating 5 USD with their QSL card.

SILENT KEYS.....
It was reported that Jean Liesse, ON4LE, became a "Silent Key" (SK) on November 10th.

It was reported that Baatar, JT1BG, became a "Silent Key" (SK) on November 14th. Baatar was the first to receive 5BDXCC, 5BWAZ and DXCC Honor Roll in Mongolia.

OPDX and its readers would like to send out our deepest sympathy to the above "SK's" family and friends.

SPECIAL EVENT (French Telethon). For years in France, and now in some other European countries (like Switzerland, Luxembourg, ...), the first weekend of December is the date choosen to hold a special major Telethon. This Telethon is a big event sponsored by the major French and other European Public or Private Companies, joint to the TV Net France2, to collect funds for the research against the genetic dieases. This year, as usually, a lot of special ham events stations are scheduled to be on the air. Please look for the following:
TM4THO - (North France) Activity by the Informatique, Communication Electronique ARS members, from December 1-15th, on HF and VHF, and CW/SSB/DIGIT. QSL and Award (5 Euros) available from David, F4EPU. Main activity on December 2-3rd from the City of Jeumont. Web page: http://www.qsl.net/f1lxl
TM8T - (North France) Activity between November 27th and December 11th. Main activity on December on 2-3rd from the City of Croix. QSL (w/SAE + 1 Euro for the Telethon), to: GCNF, 68 rue Jules GUESDE F 59170 CROIX, France.
TM6TLT - (Le Mans Area) Activity by the Sarthe l'A.R.A.S 72, from 1300z, December 3rd, to 1500z, December 4th. QSL per instructions on: http://asso.proxiland.fr/aras72/
TM3TLT - (Vald'Oise near Paris) Activity by the Radio-club de VAUREAL (F8KGL) ARC. F5KES and the 95th division of the REF-Union will be on the air December 2-3rd, from the city of Vaureal. Look for activity on HF, VHF and UHF (+ ATV). Web page: http://tm3tlt.f8kgl.com
HB9Y - (Switzerland) Activity by the members of the USKA-Valais-Wallis all December long. Main activity on December 3rd from the Midi Place in the City of Sion. QSL via Bureau. Web page at: http://he1tele.radioamateur.ch/

ST0, SUDAN. Operator Jovica, T98A, will be active as ST0RM during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via T93Y. Visit the Web page at: http://www.t93y.com/st0rm

TF4, ICELAND. Charlie "CHAS", N1RR, will be active from here this week from Thor, TF4M, QTH. Chas believes Thor's station is first-class, with FT1000's - EMTRON Amps and amazing Rhombics and large VEE beams at 80ft. Even Icelanders, like TF3CW and TF3YH, believe that Thor's station is the best station in the country and certainly the best on the low-bands. Long beverages will be added this week, but the site is known to be incredibly quiet. The band conditions should remain excellent with the low absorption trend repeating from last month. Chas hopes to work some of you in the CQ WW DX CW Contest as TF4M, a Multi-Op/Two TX entry or before the contest as TF/N1RR. Look for him after the contest on 80/160m CW (for about 10 hours, before returning home).

TI, COSTA RICA. Phil, N0KE, reports that he will be at TI5KD's station for the CQ WW DX CW Contest and spend some time on 160m outside of the contest. Outside of the contest he will be active as TI5/N0KE. In the contest, he plans to be active as TI5X mainly on 15 meters. He also adds that Alanson/K0AV will be active as TI5N on 40m and TI5A on 20 meters. Phil is also expected to be in the ARRL 10M Contest.

TR8, GABON. Roland, F8EN, will be active again as TR8CR from Libreville. He will be there from December 12th to January 12th. Activity will mostly be on CW on 40/20/10 meters (7005 and 14005 kHz) and SSB (14170 kHz) during his morning.

VK0, MACQUARIE ISLAND (Possibly ZL9). Several sources are reporting that Richard, W5VTS, plans to be active as VK0AVT starting November 23rd, for about 24 hours. Activity will be on 40/20 meters CW. Also, there is a possibility of some activity from Campbell Island around November 26th. Look for W5VTS/ZL9 to be active for about 24 hours. QSL via operator's instructions.

VK9C, COCOS-KEELING ISLAND. Remember to look for Bernd, VK2IA, to be active starting around November 22nd as VK9AA from here. He will also participate in the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band entry. QSL via DL8YR.

VP2E, ANGUILLA. Operators Gordon/N5AU and Ray/KC5EA will be active as VP2E during the CQ WW DX CW Contest (November 26-27th) as a Multi-Single entry. QSL via N5AU.

VP9, BERMUDA. Mark, AA1AC, will be operating from the Hamilton Parish, Bermuda, as AA1AC/VP9 from December 12-15th. QSL via to his home callsign, direct or via the bureau.

WP3, PUERTO RICO (Update). Alfredo, WP3C, will be active in this year's CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via W3HNK. Visit his Web site at: http://www.wp3c.qth.com

YI, IRAQ. Operator Ilian, YI9LZ (LZ1CNN), will be active in the CQ WW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (15m) entry. QSL via LZ1ZF.

ZB2, GIBRALTAR. Jorma, OH2KI, has postponed his VU2WAP operation but will now be active as ZB2X in the CQ WW DX CW Contest (November 26-27th)

as a Single-Op/All-Band or Single-Band entry. QSL via OH2KI.

ZP0, PARAGUAY. Marco, N5ZO, will be active as ZP0R during the CQ WW DX CW Contest(November 26-27th) as Single-Op entry. QSL via W3HNK, direct or by the bureau.

Actually, the typical FM rcvr can handle up to +/-7kHz deviation unless it has had new filters added for narrowbanding, etc.....this is due to the filters not having a sharp cut off at the 5 khz point....My GE MSTR II rcvrs can accept up to 7 kHz dev signals on strong signals..on weak signals, the wider deviation starts to confuse the squelch ckt and thus the rcvr starts to squelch..but the rcvr is designed for 5 kHz deviation...and this is normal of FM filters...

FM broadcast stations are +/- 75 kHz...not 150 kHz! The max b/w of a FM broadcast signal is 200 kHz.....(which is normal channel spacing also) including the subcarriers..
and Modulation Index is Dev/highest freq of modulation....but MI IS not the limiting factor in a rcvr...It is overall deviation and bandwidth (B/W is equal to 2x (dev PLUS Mod freq). You can have a 3 kHz dev with 1 kHz tone and the MI is 3....increase to 5 khz dev with a 1 kHz tone and the MI DROPS to 1.6...thus MI is NOT the issue....the overall BW in the above examples would be 8kHz and 12 kHz respectively.

Yes, FM vs PM if done right is not noticeable on the air...unless the PM has not been corrected or the FM does not have preemphasis...
PM is easier to implement on xtal radios and is much more stable in older designs....FM is better in PLL radios..also FM allows Digital modes (DCS, etc) where as PM cannot handle it (DC offsets dont work with PM).

Now- what did I say ?? Syntax? what does +/- 75 Khz add up to?? 200 Khz?? NO , it adds up to a 150 KHz channel bandwidth (+/- 75 KHz), with 200 KHZ Channels!! But, I digress: on WEAK signals, clipping of signals, at least in the Motorolas that I am used to, will start (clipping, chopping, DISTORTING, the signal, once you exceed +/- 5 KHz)! The point I try to make is, unlike human experience, TOO MUCH can be far worse than too little, when comes to LOUDENESS into a microphone (at least on FM)! Its kind of like the worlds cheapest hearing aid-- a button that states "YELL, I'M DEAF" ! It may work in the real world, but, when applied to radio, t'aint necessarily so! And, in trying to keep from technological overkill, try to keep it in SIMPLE terms, as MOST folks here don't have Engineering Degrees! The point is, that the modulation type (Phase, or Frequency) isn't necessarilly what is causing the difference, at a given power level on radios, but the deviation component (at a given power level) can have drastic implications on a (Repeated, or Directly) recieved signal, Vs. a carrier,or very narrowly modulated signal ! W4ASX RESPONSE TIME, 11/18/2005 to K1MAN Essay ES051115

Open minded, I look for the wisdom, despite the nonsense that preceeded it. In this case, Glenn, rambling masquerading as wisdom is what I read. You'd do well to figure out what you're trying to say before you say it. Readers want to see a topical sentence, not stream of conscience writing. When the writing goes on and on without materiality, then we conclude the writer is over impressed with himself, writers who are generally poor listeners and readers. Such people have difficulty perceiving reality.

I'm afraid, Glenn, that's where you fall in. Many of your statements/conclusions are rife with fallacy, i.e. the fact that someone fails to answer a CW call means he doesn't know the code. A ham for 53 years, I do not answer code because I want to talk sideband. So, by your logic, you question whether I ever knew the code on account of ignoring a cw signal.

And this bit about law. God, Glenn, get a grip. Law is so deep and intoxicating that even the most educated lawyer wouldn't make the claims you do. Only someone who doesn't know what he doesn't know would talk about law the way you do. Being honest, I know of one exception: The jury trial you won against the law professor. Now, that was a case you can be proud of, one you thought about and prepared for. For the most part, however, you're way behind me in law, and I don't fancy myself anything in law. I mean, consider what I don't know: proof of facts, evidence, hearsay exceptions, theories of damages. That's just within in the ambit of what comes immediately to mind; imagine the big iceberg of law under the sea that isn't readily visible.

At least when I write about you, I write on the basis of facts. For example, when I alleged you were a narcissist, I drew directly from your Wife, Bonny. Fact is, you don't know anything about Brian. I can tell you that Brian is one hell of a genius in psychology, rendering my psychological musings child's play.

You are certainly right when you say he sets up institutes and pseudonyms, but don't many of us? My company is called Entertainment Central, a registered dba of my person here in Florida. Don't you have IARN and AARU? I've always thought that the way we Americans market our material is through all kinds of names that are not necessarily our own. In your mind, however, something is wrong when Brian employs

traditional Americana.

Glenn, again I reiterate at one point you were on the way up, but you took a wrong turn. You are no great thinker, no great lawyer, a poor writer, a poor communicator, a very, very poor ham, and a mentally disordered individual, growing worse. Take stock of yourself, my friend, and turn it around.

Bob Sherin,
W4ASX

P.S. If you send me material, please publish any response with the same prominence as the original material. Thanks.
K1MAN Responds November 20, 2005

From: K1MAN14275@aol.com
To: Bobmiami1@aol.com
CC: k3vr@hotmail.com

To: W4ASX

cc: K3VR

Date: 19 November 2005

You are right about two things, Bob: 1) I don't know anything about Brian Crow, K3VR, and 2) Your iceberg analogy is a very goog one, but, as an engineer, I do understand the scientific reasons why 9/10 of an iceberg remains unseen under the water. I also understand the basic principles that support the other 9/10 of the law, as you correctly state that I do not know. I don't, of course.

Likewise, Bob, you don't know about 9/10 of my legal work or 9/10 of my other work either. This, at best, will have to wait until all of my books are finished and published at www.K1MAN.com as well as in "Scientific American," etc.

My biggest legal case to date, by far, is currently pending in a Maine Superior Court.

Thanks for reading my essay. It was great to hear from you after so many years. God bless you! 73 and GL de K1MAN.

"Great causes are never tried on the merits; but the cause is reduced to particulars to suit the size of the partisans, and the contention is ever hottest on minor matters." - Ralph Waldo Emerson - From his essay "Nature" 1844.

W4ASX Replies, November 21, 2005

What a lame response, Glenn. God, I could tell you that my biggest case is right now, and it will go down in legal history. That it very well. But this doesn't address the level of my legal knowledge nor countless cases of others that are likely more important than mine and

better advocated.

What I get from you Glenn is this notion of entitlement, that only other special people can understand you. I may not know 9/10ths of your law any more than you know 9/10ths of mine. However, I do know what I read as public record, and far from good lawyering, it is pitiful, in my view. I see the way you comport yourself as highly disordered.

Let me give you some examples. You take civil matters and put them in the criminal arena. Where do you think you're going to get with all your felony affidavit complaints and those green cards? By making those matters criminal, do you think the U.S. Attorney is going to pursue them? To the contrary, everyone with whom I communicate in privity thinks you're nuts.

A good part of law is in the chosen remedy. Consider: If you have a complaint against a ham interfering with your broadcast, pursue the traditional civil route. Get an injunction. Given good cause, it's a piece of cake and you could join the FCC as an indispensable party (to interpleed).

Your remedy with Riley is the epitome of what not to do from perspectives too numerous to enumerate. If you sincerely believe all the things you allege in the public forum, why not frame it in a 42 USC 1983 federal action, which, designed for the purpose, has teeth? Of course, you're not going to get anywhere unless you learn how to plead, your weakest part (of which I was aware). For, if your pleading doesn't pass muster, the case will go nowhere, like all of your cases, except the Corson one.

Now, permit me to enlighten you about that 9/10ths iceberg of law underneath. It is not governed by engineering formulas. In this case, it is the sheer intoxication that no matter how far you go in law on any given subject, the library is still replete with more. And every subject can be attacked from so many different angles. Far from governed by formulas, it is governed by education: Smart legal people have a notion of what they don't know.

Your very manner of expression about law, Glenn, is arrogant and pompous. What successful advocate would call an FCC NAL with prima facia efficacy puny and anemic? If that is your idea of Soloman's law, you need more than legal help.

Every would-be author wants to be published. The more respected the publication, the better the author looks. So, apparently you have some massive need to tell me to watch for you in Scientific American. Need I tell you to watch for my best seller "Death of a River Pilot?" While I have high hopes, I don't know for sure that it will be a best seller -- or even published, for that matter. Only time will tell. But you've got this need to hype yourself in the present for something that may happen in the future. Has seasonal depression got you down? (I

know that Maine isn't the brightest spot at this time of year.)

In the 1950s, I elmered Aaron Fishman, K1BAF, and in recent years he was in fact published in Scientific American regarding the history of sun spot cycles. Not one to promote himself, Aaron just one day sent me the article, whereupon I marvelled at his achievement. He wasn't aware of what an honor it was. Now Aaron is a mensch, not a pompous ass, as, quite honestly, you come off.

Like your stream of consciousness musings, your reply is stilted. Memoirs. Anyone who has a life worth studying can write a memoir, but, from what I know, yours isn't worth reading, and neither is mine. You're far more likely to wind up a classic case study in DSM.

Please pardon me for expressing the thoughts stirring within. Obviously, if you are enamored with marching to the beat of your own, off-beat drummer, proceed! Be assured that I will evaluate any of your prospective writings unprejudiced and with an open heart. To be honest, I like communicating compliments but have the opposite animus based upon the totality of your utterances in the public domain.

Bob Sherin, W4ASX

3214. Galaxy Electronics Founder Leo Meyerson Asks FCC To Deny K1MAN Renewal

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-21 14:01:21 UTC

This is a post to QRZ.COM by K3VR and reads as follows:

Leo Meyerson, W0GFQ, is the latest high profile ham to come out publicly about Glenn Baxter's license. You probably remember Leo as the founder of WRL and Galaxy Electronics. Walter Cronkite also came out publicly against Baxter's (ex-k1man) renewal.

In fact, Leo just sent a letter to the FCC about Baxter. You can find the letter and a discussion of Baxter's renewal here:

"Leo Meyerson is an acknowledged pioneer in the field of radio. Leo is the founder of World Radio Laboratories and Galaxy Electronics. Throughout the years Leo has been very active in public service. A life member of the Quarter Century Wireless Association, Leo served as a National Director from 1977 to 1987. In 1991 he was named the QCWA Amateur Member of the year and in 1994 he was inducted into the QCWA Hall of Fame. Leo is also a life member of the American Radio Relay League, Society of Wireless Pioneers, and International Mission Radio Association among other associations. In 1980 Leo was elected a fellow of the Radio Club of America, one of the most prestigious radio clubs in America.

Leo Meyerson is the second radio icon to denounce Glenn Baxter, ex-K1MAN. The other, famous broadcaster Walter Cronkite, has publicly stated that he has experience with Baxter's lack of ethics. Cronkite also called on the FCC to deny renewal of Baxter's amateur radio licenses."

Vinnie

What would ten 6LB6's cost when this unit needs to be retubed?

Something to consider!

Pete

Rabbi Phil,

Before I post the latest exchange, let me address your commentary. Yes, I do go from controversy to controversy, in ham radio because I was apart of the subjects' lives of which I write. I like to think I'm empathetic (see "K1MAN Has a Case"), using the First Amendment to make a difference (see "The Florida Bar is Corrupt, both a newsgroup and an article).

My life at 66 is extremely full: Angelic Wife of 12 years, great grand children, a novel "Death of a River Pilot," slated for publication (hopefully) in the future, from retirement a new business called Entertainment Central, which is more successful than any of my businesses in my "working days.'

Now informed, perhaps you need ask yourself about getting your own life, lest you continue with wasted words on faulty predicates.

Bob Sherin, W4ASX

And now the latest W4ASX/K1MAN Exchange for those interested.

W4ASX Answers K1MAN's Haughty Quotation 11/21/2005

Trouble is, when you think you know more than the regulators, when you think you can interpret the Constitution without the Supreme Court, when you see agents and conspiracies all around you, when you assume falsely, when you are unwilling to listen and comprehend your reading, when you resort to the bombast of glittering generailities, instead of addressing specifics, when you break your arm complimenting yourself on stellar legal knowledge while, at the same time, declaring essentially you won't be regulated, your deathknell..

Real knowledge is to know the extent of one's ignorance."

Most of them WILL need repair. The FT-90R is a turd of a radio.
With more "bugs" then features, it's a real pain in the ass....
I would think of another dualband mobile than the FT90R...seriously.

World Radio Labs / Galaxy of Council Bluffs, IA (later purchased by HyGain
in Lincoln, NE) existed until the late-1970s.

Since this unit uses ten (10) - 6LB6 sweep tubes it is not a practical
amplifier -- since these TV sweep tubes are no longer produced. Might be a
nice project to convert it to a couple of Russian triodes. I would sell the
tubes for the $$

I have used the FT-90 for four years now with zero problems, love this
radio! And its the only dual band mobile radio that will fit in our
Outback. Once you get used to the menu's its pretty easy to use, I
know, menu's, those blasted menu's, but what radio doesnt have menu's
these days! I guess my Heathkit HW-2036 doesnt have menu's, and it
does have a "Digital Readout", heay, maybe I will put that in my
Outback!

All right anon. Let's talk writing. While I'm only an apprentice for the past 30 years, I've had successful writers and editors take me under their wing. Over the period, effort has been made at clear expression whle covering the nuances.

There are two stories I've covered in detail: KV4FZ and K1MAN. (For those unfamiliar with the former, put into NG search "When the Feds Fanned Out.)

Let's talk about the K1MAN story visible to me: 1).Glenn pioneers bulletins, 2) His bulletins are formally annointed as legal by the FCC, 3) For a time in the 80's he devotes himself to good work, 4) He demontrates himself to be a dynamo, writing, producing and implementing an interesting bulletin, 5) He does good work around the world, 5) He then gets involved in questionable foreign policy, 6) His behavior becomes increasingly erratic, 7) He sees conspiracies and agents everywhere, 8) He begins an unwarranted, smeer campaign against Riley Hollingsworth, who has given him the utmost leniency, 9) When Riley writes essentially acknowledging the legitimacy of his broadcasts but questioning some facets, Glenn rejects out of hand what any normal person would be thrilled with, 10) Glenn increasingly exhibits grandiosity, wandering writings going nowhere with a pompous tone, 11) At a time when he is required to exhibit the character necessary to be a ham, he essentially says he won't be regulated, 12) Concommitently with 11, he claims mastery in advocacy.

Perhaps some readers find the above burdensome, an audience which would not be interested in reading me. There are other readers who will find this story as facinating as I. Brian, K3VR surely does and his superlative material reflects this. Right here on ham radio we're witnessing a guy over a long period of time with huge potential self destruct, material fit for Shakespeare.

Now, interested readers, here's the latest exchange:

Bob,

What a "jerk!" You were "splattering from 14.275 all over SATERN on 14.268 preventing check ins," and after a very courteous request from ND8V to turn off your amp (you were talking with a New England station and coming into Maine 40 Db over 9 here), you QSYed to 14.313 so as to wipe out everyone up there! You were in clear violation of FCC rules by using more power than required to maintain your amateur radio communications, and you deserve a $22,000 NAL! You don't see ND8V breaking any FCC rules do you?

All right, just got off this great enjoyment called ham radio to answer you. First, am surprised at your treatment of a real problem in which you characterize me as a "jerk," because within the half hour you had saluted me by IM with hallowed words and "God Bless."

Yes, I was informed of the splatter on 14275 by Mike, ND8V, who is increasingly active with Saturn. And yes, as detailed ahead, it was admittedly unintentional, faulty operating on my part. Both Mike and I often hear each other's splatter. As usual, I told Mike I would move and did as you indicate to 14313. Your story ends there.

But it continued: My only transmission 14313 was: "Is this frequency occupied?" Someone answered, and I moved to 14280. Again Mike came on and said I was splattering on 14275, whereupon I cut my ALC.

At that change, the ham with whom I was talking reported a major cut in splatter. After the qso I went right back to Mike, a technical expert, and asked if the cut made a difference with him. Yes, he said, explaining how automatic limiting works. I learned something from this: That I've got to strike a careful balance, running full power with minimal ALC.

As to the power necessary to conduct a qso, you have to be in the shoes ot the station operator to know what is required, a subjective call. I try with a passion to avoid interfering with anyone. And you know this. You also know, as does Riley, that I'm ammenable to regulation.

Glenn, in view of our exchange in which I've voiced no pleasure in seeing you devolve, hoping for a turnaround, and your biblical quotations with "God Blesses," this email to Riley speaks with a second voice.

I don't mind fielding whatever you have to say; but if you are to exhibit the integrity necessary to hold a license, play no games (with phony predicates and innuendoes) and speak with one honest voice. For, to me, your devious, misleading tone (not your opinions) renders you unfit for licensing as a ham radio operator. This is not to attack you

but on careful consideration over a long period of your mental deterioration as evidenced by your operating practices on ham radio.

I don't mind your copying Riley; however had you not done so, this email would never have been written. I ask Riley to make this part of the K1MAN record

Poor amp, runs about a dozen old TV sweep tubes with all the problems that come with them! It was a joke when first built, and hasn't improved with age. You can get a nice Heath SB200, SB220 or SB230 for equal or less money.

Some CBer will likely get this rag and hopefully blow it up first key-down.

3247. SWAN-500C re-born

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-22 19:54:02 UTC
From: gene@csl.uiuc.edu
Message-ID: <dlvt0q$43s$1@news.ks.uiuc.edu>
Source record: 47351

Although I have a later digital transceiver (Icom-751), I recently acquired a Swan-500-C from an estate. It had been in storage for 25 years. I have had fun working on it's quirks and returning it to very good performance, even by today's standards:

The first quirk was not staying on frequency (not related to time/heat drift). Slightly wiggling the bandswith knob caused slight changes in voice pitch. And what was worse (and intolerable in a group discussion) was that often Transmit on a slightly different frequency than it received on. A change of more than 100 Hz or so is usually intolerable.

My initial thought was oxidized bandswith contacts. I bought some "Deoxit" at Radio Shack dowsed all the contacts except the ones in the VFO compartment. This may have helped slightly but problem was essentially the same. Then I "Deoxed" the bandswitch contacts in the VFO compartment which I SHOULD NOT HAVE DONE, because the material is a different plastic and was severely affected. It changed the frequencies by more than 30 KHz...probably by changing the dielectric constant of the plastic material. I quickly rinsed this off with FREON-TF and frequencies returned almost to where they were before.

The original problem still mostly existed after all the contact cleaning. I had even used "PB-Blaster" rust solvent from Auto-Zone on the main bandswitch (not the VFO) which made no noticeable difference. I finally flushed all the contact cleaners back off with FREON-TF which pretty pretty much leaves them clean and dry.

HERE'S WHAT SEEMS TO HAVE BEEN THE MOST SIGNIFICANT "REAL" PROBLEM:

While trouble-shooting the problem, I monitored the actual VFO frequency (which is always the operating frequency plus or minus 5500 KHz in "Normal" sideband), with my Icom-751 listening as a frequency-meter:

I found that tightening, or loosening the mechanical linkage between the two band-switches (VFO and lower gang), the "pitch" of tone I was listening to on the Icom changed by about the same 100 or 200 Hz as exhibited in the origanal problem. The long band-switch shaft passes through several wafer sections and is only grounded near the knob and de-tent assembly which provides a poor and un-reliable ground. (Slightly wiggling the band-switch knob always caused a significant change in the tone pitch I was monitoring).

Apparently, when the shaft was not firmly grounded, it provided a capacitive-coupling path between certain wafers that caused the problem.

AS A CURE, I soldered a flexible jumper (Pig-tail) between the lower shaft and chassis ground, and also a jumper on the larger section of the mechanical linkage above the chassis to ground.

On a different aspect of improving the SWAN-500 performance, I used and external wall-receptacle-mounted transformer to light a 12 volt auto tail/stop light and placed it against the VFO compartment to simulate heat when the transceiver has been on for awhile. Although probably not necessary, I took the opportunity to negative-rectify this 12 volts and send it in one of the accessory socket pins (I don't have the pin# handy, but it goes the 25W 10-volt zener(-10v) mounted under the chassis. You may have to limit the current to the zener with a resistor if your

voltage is excessive. This keeps the transistorized VFO section running at all times. I have found that remarkably, there is virtually no warm-up time required for SSB standards operation...comparable to the digital frequency-synthesized more modern transceivers. Of course you disconnect the external heat while operating the transceiver.
If better voice quality is your preference, the SWAN provides this by using a wider crystal-filter band-pass of 2.7 KHz which is noticeably better than the Icom-751 which is 2.3 KHz bandwidth, and some transceivers even use 2.1 KHz.

2test wogie doesn't know enough about radio to talk about it unless you
ask him about 'negative swr'. But he can sure give you all the good tips
on how to jam other stations on 20 meters. LOL!!!!!

hello
its junk, was junk when new,
age and todays price of sweep tubes do not make it better

seller stating the amp is rare
you do not want a rare amp
you want a common as dirt amp
that you will have no problems finding parts or new tubes for

35 years ago replacing sweep tubes was cheep
use to be could go down to the drug store
buy new set of sweep tube finals
for a Drake or Swan transceiver with lunch money, not any more

tube sellers like Antique Electronics Supply
do not warranty sweep tubes
will not take back bum sweep tubes
if you do not know what you are doing
you can kill a set of sweep tubes in just a few min.

please note, you do not do not want to waste
your time and money on any amp that uses sweep tubes

also the 1,000 watt pep noted is the old
dc input, not 1,000 watts pep output
be lucky to see 500 watts key down cw
for a min or so, before the the glass over heats
and the plates start to warp

want a nice used amp save your money
look for a Heathkit SB 200 or even better a SB 220

there were also lots of good old amps made by
Drake, Hallicrafters, Gonset, Heathkit, Hammond, Hammarlund,

look for a amp that uses real rf power tubes
572B, 811A, 813, 3-400Z, 3-500Z, 4-400, ect
mid power, servicable used amps out there
built like tanks and just as tough
using real transmitting tubes

love WRL gear, have more than one Globe transmitter
but I would never buy this WRL amp

yours truly
de mac w8znx

That's right Mac,
World Radio Laboratories Globe series are great transmitters.
I love the "Globe King."
The Galaxy 2000B was made for CBers that didn't know any better than to buy
it.

To the contrary, I find 20 meters prime spectrum of interesting hams. Taking a break from business, I had the pleasure of talking all day on 20, only a minor part about the K1MAN story.

I'm glad you raised 20, because Glenn has weighed in within this thread on the subject, decrying its decay.. Contrary to his view, I find 20 meters upbeat. Quite a change from a short time ago when Riley came on board. Respect has replaced disrespect, a decent atmosphere has replaced one which was polluted (now the kids can listen), contesters are as avid as ever, friendly nets are ordinary operations, and hams, for the most part, act courteously toward one another.

In my view, 20 has undergone a sea shift for the better. Diatribes? If that is the way you wish to characterize this type of communication, be my guest.

To the contrary, I find 20 meters prime spectrum of interesting hams.
Taking a break from business, I had the pleasure of talking all day on
20, only a minor part about the K1MAN story.
,

At the risk, "Preacher", of being characterized as being one of the
uninteresting Hams on 20 meters, may I?
Yes, you often do talk "all day on 20". And you talk, and you talk, and you
talk. At the end of the day, Bob, you have spent hours talking, and in the
process you actually say little.

Yes, previous posters are, in the vernacular, 'right on the money' when they
comment that many of them have made it a habit to spin their VFO to another
frequency when you arrive on scene. Why do you suppose this is, Bob?
Obviously what you have to say/bloviate is of little to no importance to the
majority of Hams within earshot of you, but that hardly gave you reason to
pause, did it? You blab on, undeterred, and are somehow convinced that you
are offering something of interest and value.

And, Bob? Please DO try to be just a tad bit less verbose. I realize that
you fancy yourself as a wordsmith, but try, at least, to keep your
vocabulary within the context of what it is you are attempting to convey.
You are, for the most part, not dazzling any of us with your attempts at
brilliance.
,
In my view, 20 has undergone a sea shift for the better. Diatribes?
If that is the way you wish to characterize this type of communication,

port-a-potties?

>

2test was on hiatus at the mental ward. He had to be reevaluated for his
psychoactive drug prescriptions.
He had heart problems, too. Had to have a few stents put in.
2test is on a low cholesterol diet, which means no more trips across the
river to Wheeling for tube steaks.
The Lavender Lads are going to miss him.

Please, guys, give Roger a break and remember him in your prayers.

We all know Roger has not been well for years and years, and these last two weeks have been a particularly difficult time for him.

Roger suffers from congenital heart problems, a problem that at fifty years of age, is difficult to deal with.

How about all of us say a silent prayer for Roger and ask God to speed Roger on his road to recovery?

There is power in prayer and who knows? Maybe our prayers can help speed Woger to a quick recovery.

And if God doesn't listen??? Well, Roger is going to die.

Bottom line? Nobody cares.

There is no word in our language to explain this feeling.
In fact only the German language has a word for
this: "Schadenfreude". It means taking pleasure in the misfortune
of others. It is not necessarily malicious, or envious. It can
be a just pleasure: the fall from grace was deserved.

"As I learned there was a word for this, albeit in
another language, in German, and so sort of as a hobby I continued
to look into this subject of why is it that we feel pleasure when
bad things happen to other people. And the more I looked, the more
fascinated I became - in part, because I couldn't find anything. No
one seemed to have written on it. And eventually, I came across a
clue in the writings of Arthur Schopenhauer, a very influential 19th-
century German philosopher who, in the 1840s, says essentially "turn
back, don't look any further. There is a kind of pleasure that we
take in the misfortunes of other people. It is called Schadenfreude,
and it is a sign that the devil is working in a person". And this is
very curious, because I knew that Schopenhauer, an atheist, didn't
believe in God. And so I was intrigued that he referred to this
religious imagery - to frighten us, if you will. Not long after
Schopenhauer wrote, in the 1840s, that we should banish from our
communities any monster who ever witnessed taking pleasure in the
misfortunes or sufferings of other people, an English Archbishop
named R. C. Trench used the word Schadenfreude by name, in a book
that he wrote called The Study of Words. According to the Oxford
English Dictionary, this English Archbishop R. C. Trench is the
first person ever to use the word Schadenfreude in the English
language. And his use was quite curious. He'd moved to a discussion
of frightening words, and he used as one of his primary
illustrations the word Schadenfreude - he said to English
speakers "our neighbours, the Germans, have a word for taking
pleasure in the misfortunes of other people", and he said that the
mere fact that the German language contained a word for this
phenomenon was evidence that all of German culture was
polluted, was tainted."

Blah, Blah,

Turn me off; that is surely your prerogative. Based upon my results, though, for every individual exercising your type of disgression, there are hundreds who call, talk and befriend. My cup runneth over.

Now the latest on K1MAN as of November 23, 2005

K1MAN email to Riley Hollingsworth, Esq, FCC of November 22, 2005

"you QSYed to 14.313 so as to
wipe out everyone up there! You were in clear violation of FCC rules
by using more power than required to maintain your amateur radio
communications, and you deserve a $22,000 NAL!"

Last night, troubled by the K1MAN email to the FCC, I mulled it. And what I came up with is dispositive of K1MAN's final disposition. Not one to readily use the word lie, meaning misrepresentation with scienter, I'm compelled to write that K1MAN's intention yesterday was to deceive the FCC.

Here's why. "you QSYed (changed frequency) so as to wipe out everyone up there!" Here K1MAN arrogates unto himself knowledge of intentional interference and charges that I went on 14.313 to "wipe out everyone up there." Nothing could be further from the truth. I made one transmission there: "Is this frequency occupied?" When the answer was affirmative, I moved.

By making a false charge and failing to produce the mitigating or exculpatory information of what, in fact, happened, K1MAN, who holds himself out as a ham radio leader, maliciously misleads our regulator, the FCC. Where a good part of ham radio is voluntary compliance and cooperation in the resolution of problems, K1MAN does not possess the moral character to be part of this colossus..

If this were his only transgression, a fair minded person might be prone to let it slide with a slap on the wrist. However, the on-air course of his performance shows that his conduct here is but a minor part thereof.

Please make this part of the K1MAN record at the FCC.

W4ASX Replies 11/23/2005

Blah Blah Blah,

Thank you for your post. I especially appreciate it because your
points and position, well expressed, are clear.

Pluralism, the concept essentially of "different strokes for different
folks" is the responsive topical sentence. For sure, the realization
is there that not everyone is interested in the subject-matter of my
posts. Also, that writing, as an art form, is challenging. What turns
me on is to sink my teeth into a story of which I have unique knowlege
and try to reach an audience with that knowledge who come away
entertained and better informed.

Well understood is the difficulty of word-smithing. For our language
is so very rich when wielded to its full extent. All words have
semantical frameworks, so the choice is exacting. Does my effort to
write mean I'm a great writer? No. Ever since trying to go beyond
myself in writing 30 years ago, I've struggled to improve, marvelling
at those successful people whose text leaps off the page.

Notwithstanding, I think through my posts, spend time editing, read
responses with arespect, then try to participate, changing according to
the input coming back.

If you put my call and name into a newsgroup search, you'd be surprised
with the results. This isn't the only place nor subject on which I
post. I've posted in groups on religion and law as well. I'm also a
published author in publications too numerous to list here, but here

are some: The Miami Herald, The Miami News, Computer World, Datamation, the Westside Gazette, Florida Skip, South Florida Business Journal.

I was paid for some of the articles. So to tell me, I'm not read is clearly false. I know I'm read from your responsive posts, calls, emails, and knowledge people often show who communicate with me. You can also read it on the Net: One ham posted (about the KV4FZ story): to understand the KV4FZ story, "see Bob Sherin, W4ASX's work."

More, to critcize operation on ham radio is self defeating. If we need anything, we need to get the hams out and on the air, whether it be code, rag chewing or contests. To characterize my operation on ham radio is a waste of time in the face of my disclosure that I'm up to my ears in business and use this collosssus for relaxation, is a misrepresentation. The fact is, I'm not on much of the time when I'm on the road doing gigs.

Whatever your opinions, fellow hams, have a happy holiday, at a time when I have 3 gigs scheduled, moving my 85 pound Peavy speakers and sound systems around. You enjoy while I work.

Bob Sherin, W4ASX

Perhaps I should add a cautionary risk-warning for the less experienced
who choose to energize the VFO during off-hours as described above:
During normal operation on mine, the current to the -10v zener set the
voltage at -10.1 volts. When I substituted an external source when the
transceiver was turned off, I selected a resistor to supply enough
current to read -9.9 volts at the zener....thus ensuring that the current
is not excessive. Accordingly, you should be sure to disable the external
current supply (and heater light) before you turn on the transceiver to
prevent BOTH currents energizing the zener. It would probably tolerate it
temporarily but if it were destroyed so as to "open up", the soaring
negative voltage might destroy the VFO transistors.
A wide variety of external power sources could be accommodated...AC or
DC, but if AC is used, it will require an external rectifier with the
Cathode toward the transformer, and Anode toward the internal zener. No
filtering required.
In my particular case, I had a unit labeled 13.5 vdc @ 1A.
On the auto brake/park bulb, I chose to solder to the two lead contacts
(ignoring the shell). This runs the Brake and Park filaments in series
and of course most of the illumination is the Park filament only. My
voltage across these measured 11.25 volts dc but of course it could
also be 11.25 ac. Although with my negative dc supply, I didn't need
the rectifier diode, but I used one anyway as a precaution against
accidentally reversing the dc supply. As noted above, this amount of
heat seems to simulate the normal operating heat quite well since I
experience virtually no warm-up time required for freqeuncy stability.
On accessory socket J6 on the Swan 500-C, chassis ground is pin #9
and the external zener current goes to pin #3 or #4 (They are jumpered
together in the octal plug) and of course you leave the plug inserted.
For other Swans that might have different wiring, the zener is a
25 watt, insulated, stud-mounted 1N2974-A.

A couple of other tips that might be useful to some:
Although my receiver was functioning satisfactoriy, the S-meter
readings seemed stingy compared to my Icom. Removing a capacitor
is an easy fix for this:
The high-end of the Audio Gain pot (R-1201) has a capacitive-divider
of two .001uf's in series which divide down the audio voltage derived
in the Product Detector. This midpoint goes to AGC amplifier/detector
(pin#8 V-11, 6BN8)
to generate the AGC. Simply removing the lower (grounded) .001uf, C-1104
allows much more audio to generate AGC without affecting anything else.
In my case, this makes the S-meter readings more normal, and better
AGC control of signal levels.

Another change I did was to lengthen the AGC time-constant which seemed much faster than the Icom (I use it excusively in SSB mode). They used .01uf, C-901, from pin#6, V-11, 6BN8, to ground. I added an additional .05uf across it for a longer release-time.

Although the Swan-500 is usually sufficient at its higher power levels, I prefer to use mine to drive a Linear Power Amplifier. Even so, I prefer to leave a 50 ohm dummy load paralled at its output to ensure stability at light loading...the two 6LQ6's are still not working very hard and should last a long time. The dummy load does not affect the Receive sensitivity noticeably.

Well, it is free as in beer, for now. Everyone loves free beer!

Of course, there is more than one kind of "free" when it comes to source code. The only real reason you might want to hang onto the source is if you plan on selling it as a proprietary product in the future. Even then, it may be to your advantage to open the source up to take advantage of what other people can do. Any copyrights still reside with you. Allowing someone to spin off a native OS X or Linux version will

only benefit you, as most small software projects never make any money anyway.

There are more than a few Morse training programs available for free (at least for Win32.) What is missing is a real solid suite of Morse tools available under a truly open license.

It still remains to be seen whether or not this software is an example of "great work" or not ;)

Thread Readers,

Please be aware that the pseudonyms above may likely be one person, a K1MAN supporter, who, unable to meet the subject-matter, is attempting to undermine and detract from the posts. When a pseudonym is pitted against a real person, a ham, with a real name, the discussion is biased, because while the unidentifed knows about the reality of the opposing poster, the identified poster doesn't have a provable clue nor can he assume with whom he is debating.

Permit me, for a moment, to point out how this relates to the above post about 75 meter operations. Though I haven't been down there in years, there was a time when I was very much into 75 meters, primarily because, like many others, it gave me an opportunity to design, build and test low band antennas.

To be honest, I never felt comfortable on 75 meters, nor did I feel that I fit in for the most part. There were groups, however, in which I enjoyed participating, like the Knights of the Round Table. The above poster knows all this, so taking advantage of his knowledge, he delivers a cheap shot. And because he remains incognito, there can be no impeachable dialogue back.

This is why anonymous posts sully real reporting on these Newsgroups. They can impart a wholly false impression -- of many against one when the many is actually only one, of innuendo when the issue raised by the poster cannot be related to the poster's actual behavior, or wholly fabricated information designed to discredit is disseminated behind a mask of anonymity.

I ask only readers that you ponder the subject-matter of this thread and not the tangential calumny, invective, rumor and half baked truths. This is an important story to ham radio, one in which I've been joined and outdone by the masterful and all-encompassing research of K3VR, Brian.

> Well, it is free as in beer, for now. Everyone loves free beer!

That's irrelevant. It's great software, and all the feedback I have gotten (with the exception of that from one or two anonymous "contributors" on news) supports this fact.

More than four thousand downloads in just a few weeks is another indicator.

> The only real reason you might want to hang onto the
> source is if you plan on selling it as a proprietary product in the
> future.

I don't have any plans to sell this product in the future. I made this as a contribution to the continued use of Morse code, and the fact that there has been more than 4,000 downloads in just a few weeks indicate that it is already a SOLID contribution.

Either way, the source code belongs to me, I decide what to do with it and I don't feel the need to justify that to anyone.

> Even then, it may be to your advantage to open the source up

Point taken. Still, it's my baby, and as I never expected to make money
from it I don't really need any of those "benefits".

> There are more than a few Morse training programs available for free
> (at least for Win32.)

Yes, there are. So what reason could I possibly have for spending time on
creating this one ? Could it be that most of the others are not all that
good ?

> What is missing is a real solid suite of Morse
> tools available under a truly open license.

I don't miss that at all.

I have made a solid contribution to the continued use of Morse code. What
have you contributed, besides negativity ?

> It still remains to be seen whether or not this software is an example
> of "great work" or not ;)

Not for me. Why don't you download it and give it a try, instead of just
working real hard to find something to complain about ?

Anyone remember the Astro-Net on 3885 kc from the 1960s? It was composed
of group of amateur astronomers who nightly trained their telescopes on a
particular celestial object and would then have round-table comments
about that object. It was fascinating to eavesdrop on that net.

So you think fabricating false premises is fair game in the law? Is
this the quintessential advocate you've become? Shame on you, Glenn!

I am so ashamed Bob!

Let them eat Crow!

73 and Happy Thanksgiving.

W4ASX Commentary

This ham, whose license has been set aside, does not deny fabricating
charges that he transmitted to the FCC, instead suggesting deceit is
fair game when it comes to the regulation of our hobby/service. Yet it
is this very character issue that is determinative of whether K1MAN.
Glenn Baxter's fall from grace will leave him without a license.

I don't remember it, but I do remember reading about it in back issues
of the various magazines. It must have gotten some prominence if it
got enough mention that your subject header would jump out at me.

I think there was an article in CQ about them, but I'm not sure.

Obviously at the time, space and astronomy were more popular, or
at least more visible as hobbies. I can remember going to
the local park where one astronomy group would set up there
telescopes so the public could come by and view the stars and planets.

Nowadays, any such public viewings are far more distant, as they want
to get away from the city lights.

FRIEND,

Hi. Check out www.ChezBrandon.com ; it's awesome. As are you, Brandon is highly intelligent, knowledgeable, and good. May you have an awesome day.

A Succinct Warning: Elements of the Mossad, sated with cash from the murderous and destructive narcotics trade, are using some medical, pharmacy, and food service workers to murder men, women, and children. (A certain tasteless acid, for instance, causes cancer.)

Victor Ostrovsky's books BY WAY OF DECEPTION and THE OTHER SIDE OF DECEPTION: A ROGUE AGENT EXPOSES THE MOSSAD'S SECRET AGENDA offers elucidation, as does James Ennes, Jr.'s ASSAULT ON THE LIBERTY.

Again, may you have an awesome day, and check out www.reopen911.org and www.ChezBrandon.com

You bet. They started out when some of the guys noticed brief point-source bright flashes on the lunar surface. Used 80m to time whether the flashes were synchronized across large observation distances. If they were not, then the flashes were likely meteors in the earth's atmosphere; if they were synchronized, then the probablility that they were associated with an event on the lunar surface was pretty high.

The guys had scopes setup in the backyard and 100-foot headphone/microphone cables going back to the radio so they could observe and talk on the radio simultaneously.

They did reach a conclusion about the flashes....

The Ohio/Penn DX PacketCluster
DX Bulletin No. 737
BID: $OPDX.737
November 28, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NG3K, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, NN7A, K8YSE, N0KE, W0TT, DL1EK & The DX News Letter, F5NQL & UFT, G3SWH, G4EDG, HB9BZA, I1JQJ/IK1ADH & 425 DX News, I2YSB, JI6KVR & JA-IOTA Islands News, OH2BN, OK1DOT, PA1AW, SP5UAF, VA3RJ & ICPO, VU2DSI and VY2UR for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 18th/November, through Friday, 25th/November there were 237 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1MV, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9C, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/R, ROTUMA ISLAND. Operators Will/N7OU and Rob/W7YAQ will be active from here for the ARRL DX SSB Contest (March 4-5th) as a Multi-Single entry. They have received permission to stay on Rotuma and have made all of their travel reservations. They currently don't know their 3D2 callsigns yet.

4L, GEORGIA. Vakhtang (Vaho), 4L8A, will be active in the CQ WW DX CW Contest (November 26-27th) as a Single-Op/Single-Band (40m)/High-Power entry. QSL direct to 4L8A.

4U60, UNITED NATIONS HQ. The United Nations HQ station was on the air this past week using the callsign 4U60UN to celebrate the 60th anniversary of the United Nations. Operator was Masa, AJ3M. QSL via HB9BOU. They expect the next activity to be this coming Sunday, November 27th. Operator will be Seppo, OH1VR. Also, QSL via HB9BOU.

5Z, KENYA. Alex, 5Z4DZ, will sign the unique callsign 5Z1A during the CQ WW DX CW Contest this weekend. He will be a Single-Op/Single-Band (20m) entry. QSL via PA1AW, Alex van Hengel, Bovenkruier 18, 2995CA Heerjansdam, The Netherlands. More info and logsearch after the contest will be available at: http://www.pa1aw.nl/5z1a

6O, SOMALIA. Eight Italian operators will operate from Somalia for two weeks starting January 19th. Operators mentioned are: Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Carlo/IK1HJS, Vini/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA and Adriano/IK2GNW. They will operate as 6O0N (in memory of Adam Nuur Maxamed Islam) with three stations on all bands SSB, CW and RTTY. QSL via I2YSB, direct (Silvano Borsa, Vle Capettini 1, 27036 Mortara, Italy) or by the bureau (E-mail requests for bureau cards can be sent to 6o0n@i2ysb.com , a form is available on the Web site). The pilot for the operation will be Gianni, IS0VSG (is0vsg@tin.it). Further information, updates, pictures and logs will be posted to: http://www.i2ysb.com

6Y, JAMAICA (Update/Correction/Omission). Kenny/K2KW and Tom/N6BT will be active from here between November 26th and December 5th. Their activity will include the ARRL 160M CW Contest (December 2-4th) as 6Y0A as a Multi-Single entry. They also report that they will be running a 2 element vertical array with 76' elements with top loading and a large radial field... this will be the biggest 160 array they have installed to date. They will be running 1200w. Kenny reported to the "TOP-BAND" group this week: "Most operations will be on 160m. Nightly into USA/EU, and then at sunrise for JA/Asia/Oceania. We'll be active a bit during the 2nd night of CQWWCW, and then all during the week. We'll do a M/S effort in the ARRL 160m contest, which is the main focus of the trip. Thanks to JA3AAW, this information has already been posted on the JA TopBand reflector, as we will make a special effort at our sunrise for JA and Asia. When targeting JA, we'll transmit on 1825.5, listening down 2."

9H, MALTA. Operators Andrea/IK1PMR and Claudia/K2LEO will spend the next five weeks on Gozo Island (EU-023) as 9H3MR and 9H3LEO, respectively, now through December 21st. Look for 9H3MR to be mainly on the lower bands CW, 20 meters and the WARC bands. Look for 9H3LEO to be on RTTY. They plan to participate in the CQWW CW Contest this weekend as well as other upcoming

Contests (160m and RTTY). QSL via IK1PMR. Visit the following Web page for more info and updates: http://www.ik1pmr.com/dx-peditions/9h/

AT0, INDIA (Special Event). Arasu, VU2UR, informs OPDX that some VU amateurs will be active using the special callsigns like AT0JCB, AT2JCB, AT5JCB, etc....., all with the same suffix on or before/after November 30th. It will only last for a very short time. This is in celebration with the birth/anniversary of the Great Indian Scientist Acharya Jagadeesh Chandra Bose (JCB), who demonstrated wireless communication, much before G. Marconi. Watch out for these special stations and receive a special QSL card.
ADDED NOTE: Dattatry, VU2DSI, informed OPDX that he will be active using the special callsign AT0JCB for 24 hours on November 30th. Suggested frequencies are as follows:
10m - 28510 and 28490 kHz 40m - 7090 and 7035 kHz
15m - 21310 and 21270 kHz 80m - 3780 kHz
The QSL info and address for VU2DSI is available on QRZ.com.

C6, BAHAMAS. Brian, ND3F, is expected to be active as C6AQQ this weekend from Nassau (IOTA NA-001 and lighthouse WLOTA L-1115), New Providence, until November 29th. Activity will include the CQ WW DX CW Contest. QSL via his home callsign.

CT1, PORTUGAL. David, CT1DRB, will be active as CS1GDX during the CQ WW CW Contest as Single-Op/All-Band/Low-Power. QSL via CS1GDX, GPDX, Portuguese DX Group via the bureau.

CT3, MADEIRA ISLAND. Jose, CT1BOH, will be active as CT3EN in the CQWW CW Contest from the "Madeira Team's" station located near Funchal in Santo da Serra. This station was used last CQWW SSB Contest as CT3YA and previous results gave it a 1st place World Multi-Multi.

HS0, THAILAND (News). Charles Harpole, K4VUD (currently HS0ZCW), states, "Remember that all regular HS stations are limited to small parts of the low end of 80m and 160m and only during contests... see RAST Web site for details." He also mentions that two HS RAST club stations are currently licensed to transmit on the WARC bands... HS0T and HS0AR at least through the end of this 2005 year.

IOTA NEWS.....
AS-053. Operators Choon/E20HHK, Mann/E20NTS, Cy/HS0GBI, Winit/HS1CKC, Yong/HS4BPQ, Son/HS6NDK and Pong/HS9IFG will be active as HS0T from Ko Lanta Yai Island and lighthouse (WLOTA L-0946) between now and November 28th. Activity will be on 160-10 meters, the WARC bands included, CW, SSB, RTTY, SSTV and PSK31. QSL via HS6NDK (QRZ.com).

AS-113. Steve/G4EDG and Jeff/G4ELZ will be signing /SV8 from a hilltop location on Kithira Island, December 4-11th. Activity will be CW only with two stations. They will be using a FT100 and a FT817 into G3HCT vertical and modified dipoles, running 100 watts output. QSL via G4ELZ.

KP2, U.S. VIRGIN ISLANDS. Ken, WB2ART, will be active on St Croix, USVI, January 13-21st. Activity will be (mostly) PSK31 on 20 meters, but he can operate any band 40-10 meters. QSL via his callbook address with SASE.

OA, PERU (Update/Correction). Daniel/DL5YWM and Eric/W0TT will operate from the Radio Club Peruano in Lima, from now through November 28th. Their callsigns will most likely be OA4/DL5YWM and OA4/W0TT. QSL via home calls. Additionally, they plan to operate OA4O or OC4O on all bands in the CQ World Wide DX CW Contest. QSL via OA4O.

OH0, ALAND ISLAND (Update/Change). Look for Ville, OH2MM, to be active as OH0E in the CQ WW DX CW Contest as a all band entry.

OJ0, MARKET REEF (Daily Reports Filed By Martti, OH2BH, From The OJ0 Trip). Before and during the November 2005 Market Reef DXpedition (OJ0B & OJ0J), Martti, OH2BH, one of the participants, is filing daily reports from the area, reflecting his impressions and those of the other team members (OH2PM, OH2BO and OH0RJ) about each day's activities. For communicating his continuing stories, Martti is using his Nokia 6630 camera cellphone which also makes it possible for him to send high quality pictures. These are published on a daily basis, along with Martti's firsthand reports, on the Internet at this address: http://www.kolumbus.fi/oh2bn/pagemarket.htm

QSL INFO AND NEWS.....
CURRENT NOMINEES FOR TOP 5 QSL MANAGER. John, K1XN, from the GoList has announced the following nominations as of November 21st: DJ2MX, DL7AFS, DL7CM, DL9ZB, EA4KB, EA5KB, EA7FTR, F6AJA, G3SWH, G3SXW, G3SXX, G3TXF, HB9BOU, I2MQP, IT9DAA, IT9YRE, IZ8CCW, IZ8CGS, IZ8FWN, JE1LET, K1BV, K2PF, K3PD, K8LEE, KB6NAN, KU9C, LU4DXU, M5AAV, N1WON, N2OO, N4AA, N4XP, N5FTR, N6RT, ON5NT, PA3GIO, RU6FZ, RW6HS, RZ3EC, UA3DX, UA4WHX, VE3HO, VE3XN, VK9NS, W2GHK, W3HNK, W5UE, WA3HUP, WA4JTG, WA4WTG, WV7Y and YB9BU.

U.S. POSTAGE GOING UP. Look for U.S. Postal rates to go up effective January 8th. Postal rates and fees will increase an average of 5.4 percent, the postal service announced Monday, November 21st. The price of first-class stamps will increase from 37 cents to 39 cents. Postage for postcards will increase a penny to 24 cents. It is the first postal rate increase since 2002. Airmail stamps will go from 80 cents to 84 cents. Please remember this increase when you are QSLing.

LOGBOOK OF THE WORLD. Robert, HB9BZA, informs OPDX that the Logbook of the World (LoTW) users list has reached 10,000 callsigns! He states, "The (unofficial) list I've been working on for several months just reached this important milestone. It can be downloaded at this URL: http://rchalmas.users.ch/lotw
A listing by DXCC entity was added at this occasion and the site has been redesigned. Any LoTW user can help make this list even bigger by sending me his list of LoTW credits; instructions to do so can be found on my site."

NOT THE QSL MANAGER. Phil Whitchurch, G3SWH, informs OPDX that he has been receiving QSLs for Z21CA. He has never been the QSL Manager for

this station.

R1MV, MALYJ VYSOTSKIJ ISLAND (MVI). The R1MVW log search is now available at: http://www.r1mvw.ra6lbs.ru/eng/log-search.php
QSL via DK4VW (for direct cards - maildrop) or via the UA2 QSL Bureau. Anyone donating 100 USD will be listed on the QSL card. Also, a special color QSL will be available for anyone donating 5 USD with their QSL card.

SP, POLAND (Special Activity). Tom, SP5UAF, reports on two upcoming special event stations to be active:
SP0TPAX - Look for special event station SP0TPAX to be active in December and then again in April. The activity is organized by the SP DX Club. Expect activity on all bands (LF, HF, VHF, UHF) on all possible modes. QSL via SP7DQR (by the bureau or direct). This activity is to celebrate the first Polish amateur radio contact to a HAM station from outside Poland in 1925. Tadeusz Heftman, using the call SP0TPAX, made a QSO with N0PM - it was a station from the Netherlands. A few months later, in April 1925, TPAX made a QSO with an American HAM who was using U1AAO as a callsign. PLEASE NOTE: Tom, SP5UAF, is look for any HAM who perhaps has any information about the historical callsigns N0PM or U1AAO. Contact Tom, SP5UAF, at: tomek@sp5zcc.waw.pl

SP80QSL - Look for SP80QSL to be active from December 1st through mid-January. This activity is organized by the Warsaw District of the PZK (Polish Amateur Radio Union). QSL via SP7DQR (by the bureau or direct). Activity is to celebrate the founding of the QSL Bureau in Poland. In 1925, Jan Odyniec and his brother Stanislaw (both non-HAMs, but did a lot for HAM Radio in Poland) founded the first QSL Bureau. Tom, SP5UAF, states, "As far as we know it was the first QSL bureau in the world. The first QSL bureau was helping to exchange QSL cards and it was also designing and printing QSL cards for Polish HAMs."

TI, COSTA RICA (Correction). Phil, N0KE, reports that he had a "TYPO" in the information he sent out about the activity from the TI5KD station for the CQ WW DX CW Contest. In the contest, Phil plans to be active as TI5X mainly on 15 meters. He also mentions that Alan/K0AV will be active as TI5N on 40m (not 20m) and Martin/K2PLF will be active as TI5A on 20 meters.

V3, BELIZE. Art, NN7A, will operate as V31JZ/p from South Water Caye, Belize (IOTA NA-180), January 11-15th. This will be a one-person operation with 100 watts, and a vertical and wire antennas. Operations will be CW on 40-10 meters including the WARC bands; some 80m and 160m. There will be some possible SSB activity on the 20/15 meters IOTA frequencies if conditions permit. IOTA NA-180 was opened as a new IOTA by Art and Mike Sharp, NG7S / V31RL, in February 1993. This will be Art's 6th operation from South Water Caye, and his 12th trip to Belize since 1988. QSL via NN7A, by the bureau or direct to: Art Phillips, P.O. Box 201, Flagstaff, AZ 86002 USA. There will be no on-line logs, and E-mail contact will not be possible while on the island.

ZK1, SOUTH COOK ISLANDS. Operators Bill/N7OU and Rob/W7YAQ will be active
from Rarotonga, February 16-24th. They currently don't have their callsigns,
but they have made their plane and hotel reservations for this DXpedition.
Their activity will include the ARRL DX CW Contest (February 18-19th) as
a Multi-Single entry. Outside of the contest, they will be on all bands
80-10 meters, mostly CW, but there may be some SSB too. More details are
forthcoming as it gets closer to their operation.

The following stations are expected to be active in the
CQ World Wide DX CW Contest (November 26-27th, 2005)

Thanks to Bill, NG3K, for providing OPDX readers the following
consolidated listing of the participants in the 2005 CQWW CW Contest. For
a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/cqc2005.html

Brian, K3VR, traced a particularly offensive, pornographic post about me to Easley, South Carolina. The post consists of fabricated and odious charges.

Easley, South Caroline is the home of one Rich Whiten, ex-WB2OTK. When Brian confronted him, he did not deny it. So, we've unmsked this anonymous poster playing havoc on this thread and others.

Bob Sherin, W4ASX

"abotu"? BWHAHAHAHAHAHAHAHAHAHAHAHA! You can't even talk in English,
Markie the kiddie fucker.

>
> 2test wogie

Commode Buzz Cornholer doesn't know about radio either, except that he
can get on the CB and solicit blowjobs like his mommy does down at the
truck stop.

Secwet Wogie has yet to explain his absence of almost two weeks. Some say he was hospitalized with heart problems and others maintain that he was undergoing advanced AZT treatments.

It is highly likely that Wogie is HIV positive, given his past history. So, Wogie, which is it? Is your 50 year old heart going belly up or have you developed an immunity to the AZT treatments?

No need to lie about it, either. I'll give Chief Stenger a call and he will fill me in.

From ARNewsline #1476:

ENFORCEMENT: WRL / GALAXY ELECTRONICS FOUNDER MEYERSON ASKS FCC NOT TO RENEW K1MAN'S LICENSE

Another well known ham has written to the FCC asking the agency not to renew the license of American Amateur Radio Association founder Glen Baxter, K1MAN. In a letter to FCC rules enforcer Riley Hollingsworth that's been posted in cyberspace, Leo I. Meyerson, W0GFQ, charges that Baxter has been distributing unsolicited commercial e-mail that uses his name to promote business interests. He goes on to say that his now public letter is intended to let the FCC and the public know that Baxter has no authorization to use his name, photo nor that of Meyerson's wife. Nor does he support any of Baxter's activities, business or otherwise.

For those of you new to the hobby, Leo Meyerson, W0GFQ, is a walking legend. He was the founder of World Radio Laboratories and Galaxy Electronics. His simple but effective Globe Chief and Globe Scout transmitters were the first station for many new hams in the 1940's, 50's and 60's. He was also among the first to bring high frequency transceivers to ham radio through his Galaxy product line.

Meyerson's letter goes on to say that he is aware that the FCC has issued a $21,000 Notice of Apparent Liability against Baxter's Amateur Radio station. He ends by asking the Commisson to not renew Baxter's license which has been set aside by the FCC.

Meyerson's letter to the FCC concerning Baxter's pending license renewal is the second such note this year. As previously reported, retired CBS Newsman Walter Cronkite, KB2GSD, wrote the FCC last June after Baxter allegedl;y refused to stop using 1996 era promotional material containing Cronkite's voice. Massachusetts Governor Mitt Romney dismissed the role of Amateur Radio operators in emergency communications during a televised "town meeting" program on WCVB's "When Disaster Strikes: Segment Two." The program featured public safety and volunteer organization officials from across Massachusetts among its audience.

Host and moderator Natalie Jacobson asked an increasingly-agitated Governor Romney questions about communications interoperability, and communication without commercial power. Romney was next asked by Jacobson, "...so does it come down to ham radio?..."

The Governor replied in a disgusted tone, "No, we don't need to deal with ham radio operators..."

Embarrassed public safety officials later tried to put in a good word for Amateur Radio. National Weather Service Warning Coordination Meteorologist Glenn Field was prepared to state the importance of Amateur Radio, when Salvation Army Colonel Fred Van Brunt was called upon. Van Brunt remarked about his organization's quest to improve its communications capabilities and how Amateur Radio has aided his organization. "The ham radio situation helps a great deal," he stated.

"I have already written and submitted a letter to the Governor's Office," wrote Eastern MA Section Emergency Coordinator Rob Macedo, KD1CY. "I have also written an email to Natalie Jacobson."

ARRL Section Manager Mike Neilsen, W1MPN, sent a section-wide email to all Eastern MA ARRL members describing the incident along with actions he and his staff were taking to mitigate the situation.

"[Romney's] attitude about us sets an unfortunate tone within the state's executive branch," wrote Neilsen. "As a former military officer, I see this as a failure in leadership. My immediate concern is our working relationship within the [Massachusetts Emergency Management Team] environment." Neilsen intended to address the Governor's comments as "an urgent matter" at a meeting on November 17 with Don Carlton from the Emergency Management Agency.

"I was very disturbed about what the Governor stated on the program," wrote Ron Wood, W1PLW, the section's Public Information Coordinator. "It does show that more work is needed by all hams in the section. It's a great idea to write letters explaining the good we do." Wood is attempting to schedule a meeting with the Governor's office so that EMA ARRL staffers might discuss the matter further.

Tom Kinahan, N1CPE wrote that Governor Romney's comment has made "a PR problem" for Kinahan in his role as MA State RACES Officer.

"I've got a roster of over 150 Amateur Radio operators that support local communities, and those of us that directly support the state government. There are at least double that in terms of people that are actually out there that I don't have formal paperwork on that support Amateur Radio emergency communications in some organized manner... The Governor has said that he 'certainly doesn't need to rely on ham radio' -- where does that leave the RACES program now?"

Steven:

Where are you located that they won't sync?

When propagation is good, they should sync from anywhere on the US mainland.

I should know, I'm located in Hawaii, and my wife bought one of the damn things and it would reset itself about every other day. This is a problem, as the clock doesn't have a selection for Hawaii Standard Time, only for the time zones on the mainland US. The typical scenario was: Set the clock to local time, set the alarm, go to sleep. Sometime during the night, clock resets itself to Pacific Time, and the alarm goes off two or three hours early (depending on daylight savings time). As malfunctions of any electronic item in the house are assumed to be my fault, I was typically blamed for the problem.

I finally opened it up and disconnected it's antenna, so it can't resync any more. The actual timekeeping is pretty good, no large amount of drift noted so far, so it is still a decent "stand alone" clock. The display showing it trying to get the time signal is comical at times, though. Of course, the bog box store she bought it from should have never sold it here, because I'd guess most of them eventually get returned because they keep changing time....

Given we are over 2300 miles from the west coast, plus the distance to Boulder, you shouldn't have any problem anywhere on the mainland unless you live in the back of a cave or under water. If the clocks are just bitching about not having sync'd, I'd just ignore them. If they are drifting so much it matters, I'd get rid of them if they won't sync.

Good Luck

3334. Electric Lines and Gas Pipes To Carry Internet To Princeton Illinois

Electric lines and gas pipes will carry Internet to Illinois town
By Jon Van
Tribune staff reporter

November 26, 2005

PRINCETON, Ill. -- Starting in December this town of 7,500 will begin offering high-speed Internet service over the electrical lines that power the city.

It is among a handful of communities nationwide to plunge into a new technology called broadband over power lines, or BPL, that competes with Internet connections provided by telephone and cable TV operators. Combined with wireless technologies, broadband service delivered over power lines--and perhaps one day even through natural gas pipelines--raises the likelihood that going online anywhere at any time for very low cost will soon be a reality.

The Princeton service, which began testing this spring, is being watched by small communities across Illinois. One member of the Illinois Commerce Commission hopes other towns will experiment with BPL to spread Internet connectivity and drive down costs.

About 15 customers are served by Princeton's BPL test deployment, which demonstrates the service is robust and works well, said Jason Bird, superintendent of Princeton's municipal electric utility.

"From the utility's standpoint, this hasn't been difficult," he said. "The equipment is similar to what we work with every day."

Customers seem to like the service, especially the in-house portability BPL offers. A computer can move from one room to another and go online simply by plugging its modem into any electrical outlet in the house.

"I'm much more active on the Interent now because the speed is much better than with dial-up," said Leslie Lund, who began using BPL in March. "I don't get interference, even when my husband uses his power tools."

The electric line connections get their Internet signals from a 12-mile loop of fiber that Princeton installed last year as a means of attracting industrial development. After one factory left town in 2003 and the manager of another complained about the town's lack of advanced communications infrastructure, the city decided it needed fiber, said Mayor Keith Cain.

"We already had our own electric utility, so that gave us a real advantage," he said. Since the city installed fiber and started testing BPL the local cable and phone operators upgraded their systems and cut service rates, he said.

One downside to Princeton's BPL experience has been an inability to get enough equipment to begin the commercial rollout sooner, Cain said. The town's BPL vendor ran into financial difficulty and stopped producing equipment while it went into reorganization.

Under new ownership, the vendor now says it can ship the products needed for the rollout, said Steve Brust, vice president of Connecting Point Community Centers, the Internet service provider that manages Princeton's broadband service.

"The equipment works fine, but it's proprietary," Brust said. "There are a lot of companies in BPL right now, but there are no standards and no one company dominates the market."

Lack of standards is common with any new technology, said Raymond Blair, vice president for BPL initiatives for IBM Corp. Broadband technologies like Wi-Fi that are based on standards enjoy popularity because the equipment is interoperable and less expensive than proprietary systems.

At least three industry-based committees are working toward BPL standardization, Blair said. The emerging industry should benefit from their work within a year or two, he said.

"The best case for BPL right now lies in creating a smart electrical grid," Blair said. Utilities can spot trouble, read meters, improve efficiencies and generally boost reliability once they install fiber to monitor their grids, he said.

Once BPL standards are in place, equipment costs will drop, making a stronger economic case for offering high-speed Internet to residences, Blair said.

Robert Lieberman, a member of the Illinois Commerce Commission, said the state has $5 million it will award to projects intended to extend Internet connectivity.

There will be another $5 million available next year, and he hopes that some BPL projects will receive a portion of that Digital Divide infrastructure funding.

Also, Lieberman said, the ICC and state lawmakers need to provide incentives to electric utilities to install smart grid equipment that makes BPL to residential customers possible. Texas lawmakers recently adopted such incentives, and legislators in New York are considering doing so, he said.

Power lines aren't the Internet's only new avenue into homes. There's also interest in using natural gas pipelines.

Broadband in gas, or BiG, has been proven to work in concept, although field trials haven't yet been launched, said George West, a senior analyst with West Technology Research Solutions, a market research firm based in Mountain View, Calif.

BiG would rely upon ultra-wideband radio waves traveling through gas pipes to bring Internet to customers. The Federal Communications Commission approved ultra-wideband applications a few years ago but requires they operate at very low power to avoid interference with wireless phones and other appliances.

Pumping ultra-wideband signals along gas lines buried underground would shield them from interference, enabling them to operate at higher power, West said. "BiG has the potential to serve 18 million homes by 2010."

The ICC's Lieberman said he is intrigued by BiG.

"I'd love to see a project with People's Gas or Nicor to test this," he said. "My theory is the more pipes you have to bring the Internet to customers, the better for everyone."

You see, news readers, we are seeing that K1MAN and supporter consider deceit and libel funny. I say that both are qualities disqualifying individuals from being ham radio operators.

Rich Whiten is already ex-WB2OTK; Glenn Baxter's renewal of K1MAN has been set aside. With one foot on a banana peel and the other in the grave, declaraing deceit legitimate in regulation is Baxter's deathknell.

This is just great! Next they will be offering DSL through the sewer lines. But, then again, this would be redundant!

Fire up a full-power 1500W RTTY transmitter on 80 meters next door
and see if she can make the same statement.....

I don't know about other areas but
here in NC, our gaslines are plastic.

Even the larger mains are all plastic
pipe.

BPL will loose money bigtime, and
the utilities that go online with it will
siphon money from other ratepayers
to pay for the starup and the shutdown of
bpl.

FINALLY!!

THE TRUTH!

The public has known for a long time how useless ham radio is, not to
mention the low life types who becomes hams. Think I'll have to write a
few letters myself. most of the spectrum 50 mhz and above should be
turned over to commerical interests.

GOOD FOR YOU, GOVERNOR!!

Just wait until Ma Bell finds out. After all the telephone lines are
upgraded to fiber optic, they will start selling power over TP.

The best way to gain understanding in the different modulation techniques is to view active signal with both an oscilloscope (time-domain) and a spectrum analyzer (frequency domain.

By varying the crucial parameters (AM depth and so forth), you can get a really good feel for how the CW signal is altered when you change them.

++++++++++++++++++++++++++
Typical politico or either party.

Hasn't a clue how the states com systems works, get frustrated by the
hard
questions, and lashes out when he should has kept quite. Sadly he will
in all
probability not suffer for his stupidity.

He ought to be ran out of office on a rail.

This attitude is why I no longer participate in ARES, SkyWarn or any
other
activity that has ANY government connection.

PICON be damned.

I have spent enough nights looking for tornados, enough weekends trying
to
"interface" with various government agencies to deliver messages during
floods,
and enough cold days running MDs and nurses around when the snow/ice
shuts
the town down.

Terry

Think about it: State: Massachusettes; Politician: Mitt Romney.
Doesn't that say it all? This isn't the first time his head (or
lard-ass Ted Kennedy's head for that matter) has been impacted up his
ass! Why do the people in this state keep electing these bottom
feeders?

++++++++++++++++++++++++
Somewhere I have a link to a professional design magazine that details
the only comm links to work for 3 or 4 weeks after Katrina were the
ham's.

The NG, FEMA and Corp of Engineers were reduced to using runners
to move messages.

I will dig out the link and post it in the next several days.

I don't normally cut and past entire atricles, but this one is
important.
It shows why Ham radio is far from "useless'.

ALL TOP 20 >>

A few months ago, NBC's Tonight Show staged a race between a pair of
ham-radio operators with Morse-code keys and a couple of kids with
text-messaging cellphones to see who could communicate faster. The hams
won hands down, proving, in the minds of some, that old technology
could hold its own against new. In recent days, ham radio was put to
the test again by Hurricane Katrina. This time, however, lives were at
stake.

In the world of design engineers and electronics in general, change is
essential. Designers work diligently to make the fruits of their labors

obsolete almost before they see daylight. The turnover in technology is sometimes like a flood, with old being washed away by new over and over. Often, the new beats the heck out of the old. But there are times when old isn't necessarily bad; in fact, sometimes old works when new doesn't. And then we're glad that old is still around, or at least we should be.

Wireless technology, while relatively new to many consumers, is of course not new at all. A few (very) old-timers remember the original "wireless" of radio. The revolution wrought by the pioneers of wireless changed the world then, and the technology behind that revolution has been re-invented and re-applied time and again. Its pre-eminent incarnation today is our near-ubiquitous wireless communications infrastructure, which has freed us from the shackles of landlines and made our mobile lifestyles possible. Technology truly is great stuff.

Until, of course, a monster hurricane comes along to render it nearly useless. Here we see a scenario in which a flood literally swept away the new. As Hurricane Katrina's fury hammered the Gulf states on August 29, the communications infrastructure took a devastating hit. Telephone service, including wireless, became at first intermittent and then unusable in many localities. Where there was phone service, 911 switchboards were often unreachable due to the massive volume of calls. The response of local authorities, now termed "confused" by deposed FEMA chief Michael Brown, wasn't helping much. The Gulf Coast was about to descend into darkness, chaos, and, worst of all for many, silence.

But proponents of the old were at the ready. The "old," in this case, is ham radio. In the eyes of the "man on the street," ham radio has a pretty stodgy reputation. Aren't hams still using Morse code? Don't some of them use radios with tubes, for goodness sake? What the "man in the street" probably doesn't know is that it was amateurs who advanced the radio arts early in the 20th century. Down through the decades, amateurs have embraced (and often driven) all of the innovations in wireless technology, up to and including all digital modes and the Internet. But many have stayed in touch with their roots, which is good old-fashioned analog HF operation. And while amateurs have a longstanding tradition as innovators and experimenters, they also have a mandate that comes with their licenses: to be ready, willing, and able to provide emergency communications whenever and wherever they're needed.

As Katrina bore down on the Gulf region, amateur radio operators, under the aegis of the American Radio Relay League's (ARRL's) Amateur Radio Emergency Service (ARES), prepared to swing into action with emergency networks that would run health-and-welfare traffic into and out of the disaster zone. As early as the Monday following the storm, hams throughout the hurricane zone were putting emergency stations on the air. In one instance, hams were instrumental in the rescue of 15 people clinging for life to a New Orleans rooftop. Meanwhile, in Alabama, amateur SKYWARN weather nets kept the National Weather Service apprised

of conditions throughout the state. In hard-hit sections of Mississippi, hams running off generators and with makeshift antennas were the only means of communication, getting word to out-of-state friends and relatives concerning their loved ones.

There were numerous other instances of hams helping those who were not simply inconvenienced by the storm, but whose lives were in imminent danger. Now that things have calmed down in the Gulf region, many of the emergency nets have stood down. But hams continue to serve the public in the many areas that are still without power or phone service.

As our nation collects itself in the aftermath of the Katrina disaster, President Bush has promised federal reviews of what went right and what went wrong. One of the findings of those inquiries should be that the federally-instituted Amateur Radio Service, which functions under the licensing authority of the FCC, stood tall when the country needed it.

Amateur radio currently faces various threats to its existence. Chief among those is the advent of broadband-over-powerline (BPL) technology, which, if broadly adopted, has the potential to cause widespread interference to HF communications, not just for amateurs but for other services that use the HF spectrum.

Amateurs and the ARRL have made a lot of noise about BPL, asserting that it could seriously hamper their efforts and those of relief agencies such as the Red Cross and Salvation Army, in the event of a disaster such as Katrina. It's rumored, though, that the same FCC commissioners who have given their blessing to BPL field trials will now take a much harder look at the technical issues concerning BPL and its interference potential in the HF spectrum. Let's face it: The federal government didn't handle the emergency in the Gulf very well; it'd be prudent for it not to sanction a technology that could impede one of the few things that actually worked.

Many readers of this newsletter are amateur radio enthusiasts. If you are, and if you haven't already done so, consider writing your congressman to express your concern about the future of the Amateur Radio Service, especially in light of its outstanding efforts in recent days. Remind your elected representatives that a vibrant and unimpeded Amateur service can and will be a lifesaver when disaster strikes. Also, consider how you yourself might help. What if a hurricane, tornado, or earthquake ravages your area? Are you prepared to get on the air without relying on the mains to handle emergency traffic? Get in touch with your local amateur-radio club and find out how you can pitch in.

Your cell phones and wireless routers are indeed great stuff, but so is a good old HF transceiver. We shouldn't always be in such a hurry to let the flood of new technology wash away the old. The geek down the block with all the antennas on his property could turn out to be your best friend someday. Because sometimes, old trumps new.

You can e-mail David Maliniak at dmaliniak@penton.com.

At that distance you don't even need a 100 watts to elimate their interent completely. The old saying if it causes interference it can be interfered with. I had a leaky cable company amp on the power in front of my rural house. And every time I keyed up on 2 meters everyone up and down the street lost their cable. And they did hear me clear as a bell too, turned out there wasn't anything any government agency would do ecept tell the complainers to call their cable provider. They had it fixed in hours after that. They have no protection from interference on a closed system and had they interferred with my 2 meter station they would have had to shut it down immediately as they are not to interfere outside of their system period.
My neightbour had one of those internal broadband system for distributing interent with in his house over the power lines. I caused him so much grief and it turned out the units where not legal in Canada or the USA. Turned out they were a cheap Chinese copy of a system that was approved but operated in near the 2.4 ghz on a very low level hardwired system. He called to file a complaint and the Industry Canada (Canada's form of the FCC) they wanted the number off the sticker on the back of it and then paid him a visit a couple of days later. I knew the inspectro so he stopped over for a visit and a coffee and told me all about what had happened. It pays to have friends in the right places, hi, hi.
I don't think this BPL is going to make it as the technology is not yet prefected to the point where they will not cause interference on very broad spectrul of the hf, vhf and uhf bands. Motorola has the means and the technology but their system works up in the giga hertz where the bandwidth can be used without interferrring with hardly anything or anyone. Why do you think it's been outlawed in Japan and Austrailia, specially Japan the most advance electronics country in the world. do you honestly think it will last in North Amercia in either country. Do you remember how much of the radio frequency spectrum is assigned to the military, well do you think they will tolerate any kind of interference at all? Not likely and they will make darn sure you don't have the ability to in the future as well.
And then there are the other countries of the globe, it is written that no country shall willingly or unwillingly cause interference with the radio service of another country. Also there is the hf radio broadcast spectrum that is very much a part of the 40 meter band, do you really think they will tolerate interference. It's the bottom line, if the USA and Canada adopt the idea that we can interfere with anyone else, I wonder how long our exportable products will be sold in those countries. Without exports where will our economies go, who's going to be able to afford to pay for an ISP who caused you to loose your job.

Sorry about the long windedness, but this is going to disappear, for one do you really think the airline industry will put up with an ISP interfering

with their comunications, not likely. And that's just one example, there are the police, fire and ambulance, the FBI, CIA, RCMP, FAA the list could go on and on.
Before long those that choose to turn it on will have it shut off more than it's on. And then it becomes a black hole for the investors.
If they can put internet 100 miles outside of Anchorage Alaska, or on Elsmer Island, which is 300 miles south of the North Pole where there are no hydro poles or wires, they can put it anywhere without interfering with anyone.

I'm gone

*Yes, most call centres are scaled down to just be useful in normal situations due to trying to compete on a budget. As in most thing these days its money over everything else. The services always seem to come second. Especially in the National Health Center here in Blighty.

*My arguement also for the continued usefulness of CB radio. Not a replacement for the mobile phone or internet but another communications option especially if the s_it hits the fan. Phones and the internet cant do what the CB does, and vice versa so why not embrace the three. Amateur doesnt need embracing as its there and its not for the general public. It use just needs accepting by the authorities a bit more even though its been proved time and time again.

3357. In Austria Amateurs protest against DSL over powerlines.

Newsgroup: rec.radio.amateur.misc
Date: 2005-11-27 13:23:46 UTC
From: Jan Panteltje <pNaonStpealmtje@yahoo.com>
Message-ID: <dmcc17tef1@news.datemas.de>

Sending DLS (Internet) over powerlines uses either
1.8 to 32 MHz
or
3 to 21 Mhz.
Of cause in the first case CB is also affected.

The signal strength was measured by the gov, and
found to be 111.639 times the allowed limit....
They had to reduce it a factor 111.639 to make even digital radio
reception (DRM (Digital Radio Mondial)) possible.

New tests are running, here is an original article in German:
http://www.heise.de/newsticker/meldung/66673

As internet over powerlines is also considered in the US,
I think US amateurs and CB people should strongly protest
too.

These guys got the license to operate 'because it is cable,
and that is not regulated like radio'.
Of cause powerlines are not shielded, and high up there, the
perfect VERY long antennas....

;-) Maybe if the conditions are good you will be able to get free internet
from Austria in the US. ;-)

Actually, any Boy Scout can read code. Hams have their own jargon,
for efficiency, but one need not be a fully licensed ham to read a code
message. One only need be informed. That can be anybody.

While that may seem to be true, the chaos on the 11 meter band is
evidence of just how unworkable 11 meters would be in an emergency. Yes,
it would work, and yes, anyone would be able to use it. However, the
advantage hams have in an emergency is the discipline and understanding
of protocols to be able to get a message through crowded bands, without
creating any new interference. Most untrained operators, not all, but
most by far, would simply get on the radio and start talking regardless
of who is there first. This, coupled with CB's limited local range would
be more of an impediment than trained hams working limited allocations

in fewer numbers. In an emergency, the 11 meter band may simply not be sufficiently open to make CB a practical alternative to the amateur service.

Amateur operators would have a power advantage, as well, exceeding 200 times the CB user's power output.

Non hams do not understand the long standing traditions of the amateur net--a group, or network of hams working together to get messages from any part of the world to any other part of the world, either acting as phone relay stations or as traffic handlers relaying content. Those networks have existed since Maxim, and are already in place. They exist from coast to coast on all bands. CB does not have such a tradition. Primarily because long distance communication, by the rules of the charter of the service prohibit long distance. But realistically, CB operators are simply not organized into networks ready and willing to move traffic. Most REACT teams are as unable to get a message through a crowded band as any other operator. 5 watts when untrained users are screaming for assistance all at once is not sufficient to overcome the noise.

Further, ham operators are uniquely able, and qualified to improvise communications where non exist. There are bands throughout the spectra with propagation characteristics unique to needs of the moment. Hams know where and when these characteristics are available. CB users do not. Ham operators are legally permitted to improvise equipment, as well, often cobbling together equipment of many types, modifying as they go, to create the combination of hardware necessary to their needs. All they have to do is operate within the bands, and refrain from creating interference. Short of that, only the individual's technical limitations are a factor. CB users, however, frequently don't have the technical expertise to improvise. Even if they did, such improvisation on the 11 meter band is prohibited. Only type accepted hardware is permitted, and it may not be modified by the end user. Few CB operators are licensed to service their own radios. In an emergency, they'd be limited by the functionality and serviceability of the hardware at hand. Ham radio operators, on the other hand, would have no limitations except that they must operate within the bands, and the emissions must not create interference.

So, while it may seem true that CB is open to everyone and a far better option that a licensed service, reality begs to differ.

What's unfortunate, is that the CB mentality has begun to affect the amateur service, as well. The sense of community and public service has been eroded by those who don't know, nor do they care, about the public service aspect of amateur radio. And the responsibilities of being a part of the service.

>
>> Now that things have calmed down in the Gulf region, many of

>
> How are they doing this? in what way? Who are they talking to?

Emergency generators in private hands are still considered a rarity
by most. Not the case. I live in Suburban Chicago. Half of my neighbors
have generators. I have a 20,000 watt generator that I can kick in when
the power goes down--a trick I learned from my grandfather. Hams who
participated in DXpeditions, or field days often have generators to
power their rigs. As a second tier backup, I"ve got a 1000 watt inverter
that I can power with the battery on my car. With the heavy duty three
phase alternator I installed, I can keep that battery alive simply by
starting the car and letting it run for an hour or two every so often.

If one wants to, there are always methods of being prepared for
power outtage.

As for who they're talking to? Other hams. There are a lot of them
out there. And many in any given community.

>
>> Also, consider how you yourself might help. What if a hurricane,

>
> *I will be ready on my good old trusty CB to broadcast to the masses.

Exactly my point. Broadcast is not the goal. Point to point
communication is. And that's where hams excel. Because they know how to
work together, not only to limit interference, but to move traffic.
They're organized. They're disciplined. They don't broadcast to the
masses. They have a plan, and it's already in place. You are but one
with a radio and an intent. So are hundreds of others in your region.
None of you have gotten together to create a strategy to handle
communications in an emergency. Chaos threatens.

A good analogy is the a football stadium. Organized individuals
could move a message around the stadium during a game. While those
'ready to broadcast to the masses,' would simply begin calling out to
whoever hears them. As they do when the ball nears the goal.
Organization would get an intelligible message through the noise. While
the unorganized would BE the noise.

Your trying to tell me all boyscouts know morse code?? are you sure?? so
youd keep boy scouts in these troubled areas would you... Only a few people
can understand morse.

//snip//

One sec. You are also simply going on about civilians... where do the police
come into it? Their radios are knocked out and they need communications.
They cant use amateur bands because they arent licenced.... they can use
CB's though cant they?

> not all, but
> most by far, would simply get on the radio and start talking regardless

I dont think you understood what i meant. I didnt mean use CB instead of
Amateur. I cant see why the both cant be used side by side.

> Amateur operators would have a power advantage, as well, exceeding
> 200 times the CB user's power output.

Dont forget were talking about local'ish communications here not wide
ranging communication. The information only needs to be put out to somewhere
with power and unaffected. Also power wise theres a good few set ups on the
CB band out there with plenty of power. You go on about legally but were
talking natural disaster times here and i doubt if everyone sits reading
rule books to see what they can do.

> Non hams do not understand the long standing traditions of the

Long distance communications again... missing the point again...

>Primarily because long distance communication, by the
> rules of the charter of the service prohibit long distance. But

Like i said, side by side not instead of. Dont forget a lot of these
screaming untrained users wont be able to use their sets due to homebase
power cuts and in NO case, flooded vehicals but it wouldnt take long to
organise some sort of communication set up via CB in these instances. It
only needs a few experienced CB operators to make it viable. There are some
clever organised CB groups out there which you overlook just as the
politician chappie in charge tried to brush off radio Amateurs... we dont
need their help... remember? Your doing exactly the same thing. The more
communications channels in an emergancy the better.

//snip//

CB users, however, frequently don't have the technical

You dont need adapted hardware. Were talking local communications here not
trying to get out round the world. The CB service is perfectly adiquate for
this.

> So, while it may seem true that CB is open to everyone and a far

Pedantic reply there. You knew perfectly well what i meant which was to get information about and communicate to those in range (remember the repeaters being knocked out)

And that's where hams excel. Because they know how to
> work together, not only to limit interference, but to move traffic.
> They're organized. They're disciplined. They don't broadcast to the
> masses. They have a plan, and it's already in place.

Bollocks........ only the Hams who have been trained for such events have plans in place

You are but one
> with a radio and an intent. So are hundreds of others in your region.

Internet wouldnt be an issue... knocked out remember. As will have most of the incapable users of CB. Only the ones prepaired "with a plan" would be on air ready to organise. Or do you think anyone who isnt an Amateur couldnt organise anything. I know a few Amateurs who couldnt organise their breakfasts in the mornings never mind anything else.

> None of you have gotten together to create a strategy to handle

Trumpet blowing for ones own service and nothing else. As far as perfect Hams go, you seem to think they are all angels and well organised. Well unless they have been recruited and actually trained for such events then they would be as useless as the next person. Not all Hams are as you imply.

You also seem to repeatedly go on about one or the other service. Like i said earlier and was not picked up on as your own trumpet was deafening you, both services could have run side by side perfectly fine. CB for the general organising of local issues and policing and Amateur for the longer distance more drafting in supplies side of things and keeping outsiders informed....

Regards,
Graham.

Here comes Digital TV !!

http://www.dtv.gov/

(....otherwise known as the FCC's pending DISASTER when regular
analog broadcasting goes off the air and suddenly millions upon
millions of TV sets suddenly are "obsolete" and no longer work)

Can you just imagine what will happen the first weekend after
the DTV shi+ hits the fan and Bubba can't watch his BALL
GAMES or his NASCAR on his, now utterly useless TeeVee...?
Unless of course he buys a $100 set-top converter box for every TV
Want to talk about an excuse for rioting in the streets? Here it is, or
will be soon!
Not to mention also the fact that DTV will cause RFI to public
service commnications to go thru the roof, including cell phones which
will be useless anywhere near the transmitter. (this should be fun)

http://www.dtv.gov/consumercorner.html#obsolete

"The target date for the end of the transition from
analog to digital television signals is December 31, 2008.
That date may be extended, however, until most
homes (85%) in an area are able to watch the DTV
programming. At that point, broadcasting the
current ï¿½analogï¿½ channels will end and that spectrum
will be put to other uses. Until the transition to DTV
is complete, television stations will continue broadcasting
on both their digital and analog channels."

DTV broadcast is HIGHLY prone to multipath distortion problems
caused by shortcomings of the 8-channel vestigial sideband (8VSB)
transmission standard, which has been mandated for use by all
broadcasters in the United States by the Federal Communications
Commission. In short, if you think it was hard to get TV reception
back in the 60's and 70's before cable using a pair of rabbit ears
then you ain't seen nothing yet! With DTV you get nothing if even
one bit is missing from the broadcast stream. Black screen DOA.

Finally, here is the URL of the people who pushed this
pending disaster thru Congress: http://www.dtvcoalition.com/

Other articles on how flawed DTV really is and how
consumers are likely to react in anger when their sets
go dark in late 2009: http://dtvfacts.com/

My feeling is that it isn't going to do much good to cry... the FCC and majority of the public seem to like it... and the Hams and CBers have a lousy lobby. Let's hope the levels are low enough to be tolerable.

Most people already have the necessary converter. It's called a cable
box. The STBs for the rest of the peeps will most likely be ca $25.
Closer to that than $100.

Part of Big Brother's campaign to control the airwaves completely.
They do not want us to be able to communicate without using their
infrastructure.

The mayor was only confirming what many of us in this hobby realize:
Ham radio operators have not served any useful purpose in emergency
communications for a long time. The professionals pretty much ignore
them. At most they talk to one-another in health and welfare nets and
if someone actually calls in with an emergency all hell breaks loose
because everyone wants to talk personally with the ham calling in.

Hams have this vision of themselves as the emergency communicators who
while huddled in a dark storm beaten shack will get through to the
outside world and save the day by using a car battery and some
jury-rigged cw setup. And the hams on the outside see themselves as
the unique link on the other end who will alert the authorities and
direct them to the site before anyone else can because they alone have
a connection with the emergency site. It's little more than mental
masturbation folks 'cause the real world doesn't work that way.

Oh, really? High-quality, flat-response tuner / IF strip / demodulator,
plus a scan convertor to convert from any of the gazillion digital
formats to NTSC, and RF modulator and power supply, all for $25 consumer
price?

Doesn't that say it all?
end quote.

Mitt Romney is a Republican. IIRC, he moved to Massachusetts from Utah around the time of the last Winter Olympics, didn't he? MA has a habit of electing Republican governors. Sounds unlikely, but you can look it up.

People talk like this whole DTV conversion is coming as a surprise.
It's been planned and in the news regularly for the last decade
(literally). This isn't some overnight switheroo that Congress is
trying to pull. There's been plenty of advance notice. If some people
choose to ignore the news and are surprised four years from now when
they can't watch regular TV (and that is only if they receive over the
air only, which applies to roughly less than 15% of the country), so be
it.

Personally I'm looking forward to the highly increased picture quality
and digital surround sound that DTV can provide. If some people want to
stick with their 1950s technology, so be it; but don't hold it against
those of us who want to move into the 21st century, thank you very
much. Many parts of the world like Japan and Western Europe have pretty
much moved to DTV already, and those countries haven't been engulfed in
mobs of angry people who can't watch TV anymore.

The problem isn't moving into the 21st Century, Mr. Futuristic Modern Dude.
We're already there. The problem is *removing* the existing broadcasts.

There'd be room for everyone if Congress wasn't so easily bought by
commercial interests bent on forcing the public to throw away literally
TRILLIONS OF DOLLARS worth of equipment.

I'm as far from a treehugger as one can get, but have you given any
thought whatever to the landfill problem when hundreds of millions of
television sets suddenly need landfill for disposal?

That's completely silly. No one could make *anything* for $25 if they
are forced to do it in runs of ten or fifteen at a time because the
suppliers don't have parts.

Here you might have something... except the chip has to be about 25
cents to pass the rule of 10. Figure $8 in 10,000 qty, then your
set top box might make $100.

Pore feller, yer countenance is displaying a fine shade of green.

Amateur radio is only as helpful as the people in it, but there are PLENTY
of stories of assistance by hams in the recent storms including one where
the hams on scene in New Orleans LOANED HF equipment to the National Guard
because theirs wouldn't WORK!

All I see here is a high shade of envy and sour grapes towards hams who
traditionally lend a hand. Shame on you!

Nice try, however:

As usual, ham radio operators help sustain wide-ranging relief efforts
By Andrea Kelly
ARIZONA DAILY STAR

When all else fails, it's ham radio to the rescue. Across Arizona, ham radio operators are helping sustain Hurricane Katrina relief efforts by helping storm-torn communities communicate with rescue workers and family across the country.

This is not a first. Ham radio operators come out of the woodwork during disasters around the world, even transmitting in Morse code if language barriers pop up, said Mike Swiader, president of the amateur Superstition Radio Club in Mesa.

Ham radio operators have contributed to emergency communication efforts since World War II, Swiader said, and were crucial in post-9/11 emergency communications, as well as during the Asian tsunami last holiday season.

Ham radios work when other communication systems are down because they're powered by solar energy, batteries or generators rather than the usual power sources.

The messages are passed from radio to radio until they get to the one they are directed to, so radios don't need to be near each other to receive signals, like regular AM/FM radio signals.

"We've been involved in passing traffic to and from the Louisiana and Mississippi area," said Tom Fagan, a leader of the Arizona ham radio operators organization. "Whatever needs to come in and go out, we're doing."

When Arizona's ham operators - there are about 16,000 of them - get messages from the hurricane area, they send them along to agencies like the American Red Cross and the Salvation Army in the Southeastern region of the country.

"We're the link," Fagan said.

Because communications within a disaster area are often jumbled, Swiader said, it's frequently easier for someone there to contact an operator in someplace like Arizona, who can then relay the message back to a recipient in the disaster area.

"Sometimes it's easier to be heard that way," he said.

More than 30 ham radio operators from Arizona have already headed toward the disaster area, hoping to assist relief efforts and give emergency workers a way to communicate with each other, as well as assisting searches for missing persons.

"They're moving in when they're allowed by American Red Cross and Salvation Army," said Ned Stearns, a Phoenix ham operator and vice director of the American Radio Relay League, the national organization for ham operators.

In fact, the ham operators plan to compile a list of people they can determine as missing, deceased, alive or unknown, based on information transmitted over the ham signals.

To find out about people in the area, visit www.satern.org and fill out the health and welfare information request for the person you are trying to find. This information will be sent through the Salvation Army emergency radio network.

Ham radio operators are helping from afar
Sunday, September 11, 2005
By DONNA FORK
For the Times dfork@knology.net

But sometimes, even the airwaves can be shut down

They also serve who listen and wait.

Huntsville amateur radio operator Douglas Hilton and other "hams" in North Alabama are helping victims of Hurricane Katrina by relaying messages between families, officials and each other.

Lately, Hilton's been spending most of his spare time in his "ham shack" listening to calls for assistance. The systems analyst for Intergraph Corp. is one of thousands of amateur radio operators who help people during emergencies.

Hilton is unusual in the ham radio world because he wears three hats: He is an amateur operator; a member of the Alabama State Defense Force, heading the Communications Platoon for North Alabama; and he's also a military communicator authorized to use the Military Affiliate Radio System.

His connection to the military (although he is a civilian) gives him access to additional radio frequencies most amateurs can't access. He has been a ham radio operator for 42 years; his father had him build a

crystal radio when he was 7 years old, and he got his ham license as a teenager. But he wasn't all that active until after the terrorist attacks of Sept. 11, 2001.

"That hit me right between the eyes," he recalled, and he began to get back into "hamming."

Now Hilton averages about 100 hours a month on the airwaves and takes countless courses and certifications. He noted that amateur radio operators are "amateurs only in that we're not paid." In return for service "the government gives us frequencies."

Hilton said the North Alabama ham community is large.

"The astronauts are all ham radio operators," he said, noting that astronaut Owen Garriott "was the first ham in space."

Hilton''s "ham shack" is not really a shack at all. It is located in a formal dining room - complete with crystal chandelier. It includes six radios and two computers.

"You don't need six, but don't tell my wife, please," Hilton said as his wife, Diane, laughed. She recently obtained her "technician class" license, which is the entry-level license for ham radio operators. The next is "general class." The highest, which Hilton has, is "amateur extra." Anyone can be an amateur radio operator, Hilton said. There is no age limit: Hilton knows a local ham who is 18 and another who is 89.

It doesn't cost much to be an operator either, he said. A beginner could purchase enough equipment to get started for about $300. Courses are free through one of the local ham radio clubs, of which there are several, including the Huntsville Amateur Radio Club (the Web address is www.harc.net).

In addition to six radios, Hilton has two computers: a laptop and a desktop. "The radios are hooked into the computer." With his setup, the Hiltons can talk to other hams as far away as Japan.

But for the past two weeks there hasn't been time to chat about matters such as which antennas they like the best. There are emergency frequencies to monitor. At the moment, a critical one is the Salvation Army's emergency frequency, Hilton said.

Hilton never knows if it will be a busy night or a quiet one. Recent solar flares have added to the uncertainty because they disrupt communications. Friday, during the late afternoon and early evening, it was unusually quiet.

"I'm a little surprised," he said Friday. "I can't believe how dead these bands are."

Solar flare

It could be a solar flare, or could be something else. "That's the problem, you never know," he said. The waiting, the listening, "it wears you out." But it's worth it when you hear a voice and "you might be the only person who can hear this guy."

On Thursday night, when Hilton was expecting problems, reception was fine. He was able to contact two operators in Louisiana. He also heard one Mississippi ham talking to another ham "so at least one is working there."

ecause of the Hurricane Katrina disaster, there are thousands of messages piling up, waiting to be delivered by ham radio operators: What will happen when all their radios start working again?

People like Hilton will be extremely busy. There are thousands of ham radio operators in Louisiana and Mississippi. When they all get back to the airwaves, it will be quite a challenge to sort out all the messages.

But meanwhile, as they waited for the deluge of messages, on Thursday night the Huntsvillians received a call for help from New Mexico.

Maura Campbell Kingston of Clovis, N.M., was trying to reach her aunt, 76-year-old Sister Joan Campbell, a nun, of Harvey, La. Kingston called the Salvation Army, which contacted a ham radio operator, who called Hilton.

Hilton tried Thursday to reach a radio operator in Louisiana to check on Campbell, but almost all of them were off the air. Finally on Friday night Hilton got through to "KG5YK," who is Robert A. Turner of Elm Grove, La.

When Turner's message came through, hams from all over the United States could be heard, eager to talk with him.

Helping 'ham brother'

The outpouring of sympathy could not be contained: Radio operators from Texas, Indiana and elsewhere all expressed their support for their "ham brother" in Louisiana.

"I hope this never happens again," said Turner of the Katrina disaster. "It's been a tough time. ... I'm looking for the right words." He thanked the other hams for their all their help.

"You'd do the same for us," the ham from Texas said. Others echoed his sentiments.

Turner gave Hilton information about when to call with his "health and welfare message" about Kingston's aunt. Hilton vowed to keep trying to deliver the message "for as long as it takes."

But that proved to be unnecessary.

Friday night, after calling her aunt repeatedly, Kingston finally reached her by phone. She was still at her home in Harvey.

"She was OK," Kingston said in a telephone interview Saturday. "Harvey stayed dry." But the area was without power and Campbell "was sitting in the dark with her flashlight."

Later, Kingston called Hilton to thank him. She said he told her: "I'm just doing it because I want to help."

Kingston was impressed.

"I believe that thing about Southern hospitality."

Thursday, September 15, 2005

Ham radio proves to be more than a hobby
By Jeannetta Edwards

Daily Times Leader

When Hurricane Katrina hit, telephone and cell phone communication hit an impasse because of downed lines and towers. But, amateur radio operators did not miss a beat or a transmission.

"Before and after the hurricane, this has proven to be the most reliable form of communication," said Randall O'Brien, a retired highway patrolman who has been involved with ham radio operation for 35 years.

"People thought when they got cell phones, they didn't need us anymore," said O'Brien, an advanced licensed operator, who often talks to missionaries in South and Central America.

According to Denver Baker, Clay County has more than 30 amateur radio operators, but only a small fraction are active.

"It's a wonderful hobby," said Baker, whose wife recently received her technician license.

The multi-faceted operation includes digital and satellite communication and is enjoyed by all age levels.

"This is a good hobby for seniors or for young people," said Baker.

By becoming a ham radio operator, which requires taking a test to obtain a license, people can communicate with others anywhere in the world.

"The classes for the test are free," said Baker, "and we help you with everything you need to know."

According to Baker, who has been enjoying this hobby for the last 10 years, the only investment required is the fee for the test and the purchase of equipment. A handheld transmitter cost around $100.

The self-policing group ensures that everyone adheres to the rules and regulations.

"We're called amateur radio operators, but there's nothing amateur about it," said O'Brien, who first became interested in electronic at age 13.

The group, which also belongs to the American Radio Relay League, meets monthly in West Point.

"We have a good bunch of hams in this area," said Baker. "We bring food at our meetings and have a good time."

"It's nice, especially for seniors," said Baker.

For information on getting involved in ham radio operation, call O'Brien at 494-2898 or Baker at 494-9096.

Ham Radio Operators Offer Help

By Beth Hahn
Mountain View Telegraph
Since Hurricane Katrina hit New Orleans last week, several ears in the East Mountains and Estancia Valley have been tuned to amateur short-wave radios.
McIntosh resident Ed Brooks said local Ham radio operators are willing to relay messages from the Gulf Coast if needed.
"We guys here in the Estancia Valley are just listening," he said. "We haven't had any need for what we can offer."
Although they may not be needed yet, Brooks said local Ham radio operators are still listening in to conversations taking place in Louisiana, Mississippi and Alabama.
During the interview with Brooks, his Ham radio was tuned to a conversation involving a Coast Guard helicopter that was rescuing a family from a rooftop in New Orleans with direction from another Ham radio operator.
Brooks said similar situations have been broadcast hundreds of times during the past week.
"It's been really spotty, but what we've been (hearing) is that it was good fortune that somebody down there had Ham equipment," he said.
Daryl Clutter, an Edgewood Ham operator and member of the Salvation Army's shortwave network, said he relayed a message from Ontario to U.S. Coast Guard officials in Washington, D.C., that originated in Louisiana.
"It was just the word 'help' spelled out two times," he said.
Like Brooks, Clutter said he has stayed close to his Ham radio since Aug. 29.
"There's been so much going on," he said. "Every day, something happens."
Clutter, a former truck driver who often delivered frozen food to the Gulf Coast, said radio traffic has slowed since the hurricane devastated the region.
"You just wonder who all you know, that used to be your customers down there, that are still alive or had the good sense to get out," he said.
As amateur radio operators, Clutter said, Ham enthusiasts practice for disasters "every day."
"There's only so many cell phone frequencies," he explained. "If the phone system goes down, there's no way ... (one company) could handle all the 60,000 or 70,000 phone calls."

Mountainair resident and Ham operator Bob Scupp said the Salvation Army network alone has handled more than 128,000 messages since Aug. 29.
Brooks said Ham operators have been relaying messages from residents to volunteers or emergency personnel. Since a large number of National Guard and military personnel have arrived in the area, Brooks said the messages have changed from pleas for help to questions about well-being.
Shelters for evacuees are beginning to utilize Ham radios to communicate with other shelters to help families find missing relatives, Brooks said.
Rescues are still going on.
"There's been instances where they're still finding people, trapped in houses, trapped in buildings or running out of oxygen," said Clutter. "It's just terrible what's going on down there."
Clutter and Brooks said they will not offer assistance unless someone requests contact in the Albuquerque area.
"We don't want to tie up the frequencies," Brooks said.
Clutter and Brooks said they will continue to listen to their Ham radios for messages or relay requests until communications are restored in the Gulf Coast.
"We live and breathe this," Clutter said.

Amateur radio operators provide vital communications support
By Teresa Atkerson
MCALESTER NEWS-CAPITAL (MCALESTER, Okla.)
MCALESTER, Okla. -

With more than 10,000 requests for help in finding loved ones, the amateur radio operators in Louisiana are extremely busy.

In fact, they are so busy, they have asked people to wait with their requests unless there is an extreme emergency.

Ralph Suter, with the Pittsburg County Amateur Radio Club, said they had about a half dozen requests for assistance in locating loved ones in the area devastated by Hurricane Katrina. ï¿½The Red Cross funneled the requests for health and welfare,ï¿½ he explained. Now, the national traffic system is backed up with the requests, he said, because there were so many.

There are extreme problems with communications in New Orleans at the present time. Suter explained VHF radio has to have line of sight while amateur radio operators can use lower frequencies that can bounce off or curve to get the message through. ï¿½A benefit of amateur radio is you can throw a piece of wire in a tree or up a flagpole. With 12 volts of power, you can operate on a local or even worldwide basis,ï¿½ he explained.

As an example, Suter said recently an amateur radio operator in Louisiana had some kind of problem that he couldnï¿½t get help with after the hurricane. He put out the message, it went through Washington state

to Texas and then into Louisiana where the right people were found to help him.

Amateur radio operators can also communicate via Morse Code, upload through television or computer or radio to satellite, Suter said. That gives them even more advantages in communication.

Jim Russell, president of the PCARC, said amateur radio has been around as long as there has been radio. Even in World War I, amateur radio operators helped with messages in Morse Code, which is something operators today still must learn as part of their licensing process.

ï¿½We look at it as a hobby,ï¿½ Suter said. ï¿½Itï¿½s a resource of individuals because they have an interest to develop the skills to operate radios in various modes.

ï¿½Itï¿½s a resource for trained communicators.ï¿½

There are forms that must be used when transmitting messages. ï¿½When it goes into the system at one point and comes out at the destination, it is exactly the same information, even with the misspelled words,ï¿½ Suter said. ï¿½Itï¿½s our responsibility when handling traffic that it comes out exactly as it comes in.ï¿½

Suter said many of the operators use their radios on a daily basis while others check weekly. When it comes to disasters, there is the Amateur Radio Emergency Service. ï¿½Itï¿½s not really an organization but it is organized on a national basis for community programs.

John Wright, another PCARC member, checks with the Oklahoma Sooner Net and with the Salvation Armyï¿½s network, SATERN.

After the Oklahoma City bombing in 1995 and 9/11, Russell said amateur radio was used extensively. It is also used during and after tornadoes and other natural disasters. Now, the group can work with the Automatic Position Reporting System to help more accurately report severe weather.

The group has an annual field day, which is a combination of a exercise and a contest. ï¿½We go out and set up radios under adverse conditions to simulate disaster response,ï¿½ Suter said. ï¿½In the past, weï¿½ve started with solar power, using a battery in a car or even a portable generator.

ï¿½The last time I kept count, we were able to make contacts in 47 states, the Philippines, some in South America and Puerto Rico in a 24-hour period.ï¿½

Suter pointed out that the word ï¿½amateurï¿½ is not what people interpret it as. ï¿½People interpret it to be an unprofessional group. But while itï¿½s made up of a lot of people for a hobby, itï¿½s not unorganized or unprofessional when dealing with disaster. We have capabilities that public agencies just donï¿½t have,ï¿½ he said.

Members also have to be licensed. The license testing can be done in McAlester now so those wishing to be licensed donï¿½t have to go to Dallas or Oklahoma City as in the past.

Teresa Atkerson writes for the McAlester (Okla.) News-Capital.

Old Technology Still Needed
(Page 1 of 2)

Sept. 8, 2005

Overwhelming Charity

Joe Carcia, station manager of the American Radio Relay League in Newington, Conn. helps with the disaster relief effort for Hurricane Katrina's victims along the Gulf Coast. (AP)

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

(CBS) There is a store in London dedicated to "appropriate technology." It mostly carries products designed to be used in developing countries where there is a weak communications infrastructure.

Sadly, thatï¿½s now the case for a large swath of the United States where Hurricane Katrina and its flood waters have wiped out cell phone towers, telephone switching stations, Internet routers and other ground-based communications systems. Even wireless Internet depends on nearby transmitters and receivers on the ground.

But amateur radio is working and, according to Allen Pitts of the Amateur Radio Relay League (ARRL), "ham" radio operators from throughout the country are answering the call to provide vital communications links. Satellite phones, a much newer technology, are also coming to the rescue.

Pitts acknowledges that cell phones and other technologies "work wonderfully when everything is going right," but "they are very vulnerable when everything is going wrong."

Just as with past hurricanes, earthquakes and on September 11th, the ground-based infrastructure, in many cases failed because vital parts of the system were damaged or overwhelmed during the emergency.

In other words, when you need them most, those cell phones are of no value.

Amateur radio, says Pitts, is not vulnerable to these problems "because each of the radio operators is a complete transmit and reception center unto themselves able to continue going and continue with nothing more than an electrical source, such as a battery or a generator, a radio and piece of wire for an antenna."

Listen to audio of Larry Magid's interview with ARRL's Allen Pitts.

While base-station radios are larger and require an electrical power source, there are also portable ham radios slightly larger than a pack of cigarettes with a range of about 20 miles, according to Pitts. Pitts says that the next sized radio, about the size of a paperback book, can communicate up to about 50 miles without a repeater while larger

systems, "about the size of a desktop computer" can communicate globally.

Amateur radio operators are in demand. When I checked the ARRLï¿½s Web site there was a call from the Salvation Army for "10, two-operator Amateur Radio teams for deployment in the U.S. Gulf Coast. Operators must hold at least a General class license. Teams should be fully self sufficient in terms of food, water and lodging and plan to remain in the disaster area for from one to two weeks."

Pitts said there was a "lady in Connecticut," who was listening on her amateur radio and happened to hear that there was a woman "who was trapped for four days without food and water." She was able to relay that message, by ham radio, into an operations center that dispatched the fire department. A day later she got a call from the trapped womanï¿½s mother, thanking her for her role in the rescue.

Ironically, this comes at a time when amateur radio is struggling for respect and, to some extent, survival. What was once a popular hobby has fallen into somewhat hard times for a variety of reasons, including the fact that the Internet, cheap long distance calling, cell phones and other technologies make the ability to use these two-way radios not quite as compelling as it once was.

Also, there is a bit of a rift between some members of the amateur radio community and some parts of the Internet industry over the use of power lines to transmit Internet signals. This technology, which could put power companies into competition with cable and phone companies for broadband service, has been criticized by some ham operators because of possible interference problems.

Despite the fact that their origins go back to the early 20th century, hams are hardly low-tech. There are now bridges between ham operators and other technologies including the Internet, cellular phone systems and Internet phones. In fact, long before the Internet became popular, ham operators were using their radio gear to transmit data along with voice and morse code.

Also coming to the rescue are satellite phones. These phones - which are much more expensive to buy and use than cell phones - rely on satellites rather than ground equipment to communicate with the phone network.

Because satellites are in space, theyï¿½re not vulnerable to conditions here on earth. Also, as long as you have a view of the sky, youï¿½re able to communicate. Iridium, which operates "66 low-earth orbiting (LEO), cross-linked satellites and 11 in-orbit spares," says it provides "complete coverage of the earth (including oceans, airways and Polar Regions)."

I carried an Iridium phone with me when I traveled to Peru a few years ago. It worked great when I was in the clear such as on a boat in the middle of the Amazon River but, because it requires a line of site view of the sky, it had problems in dense jungle and in cities with tall buildings.

Iridium spokesperson Liz DeCastro estimates that there are currently about 10,000 of Iridium's phones being used in the region with orders for about 6,000 more. The company sells through resellers so it doesnï¿½t have exact numbers. DeCastro says that "traffic in the region increased by 3,000 percent" since the storm hit and that the number of subscribers increased by 500 percent.

Satellite phones are a lot cheaper to use then when I went to Peru, but they still cost between $1 and $1.25 per minute to use, according to DeCastro. Thatï¿½s a lot more than domestic cell use, though often cheaper than using U.S. phones when roaming overseas. The phones themselves cost between $1,000 and $1,500 she says.

In addition to handling voice calls, satellite phones can also be used for messaging or data, albeit at modem rather than broadband speed.

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

Thatï¿½s why some news organizations keep manual typewriters around. You never know when that old technology may suddenly become the "appropriate technology."

NYNewsday.com
Amateur radio operators head to Gulf Coast

September 6, 2005, 1:00 AM EDT

NEWINGTON, Conn. -- Oscar Fuller only became an amateur radio operator about a year ago, but he knows how valuable his equipment can be in an emergency.

So even though he has never responded to a crisis, the American Relay Radio League member is planning to head to the hurricane-ravaged Gulf Coast and see if he can help establish an emergency communication network.

"This is a tragic set of circumstances," said Fuller, who recently retired from IBM. "If I can lend a hand, I want to."

Fuller and about 14 other members of the Newington-based amateur radio operator network have signed up to join the relief efforts for Hurricane Katrina. The amateur operators _ known as hams _ can often use their equipment to communicate in difficult circumstances.

Because the radio equipment operates on many frequencies, is self-contained and portable, it can often work when other communication networks, such as telephones, aren't working. It can never be blocked, which is why operators say it is good in disasters.

"When all else fails, ham radios work," said Betsy Doane of Shelton, who oversees the 2,500 members of the league in Connecticut.

David Patton, an official with the radio group, said as many as 750 volunteers may be needed. The Connecticut volunteers are going to help

provide communication support for more than 200 American Red Cross Shelters in Mississippi, Alabama and the Florida panhandle.

"There are limited resources to an overwhelming disaster," said Allen Pitts, public relations manager for the radio league. "So there is not a ham on every corner. The hams are put where they are needed most of all, in emergency traffic or for saving lives."

Dennis Motschenbacher of Colchester was among the first volunteers to say he would go. He spent Sunday shopping for supplies and getting ready for the 18-hour, 1,100 mile drive to Montgomery, Ala., where he will be dispatched to a shelter.

"Everything I need, I'm bringing," he said. "There won't be any Radio Shack to go to."

The 57-year-old has been a ham for more than 40 years. He has operated his radio from places as far as East Timor and the Balkans.

The hardest part will be "seeing people in this troubled state _ smelly, sick, depressed, angry. And no matter what any of us do, it won't be enough for all of them."

Ham Radio Operators Pitch In To Hurricane Katrina Relief Effort General Interest
09/07/2005
With communications out all over New Orleans and the Gulf Coast, the professionals are turning to amateurs to be their ears to what's going on in the areas devastated by Hurricane Katrina.

Local operators say they've been in touch with people in and around New Orleans since the beginning of the ordeal.

Ed McLaughlin, of Kennewick, says in the days that followed the disaster, he was able to help a family in Medford, Ore., get an update on how their relatives were. He's provided similar contact for a family in Chicago.

The reason-- ham radio, which is able to get in places that have no other means for communication when land-based infrastructure fails.

Ham radio has been such a success during these recent days that FEMA and the Red Cross are now using it as their primary mode for communication until other modes of communication are restored.

News-Leader.com Springfield Mo.
Ham radio helps close communication gap

Nixa man relayed message from president to New Orleans' mayor.

Joe Hargis works on his amateur radio in his home in Nixa. Hargis helped rescue an elderly woman by notifying someone who could contact rescue

workers via radio.

By Sarah Overstreet
News-Leader

If you've been unsuccessfully trying to get information about someone living in Hurricane Katrina's region of havoc, here's an avenue you may not have considered: local ham radio operators.

While cell phones rely on towers and traditional telephones rely on intact land lines, ham radios transmit from radio to radio, bouncing waves off the ionosphere in the upper atmosphere far above the Earth's tantrums. They can run off batteries, generators and sometimes even the sun.

Two Ozarks amateur ham radio groups - the Nixa Amateur Radio Club and the Christian County ARES (Amateur Radio Emergency Services) - have been relaying messages from people all over the world to those whose communication has been cut off by Katrina.

David Beckler, a ham radio operator from Nixa, even relayed a message Tuesday from the director of the Federal Emergency Management Agency in Texas to New Orleans Mayor Ray Nagin.

"He had a message from President Bush to the mayor of the city of New Orleans," says Beckler, a New Orleans native who moved to Nixa six years ago.

Since the message was an emergency communication, the dispatch needed to go through the net control station on an emergency frequency, Beckler said. He knew it was important, because the ham operator had said, "break, break, break," which requires all other communications to yield and give that one priority.

"The net control station or other stations on this frequency could not hear this message," Beckler says. Beckler contacted the net control station, and people there asked him to contact the sending ham operator and relay the message back to that operator. "That's when he told me it was from President Bush."

Joe Hargis, another Nixa ham club member, also helped with an urgent message. "I was monitoring the SATERN network (Salvation Army Team Emergency Radio Network)," said Hargis, a retired elementary schoolteacher.

"A person called in with a piece of emergency traffic and the (receiving) person could not hear him. He said, 'Is there anyone on the frequency who can copy this?' I broke in and told him I could hear it fine."

Hargis relayed the message back to SATERN, and the operator there could hear Hargis well. "It was a 90-year-old woman and her elderly neighbors. They were afraid to leave their home because of the unrest in the neighborhood, things that were going on, and they needed assistance to be evacuated. They were running low on medicine, and one was running out of her oxygen supply."

Nixa ham club member Rod Kittleman says their members helped save the lives of a couple in New Orleans.

"A weak, disabled elderly couple were trapped in their attic. Their phone worked, but they couldn't get through to local authorities," the KADI radio program manager explains.

Too weak to break through their roof so emergency personnel could find them, the couple called their daughter in this area. She contacted the Nixa club, which relayed the message to a local ham operator who is licensed to operate on emergency frequencies.

"He got through to authorities in New Orleans over the radio, and they were rescued. (The ham operator) relayed the message back to their daughter. That's the reward we live for."

ARRL's Role In Rescue Offers Lessons For Future

Mark David
ED Online ID #11164
October 13, 2005

Investigations into the communications breakdowns in our national emergency response systems continue. Yet I'm struck by the contrast between the hue and cry for upgraded infrastructure solutions and the much quieter revelation that old-school ham radio provided the only trustworthy communication during Hurricane Katrina.

New Orleans emergency departments' radios were wiped out when broadcast towers lost backup power generators. Police and fire departments only had citizen-band radios, offering inadequate bandwidth. Emergency responders lacked coordinated frequencies.

The National Guard cited antiquated communications technology-as a contributor to its delayed response. Lt. Gen. Steven Blum told USA Today that there was a shortage of high-tech radios and satellite communications gear. "We were underequipped," Blum told USA Today. "We don't need tanks and attack helicopters... but we must have state-of-the-art radios and communications."

The Guard has historically gotten "handmedown" equipment from active-duty military. It now uses "Vietnam-era radios while it needs 37,000 newer radios," according to Guard budget briefings.

Meanwhile, ham radio operators proved that older technology can be the most reliable technology. Our EDA Editor (and ham) David Maliniak wrote an online column on the subject, pointing out that sometimes "old works when new doesn't." (Read it and add your comments at ED Online 11136.) During and after Katrina, hams running on generators (sometimes with makeshift antennas) worked throughout the hurricane zone to put emergency stations on the air. They guided rescuers to stranded victims and updated weather services via the Hurricane Watch Net.

Amateur radio was the primary means of contact with the outside world for many shelters. It's estimated that some 1000 amateur radio

volunteers helped serve the hurricane-ravaged communities and shelters, even providing communications for the Red Cross.

Still, the real lesson of the ham radio successes isn't that old sometimes trumps new. Upgraded, reliable hardware is vital for adequate emergency response. Amateur radio has continued to upgrade too. Hams use satellites, digital systems, cross-band repeaters, and more. As the American Radio Relay League (ARRL) puts it, the Morse code key may still be on the desk, but generally it's next to a modern system operable under extreme emergency conditions.

DISTRIBUTED NETWORKS

Katrina taught two key lessons. First, the Amateur Radio Emergency Service (ARES) organization proved effective because hams don't depend on a centralized infrastructure. When cell towers, phone switching centers, or other central communicationsnetworks are down, hams aren't. Many operators have their own generators and are ready to fire them up to get on the air when there's no power. National disaster response plans must assume that the centralized communications infrastructure likely will be crippled, so the emergency system must include a distributed or "mesh" networking scheme.

Second, ARRL succeeded because operators subscribe to a mission that comes with their licenses-to be ready to provide emergency communications whenever and wherever they're needed. ARES has a well-conceived action plan coordinated through the Radio Amateur Civil Emergency Service (RACES). ARES is part of the ARRL, and RACES is coordinated through the Federal Emergency Management Agency (FEMA). But like the broacast system, the emergency plan is decentralized. Radio operators can work independently to serve their community as circumstances require.

A decentralized emergency plan requires deputized people who truly understand and care about their responsibilities. The best emergency response relies on distributed manpower, with first responders empowered to make decisions at the scene of the crisis.

It doesn't take a federal investigation to realize that the government's emergency-response debacle was caused by centralizing the decision-making with politically appointed bureaucrats who didn't have a personal mission or a true sense of ownership in ensuring preparedness. The fiasco with now-deposed FEMA leader Michael Brown exemplifies the folly of appointments based on cronyism, rather than the recruitment of people who have a passion, understanding, and commitment for the responsibilities they shoulder.

In this issue's cover story, Ron Schneiderman looks at government programs and the new technologies tackling our homeland security problems. But will the right people get those technologies? Too often, homeland security appointments and dollars are doled out according to political favoritism. As we saw in the recent emergency response,

technologies are only effective when managed by people-like the hams-who take their responsibilities to heart.

Hats off to all of you who care about the quality of the security and emergency communications technologies you're engineering. Let's hope they end up controlled by people who care just as much.

A few months ago, NBC's Tonight Show staged a race between a pair of ham-radio operators with Morse-code keys and a couple of kids with text-messaging cellphones to see who could communicate faster. The hams won hands down, proving, in the minds of some, that old technology could hold its own against new. In recent days, ham radio was put to the test again by Hurricane Katrina. This time, however, lives were at stake.

In the world of design engineers and electronics in general, change is essential. Designers work diligently to make the fruits of their labors obsolete almost before they see daylight. The turnover in technology is sometimes like a flood, with old being washed away by new over and over. Often, the new beats the heck out of the old. But there are times when old isn't necessarily bad; in fact, sometimes old works when new doesn't. And then we're glad that old is still around, or at least we should be.

Wireless technology, while relatively new to many consumers, is of course not new at all. A few (very) old-timers remember the original "wireless" of radio. The revolution wrought by the pioneers of wireless changed the world then, and the technology behind that revolution has been re-invented and re-applied time and again. Its pre-eminent incarnation today is our near-ubiquitous wireless communications infrastructure, which has freed us from the shackles of landlines and made our mobile lifestyles possible. Technology truly is great stuff.

Until, of course, a monster hurricane comes along to render it nearly useless. Here we see a scenario in which a flood literally swept away the new. As Hurricane Katrina's fury hammered the Gulf states on August 29, the communications infrastructure took a devastating hit. Telephone service, including wireless, became at first intermittent and then unusable in many localities. Where there was phone service, 911 switchboards were often unreachable due to the massive volume of calls. The response of local authorities, now termed "confused" by deposed FEMA chief Michael Brown, wasn't helping much. The Gulf Coast was about to descend into darkness, chaos, and, worst of all for many, silence.

But proponents of the old were at the ready. The "old," in this case, is ham radio. In the eyes of the "man on the street," ham radio has a pretty stodgy reputation. Aren't hams still using Morse code? Don't some of them use radios with tubes, for goodness sake? What the "man in the street" probably doesn't know is that it was amateurs who advanced the radio arts early in the 20th century. Down through the decades, amateurs have embraced (and often driven) all of the innovations in wireless technology, up to and including all digital modes and the Internet. But many have stayed in touch with their roots, which is good old-fashioned

analog HF operation. And while amateurs have a longstanding tradition as innovators and experimenters, they also have a mandate that comes with their licenses: to be ready, willing, and able to provide emergency communications whenever and wherever they're needed.

As Katrina bore down on the Gulf region, amateur radio operators, under the aegis of the American Radio Relay League's (ARRL's) Amateur Radio Emergency Service (ARES), prepared to swing into action with emergency networks that would run health-and-welfare traffic into and out of the disaster zone. As early as the Monday following the storm, hams throughout the hurricane zone were putting emergency stations on the air. In one instance, hams were instrumental in the rescue of 15 people clinging for life to a New Orleans rooftop. Meanwhile, in Alabama, amateur SKYWARN weather nets kept the National Weather Service apprised of conditions throughout the state. In hard-hit sections of Mississippi, hams running off generators and with makeshift antennas were the only means of communication, getting word to out-of-state friends and relatives concerning their loved ones.

There were numerous other instances of hams helping those who were not simply inconvenienced by the storm, but whose lives were in imminent danger. Now that things have calmed down in the Gulf region, many of the emergency nets have stood down. But hams continue to serve the public in the many areas that are still without power or phone service.

As our nation collects itself in the aftermath of the Katrina disaster, President Bush has promised federal reviews of what went right and what went wrong. One of the findings of those inquiries should be that the federally-instituted Amateur Radio Service, which functions under the licensing authority of the FCC, stood tall when the country needed it.

Amateur radio currently faces various threats to its existence. Chief among those is the advent of broadband-over-powerline (BPL) technology, which, if broadly adopted, has the potential to cause widespread interference to HF communications, not just for amateurs but for other services that use the HF spectrum.

Amateurs and the ARRL have made a lot of noise about BPL, asserting that it could seriously hamper their efforts and those of relief agencies such as the Red Cross and Salvation Army, in the event of a disaster such as Katrina. It's rumored, though, that the same FCC commissioners who have given their blessing to BPL field trials will now take a much harder look at the technical issues concerning BPL and its interference potential in the HF spectrum. Let's face it: The federal government didn't handle the emergency in the Gulf very well; it'd be prudent for it not to sanction a technology that could impede one of the few things that actually worked.

Many readers of this newsletter are amateur radio enthusiasts. If you are, and if you haven't already done so, consider writing your congressman to express your concern about the future of the Amateur Radio Service, especially in light of its outstanding efforts in recent

days. Remind your elected representatives that a vibrant and unimpeded Amateur service can and will be a lifesaver when disaster strikes. Also, consider how you yourself might help. What if a hurricane, tornado, or earthquake ravages your area? Are you prepared to get on the air without relying on the mains to handle emergency traffic? Get in touch with your local amateur-radio club and find out how you can pitch in.

Your cell phones and wireless routers are indeed great stuff, but so is a good old HF transceiver. We shouldn't always be in such a hurry to let the flood of new technology wash away the old. The geek down the block with all the antennas on his property could turn out to be your best friend someday. Because sometimes, old trumps new.

Lol... I know America has vast areas compared to the UK but don't you think Police could have been equipped with CB radios in NO? I remember hearing the police bands were knocked out but I don't know whether they could talk radio to radio (Like CB) or if they needed to talk via a base. Obviously police couldn't have been issued with Amateur Gear (because they would be illegal operators) but CB stuff they used to use years ago would have assisted them greatly in that respect. Most of the squeaking you refer to would be gone due to base stations being off and cars being flooded. It would have to have been an organised person who remained on the air unaffected. Most of the CB fraternity would have heeded the evacuation call and got out or.. as so many Amateurs like to think of us, robbing the shops and being all lawless like. It must, in reality, have been a very scary hellhole for a lot of people and I certainly hope I never go through it.
I think all in all, joking aside, CB could have had (if it didn't anyway) a great part to play alongside Amateur radio in the relief and Police co-ordination efforts.

Regards,
Graham

The governor was only confirming what many of us in this hobby realize:

Ham radio operators have not served any useful purpose in emergency communications for a long time. The professionals pretty much ignore them. At most they talk to one-another in health and welfare nets and if someone actually calls in with an emergency all hell breaks loose because everyone wants to talk personally with the ham calling in.

Hams have this vision of themselves as the emergency communicators who while huddled in a dark storm beaten shack will get through to the outside world and save the day by using a car battery and some jury-rigged cw setup. And the hams on the outside see themselves as the unique link on the other end who will alert the authorities and direct them to the site before anyone else can because they alone have a connection with the emergency site. It's little more than mental masturbation folks 'cause the real world doesn't work that way.

Ever price one of those cable boxes? They probably don't cost much to build, but if you go to buy them, they're on the order of $300-$400, at least the addressable ones. The cheapies, that do no decoding still run into the $100+ range for one that doesn't break in a month or two.

3392. Re: Dec. 2005 Issue of QST on Web?

Newsgroup: rec.radio.amateur.misc

Hi Wayne

Although not helpful in your case I did a quick lookup on the peer to peer internet network system (gnutella, donkey, bit-torrent etc) and found various copies of older QST's. These were PDFs produced by the ARRL and no doubt copywrite. A number of the ARRL etc handbooks are also available in this format.

Cheers Bob VK2YQA

Unless it's changed, you can get a copy from the ARRL, for a fee.

Traditionally, they'd sell back issues for a reasonable amount, and if
the issue was no longer available, they'd copy a specific article for
you for a fee.

I have no idea what happens about the current issue, or even if
they continue this very useful policy.

QST is no longer available on the newsstand, but having it there
was a relatively recent policy. But decades ago, one could get
the latest issue at the local radio store. That might still be
the case.

What radio stores! :-) They are getting harder and harder to find. I'll give
the ARRL a call. That might be the fastest. There may be a way through
ProTrack, a service to public and college libraries.

BiG? That would be quite a trick around here. Everyone has to use
Propane because there is no underground distribution system.

I saw a recent news story where BPL was shut down in one city because
of technical problems were costing more than they could expect to
recover and that the system was being dismantled.

5 Newsgroups?

and my set top box was free when I signed up. I get excellent picture
and sound and no interferrence between the ham stations (One in the
shop and one in the house). 1.8 through 440. Legal limit 1.8 through
30. 100 watts out on 50 MHz and 200 watts on 144 MHz.
I'm running an Alpha 76A in the house for HF and a Henry 2K-4 in the
shop.

Remember Digital is not necessiarlily HDTV, but they will be moving up
out of the VHF bands.

BTW, the computers and ham rigs are less than 3' apart and the network
cable runs with the coax cables for a ways.

I can run a 2-meter HT on the desk with the computers running although
if I get within about a foot of this one it will open the squelch.
Still I can set the HT next to the left side of the monitor and it
works fine.

Tain't nearly that bad. It depends on what bits are missing, but what
happens it the picture will start to break up if enough of the right
bits are missing.

You do need a good UHF antenna for local HDTV at present and probably
will for Digital as well. Rabbit ears definitely will not cut it. and
if you live near woods it's likely a small antenna on a roof mounted
tripod won't either. I get a reasonably good signal for 60 to 90 miles
and do copy one station quite well from nearly 100 miles (Traverse
City), but their digital antenna is out this direction so I'm not sure
just how far it is to the antenna.

Yup. Free.
Both my cable box and my digital satellite box were free with a years
subscription. Actually the same went for the cable modem at 3 Mbs
with free installation which meant running almost 200 feet of cable .
It's a 130 feet from the pole so that's 160 feet and there are 3 drops
in the house so I guess it's a tad more than 200 feet along with 3
splitters which are cheap.

I'll probably keep right on using the one old 37" analog set down in
the basement until it gives out. The tuner gave out long ago, but I
use it as a monitor with the VCR as the tuner.

The problem is that Google invested $100,000,000 in BPL. With that kind of money it will suceed even if it fails. The only way to prevent it is to boycot Google and sites with "ads by Google" and let them and their advertisers know it.

Geoff.

```
-----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

Thanks to everyone who has signed up for our special project.

This is a final call for participants to contribute to our shortwave
sound-art project.

We need more amateur radio operators world-wide who can transmit a
message for reception in North America / Pittsburgh PA at 7:30PM on
the third of December 2005.

We will be running a test shortly. All participants will be sent a
special sound file with which we will be performing a dry run before
the night of the performance.

If you are able to assist us in this project, please contact us
immediately at irdial [at] gmail.com.

We look forward to working with you on this project!

IF BPL and BIG prove to be reliable conduits that can generate more
income than exenses then there is no reason they shgould not go ahead.
The plumbing is already in place so why nor use it.

For the record. Morse code is not a boy scout requirement
at all and in my several years as a Boy Scout Leader (my son
went all the way to Eagle) I never met another scout leader or scout
who knew morse code.

Even in the boy scout Radio merit badge requirements,
morse code is an "ellective" requirement
which any scout may pick to do out of a list of several
Radio merit badge requirements.

Cheers,
Bill K2UNK

> Police could have been equipped with CB radios in NO?

There was a time when "some" USA
police forces had CB Ch 9 monitoring
capability. I recall seeing highway signs stating that to
be the case, but its been a long time since I remember seeing
such signage. I doubt many of those still do today.

> I remember hearing the
> police bands were knocked out but I don't know whether they could talk
> radio
> to radio (Like CB) or if they needed to talk via a base.

It depends on the radio system being used. If it is
a repeater based system, odds are that rules out
direct car to car capability.

> Obviously police
> couldn't have been issued with Amateur Gear (because they would be illegal
> operators) but CB stuff they used to use years ago would have assisted

> I think all in all, joking aside, CB could have had (if it didn't anyway)
> a
> great part to play alongside Amateur radio in the relief and Police
> co-ordination efforts.

I don't recall even reading about any incident where CB was
used at all. That doesn't mean it didn't happen
somewhere, but it certaily appears that any CB activity
was minimal at best in comparison to the role that amateur
radio played.

Cheers,
Bill K2UNK

IF that is the case then BPL and BIG will fail. Although it is worth
noting that DSL service "doesn't always work" too. Distance from the
hub has a major impact on response time.

power companies would be better off running fiber
along the rights of way that already exist,

then wi-max it out or use the motorola system
to get it out to the users.

bpl companes will fail. slow transmision rates

how can they compete with broadband over cell ?

reading about maybe not I saw hwat had to a Cb or Marine VHF unit in
use right alongside a ham unit (does any service besides CB and Marine
VHF have smal mobile units with channel 37 I don't think so which is
how I id the unit)

RE: "Incentive Licensing"

PRESS RELEASE
October 30, 2000
For further information:
Gary Harrison, K0BC
QCWA President
P.O. Box 467
Bolivar, MO 65613
417 777-7777
417 777-4783 Fax
k0bc@ipa.net

The Quarter Century Wireless Association, Inc. has filed a petition with the Federal Communications Commission requesting rulemaking action to amend Section 97.505(a) of the Commission's Rules for the Amateur Radio Service. This amendment would facilitate the restoration of those privileges withdrawn from Advanced and General Class operator licensees on November 22, 1968. The amended rule would do this by requiring administering volunteer examiners to give examination Element 4 credit to current Advanced and General Class licensees also holding an FCC-issued Advanced, General or Conditional Class operator license granted before November 22, 1968. By doing such, the person would become eligible for a Amateur Extra Class operator license, the privileges of which include those withdrawn on November 22, 1968.
On November 22, 1968, amateur operators holding Advanced, General and Conditional Class licenses lost significant operating privileges as a result of rules adopted by the FCC in implementing a system of incentive licensing. Every Advanced, General and Conditional Class operator was affected adversely. Within the instant of but a single tick of the clock, their privileges on the most popular amateur service bands were reduced drastically. To regain the privileges withdrawn, a licensee had to upgrade to Amateur Extra Class by traveling to an FCC office and passing difficult high-speed telegraphy and written examinations.

It is the QCWA view that no useful purpose is being served by continuing to deny the privileges withdrawn to those amateur operators who still suffer from that action. The single issue addressed in the petition is the need to restore to these operators the privileges they have not enjoyed for some 32 years. In sharp contrast with the compassionate "grandfathering" provisions

recently adopted for the amateur service, the transition to incentive licensing imposed an injustice on all amateur operators holding an Advanced, General or Conditional Class operator license grant on November 22, 1968. It brought serious disruption to the amateur service and created ill will within the amateur service community. Although many, if not most, of the licensees affected have since upgraded to a higher operator class, there is a widespread belief within the amateur service community that the abrupt withdrawing of privileges was unjust to all Advanced, General and Conditional Class operator licensees of that era.

There remains today, at most, a few thousand amateur operators so affected who have not chosen to upgrade. Some do so as their statement in protest to having been affected so adversely. Clearly, these licensees lost significant privileges for which they had previously qualified by examination before FCC examiners. Moreover, for many years - in some instances for many decades - these licensees had been using those privileges at their amateur stations. Most certainly, they had proven conclusively their proficiency in operating an amateur station properly with those privileges. Then, in that instant of time, those very privileges were withdrawn.

As the organization whose purpose is to promote cooperation and friendship among amateur operators of at least 25 years of service, the QCWA seeks a prompt ending of the injustice being suffered by those within its constituency. The QCWA is committed to promoting interest in the amateur service and the advancement of the electronic art, making use of the reservoir of knowledge and experience among the nearly 10,000 members of the QCWA for the benefit of all amateur operators and the furtherance of the public welfare through amateur service communications.

May God bless the QCWA for trying to fix that wrong.

My situation exactly. While I'm at 2500' ASL and my local stations
are at 8800' and 4500', there are higher peaks between them and me. So
signal levels are down and reflections off local peaks (that are
line-of-sight to me and the transmitters) are as strong as those via
the obstructed path.

This is a technological disaster, which of course is what you get when
you put politicians in charge of science projects.

DTV, BPL, the morning after pill, all screwed up by politicians with
agendas.

I meed a good excuse to quit watchin' the "BOOB TUBE"
maybee this is it...

I us'd to repair TVee... Most people were satisfied with
a picture that looked like a pair of those 3D glasses when
the show wasn't in 3D...

If you done anything to make it better they complained it
jus' doesn't look rit'...

R!

"... all for $25 consumer price?"

DVD players for $17.88? Portable DVD players and even DVRs under $100?
Check. Routers for $5? Check. 20" color TV with remote, $79.95? Check.
Laptop for $400? Check.

Hardly seems possible, but the ads are in the Sunday paper every week.

>*What appears to have been forgotton here is only Full licenced Hams can
>read these messages compaired to everyone who can read a text.

In point to point communications, it doesn't matter. But in the real
world of emergency comms, voice is the usual mode, not CW.
IE: the fone hurricane nets, health and welfare nets, etc... Few
are CW. But anyone can copy them if they were. Well... If you know
code that is... I knew code well before I was a licensed ham.

>*But when the powers out so are the repeaters and also the mobile phones. CB
>radio is more practicable in situations like this as anyone can use them not
>just Amateurs.

Yea, but is there anyone on the CB bands I would want to talk to
to pass the traffic, etc? I kinda doubt it. CB might be ok for very
local
neighborhood type stuff. Lets them keep in contact. But as far as
actual
traffic, or health and welfare, CB would be nearly useless to me.
Not knocking CB, just telling it like it is. I would be on HF, and VHF
simplex. Also...The likelyhood of *all* the repeaters staying down for
long is probably fairly slim, unless the actual antenna towers are
down.
They can always bring a generator...You can also set up portable
repeaters. IE: ad nausium... I'll be talking everywhere. Local and
regional. CB wont. They will mostly be stuck in the hoods.

>How are they doing this? in what way? Who are they talking to?

Do they keep you locked in a closet? We do it in whatever way it
takes to get the job done. We are like Marines. We adapt, overcome.
Who do we talk to? Nearly anyone who is involved. From the
national weather service, to the coast guard, to local government
officials, to hospitals, etc, etc.
You talk about the CBer's. Where were the CB'ers in NO when the
people were stuck in attics with cell phones? The cell phones
were working for many people. They would call for help on their
phones, but there was no way to relay this to local police, etc...
Where were the CBers? They didn't seem to be capable of relaying
the calls. How were these calls being relayed to local NO officials?
I'll tell ya...The people that the cell phone users would call, would
eventually be routed to ham radios ops doing health and welfare
traffic to/from the area. Most of this was on HF. 40 meters in the

day, 75 meters at night. The 7.290 traffic net handled quite a bit.
Anyway, the traffic net people would get calls from relatives relaying
the cell phone calls from the attic stuck people. You would have
people in Houston, Dallas, Little Rock, etc, etc, etc, etc relaying
these messages *back* to NO to be relayed to the police, fire, etc.
I heard *many* of these attic stuck relays on HF. So sorry, but
your CB would be useful to the local is not really flushing. The
CBers either were flooded themselves, or fell down on the job.
The hams using *HF* were the only ones reliably relaying these
messages. And they were often 100's on miles away from NO.
I'm in Houston. So we also had our scare this year too. Believe me,
I'm prepared to handle just about anything, and have been, well before
any hurricanes hit the area. I have battery power here at home, and
don't need no stinkin power. Ditto for mobile, portable. I'm fully
self contained, power, radios, antennas. I can run off battery power
indefinately. I recharge off the trucks. I have portable towers, masts,

etc, etc, so I can set up at any remote location with 1st class
antennas. We practice this at field day every June...
I can set up antennas portable, better than some peoples home
antennas. IE: large yagi's, etc. I could act as the portable tower
for a temporary repeater. Anywhere they want to put it. I drag
it all on a motorcycle trailer.

>*I will be ready on my good old trusty CB to broadcast to the masses. More
>accessible and cheaply available than Ham but im sure the both can work in
>tandem.

There is a place for CB, no doubt. But I see CB as being good for
the local neighborhood talk line where poeple can keep track of the
people around them. It's pretty good for that. But handling actual
emergency traffic? In most cases CB would be fairly useless.
For many reasons. IE: the frequency is wrong for that use.
IE: only 5 watts legally... IE: the wrong people are on it, if
you are relaying traffic. Trust me. I have all of the currently
used devices. Cell phones, CB's, ham radios, shouting with my
lungs, etc. if I knew a hurricane was heading this way, I'd keep
my ham radios over all of them any day of the week. Way more
useful, with the wide spectrum coverage, antennas, radios, etc
I have. Here in Houston, ya wanna relay emergency traffic,
get on ham radio. Ya wanna talk to a truck driver looking for
grocers supply, get on a CB.. And I'm not bad mouthing CB.
Just stating the bleeding obvious. To me, CB is nearly useless.
In contrast, I can do nearly anything with the ham radios.
Including digi modes, fax, SSTV, etc...I can send documents,
weather charts, etc, over ham radio. And I can do it all with *one*
radio. My IC-706mk2g. Covers all bands, all modes. gen cov
receive. Heck, it'll even do CB if you clip a dyode.... My is still
locked though..Can you do all that with your CB? I doubt it
unless it's ham rig... :(
Good luck in the next emergency... I bet more will line up

behind me, than you, if they need to pass welfare traffic about
people stuck in flooded attics. We proved ourselves at that
job. We got *many* of them plucked out over those few days
after the storm. I heard many of them myself live, in living color.
Many on 7.290 and the linked health and welfare nets.
MK

This is amusing, given that incentive licensing came into effect in the US 37 years ago, meaning that a significant number of QCWA members could have been licensed after the rules went into effect. Someone licensed in 1968 is only 13 years away from fifty years of being licensed, doubling the 25 year requirement of being a ham to join the QCWA (if the old rule applied that you had to be licensed for 25 years).

I suspect there are only a handful of US hams still active who were around at the time of the introduction of incentive licensing and who've not upgraded at some point.

People wait for over a quarter century for privileges they could get sooner by simply taking a test?

Take note that the press release has a date of October 30, 2000, five years ago. Surely by now there's been some sort of response to the petition, be it yes or no

I guess you missed it the first time around. Try to pay attention.

As usual, ham radio operators help sustain wide-ranging relief efforts
By Andrea Kelly
ARIZONA DAILY STAR

When all else fails, it's ham radio to the rescue. Across Arizona, ham radio operators are helping sustain Hurricane Katrina relief efforts by helping storm-torn communities communicate with rescue workers and family across the country.

This is not a first. Ham radio operators come out of the woodwork during disasters around the world, even transmitting in Morse code if language barriers pop up, said Mike Swiader, president of the amateur Superstition Radio Club in Mesa.

Ham radio operators have contributed to emergency communication efforts since World War II, Swiader said, and were crucial in post-9/11 emergency communications, as well as during the Asian tsunami last holiday season.

Ham radios work when other communication systems are down because they're powered by solar energy, batteries or generators rather than the usual power sources.

The messages are passed from radio to radio until they get to the one they are directed to, so radios don't need to be near each other to receive signals, like regular AM/FM radio signals.

"We've been involved in passing traffic to and from the Louisiana and Mississippi area," said Tom Fagan, a leader of the Arizona ham radio operators organization. "Whatever needs to come in and go out, we're doing."

When Arizona's ham operators - there are about 16,000 of them - get messages from the hurricane area, they send them along to agencies like the American Red Cross and the Salvation Army in the Southeastern region of the country.

"We're the link," Fagan said.

Because communications within a disaster area are often jumbled, Swiader said, it's frequently easier for someone there to contact an operator in someplace like Arizona, who can then relay the message back to a recipient in the disaster area.

"Sometimes it's easier to be heard that way," he said.

More than 30 ham radio operators from Arizona have already headed toward the disaster area, hoping to assist relief efforts and give emergency workers a way to communicate with each other, as well as assisting searches for missing persons.

"They're moving in when they're allowed by American Red Cross and Salvation Army," said Ned Stearns, a Phoenix ham operator and vice director of the American Radio Relay League, the national organization for ham operators.

In fact, the ham operators plan to compile a list of people they can determine as missing, deceased, alive or unknown, based on information transmitted over the ham signals.

To find out about people in the area, visit www.satern.org and fill out the health and welfare information request for the person you are trying to find. This information will be sent through the Salvation Army emergency radio network.

Ham radio operators are helping from afar
Sunday, September 11, 2005
By DONNA FORK
For the Times dfork@knology.net

But sometimes, even the airwaves can be shut down

They also serve who listen and wait.

Huntsville amateur radio operator Douglas Hilton and other "hams" in North Alabama are helping victims of Hurricane Katrina by relaying messages between families, officials and each other.

Lately, Hilton's been spending most of his spare time in his "ham shack" listening to calls for assistance. The systems analyst for Intergraph Corp. is one of thousands of amateur radio operators who help people during emergencies.

Hilton is unusual in the ham radio world because he wears three hats: He is an amateur operator; a member of the Alabama State Defense Force, heading the Communications Platoon for North Alabama; and he's also a military communicator authorized to use the Military Affiliate Radio System.

His connection to the military (although he is a civilian) gives him access to additional radio frequencies most amateurs can't access. He has been a ham radio operator for 42 years; his father had him build a crystal radio when he was 7 years old, and he got his ham license as a teenager. But he wasn't all that active until after the terrorist attacks of Sept. 11, 2001.

"That hit me right between the eyes," he recalled, and he began to get back into "hamming."

Now Hilton averages about 100 hours a month on the airwaves and takes countless courses and certifications. He noted that amateur radio operators are "amateurs only in that we're not paid." In return for service "the government gives us frequencies."

Hilton said the North Alabama ham community is large.

"The astronauts are all ham radio operators," he said, noting that astronaut Owen Garriott "was the first ham in space."

Hilton''s "ham shack" is not really a shack at all. It is located in a formal dining room - complete with crystal chandelier. It includes six radios and two computers.

"You don't need six, but don't tell my wife, please," Hilton said as his wife, Diane, laughed. She recently obtained her "technician class" license, which is the entry-level license for ham radio operators. The next is "general class." The highest, which Hilton has, is "amateur extra." Anyone can be an amateur radio operator, Hilton said. There is no age limit: Hilton knows a local ham who is 18 and another who is 89.

It doesn't cost much to be an operator either, he said. A beginner could purchase enough equipment to get started for about $300. Courses are free through one of the local ham radio clubs, of which there are several, including the Huntsville Amateur Radio Club (the Web address is www.harc.net).

In addition to six radios, Hilton has two computers: a laptop and a desktop. "The radios are hooked into the computer." With his setup, the Hiltons can talk to other hams as far away as Japan.

But for the past two weeks there hasn't been time to chat about matters such as which antennas they like the best. There are emergency frequencies to monitor. At the moment, a critical one is the Salvation Army's emergency frequency, Hilton said.

Hilton never knows if it will be a busy night or a quiet one. Recent solar flares have added to the uncertainty because they disrupt communications. Friday, during the late afternoon and early evening, it was unusually quiet.

"I'm a little surprised," he said Friday. "I can't believe how dead these bands are."

Solar flare

It could be a solar flare, or could be something else. "That's the problem, you never know," he said. The waiting, the listening, "it wears you out." But it's worth it when you hear a voice and "you might be the only person who can hear this guy."

On Thursday night, when Hilton was expecting problems, reception was fine. He was able to contact two operators in Louisiana. He also heard one Mississippi ham talking to another ham "so at least one is working there."

ecause of the Hurricane Katrina disaster, there are thousands of messages piling up, waiting to be delivered by ham radio operators: What will happen when all their radios start working again?

People like Hilton will be extremely busy. There are thousands of ham radio operators in Louisiana and Mississippi. When they all get back to the airwaves, it will be quite a challenge to sort out all the messages.

But meanwhile, as they waited for the deluge of messages, on Thursday night the Huntsvillians received a call for help from New Mexico.

Maura Campbell Kingston of Clovis, N.M., was trying to reach her aunt, 76-year-old Sister Joan Campbell, a nun, of Harvey, La. Kingston called the Salvation Army, which contacted a ham radio operator, who called Hilton.

Hilton tried Thursday to reach a radio operator in Louisiana to check on Campbell, but almost all of them were off the air. Finally on Friday night Hilton got through to "KG5YK," who is Robert A. Turner of Elm Grove, La.

When Turner's message came through, hams from all over the United States could be heard, eager to talk with him.

Helping 'ham brother'

The outpouring of sympathy could not be contained: Radio operators from Texas, Indiana and elsewhere all expressed their support for their "ham brother" in Louisiana.

"I hope this never happens again," said Turner of the Katrina disaster. "It's been a tough time. ... I'm looking for the right words." He thanked the other hams for their all their help.

"You'd do the same for us," the ham from Texas said. Others echoed his sentiments.

Turner gave Hilton information about when to call with his "health and welfare message" about Kingston's aunt. Hilton vowed to keep trying to deliver the message "for as long as it takes."

But that proved to be unnecessary.

Friday night, after calling her aunt repeatedly, Kingston finally reached her by phone. She was still at her home in Harvey.

"She was OK," Kingston said in a telephone interview Saturday. "Harvey stayed dry." But the area was without power and Campbell "was sitting in the dark with her flashlight."

Later, Kingston called Hilton to thank him. She said he told her: "I'm just doing it because I want to help."

Kingston was impressed.

"I believe that thing about Southern hospitality."

Ham radio proves to be more than a hobby
By Jeannetta Edwards

Daily Times Leader

When Hurricane Katrina hit, telephone and cell phone communication hit an impasse because of downed lines and towers. But, amateur radio operators did not miss a beat or a transmission.

"Before and after the hurricane, this has proven to be the most reliable form of communication," said Randall O'Brien, a retired highway patrolman who has been involved with ham radio operation for 35 years.

"People thought when they got cell phones, they didn't need us anymore," said O'Brien, an advanced licensed operator, who often talks to missionaries in South and Central America.

According to Denver Baker, Clay County has more than 30 amateur radio operators, but only a small fraction are active.

"It's a wonderful hobby," said Baker, whose wife recently received her technician license.

The multi-faceted operation includes digital and satellite communication and is enjoyed by all age levels.

"This is a good hobby for seniors or for young people," said Baker.

By becoming a ham radio operator, which requires taking a test to obtain a license, people can communicate with others anywhere in the world.

"The classes for the test are free," said Baker, "and we help you with everything you need to know."

According to Baker, who has been enjoying this hobby for the last 10 years, the only investment required is the fee for the test and the purchase of equipment. A handheld transmitter cost around $100.

The self-policing group ensures that everyone adheres to the rules and regulations.

"We're called amateur radio operators, but there's nothing amateur about it," said O'Brien, who first became interested in electronic at age 13.

The group, which also belongs to the American Radio Relay League, meets monthly in West Point.

"We have a good bunch of hams in this area," said Baker. "We bring food at our meetings and have a good time."

"It's nice, especially for seniors," said Baker.

For information on getting involved in ham radio operation, call O'Brien at 494-2898 or Baker at 494-9096.

Ham Radio Operators Offer Help

By Beth Hahn
Mountain View Telegraph
Since Hurricane Katrina hit New Orleans last week, several ears in the East Mountains and Estancia Valley have been tuned to amateur short-wave radios.
McIntosh resident Ed Brooks said local Ham radio operators are willing to relay messages from the Gulf Coast if needed.
"We guys here in the Estancia Valley are just listening," he said. "We haven't had any need for what we can offer."
Although they may not be needed yet, Brooks said local Ham radio operators are still listening in to conversations taking place in Louisiana, Mississippi and Alabama.
During the interview with Brooks, his Ham radio was tuned to a conversation involving a Coast Guard helicopter that was rescuing a family from a rooftop in New Orleans with direction from another Ham radio operator.
Brooks said similar situations have been broadcast hundreds of times during the past week.
"It's been really spotty, but what we've been (hearing) is that it was good fortune that somebody down there had Ham equipment," he said.
Daryl Clutter, an Edgewood Ham operator and member of the Salvation Army's shortwave network, said he relayed a message from Ontario to U.S. Coast Guard officials in Washington, D.C., that originated in Louisiana.
"It was just the word 'help' spelled out two times," he said.
Like Brooks, Clutter said he has stayed close to his Ham radio since Aug. 29.
"There's been so much going on," he said. "Every day, something happens."
Clutter, a former truck driver who often delivered frozen food to

the Gulf Coast, said radio traffic has slowed since the hurricane devastated the region.
"You just wonder who all you know, that used to be your customers down there, that are still alive or had the good sense to get out," he said.
As amateur radio operators, Clutter said, Ham enthusiasts practice for disasters "every day."
"There's only so many cell phone frequencies," he explained. "If the phone system goes down, there's no way ... (one company) could handle all the 60,000 or 70,000 phone calls."
Mountainair resident and Ham operator Bob Scupp said the Salvation Army network alone has handled more than 128,000 messages since Aug. 29.
Brooks said Ham operators have been relaying messages from residents to volunteers or emergency personnel. Since a large number of National Guard and military personnel have arrived in the area, Brooks said the messages have changed from pleas for help to questions about well-being.
Shelters for evacuees are beginning to utilize Ham radios to communicate with other shelters to help families find missing relatives, Brooks said.
Rescues are still going on.
"There's been instances where they're still finding people, trapped in houses, trapped in buildings or running out of oxygen," said Clutter. "It's just terrible what's going on down there."
Clutter and Brooks said they will not offer assistance unless someone requests contact in the Albuquerque area.
"We don't want to tie up the frequencies," Brooks said.
Clutter and Brooks said they will continue to listen to their Ham radios for messages or relay requests until communications are restored in the Gulf Coast.
"We live and breathe this," Clutter said.

Amateur radio operators provide vital communications support
By Teresa Atkerson
MCALESTER NEWS-CAPITAL (MCALESTER, Okla.)
MCALESTER, Okla. -

With more than 10,000 requests for help in finding loved ones, the amateur radio operators in Louisiana are extremely busy.

In fact, they are so busy, they have asked people to wait with their requests unless there is an extreme emergency.

Ralph Suter, with the Pittsburg County Amateur Radio Club, said they had about a half dozen requests for assistance in locating loved ones in the area devastated by Hurricane Katrina. &#65533;The Red Cross funneled the requests for health and welfare,&#65533; he explained. Now, the national traffic system is backed up with the requests, he said, because there were so many.

There are extreme problems with communications in New Orleans at the present time. Suter explained VHF radio has to have line of sight while amateur radio operators can use lower frequencies that can bounce off or curve to get the message through. &#65533;A benefit of amateur radio is you can throw a piece of wire in a tree or up a flagpole. With 12 volts of power, you can operate on a local or even worldwide basis,&#65533; he explained.

As an example, Suter said recently an amateur radio operator in Louisiana had some kind of problem that he couldn&#65533;t get help with after the hurricane. He put out the message, it went through Washington state to Texas and then into Louisiana where the right people were found to help him.

Amateur radio operators can also communicate via Morse Code, upload through television or computer or radio to satellite, Suter said. That gives them even more advantages in communication.

Jim Russell, president of the PCARC, said amateur radio has been around as long as there has been radio. Even in World War I, amateur radio operators helped with messages in Morse Code, which is something operators today still must learn as part of their licensing process.

&#65533;We look at it as a hobby,&#65533; Suter said. &#65533;It&#65533;s a resource of individuals because they have an interest to develop the skills to operate radios in various modes.

&#65533;It&#65533;s a resource for trained communicators.&#65533;

There are forms that must be used when transmitting messages. &#65533;When it goes into the system at one point and comes out at the destination, it is exactly the same information, even with the misspelled words,&#65533; Suter said. &#65533;It&#65533;s our responsibility when handling traffic that it comes out exactly as it comes in.&#65533;

Suter said many of the operators use their radios on a daily basis while others check weekly. When it comes to disasters, there is the Amateur Radio Emergency Service. &#65533;It&#65533;s not really an organization but it is organized on a national basis for community programs.

John Wright, another PCARC member, checks with the Oklahoma Sooner Net and with the Salvation Army&#65533;s network, SATERN.

After the Oklahoma City bombing in 1995 and 9/11, Russell said amateur radio was used extensively. It is also used during and after tornadoes and other natural disasters. Now, the group can work with the Automatic Position Reporting System to help more accurately report severe weather.

The group has an annual field day, which is a combination of a exercise and a contest. &#65533;We go out and set up radios under adverse conditions to simulate disaster response,&#65533; Suter said. &#65533;In the past, we&#65533;ve started with solar power, using a battery in a car or even a portable generator.

&#65533;The last time I kept count, we were able to make contacts in 47 states, the Philippines, some in South America and Puerto Rico in a 24-hour period.&#65533;

Suter pointed out that the word “amateur” is not what people interpret it as. “People interpret it to be an unprofessional group. But while it’s made up of a lot of people for a hobby, it’s not unorganized or unprofessional when dealing with disaster. We have capabilities that public agencies just don’t have,” he said.

Members also have to be licensed. The license testing can be done in McAlester now so those wishing to be licensed don’t have to go to Dallas or Oklahoma City as in the past.

Teresa Atkerson writes for the McAlester (Okla.) News-Capital.

Old Technology Still Needed
(Page 1 of 2)

Sept. 8, 2005

Overwhelming Charity

Joe Carcia, station manager of the American Radio Relay League in Newington, Conn. helps with the disaster relief effort for Hurricane Katrina's victims along the Gulf Coast. (AP)

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

(CBS) There is a store in London dedicated to "appropriate technology." It mostly carries products designed to be used in developing countries where there is a weak communications infrastructure.

Sadly, that’s now the case for a large swath of the United States where Hurricane Katrina and its flood waters have wiped out cell phone towers, telephone switching stations, Internet routers and other ground-based communications systems. Even wireless Internet depends on nearby transmitters and receivers on the ground.

But amateur radio is working and, according to Allen Pitts of the Amateur Radio Relay League (ARRL), "ham" radio operators from throughout the country are answering the call to provide vital communications links. Satellite phones, a much newer technology, are also coming to the rescue.

Pitts acknowledges that cell phones and other technologies "work wonderfully when everything is going right," but "they are very vulnerable when everything is going wrong."

Just as with past hurricanes, earthquakes and on September 11th, the ground-based infrastructure, in many cases failed because vital parts of the system were damaged or overwhelmed during the emergency.

In other words, when you need them most, those cell phones are of no value.

Amateur radio, says Pitts, is not vulnerable to these problems "because each of the radio operators is a complete transmit and reception center

unto themselves able to continue going and continue with nothing more than an electrical source, such as a battery or a generator, a radio and piece of wire for an antenna."

Listen to audio of Larry Magid's interview with ARRL's Allen Pitts.

While base-station radios are larger and require an electrical power source, there are also portable ham radios slightly larger than a pack of cigarettes with a range of about 20 miles, according to Pitts. Pitts says that the next sized radio, about the size of a paperback book, can communicate up to about 50 miles without a repeater while larger systems, "about the size of a desktop computer" can communicate globally.

Amateur radio operators are in demand. When I checked the ARRL's Web site there was a call from the Salvation Army for "10, two-operator Amateur Radio teams for deployment in the U.S. Gulf Coast. Operators must hold at least a General class license. Teams should be fully self sufficient in terms of food, water and lodging and plan to remain in the disaster area for from one to two weeks."

Pitts said there was a "lady in Connecticut," who was listening on her amateur radio and happened to hear that there was a woman "who was trapped for four days without food and water." She was able to relay that message, by ham radio, into an operations center that dispatched the fire department. A day later she got a call from the trapped woman's mother, thanking her for her role in the rescue.

Ironically, this comes at a time when amateur radio is struggling for respect and, to some extent, survival. What was once a popular hobby has fallen into somewhat hard times for a variety of reasons, including the fact that the Internet, cheap long distance calling, cell phones and other technologies make the ability to use these two-way radios not quite as compelling as it once was.

Also, there is a bit of a rift between some members of the amateur radio community and some parts of the Internet industry over the use of power lines to transmit Internet signals. This technology, which could put power companies into competition with cable and phone companies for broadband service, has been criticized by some ham operators because of possible interference problems.

Despite the fact that their origins go back to the early 20th century, hams are hardly low-tech. There are now bridges between ham operators and other technologies including the Internet, cellular phone systems and Internet phones. In fact, long before the Internet became popular, ham operators were using their radio gear to transmit data along with voice and morse code.

Also coming to the rescue are satellite phones. These phones - which are much more expensive to buy and use than cell phones - rely on satellites rather than ground equipment to communicate with the phone network.

Because satellites are in space, they're not vulnerable to conditions here on earth. Also, as long as you have a view of the sky, you're able to communicate. Iridium, which operates "66 low-earth orbiting (LEO), cross-linked satellites and 11 in-orbit spares," says it provides "complete coverage of the earth (including oceans, airways and Polar Regions)."

I carried an Iridium phone with me when I traveled to Peru a few years ago. It worked great when I was in the clear such as on a boat in the middle of the Amazon River but, because it requires a line of site view of the sky, it had problems in dense jungle and in cities with tall buildings.

Iridium spokesperson Liz DeCastro estimates that there are currently about 10,000 of Iridium's phones being used in the region with orders for about 6,000 more. The company sells through resellers so it doesn't have exact numbers. DeCastro says that "traffic in the region increased by 3,000 percent" since the storm hit and that the number of subscribers increased by 500 percent.

Satellite phones are a lot cheaper to use then when I went to Peru, but they still cost between $1 and $1.25 per minute to use, according to DeCastro. That's a lot more than domestic cell use, though often cheaper than using U.S. phones when roaming overseas. The phones themselves cost between $1,000 and $1,500 she says.

In addition to handling voice calls, satellite phones can also be used for messaging or data, albeit at modem rather than broadband speed.

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

That's why some news organizations keep manual typewriters around. You never know when that old technology may suddenly become the "appropriate technology."

NYNewsday.com
Amateur radio operators head to Gulf Coast

September 6, 2005, 1:00 AM EDT

NEWINGTON, Conn. -- Oscar Fuller only became an amateur radio operator about a year ago, but he knows how valuable his equipment can be in an emergency.

So even though he has never responded to a crisis, the American Relay Radio League member is planning to head to the hurricane-ravaged Gulf Coast and see if he can help establish an emergency communication network.

"This is a tragic set of circumstances," said Fuller, who recently retired from IBM. "If I can lend a hand, I want to."

Fuller and about 14 other members of the Newington-based amateur radio operator network have signed up to join the relief efforts for Hurricane Katrina. The amateur operators _ known as hams _ can often use their equipment to communicate in difficult circumstances.

Because the radio equipment operates on many frequencies, is self-contained and portable, it can often work when other communication networks, such as telephones, aren't working. It can never be blocked, which is why operators say it is good in disasters.

"When all else fails, ham radios work," said Betsy Doane of Shelton, who oversees the 2,500 members of the league in Connecticut.

David Patton, an official with the radio group, said as many as 750 volunteers may be needed. The Connecticut volunteers are going to help provide communication support for more than 200 American Red Cross Shelters in Mississippi, Alabama and the Florida panhandle.

"There are limited resources to an overwhelming disaster," said Allen Pitts, public relations manager for the radio league. "So there is not a ham on every corner. The hams are put where they are needed most of all, in emergency traffic or for saving lives."

Dennis Motschenbacher of Colchester was among the first volunteers to say he would go. He spent Sunday shopping for supplies and getting ready for the 18-hour, 1,100 mile drive to Montgomery, Ala., where he will be dispatched to a shelter.

"Everything I need, I'm bringing," he said. "There won't be any Radio Shack to go to."

The 57-year-old has been a ham for more than 40 years. He has operated his radio from places as far as East Timor and the Balkans.

The hardest part will be "seeing people in this troubled state _ smelly, sick, depressed, angry. And no matter what any of us do, it won't be enough for all of them."

Ham Radio Operators Pitch In To Hurricane Katrina Relief Effort
General Interest
09/07/2005
With communications out all over New Orleans and the Gulf Coast, the professionals are turning to amateurs to be their ears to what's going on in the areas devastated by Hurricane Katrina.

Local operators say they've been in touch with people in and around New Orleans since the beginning of the ordeal.

Ed McLaughlin, of Kennewick, says in the days that followed the disaster, he was able to help a family in Medford, Ore., get an update on how their relatives were. He's provided similar contact for a family in Chicago.

The reason-- ham radio, which is able to get in places that have no other means for communication when land-based infrastructure fails.

Ham radio has been such a success during these recent days that FEMA and the Red Cross are now using it as their primary mode for communication until other modes of communication are restored.

News-Leader.com Springfield Mo.
Ham radio helps close communication gap

Nixa man relayed message from president to New Orleans' mayor.

Joe Hargis works on his amateur radio in his home in Nixa. Hargis helped rescue an elderly woman by notifying someone who could contact rescue workers via radio.

By Sarah Overstreet
News-Leader

If you've been unsuccessfully trying to get information about someone living in Hurricane Katrina's region of havoc, here's an avenue you may not have considered: local ham radio operators.

While cell phones rely on towers and traditional telephones rely on intact land lines, ham radios transmit from radio to radio, bouncing waves off the ionosphere in the upper atmosphere far above the Earth's tantrums. They can run off batteries, generators and sometimes even the sun.

Two Ozarks amateur ham radio groups - the Nixa Amateur Radio Club and the Christian County ARES (Amateur Radio Emergency Services) - have been relaying messages from people all over the world to those whose communication has been cut off by Katrina.

David Beckler, a ham radio operator from Nixa, even relayed a message Tuesday from the director of the Federal Emergency Management Agency in Texas to New Orleans Mayor Ray Nagin.

"He had a message from President Bush to the mayor of the city of New Orleans," says Beckler, a New Orleans native who moved to Nixa six years ago.

Since the message was an emergency communication, the dispatch needed to go through the net control station on an emergency frequency, Beckler said. He knew it was important, because the ham operator had said, "break, break, break," which requires all other communications to yield and give that one priority.

"The net control station or other stations on this frequency could not hear this message," Beckler says. Beckler contacted the net control station, and people there asked him to contact the sending ham operator and relay the message back to that operator. "That's when he told me it was from President Bush."

Joe Hargis, another Nixa ham club member, also helped with an urgent message. "I was monitoring the SATERN network (Salvation Army Team

Emergency Radio Network)," said Hargis, a retired elementary schoolteacher.

"A person called in with a piece of emergency traffic and the (receiving) person could not hear him. He said, 'Is there anyone on the frequency who can copy this?' I broke in and told him I could hear it fine."

Hargis relayed the message back to SATERN, and the operator there could hear Hargis well. "It was a 90-year-old woman and her elderly neighbors. They were afraid to leave their home because of the unrest in the neighborhood, things that were going on, and they needed assistance to be evacuated. They were running low on medicine, and one was running out of her oxygen supply."

Nixa ham club member Rod Kittleman says their members helped save the lives of a couple in New Orleans.

"A weak, disabled elderly couple were trapped in their attic. Their phone worked, but they couldn't get through to local authorities," the KADI radio program manager explains.

Too weak to break through their roof so emergency personnel could find them, the couple called their daughter in this area. She contacted the Nixa club, which relayed the message to a local ham operator who is licensed to operate on emergency frequencies.

"He got through to authorities in New Orleans over the radio, and they were rescued. (The ham operator) relayed the message back to their daughter. That's the reward we live for."

ARRL's Role In Rescue Offers Lessons For Future

Mark David
ED Online ID #11164
October 13, 2005

Investigations into the communications breakdowns in our national emergency response systems continue. Yet I'm struck by the contrast between the hue and cry for upgraded infrastructure solutions and the much quieter revelation that old-school ham radio provided the only trustworthy communication during Hurricane Katrina.

New Orleans emergency departments' radios were wiped out when broadcast towers lost backup power generators. Police and fire departments only had citizen-band radios, offering inadequate bandwidth. Emergency responders lacked coordinated frequencies.

The National Guard cited antiquated communications technology-as a contributor to its delayed response. Lt. Gen. Steven Blum told USA Today that there was a shortage of high-tech radios and satellite communications gear. "We were underequipped," Blum told USA Today. "We don't need tanks and attack helicopters... but we must have state-of-the-art radios and communications."

The Guard has historically gotten "handmedown" equipment from active-duty military. It now uses "Vietnam-era radios while it needs 37,000 newer radios," according to Guard budget briefings.

Meanwhile, ham radio operators proved that older technology can be the most reliable technology. Our EDA Editor (and ham) David Maliniak wrote an online column on the subject, pointing out that sometimes "old works when new doesn't." (Read it and add your comments at ED Online 11136.) During and after Katrina, hams running on generators (sometimes with makeshift antennas) worked throughout the hurricane zone to put emergency stations on the air. They guided rescuers to stranded victims and updated weather services via the Hurricane Watch Net.

Amateur radio was the primary means of contact with the outside world for many shelters. It's estimated that some 1000 amateur radio volunteers helped serve the hurricane-ravaged communities and shelters, even providing communications for the Red Cross.

Still, the real lesson of the ham radio successes isn't that old sometimes trumps new. Upgraded, reliable hardware is vital for adequate emergency response. Amateur radio has continued to upgrade too. Hams use satellites, digital systems, cross-band repeaters, and more. As the American Radio Relay League (ARRL) puts it, the Morse code key may still be on the desk, but generally it's next to a modern system operable under extreme emergency conditions.

DISTRIBUTED NETWORKS

Katrina taught two key lessons. First, the Amateur Radio Emergency Service (ARES) organization proved effective because hams don't depend on a centralized infrastructure. When cell towers, phone switching centers, or other central communicationsnetworks are down, hams aren't. Many operators have their own generators and are ready to fire them up to get on the air when there's no power. National disaster response plans must assume that the centralized communications infrastructure likely will be crippled, so the emergency system must include a distributed or "mesh" networking scheme.

Second, ARRL succeeded because operators subscribe to a mission that comes with their licenses-to be ready to provide emergency communications whenever and wherever they're needed. ARES has a well-conceived action plan coordinated through the Radio Amateur Civil Emergency Service (RACES). ARES is part of the ARRL, and RACES is coordinated through the Federal Emergency Management Agency (FEMA). But like the broacast system, the emergency plan is decentralized. Radio operators can work independently to serve their community as circumstances require.

A decentralized emergency plan requires deputized people who truly understand and care about their responsibilities. The best emergency response relies on distributed manpower, with first responders empowered to make decisions at the scene of the crisis.

It doesn't take a federal investigation to realize that the government's emergency-response debacle was caused by centralizing the decision-making with politically appointed bureaucrats who didn't have a personal mission or a true sense of ownership in ensuring preparedness. The fiasco with now-deposed FEMA leader Michael Brown exemplifies the folly of appointments based on cronyism, rather than the recruitment of people who have a passion, understanding, and commitment for the responsibilities they shoulder.

In this issue's cover story, Ron Schneiderman looks at government programs and the new technologies tackling our homeland security problems. But will the right people get those technologies? Too often, homeland security appointments and dollars are doled out according to political favoritism. As we saw in the recent emergency response, technologies are only effective when managed by people-like the hams-who take their responsibilities to heart.

Hats off to all of you who care about the quality of the security and emergency communications technologies you're engineering. Let's hope they end up controlled by people who care just as much.

A few months ago, NBC's Tonight Show staged a race between a pair of ham-radio operators with Morse-code keys and a couple of kids with text-messaging cellphones to see who could communicate faster. The hams won hands down, proving, in the minds of some, that old technology could hold its own against new. In recent days, ham radio was put to the test again by Hurricane Katrina. This time, however, lives were at stake.

In the world of design engineers and electronics in general, change is essential. Designers work diligently to make the fruits of their labors obsolete almost before they see daylight. The turnover in technology is sometimes like a flood, with old being washed away by new over and over. Often, the new beats the heck out of the old. But there are times when old isn't necessarily bad; in fact, sometimes old works when new doesn't. And then we're glad that old is still around, or at least we should be.

Wireless technology, while relatively new to many consumers, is of course not new at all. A few (very) old-timers remember the original "wireless" of radio. The revolution wrought by the pioneers of wireless changed the world then, and the technology behind that revolution has been re-invented and re-applied time and again. Its pre-eminent incarnation today is our near-ubiquitous wireless communications infrastructure, which has freed us from the shackles of landlines and made our mobile lifestyles possible. Technology truly is great stuff.

Until, of course, a monster hurricane comes along to render it nearly useless. Here we see a scenario in which a flood literally swept away the new. As Hurricane Katrina's fury hammered the Gulf states on August 29, the communications infrastructure took a devastating hit. Telephone service, including wireless, became at first intermittent and then unusable in many localities. Where there was phone service, 911 switchboards were often unreachable due to the massive volume of calls.

The response of local authorities, now termed "confused" by deposed FEMA chief Michael Brown, wasn't helping much. The Gulf Coast was about to descend into darkness, chaos, and, worst of all for many, silence.

But proponents of the old were at the ready. The "old," in this case, is ham radio. In the eyes of the "man on the street," ham radio has a pretty stodgy reputation. Aren't hams still using Morse code? Don't some of them use radios with tubes, for goodness sake? What the "man in the street" probably doesn't know is that it was amateurs who advanced the radio arts early in the 20th century. Down through the decades, amateurs have embraced (and often driven) all of the innovations in wireless technology, up to and including all digital modes and the Internet. But many have stayed in touch with their roots, which is good old-fashioned analog HF operation. And while amateurs have a longstanding tradition as innovators and experimenters, they also have a mandate that comes with their licenses: to be ready, willing, and able to provide emergency communications whenever and wherever they're needed.

As Katrina bore down on the Gulf region, amateur radio operators, under the aegis of the American Radio Relay League's (ARRL's) Amateur Radio Emergency Service (ARES), prepared to swing into action with emergency networks that would run health-and-welfare traffic into and out of the disaster zone. As early as the Monday following the storm, hams throughout the hurricane zone were putting emergency stations on the air. In one instance, hams were instrumental in the rescue of 15 people clinging for life to a New Orleans rooftop. Meanwhile, in Alabama, amateur SKYWARN weather nets kept the National Weather Service apprised of conditions throughout the state. In hard-hit sections of Mississippi, hams running off generators and with makeshift antennas were the only means of communication, getting word to out-of-state friends and relatives concerning their loved ones.

There were numerous other instances of hams helping those who were not simply inconvenienced by the storm, but whose lives were in imminent danger. Now that things have calmed down in the Gulf region, many of the emergency nets have stood down. But hams continue to serve the public in the many areas that are still without power or phone service.

As our nation collects itself in the aftermath of the Katrina disaster, President Bush has promised federal reviews of what went right and what went wrong. One of the findings of those inquiries should be that the federally-instituted Amateur Radio Service, which functions under the licensing authority of the FCC, stood tall when the country needed it.

Amateur radio currently faces various threats to its existence. Chief among those is the advent of broadband-over-powerline (BPL) technology, which, if broadly adopted, has the potential to cause widespread interference to HF communications, not just for amateurs but for other services that use the HF spectrum.

Amateurs and the ARRL have made a lot of noise about BPL, asserting that it could seriously hamper their efforts and those of relief agencies

such as the Red Cross and Salvation Army, in the event of a disaster such as Katrina. It's rumored, though, that the same FCC commissioners who have given their blessing to BPL field trials will now take a much harder look at the technical issues concerning BPL and its interference potential in the HF spectrum. Let's face it: The federal government didn't handle the emergency in the Gulf very well; it'd be prudent for it not to sanction a technology that could impede one of the few things that actually worked.

Many readers of this newsletter are amateur radio enthusiasts. If you are, and if you haven't already done so, consider writing your congressman to express your concern about the future of the Amateur Radio Service, especially in light of its outstanding efforts in recent days. Remind your elected representatives that a vibrant and unimpeded Amateur service can and will be a lifesaver when disaster strikes. Also, consider how you yourself might help. What if a hurricane, tornado, or earthquake ravages your area? Are you prepared to get on the air without relying on the mains to handle emergency traffic? Get in touch with your local amateur-radio club and find out how you can pitch in.

Your cell phones and wireless routers are indeed great stuff, but so is a good old HF transceiver. We shouldn't always be in such a hurry to let the flood of new technology wash away the old. The geek down the block with all the antennas on his property could turn out to be your best friend someday. Because sometimes, old trumps new.

Cmdr Buzz Corey posted:

"The state is full of simple minded dummycrat liberals."

I live in Masachusetts, and worse still, Gov. Mitt Romney is a Republican. (Our Lt. Govenor, Kerry Healey is no mental giant either.) Both are children of the idle rich, and neither has any perception of the real world in which most American's live.

What is even more frightening to me, it appears obvious to everyone in MA that Romney is posturing himself to run for President, and Healey to run for Govenor. Brrrrr...What a chilling thought. I'm a long-time registered Republican, and quite frankly I seriously doubt that Romney and Healey combined would be qualified to run for the local position of Dog Catcher!

With respect to Ms. Jacobsen... For many years she was married to Chet Curtis, another local news anchor, a private pilot and I believe a ham radio operator as well. So it figures that she would have reacted to Romney's ill considered remarks dismissing the important role of amateur radio in disaster communications.

Harry C.

p.s., If the above predictions become reality, I will be re-registering as a Democrat and working my arse off to defeat both of these candidates.

Agree completely. My personal knowledge is
based on what I have seen throughout the
northeastern USA...which is no CB monitored
signage anymore.

Given the cheap cost of a CB these days, I think that
any emergency comms center should have a CB radio.
In my home town we had a RACES set-up and had
several HF and VHF ham radios, scanners for
Monitoring local police/fire/etc
AND at least one CB radio.

Cheers,
Bill K2UNK

The local WalMart had a 24" color on sale for $99. The 19" for
the same price included a built-in DVD/CD player.

Cheers and happy shopping

Hams have minimal and the CB lobby is next to nothing.

I personally can't see where power line internet will be a real
challenge to current copper phone lines and fiber. With Verizon
spending billions to string fiber to individuals homes, it wont be
long before the lawsu its begin and they will have to grant access to
these. Once that happens powerline DSL in the US is a foot note in
history.

Just the same as police/government communications then... so no need for the
Hams after all.....

> >How are they doing this? in what way? Who are they talking to?
>
> Do they keep you locked in a closet?

Not at all. My point was do Hams just talk to themselves or are they set up
in important communications centres or are they at home, and phone up
someone with the information passed to them?

We do it in whatever way it
> takes to get the job done. We are like Marines. We adapt, overcome.

That explains the friendly fire.....

If you had read my posts that was what i was referring to. Both services (CB and Ham) working together not CB instead of Ham... CB's could have been issued to the police to help organise themselves. They were not allowed Amateur gear because they arent licenced Hams. Then CB traffic passed on to Hams for the more distance and point to point stuff. THAT was what I was trying to get over.

>But handling actual
> emergency traffic? In most cases CB would be fairly useless.

> MK

Line up behind you.. oh right you seem to be in some sort of competition. Like I said before I wasn't posting about CB instead of Amateur, how many times do I need to point out what the post was about before it sinks in..... Now please put down that trumpet......

I'm not "whining" about the mountains, I'm pointing out that a bunch
of dumbshit politicians with dollar signs in their eyes made some
stupid decisions (pardon the redundancies) and are trying to foist
upon the public a technology that is both unnecessary and unworkable
for a large number of people.

When my government takes something away from me for no good purpose,
then I'm going to complain about it.

It's also curious that when I asked the chief engineer of a local VHF
TV station, who is a personal friend, why they didn't put a UHF
translator out my way he replied that they have wanted to for years
but the FCC would not grant a license. That spectrum is too valuable,
doncha know. So public interest isn't important, revenue is.

And I sure don't to pay big bucks to know what the weather is, when I
can walk outside and get an accurate picture, rather that some
wild-ass guess.

Translators are granted on a ''Secondary'' status meaning that if a
higher priority use is sought for the channel the secondary user must
vacate. Otherwise they chug on for years.

All five of the Commissioners are political types - have to be in order to be appointed and confirmed to that position.

Two with technical degrees? In your dreams. The last "engineer Commissioner" was George Sterling during the late 1940s. In the 1980s some of us wanted to have the Comm Act changed to require at least one to have an engineering degree but we were shot doen by the political types.

And at this moment you can get one (16x DVD+/- R/RW DL Pioneer DVR-110) from
Meritline for $47... simply bloody amazing..

That's the wrong reason to change parties. First of all, look at your values and compare them to the values & policies of the various parties. Join that party whatever it may be and whoever may be the leaders. Then if you don't like the leaders, work your arse off to get different leaders within the party. What good does it do you to joint a party which may be diametrically opposed to your points of view !?

Dee, it's too me that the fundamental principles of the Republican and Democratic parties don't vary much, extreme in the fringe edges.

On the other hand, when you have candidate of either parties who are total incompetent, such as Mitt Romney and Kerry Healey who not only are incompetent and also don't have a hint of a clue, it is critical to limit or inhibit their aspirations by whatever means is needed. The same can be said about John Kerry, in the last election. Kerry is a total and demonstrated dumb ass, who is only in politics to advance his rather egotistical ambitions. I would rather vote for his wife than him, in future senatorial contests.

By contrast, I rather like what Ted Kennedy does in the senate, even though I am a conservative Republican.

Perhaps I'm strange, but I would rather vote on a candidate based upon their past performance and voting record in the job, than then their party affiliation. What they professs to believe doesn't really do much for me.

Party loyalty also doesn't do much for me.

Harry C.

Better yet, opt out of the sheeple-orientated party system and vote for the CANDIDATE who best matches your politics. Urge your friends and family to do the same. Only then will we get candidates who listen to PEOPLE, not to moneyed interests.

Dave Sumner, K1ZZ
ARRL Chief Executive Officer
American Radio Relay League
225 Main Street
Newington, Conn. 06111

1 December 2005

Dave,

What is W1AW's current policy with regard to its bulletins, and can you refer me to the ARRL Board minute which established this policy? Specifically, does W1AW listen and/or QRZ each published scheduled frequency before transmitting? If the frequency is busy, does W1AW QSY, delay, or even terminate the scheduled bulletin?

The policy published in QST that I have found is to stick to the published schedule regardless of whether the frequency is busy or not, just as is the policy of K1MAN for information bulletins, which is also consistent with many years of W1AW operating practice as well.

Yow will remember that K1MAN was "fined" in 1990 with regard to this policy, and my appeal of these "fines" to the full Commission was "deep sixed" and thus blocking my further appeals to the D.C. Court of Appeals and the United Stated Supreme Court. Also, these "fines" were never litigated in Federal District Court here in Maine, and my subsequent civil suit to resolve this matter in Federal District Court against the FCC was dismissed. My related civil suit in Federal District Court against ARRL was also dismissed. My many attempts to resolve this matter have thus been repeatedly thwarted. K1MAN was then "fined" again regarding this same policy in April of 2005, a full fifteen years after the original FCC action, thus creating a further legal nightmare for the Commission, of course.

I am a member of ARRL. Thank you for your attention to this request.

Best personal regards. 73.

No Kidding. Actually, the best way to return the favor for these rocket scientists is to make sure that the IRS knows about how much money they have made.

Fortunately, they often include their street address in the posting, and that makes it even easier.

For more information call the IRS hot line at 1-800-829-0433 or go to www.irs.gov/pub/irs-pdf/p733.pdf.

Hey Rick,

That's the whole idea, isn't it? Watching the seconds tick off...
57...58...59...00

Here in New Hampshire, reception of 60 kHz varies directly with the band conditions (of course), for example, a lot like 160m, and also varies with the location in the house where the clock happens to be located.

Then again, I don't have the luxury of having a flat, mountainless, conductive ocean between me and the west coast like some people.

Mele Kalikimaka me ka Hau'oli Makahiki Hou! (I lived on Ford Island, 1960-1963, without WWVH, cable TV, or GPS)

73,
Dave

Portable toilets are modern, portable,
self-contained outhouses, usually molded of
plastic. Most portable toilets are large enough
for a single occupant. Portable toilets are
solidified by the weight of the disinfectant
liquid in the tank at the bottom of the portable
toilet. Most portable toilets have a seated toilet
as well as a urinal. Portable toilets also usually
have open holed ventilation, lockable doors and
holding tank ventilation. Like regular bathrooms,
many portable toilets have toilet paper and soap
and water.

Portable toilets are used by construction sites,
concert and sport venues, and large outdoor
gatherings, to name a few. Portable toilets are
drained, cleaned and disinfected on a weekly
basis. There are city, state, and federal codes
that require a certain amount of toilets to be
available for large events, portable toilets are
perfect for these situations. Unlike regular
bathrooms, portable toilets do not clog or
overflow. Some companies are developing upscale
portable toilets with carpeted floors, mirrors,
lights, etc. Portable toilets are usually rented
from a company and hauled around from site to site
in the bed of a pick up truck.

Any one know of a 6 meter FM repeater in the South Tampa area?
Something simplex?
I think that my RT-70A/GRC works right up to the last audio amp tube.
It has a 1 khz signal (using a Tek 2465) there but no output to the ear
piece after I provide an FM signal (8640b) at the proper frequency. When I
get the 3B4 tube I have bid for on Ebay for, I'll know if I have a
functioning FM 6 meter radio. I think the xmitside works but I need to find
a local repeater to confirm that.
Anyone had or has one that has or does does work?

hmm Comode assuiming yu havea ccall that you are hiding it is likely
that you have a general adanced or extra class liecen by when you were
cancelled it seems like that you entered radios as a Novice. meaning
you would have gotten 2 or 3 letter from the fcc just from the
liecense issues and surely moved a time a 2 geting youan exchance of
letter for each so I'llbelive you have for letters as to being on
Riley speed that could just mean you are fiends

hel I have 3 letter from the FCC myself

but you are all too concerned about letters

even the suggestion drive you folks nuts

And mine are only 8X for DVDs and 40X on CDs. <sigh> Left behind
again<:-))

BTW I live about 14 miles from the world's largest Poly crystal
Silicon supplier. I think they also sell wafers. (very large wafers).

In 1960 a single crystal rod of the best purity you could get sold for
$165 a gram. Today the poly is of higher purity than those 10 pass,
float zone refined rods and as I recall it sells for something like a
couple bucks a Kilo. . Back then a single crystal rod of 3/4"
diameter and 16" long was about the biggest thing you'd see with poly
rods about the same size.
Now days wafers are running some where between 10" and 14". I'm not
sure the current size as I've been away from it for a long time. Poly
crystal rods are huge. It takes power hoists to move them.

Some time in the late 60's (as I recall) they were able to change to a
new method of sawing wafers which reduced the waste by about 50% or a
little better. At least one firm went out of business as overnight
they had doubled the single crystal yield with no increase in, cost,
time, or labor.

Last week there was an article in the local paper that the plant is undergoing another expansion. Not just an expansion, they are doubling the plant capacity and they are already the world's largest supplier but a good margin.

They have gone from a small operation in a cement block garage while using an old two story farm house for an office building to one huge complex.

Think about the amount of silicon used in a transistor, CPU die, or even the CCD in a camera which is probably the largest typical die and then think of the thousands of metric tons of the stuff this place produces.

The engineering costs to produce any particular IC or CPU are high, but once in mass production it drops to almost unbelievable levels. Remember CPUs starting out at a $1000 dollars or more and in about a year of so they are less than a $100 and often still in production. They end up being dropped from production, not because they are losing money as they aren't, but the new *stuff* brings a premium price so it's a no brainer to make the switch. Sure the price is high so they can write off the engineering costs in a hurry, but they are still making a healthy profit.

The same is true for tuners, decoders, converters, and other set top boxes. As that stuff is mass produced and there is a tremendous market for it, they will be moving to one and two chip designs dropping the costs to a couple of dollars where the broadcasters and cable companies can give them away with each subscription.

A nearby company purchased a large batch of high quality 19 or 20" LCD monitors. The cost was some where in the low $200 range. What was the price on those just a year ago, or two years ago if you could find one that large? <:-)) Currently the price is one of supply and demand for those. They could be sold far cheaper to the individual and it won't be long before they are.

Now If I could just convince my wife of all the good reasons for getting rid of the old 19" CRTs here and going to 21" LCDs. <:-))

I hate to say, or admit this, but I remember when the new TV sets finally came out with 21" CRTs <:-)) and those *were*expensive* Carried forward to today's dollars they cost more than one of the big 50 some inch plasma sets.

Hello guys,

I recently picked up an old vector network analyser in working order
but minus the 3 interconnects between it and the
transmission/reflection bridge. These are specified in the manual to
be exactly 24" long, 50 ohms and terminated by N-type plugs.
I've been told the length of these patch leads is quite critical to
getting accurate measurements with this VNA, but am at a loss to work
out why 24" is specified when the frequency range of this device is
4Mhz to 1300Mhz. If it were only capable of measuring at one fixed
frequency, I could understand the need for a specifically cut length
of some fraction of a wavelength.
Can anyone explain the relevance of 24" in this context?
Also, will *any* 50 ohm coax suffice for this purpose or has it got to
be something special?
Thanks,
P.

it is likely the 'real' requirement is that they be exactly the same length.
though there may be some maximum length because of attenuation at the top
end. there is also a possibility that they figure in some length of coax
and calibrate that into the system, though i would think that is less
likely.

Re: Governor Romney's Uninformed Comment on Ham Radio <-----(this title for NG only)

A former Massachusetts citizen, I grew up in in Swampscott, winning my ham radio license at age 13 in 1952.

More than once, I can recall when hams were essential because of adverse weather conditions that cut communications. One was during a hurricane in the 50's. My friend (Aaron Fishman of Sherborne, K1BAF) and I manned his car atop Highrock Hill, high ground in Lynn so as to hear and reach the weakest signals, such as hand helds.

I can remember the howling winds, the car shaking, and the engine running to provide power. When it was written up in the Lynn Item, Aaron and I got no credit, but I recall that wasn't important.

What was important was the ethic of being a communication's foot soldier in time of need. That same ethic continues to the present time.

Hams are trained in efficient communications and in getting a signal out with very little. Hams represent a fountain of communications expertise, and that is why we are licensed by the federal government. (We are truly a national resource.)

A governor cannot know everything, and this is apparently a blind spot. However, I'm hoping Governor Romney can come up to speed on this subject, because it is one near and dear to the some 500,000 practitioners in the United States and to those whom they routinely help, like the National Weather Service.

Bob Sherin, W4ASX
In Mass., my call was W1ZHG

The phase shift due to the 24 inch coax cables are factored into the Network Analyzer for all frequencies and so any different lengths will cause the correction factor which is built into the analyzer to be wrong and that will make the reading displayed on the screen to be in error.

The phase velocity for most coax cables are similar, so I'd use RG-8 since that accepts type N connectors reasonably well. The impedance bump caused by a thinner cable being adapted to type N cables would be noticeable especially at higher frequencies.

The only major question is whether the original cables had a different velocity factor, and that I can't answer so I'd use the RG-8 and it should be close enough.

Here you go, Markie. This may help the rest of us get through your laborious third grade level posts.

ieSpell - A Spell Checker for Internet Explorer
Introduction
ieSpell is a free Internet Explorer browser extension that spell checks text input boxes on a webpage. It should come in particularly handy for users who do a lot of web-based text entry (e.g. web mails, forums, blogs, diaries). Even if your web application already includes spell checking functionality, you might still want to install this utility because it is definitely much faster than a server-side solution. Plus you get to store and use your personal word list across all your applications, instead of maintaining separate ones on each application.

```
*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): Just as I was finishing this
week's issue, I received a phone call from my step-mother informing
me that things turned worse for my Dad. I will be heading west ASAP,
so there will probabaly be no OPDX until further notice. Thanks for
understanding..........

"I dedicate this issue to by Dad. I hope I made him proud, as his son
as I was proud of him as a father. I will miss him when he leaves,
but I know he will be with my mother."

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the
week of Sunday, 27th/November, through Sunday, 4th/December there were
239 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V,
3W, 4J, 4L, 4S, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X,

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4X411, ISRAEL (Intertesting Item Of The Week!). The "Holyland DX Group" will operate as 4X411A on December 23-24th from the "Lowest Dry Point" on the Globe. From minus (-) 411 meters Below Sea Level in the middle of the Dead Sea, operators will use the special callsign and run two complete stations with one power amplifier on 80-10 meters, on CW and SSB starting at 0700z Friday, December 23rd. The group had/has received special permission from the Dead Sea Works Factory. Operators mentioned are: Shalom/4Z4BS, Mark/4Z4KX, Ros/4Z5LA, Ruben/4Z5FI, Ilya/4Z1UF and Jan/4X1VF. QSL via 4Z4BS. Visit Web page at: http://www.4z5la.net/4x411a

6W, SENEGAL. Dani, EA4ATI, is back in Africa again, this time in Dakar, Senegal. He informs OPDX that he received the licence 6W/EA4ATI and also mentioned that he will be on the air for the next ARRL 10m Contest as 6W1EA. Dani states that he will be here until June-July (he is working there now). We asked him what bands he would be on and he replied stating, "For now I have a three element yagi beam antenna for 10-15-20, but soon I will set up the dipoles for the other bands (40-80-160 and WARC bands)." QSL via direct to his home callsign EA4ATI.

6W, SENEGAL. Tibi, HA7TM, will be active as 6W/HA7TM from the QTH of 6W7RV located in Le Caola, Senegal, December 15-22nd. Activity will be HF, mainly CW and SSB, possibly RTTY. QSL via home call, direct or by the bureau.

C9, MOZAMBIQUE (Update/Looking For Operators). Frosty, K5LBU, reports that so far there are 3 operators going with him to Mozambique in July 2006. They plan on arriving in Maputo, Mozambique, on June 29th and depart on July 13th. They plan on having 2 complete stations set up and running the whole time. One for CW and one for SSB. They will also have a station set up for RTTY and PSK. They are planning to be active in the IARU Contest the weekend of July 8-9th with one CW and one SSB station. Frosty mentions that he just returned from Mozambique and Swaziland on November 26th after looking at a very good site at Praia do Bilene which is on the coast about 80 miles north of Maputo. He states that they will have the stations set up in a cabin that has 3 rooms so they can put the CW and PSK/RTTY station in one and the SSB in the other. They will also have 2 trailer mounted towers set up along with the 72 foot vertical for 160-80 meters which also works on 30 meters quite well. There will be four 40 meters sloping dipoles on each tower that work very well also. Daniel, ZS6JR, is also planning to set up an EME station so they can also try that mode. Frosty states, "So are there any more that would like to join us and make this trip? We will have at least two more 2 bed room cabins and can get a third if more operators join with us." If interested in joining their team, please contact Frosty via E-mail at: frosty1@pdq.net

CE0Z, JUAN FERNANDEZ. On their way to the Peter I Island DXpedition (3Y0X), Gerard/F2JD will team up with Pedro/CE3BFZ and probably some other operators and will be active from Juan Fernandez between January 20-26th.

FT5XO KERGUELEN ISLAND VIDEO IS OUT! James, 9V1YC, informed OPDX this past week that the FT5XO Kerguelen DVD is finished and is now available at the following Web page at: http://www.dxvideos.com/ft5xovideo.htm
What a great Christmas gift for DXers! Witness the Microlite Penguins DXpedition team leave home for 6 weeks and travel to this icy, windswept island aboard the famous R/V Braveheart. Sailing to new extremes in the South Indian Ocean, and again using the "low power-vertical antenna" approach, join the Microlite Penguins DXpedition team as they battle through the seas and the pileups from yet another remote Antarctic destination! Video is digitally filmed and edited, and mastered to Digital Betacam in Stereo. Look for OPDX to publish a review on the DVD as soon as it is received.

HS0 & XU7, THAILAND AND CAMBODIA. By the time you read this, Pete, SM5GMZ, should be back in Thailand again and be active as HS0ZFI until December 31st. His activity will be limited due to work, but he will operate during his spare time. Operations will be on CW, SSB, PSK31 and RTTY, probably on all permitted bands. Also, look for Pete to be active as XU7ADI for at least two months starting January 6th. Activity will be on on all bands and 6 meters. Modes should be the same.

IOTA NEWS.....
AS-013. Roberto, IW1RIH, will be active as 8Q7IH from Rannalhi Island, The Maldives, December 5-12th. He states, "The Maldives are certainly not the 'Most wanted' on HF, but I think nobody has been on the air from Rannalhi Island, so far and though, I will be so happy to do it." QSL via IW1RIH. Rannalhi Island is located 35 km, away from Male' in the South Male' Atoll, 45 minutes by speedboat. It is now a popular diving destination with a beautiful house reef around the Island.

AS-117. Look for Kenji, JA4GXS, to be active as homecall/4 from Yashiro Island (JIIA AS-117-118) in the JA4 Yamaguchi Pref Honshu's Coastal Islands Group, December 24th. Activity will be on 40/30/20/15 meters CW/SSB (IOTA frequencies). QSL to his home callsign, by the bureau or direct to: Kenji Sasaki, 2-15 Ishikannon-cyo, Yamaguchi-City, 753-0038 JAPAN.

AS-117. Operators JI2ZLM and JF0BPT will be active as homecall/2 from Shino Island (JIIA AS-117-008) in the JA2 Aichi Pref Honshu's Coastal Islands Group, January 2-3rd. QSL to their home callsign, direct or by the bureau.

AS-117. OPERATION POSTPONED! Operators Joel/F5PAC/4S7PAG and Mario/ HB9BRM/4S7BRG were scheduled to activate Barberyn Island for December 3-4th but had to cancel. They have the licence in hand but not the permision to go to the island. They are trying to get the permision to go there for an activity on December

10-11th. Their website is: http://www.qsl.net/f5pac/4s7
Joel is expected to remain in Sri Lanka until December 16th.

EU-113. (IOTA Number Corrected) Steve/G4EDG and Jeff/G4ELZ will be signing /SV8 from a hilltop location on Kithira Island, December 4-11th. Activity will be CW only with two stations. They will be using a FT100 and a FT817 into G3HCT vertical and modified dipoles, running 100 watts output. QSL via G4ELZ

NA-057. Operators Eugene/K0IEX, Vladimir/N0STL and Ron/N0AT will be active from Utila Island, Honduras, during the ARRL DX CW Contest (February 18-19th) as a Multi-Single entry. Contest callsign is yet to be determine, QSL via W0JAR. Operators outside of the contest will sign HR9/K0IEX, HR9/N0STL and HR9/N0AT.

NA-135. Members of the Radio Club Cancun will be active as XF3NN from Carmen Island. December 16-18th. Activity will be on 160-6 meters SSB and RTTY, with some PSK31 and Satellite. QSL via N6AWD.

OC-215. Operator Adhi/YC3MM and possibly others (YB5BO, YC5JAU and YD5NGQ were mentioned) will be active this week from Siberut Island, December 6-9th. The group hopes to be active as YE5M (the requested callsign). They plan to have two stations on the air with operations on 20/17/15 meters SSB and the digital modes. For Asia, QSL via YB9BU (PLEASE NOTE: Use only new IRCs, and not "green stamps"). For the rest of the world, QSL via IZ8CCW. Inquiries can be sent to: yc3mm@mdxc.org

SA-092. As part of the Low Land DX-pedition Team's (LLDXT) Surinam activity, the team was able to arrange transportation and permission to land on the rare IOTA island ?Papegaaien eiland? (Parrot Island) this past weekend. This was the second time that SA-092 was activated. The callsign was PZ5C/P. The team members were Rob/PA2R, Ronald/PA3EWP and Ramon/PZ5RA. The team was advised to leave the island before sunset, so they were only active between 1000?2000z. The QSL Manager is PA7FM. Logs are posted on the LLDXT Web page at: http://www.lldxt.nl
Rob/PA2R and Ronald/PA3EWP will be active from Surinam until December 14th. They will probably be in the ARRL 10 meter Contest.

KH0, MARIANA ISLANDS. Hide, JM1LJS, plans to be active as KH2VL/KH0 from Saipan (OC-086), Northern Mariana Islands, December 22-25th. QSL via JM1LJS (QRZ.com). Visit it his Web page with an online log search at: http://radio-dream.com/anyway_holiday/kh2vl_kh0_rota_logsearch.html

LR50, ARGENTINA (Special Event). Look for special event station, LR50U, to be on the air during the month of December from the La Pampa Province, about 700 Km west of Buenos Aires City. Activity is to celebrate the 50th anniversary of the first operation from the Argentine station on

South Sandwich Island. Members of the Radio Club Pampeano will celebrate this event during the whole month and between December 7th and 12th, three operators (LU1DZ, LU7EE and LW2DX) from the Grupo Argentino de Radiotelegrafia (GACW) will join the locals. The modes will be mainly CW and SSB. Details and useful information regarding this event are available on the GACW Web site at: http://gacw.no-ip.org

OJ0B AND OJ0J NOW QRT. The Market Reef DXpdition is now over. The radio operations terminated on November 29th at 0400z, with 12,166 QSOs in the log. OPDX readers are encouraged to visit the following Web page to read the story and view the pictures by Martti Laine, OH2BH. The Web URL is: http://www.kolumbus.fi/oh2bn/pagemarket.htm

QSL INFO AND NEWS.....
POSTAGE GOING UP (Other Reminder). Charlie, W0YG, wants to remind everyone that postal rates, both domestic and international, increase after the first of the year. Many stations, including overseas stations, that sent just an SASE do not have sufficient postage to guarantee a return of VK9XG and VK9CG cards. Charlie states, "I am trying to weed down the VK9XG stack as much as I can now but I will not have the VK9CG cards until after the postal increase goes into effect. It is tough to subsidize the entire trip and the QSL cards and have to face subsidizing postage too. I am sure this caught many by surprise, especially our overseas friends. However the fact remains if I drop a SAE in the mail with user installed 80 cents airmail postage, I am not sure it will get to them as there is some chance involved."

Ralph, K2PF, informs OPDX that he will be handling QSL cards for the recent 4O3AA activity.

Martin, OL5Y/OK1FUA, operated IS0N during 2005 CQ WW DX CW Contest. QSL via OK1MG.

LOTW NEWS. Several sources are reporting that the "Lookbook of The World" (LoTW) is scheduled to become accessible for the "Worked All States" (WAS) award by early January at the latest. Also, it is anticipated that still additional ARRL as well as non-ARRL award programs will be available through the LoTW later this year.

NEW MANAGER. Gert, K5WW, informs OPDX that effective immediately, he will be Tom, CX7TT's, QSL Manager. QSL direct (with SASE/GS/IRC), by the bureau or LoTW is accepted.

NOT THE MANAGER. Joe, WD M, reports receiving QSLs for KG4FK, and would like to report that he is not the QSL Manager.

QSL PQ7Q via PY7VI. Activity was by a group of PY7 operators during the ARRL 160m Contest from Olinda Lighthouse (ARLHS BRA-068 and DFB PE-004).

UA4WHX OPERATIONS QSLS STATUS. VLADIMIR, UA4WHX/5H3VMB, currently in Zanzibar, Tanzania, informed OPDX that he would like to answer a number of questions being raised by hams regarding his QSLing and would like

to advise them of the following:
1. ALL DIRECT REQUESTS RECEIVED FOR PACIFIC OPERATIONS HAVE BEEN ANSWERED.
2. THE PACIFIC BURO REQUESTS ARE BEING PROCESSED AND ANSWERED NOW.
3. IF SOMEONE BELEIVES THAT HE HAS NOT RECEIVED HIS REQUESTED CARD, CONATACT EITHER ME OR MY MANAGER (HE IS AT UA4WHXAA@UDM.RU) DIRECTLY TO SEE WHAT THE STATUS OF THE QSLS IS.
IMPORTANT: WE ANSWER ALL VALID REQUESTS. SOME QSLS APPEAR TO HAVE BEEN LOST ON THE WAY BACK. DO CONTACT US IF THIS IS YOUR CASE. AND QUIT SAYING UA4WHX DOES NOT QSL.
4. AFRICA OPERATIONS WILL BE ANSWERED ALL TOGETHER AFTER THE TRIP IS OVER.

I HOPE THAT HELPS. 73, VLADIMIR BYKOV, UA4WHX/5H3VMB

QSL YB1JZS via OK1DOT: Petr Gustab, P.O. Box 52, CESKY BROD 282 01, Czech Republic. QSL cards received by bureau are answered via bureau. Cards received directly with SAE and 1 USD/IRC will be answered directly (do not send old IRCs please).

QSL INFO NEEDED for the recent ZF1A operation during the 2005 CQWW DX CW Contest. There seems to be some confusion on the route. It looks like all indications point via W6VNR (direct).

T30, WESTERN KIRIBATI. Finnish operators Ari/OH6DX, Veko/OH1AWW, Veijo/OH6KN and Jouko/OH1RX will once again return to the Pacific (for the fourth time) and operate from Tarawa (OC-017), West Kiribati, January 5-22nd. The group will be active as T30DX and focus mainly on the lower bands, 160-30 meters, and look for Europe and the U.S. East Coast stations. They plans to have two or three stations on CW, SSB and RTTY. Suggested frequencies (-/+ QRM) are:
CW - 1822, 3503, 7003, 10108, 14008, 18068, 21008, 24898, 28008 kHz
SSB - 1845, 3790, 7050, 14190, 18145, 21295, 24945, 28495 kHz
QSL via OH6DX, by the Bureau or direct to: Ari Hyvonen, Viklonkuja 4F18, FI-78880 Kuvansi, Finland. A Web site is currently under construction and is expected to be online soon at: http://www.ohpacificdx.com
The Web site will also have a log search on it.

T8, PALAU. Hide, JM1LJS, plans to be active as T80W from Palau (OC-009), March 18-21st. Activity will be on all bands. QSL via JM1LJS (QRZ.com).

TT8, CHAD. Philippe, F4EGS, will return here on December 25th and stay until the end of February 2006, and again from May to July 2006. He is there on Military assignments. He will once again use the callsign TT8PK. Look for him on 20/15/10 meters using a FT100 and a MA5V antenna. If Philippe can get a Cushcraft R7 or R8 antenna on loan, he will be active on 40-10 meters. He will be on the digital modes and maybe SSB. To indicate to Philippe what bands you need Chad on, send an E-mail to: kochp@wanadoo.fr
QSL via F4EGS. He will answer the QSLs when he return to Metropolitan, France.

XU, CAMBODIA. John, KF0RQ, will be active as XU7ACQ now through December 28th. He recommands to listen on 14245 kHz between 1400-1700z. QSL via KF0RQ.

XU, CAMBODIA. Peter, NO2R, will be returning to Sihanoukville again and should be on the air as XU7ACY from January 7-21st. Activity will be mainly on CW (with some SSB)on 160, 80 and 40 meters. QSL via K2NJ. The pilot station will be W2EN.

YS, EL SALVADOR. Look for Roberto, I2JIN, to be active as YS3/I2JIN from December 10-30th. Activity will be on all bands, mostly CW.

Did you also receive a calibration kit with the VNA? If you did so, then the lengths of these interconnect cables are not crucial for calibrated measurements. Only uncalibrated measurements will be affected.

It would help to know the manufacturer and model of the VNA.

This guy is an idiot and a loser, but having lived in that area I
can attest to the crapola that manifests in that area and that punks
like him are a dime-a-dozen. The infamous "W6NUT" repeater on 147.435
makes RRAP's worst day look like a Lady's Tea at Church on Sunday...

I have to disagree. It was just as bad in '92 onward as now.

The policy group was created to take the code debate off of .misc, but
a negative result of that action was that most of the educated folks
ended up leaving .misc in favor of .policy.

You should be able to assimilate yourself quite well with the likes of
"2Test" AB8MQ and some of his brother jammers and malcontents.
Does the below look familiar, Mr. Bailey????

We, at the LPWS have often been accused of being jammers, but this is far
from the truth. Admittedly, there is the playing of music on repeaters, but
these are usually idle until one of our members comes along with a jolly
tune (see the selection for download!).
An analogy of what occurs could be the following:- You stand on a river
bridge calmly throwing stones into the water, a few anglers a mile or so
away hear this and pack up and walk down to the area of the river beneath
the bridge and set up their rods. They then complain that you are disturbing
the fish!

Poor Commode, another lame response as usual, but he does hide beind a
cheezy cancelled 1950's sci-fi character whose show had shitty special
effects. Maybe that's why the Commode always talks about
port-a-potties. He always is on the losing side.

K1MAN ESSAY - ES051202 -

Blood is Thicker Than Water

America is all of us. If you come from another country and/or another culture, you are welcome by me as we offer you citizenship and the protections of our precious Constitution. Those of us who were born here, however, are willing, by definition, to die in the protection of our precious birth land and our precious Constitution.

Even though America is all of us, and it is, we will not allow you to do some quite important things such as being our President if you were not born here. There is a damn good reason for this. If push comes to shove, we are afraid you might "cut and run." I say "might." We simply don't want to take this chance, however slight it may be.

In that sense, therefore, those who are not born in America are "second class" Americans.

Same deal in Maine. If you were not born in Maine, you are not a Mainer. I "deal" with that. Mainers do cut me SOME slack, however, since I have been a citizen of Maine for 48 years. SOME slack, not very much. That is just how it is, blood is thicker than water.

America is predominantly Christian, and we do, indeed, have a national Christmas tree. That is just how it is, blood is thicker than water. In this case, we are remembering the holy birth of Jesus and the blood many of us believe he shed for all of us. That is just how it is, blood is thicker than water.

English is the predominant language in America. Some day there well might be more Spanish speaking Americans born here than English speaking Americans born here. There might well be more "African Americans" born here that "whites" born here. Hey man, this is America; I just love being American!

When the first human, an American, set foot on the moon, a Russian said to an American:

"It must be great to be an American tonight!"

No, "Ivan:"

"It is great to be an American EVERY night!"

That is just how it is, blood is thicker than water.

If America is threatened or if our Constitution is threatened, you had better watch out! I will STAND UP and fight, and if I need help, I will choose a "kid" born in America, educated in America, who played sports in America, and who was trained by the U.S Marines, U.S Army, U.S. Navy, U.S Air Force, the U.S. Military Academy, our Air Force Academy, Annapolis, etc., etc., over someone else who might just "cut and run" when push comes to shove, as happened in WWII and countless other situations that have cropped up over our brief 200 year history.

If your native country got "raped" during WWII, YOU are the ones who that let it happen, and those kids mentioned above are the ones who came over to "bail out" your collective asses. The "goose step" did not frighten those kids very much. Americans don't know the total humiliation of being "raped." We have NO FEAR of someone coming in the middle of the night to take one of us away. Our Constitution specifically allows us to have guns for just such an occasion if such ever occurred, however unlikely. Many Americans have more "fire power" than the so called "professionals." That is just how it is, blood is thicker than water. Be careful! Don't count America out yet! That is just how it is, blood is thicker than water.

May God bless you and your family during this holy season.

73 and GL de K1MAN

disturbing
> the fish!

You jam the Huntsville and Athens, Alabama repeaters, fatty.

^^
^^^^
Who said anything about a fine, Roger? We know Riley didn't fine you. He
merely warned you in writing about malicious interference and mandated (not
'invited') that you retest.
Any Google search of AB8MQ will show that.

If they specify a physical length (24"), and nothing else will do, then the type of coax is absolutely critical as its velocity factor will determine the electrical length.

However I suspect the bridge output is not at signal frequency but DC so the cables will not be critical. It is very difficult to see how they could make it work to 4GHz with several wavelengths of coax in the signal path, acting as an impedance transformer. Two feet is a significant length even at HF, and will shift the phases considerably.

3595. K1MAN Says ARRL Response To His W1AW Information Demand Not Satisfactory

Newsgroup: rec.radio.amateur.misc
Date: 2005-12-07 22:03:58 UTC
From: netmanager2@yahoo.com
Message-ID: <1133993038.323503.4310@f14g2000cwb.googlegroups.com>

DAVE SUMNER, K1ZZ, CEO OF ARRL, RESPONDS TO K1MAN's LETTER

December 2, 2005

Glenn A. Baxter
Long Point Lodge
Belgrade Lakes, Maine 04918

Dear Mr. Baxter:

This is in response to your email of December 1, 2005 inquiring about W1AW operating practices.

W1AW is unique in that it is the only station that operates in accordance with the provisions of 97.113(d) of the FCC rules. The rules require that the station schedule operations on at least six MF and HF amateur bands using reasonable measures to maximize coverage, and that a schedule of operating times be published at least 30 days in advance.

As W1AW trustee it is my policy that W1AW adhere to the FCC rules. The station operates in accordance with the published schedule. The W1AW trustee and control operators also take seriously our obligation under 97.101(b) to cooperate in selecting transmitting channels and in making the most effective use of amateur service frequencies. For example, we transmit two brief warning messages prior to the commencement of a scheduled transmission as a courtesy to operators who may be engaged in communications on the scheduled frequencies (Ed. comment: This practice was FIRST used by K1MAN), and we deliberately keep our voice bulletin transmissions brief and limited in number.

Sincerely,

(signed)
David Sumner, K1ZZ
Trustee, W1AW

K1MAN editorial comment:

In other words, 97.113(d) of the FCC rules allows W1AW to pay a control operator for a 40 hour work week (pecuniary interest) for doing exactly what K1MAN does without any pay whatsoever, and doing it infinitely better, thus drawing a $21,000 "fine." W1AW "dumps" on existing QSO's every day and K1MAN only when some moron like K3VR

parks there on frequency in order to be "dumped" on, a criminal violation by K3VR of the Goldwater Law. Sumner was a law school drop out and Hollingsworth was sick on the day they taught law at law school. Sumner's letter is a "get out of jail free" card for K1MAN, and Dave will certainly be called as a witess in court along with Hollingsworth. Both men are in alleged criminal violation of the Goldwater Law as well by failing to discourage interference with K1MAN amateur information bulletins:

It is an interesting snub that K1ZZ does not use the call K1MAN in his arrogant middle manager mental midget letter, Hi. Eat your heart out Dave, AARA, the American Amateur Radio Association, has more class than ARRL, the "national association for amateur radio." By the way, exactly what is a "radio relay league" anyway?

73 and GL de K1MAN.

See www.K1MAN.com

Dave Sumner, K1ZZ
ARRL Chief Executive Officer
American Radio Relay League
225 Main Street
Newington, Conn. 06111

1 December 2005

Dave,

What is W1AW's current policy with regard to its bulletins, and can you refer me to the ARRL Board minute which established this policy? Specifically, does W1AW listen and/or QRZ each published scheduled frequency before transmitting? If the frequency is busy, does W1AW QSY, delay, or even terminate the scheduled bulletin?

The policy published in QST that I have found is to stick to the published schedule regardless of whether the frequency is busy or not, just as is the policy of K1MAN for information bulletins, which is also consistent with many years of W1AW operating practice as well.

You will remember that K1MAN was "fined" in 1990 with regard to this policy, and my appeal of these "fines" to the full Commission was "deep sixed" and thus blocking my further appeals to the D.C. Court of Appeals and the United Stated Supreme Court. Also, these "fines" were never litigated in Federal District Court here in Maine, and my subsequent civil suit to resolve this matter in Federal District Court against the FCC was dismissed. My related civil suit in Federal District Court against ARRL was also dismissed. My many attempts to resolve this matter have thus been repeatedly thwarted. K1MAN was then "fined" again regarding this same policy in April of 2005, a full fifteen years after the original FCC action, thus creating a further legal nightmare for the Commission, of course.

I am a member of ARRL. Thank you for your attention to this request.

Best personal regards. 73.

David Sumner, K1ZZ
Trustee, W1AW

K1MAN editorial comment:

In other words, 97.113(d) of the FCC rules allows W1AW to pay a control operator for a 40 hour work week (pecuniary interest) for doing exactly what K1MAN does without any pay whatsoever, and doing it infinitely better, thus drawing a $21,000 "fine." W1AW "dumps" on existing QSO's every day and K1MAN only when some moron like K3VR

parks there on frequency in order to be "dumped" on, a criminal violation by K3VR of the Goldwater Law. Sumner was a law school drop out and Hollingsworth was sick on the day they taught law at law school. Sumner's letter is a "get out of jail free" card for K1MAN, and Dave will certainly be called as a witess in court along with Hollingsworth. Both men are in alleged criminal violation of the Goldwater Law as well by failing to discourage interference with K1MAN amateur information bulletins:

It is an interesting snub that K1ZZ does not use the call K1MAN in his arrogant middle manager mental midget letter, Hi. Eat your heart out Dave, AARA, the American Amateur Radio Association, has more class than ARRL, the "national association for amateur radio." By the way, exactly what is a "radio relay league" anyway?

73 and GL de K1MAN.

See www.K1MAN.com

Dave Sumner, K1ZZ
ARRL Chief Executive Officer
American Radio Relay League
225 Main Street
Newington, Conn. 06111

1 December 2005

Dave,

What is W1AW's current policy with regard to its bulletins, and can you refer me to the ARRL Board minute which established this policy? Specifically, does W1AW listen and/or QRZ each published scheduled frequency before transmitting? If the frequency is busy, does W1AW QSY, delay, or even terminate the scheduled bulletin?

The policy published in QST that I have found is to stick to the published schedule regardless of whether the frequency is busy or not, just as is the policy of K1MAN for information bulletins, which is also consistent with many years of W1AW operating practice as well.

You will remember that K1MAN was "fined" in 1990 with regard to this policy, and my appeal of these "fines" to the full Commission was "deep sixed" and thus blocking my further appeals to the D.C. Court of Appeals and the United Stated Supreme Court. Also, these "fines" were never litigated in Federal District Court here in Maine, and my subsequent civil suit to resolve this matter in Federal District Court against the FCC was dismissed. My related civil suit in Federal District Court against ARRL was also dismissed. My many attempts to resolve this matter have thus been repeatedly thwarted. K1MAN was then "fined" again regarding this same policy in April of 2005, a full fifteen years after the original FCC action, thus creating a further legal nightmare for the Commission, of course.

I am a member of ARRL. Thank you for your attention to this request.

Best personal regards. 73.

Sit behind the wheel. Reach out toward the dash with your right hand.
Wherever you can touch without stretching uncomfortably is a good
place for the mic. Youy should be able to see the speaker grill
(obstructions to sight also obstruct sound).

> What would be the best looking antenna configuration.

You want the best looking one, or one that works best? Remember, the
trunk lid is about 5db down from the roof, so use the trunk if you
want the loss, the roof if you don't. Or use a Larsen 5/8 on-glass if
you want something that works and doesn't leave holes in the car.

Wow, three guys writing about aliens hanging their butts out a window?

That I can imagine -- the guys writing it, I mean. Perhaps during a
drinking session after working all day on something stressful.

What I find harder to imagine is how it got published.

no, the aliens -invented- the moon. They must, therefore, have also
invented asses, because you can't really have an ass and not moon.

This proves conclusively that aliens were involved with human
genetics.

It also explains modern politics. The whole of the current
"conservative" administration, if you think about it, are people with
no butts. Cheney, Bush, Condoleeza Rice, indeed the whole political
movement is made up of people with no asses. These are a different
-species- from us. No wonder they are such miserable bastards, I
shudder to think how they, you know, evacuate.

With Terror Alerts?

Consider the implications. The Terror-Alert color codes are the shades of the mysterious and terrible excretions of our otherdimensional overlords!

So -- thank God that Terror Alerts are coded by color, not texture!

Some well-placed aides (who wish to remain unnamed for their own safety) claim to have identified the real meanings of several colors. "Green" means "We pinched out this humongous no-bid contract, and we're flowin' regular!" And "Red" means "We sucked down beaucoup wetlands yesterday -- and boy, do those water moccasins hurt on the way out."

No wonder Tom Ridge went bonkers trying to interpret the royal stools.

no you big fake, i like women, but your little bitch roger would
???

Roger likes women. At least he says so.
Except his are the kind you can touch, taste and feel.
Not cartoons like you prefer.

Problem is that all of Roger's 'women' are inflatable. Hey, Todd, maybe if
you ask him nicely he might agree to send you a loaner. He has several.

Is there any digital ham software with user-defined modes? Like custom digital modes? For example, let's say I want to use (or use a modified version of) Mil-Std-188 (i.e. G-tor). Is there any software that will let me add a digital mode and define it at the bit level?

Thanks,
Dave

Hi Dave

Well you can always go into the source code of GPL etc software and
modify it for yourself....

Just a thought (not what you wanted to hear - sorry!)

My name is Roger. I am an Amateur Radio Operator. I used to be a problematic type of person on the Ham bands and I was accused of jamming the transmissions of fellow Hams. I am innocent, innocent. I did nothing of the sort but one day I came home to find a letter from Riley Hollingsworth, an attorney representing the FCC. In the letter I was informed that I was under investigation for illegal operating practices according to the FCC rules and regulations. Riley told me to call him to discuss these accusations. I didn't.

Then along came other letters from Riley and I was told that I had to confirm my ability to remain a Ham by being tested again.

I did as directed and was able to keep my Amateur Radio license. Ever since those days I have been attacked by my fellow Hams. Some have even taken to calling me "2test".

I did nothing wrong. Never. Ever. I was chosen at random (my story) for a retest simply because I got my first license through a VEC. Besides, I was not Ordered to retest.it was an invitation from Mr. Hollingsworth to do so. I bet every one of you Hams know someone who had to retest for no reason other than they went through a VEC the first time.

There are lots of sources to see the letters that Riley sent me and I defy you to show me anywhere in those letters where I was accused of Malicious Interference. Prove it. It never happened because I didn't do it.

Yours truly.

Wodger the Dodger AB8MQ

PS: Run my call in Google and you will find 2,380 articles. Run my old callsign, KC8JBO in Google and you will find 295 references.

Here is a quote:

NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has what it believes to be reliable evidence of possible rules infractions and not necessarily that the recipient has violated FCC rules. The FCC has the authority, pursuant to §97.519(d)(2) of the rules to readminister any examination element previously administered by a volunteer examiner. This Enforcement Log is representative of recent Warning Notices, Notices of Violation, calls for retesting, and other FCC communications to licensees involving possible serious rules violations. It is not a comprehensive listing of FCC Amateur enforcement actions.

GLENDALE, WV: The FCC sent a Warning Notice November 9, 1999, to General licensee Roger L. Wiseman, KC8JBO, citing evidence that the licensee had been "deliberately and maliciously interfering with the radio operations of other licensed amateurs" on 20 meters. "This interference has occurred at various times in the last several months and includes broadcasting music and other unidentified transmissions," said a letter from FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth. Hollingsworth warned that continued operation of the type described could result in a fine or license revocation proceeding, and he requested that the licensee contact him to discuss the allegations.

Message-ID: <1134236867.157329.44370@g44g2000cwa.googlegroups.com>
Source record: 46937

Hi all,

I am not sure if this is the right group, so don't hesitate to kick me towards the right one for asking this.

I am updating a nice frequency spectrum "Tool" in Flash. See the old one here: (http://www.e-builds.com/EM%20spectrum/). A lot of new features are coming.

What I am implementing now a.o. is the frequency allocations and some other info, such as absorption, reflection, scattering, etc.. for different elements/molecules and or for the atmosphere.
I already have done the techie stuff; it's easily done by just reading the values from an XML file. The only problem is, I can't find any XML files with the data I need. As a matter of fact I haven't found any XML files yet that have to do with the Spectrum's allocations or applications.
I could make my own, but that's first a boring monkey job and secondly I would like to use an existing XML format for this of course, for the matter of compatibility.

Does anyone has any idea about XML resources foe EM / allocations / .. or any comments about this ?
Other formats are also welcome. Then I'll just convert it to XML, which goes automatically too of course.

Thank you!

(P.S. I found already some useable format of the ITU REgion 1 allocation..)

Unfortunately that is not a zero with a slash through it but a capital letter O with a slash through it. For visual purposes it works but for sorting data, it will not sort as a zero.

Also, the character only looks like a slashed "O" in *some* ISO 8859
character sets. Eastern and Central Europeans would see that as "R"
with a caron, and other parts of the world would see it rendered in
yet other ways. It is better to encode it as a true zero and to
instead choose a font which displays zero in the way you find most
pleasing. People posting to Usenet should always keep in mind that
Usenet is an international medium.

K1MAN would never use a slashed capital O in place of a zero, because
K1MAN is a citizen of the world and K1MAN is a great man.

You may try going to www.kb3kai.com and asking if he still has a .pdf file
available that shows you how to go through the configuration step by step.
It depends upon which modem you have and he may be able to help.

Newsgroups all have "built-in" spell checkers.... As do other internet
forums.

;-)

Everyone that makes it their habit to point out spelling mistakes..

Yup, they most definately do......

Bob

Yes...the rowdy and the reckless.

But beware the "Feeble Five."

Leonard H. "Lennie" Anderson. Allegedly an electronics "engineer" and "radio professional". Not a licensed Amateur, but has spent almost a decade telling Amateurs how they SHOULD be conducting their business. Has literally spammed the FCC ECFS with multiple "reply comments" that are nothing more than verbose personal attacks on anyone who Lennie remotely deems as having made a good presentation of facts on issues he holds a contrary opinion. (Search ECFS for "Leonard H. Anderson" and see what I mean). He spent one tour in post WW2 Japan as an Army radio mechanic and now knows all there is to know about "HF operating"...Don't believe me? Just ask him! He's also an "expert" on WW2 civil defense, child rearing, emergency communications, aerial navigation, medical terminology and practice, and now real estate zoning. Hint: He's too young to have served in CD, has no children, is not involved in REACT, let alone any "emcomm", is not a pilot, does not now nor ever held a medical or nursing license, and does not hold a relators license. Lennie's list of what he "isn't" is lengthy, considered his many profound pontifications on those "isn'ts".

Frank Gilliland. Frankie's not an Amateur either, but he was a "amateur" Marine. Seems his only purpose in THIS forum is to try and undermine anything I have to say or do by claiming that since he spent one tour in the USMC himself, he "knows" all about other Marines...However Frankie didn't make it through his one and only tour unscathed...Seems Frankie was a discipline problem the whole time he was in and was court martialed not once, but twice. Two court martials in one four-year enlistment. For one who was in the Corps and knows how many other "non-judicial" and other "local" punishments there are for minor infractions, I am impressed as to just how big a PITA Frankie must have been that they used court martials rather than those alternatives. he continues his PITA conduct into his USENET life. This is his one and only opportunity to "take a swing" at a Staff NCO and not get a THIRD court martial in his SRB. Frankie claims to be a close friend of LtCol Oliver North and to have "resources you don't even begin to understand" when it comes to the Armed Forces, yet can't

seem to follow simple references to public information. Frankie's the RRAP version of the drunk at the end of the bar at the VFW or American Legion post.

Brian "The Brain" P. Burke, N0IMD. Brian is Lennie's puppet boy. Lennie says "dance" and Brain is all too happy to let him pull the strings and follow his lead. Has publically expressed "admiration" and "support" for Lennie despite Lennie's countless documented lies and intentionally deceitful anti-Amateur Radio rhetoric. Brain also claims to have operated from Somalia during operation "Restore Hope" in the 90's, however can't seem to come up with a single callsign or QSL card from anyone he "worked". In any case, he may have worked them, however not legally. He had no authorization to do so. Brain is also known for such trivial radio discussion "faux pas" as "unlicensed devices play the major role in emergency comms" and "ARES won't be able to respond to a major disaster", among other silliness. he claims to have been in the USAF MARS program, yet can't seem to figure out how to take my old callsign to verify my past participation...Of course anytime any of the Feeble Five are provided some readily researchable reference to prove what they've been told, they then demand that others "scan" a copy of documents to "prove" it.

Todd "Toiddie" Daugherty, N9OGL. Todd is a combination of a "Saturday Night Live" version of Howard Stern on the Amateur airways, with just a bit of PeeWee Herman thrown in for flavor. He purports to operate an "information bulletin" station yet refers to all of his broadcasting as "shows", and clearly uses these to broadcast his personal opinion and rhetoric, not "information". Almost 40, he's living at home and sopping up all the resources he can from mumsy and pops while they are still able to do it. Todd's biggest rants center around (1) his inability to obtain an LPFM license for his non-existant "company", (2) his illegal use of the Amateur service to take the place of the LPFM license he didn't get, and now (3) his BBS sites for the promulgation of kiddy-porn anime. I wish him well since there's a recent news release of a guy sentenced by a FEDERAL court for promulgating cartoon-style kiddy-porn. Of course like all kiddy-porners, he claims it's his "Constitutional" right to promulgate kiddy-porn.

Lastly there's Mark C."i ma not a lier" Morgan, KB9RQZ. Mark is a very troubled, disturbed fellow with numerous anger management and perversion issues that are unresolved. He's an admitted former mental health patient, and frankly he needs to be a CURRENT patient. His posts are legend for his butchering of the English language and his stubborn refusal to use a spellchecker. He does, however, claim an IQ of over 248. Mark also brags on his use of intentional deceit and lies as "natural and normal" and insists that lying and deceit are traits to be taught to children. His grandest use of this was his insistence that he was a drafted officer (a Colonel, no less...) in the US Army Chemical Corps, and that despite his avowed sexual perversions was not allowed to "retire" or "resign" from his unit. The story unravels

before it really gets going because Markie would have only been 7 or 8 years old as the last Viet Nam era conscriptees were being mustered OUT (not in). All of this in order to try and gain some "points" in this USENET forum since he knows I am prior service enlisted USMC. He "figured" I'd be "impressed" by a functionally illiterate draftee officer (uhhhh...yeah...right...). Since then we've been subjected to threads of alleged stalking, death threats, "elder abuse", etc. Markie just completed a seven day stretch wherein he loaded the NG with just under 400 such threads or reply threads. He is now forging e-mail addresses in order to manufacture extra 'accounts' with which to get around Google's posting limits and spam the NG even more. He's presently manufacturing posts in this forum with my callsign and that of my wife, Amy, W5AMY.

I am sure their responses to/about me will be predictable.

73 and welcome to USENET Amateur Radio Hell!

Steve, K4YZ

K1MAN ESSAY - ES051212B -

Three Classes of Americans

1. Everybody else.

2. Yuppies

3. Wannabe Yuppies

All of life is governed by Jack Carlton's "Pecking Order Theory." Go where you will, there will be natural pressure to fall into some very definite "pecking order." If you bring along your own "pecking order," and follow THAT instead, there will, of course, be friction. This is where the "wisdom" of "When in Rome, do as the Romans do" comes from.

In the movie "The Great Escape," the German Colonel running the elite German prison camp asks the American flier if all Americans are so insolent? The reply was: "Just about 99%" So, America itself is a giant macro "pecking order." All the other micro "pecking orders" lie within.

The trick is to find a "pecking order" (or orders) that best suit you. Not so easy in a world where there are so many models to choose from. The Ten Commandments would be a good start!

A huge problem in the United States today is too little quality time being spent by parents with their children. America's great "experiment" exacerbates this problem greatly. Here, almost anything goes, and natural "market forces" sort all of it out and with many bruises and bumps along the way. America is not for the faint of heart.

A related problem is the lack of role models for kids. America will get it right, however. This will take some time as we continue to struggle with all the strong market forces that have a free play in our rough and tumble country, land of the free and home of the brave.

73 and GL de K1MAN

Nice, coming from someone who has NEVER heard my bulletin. If you think
(which I really doubt you do) it's illegal then bitch to the FCC, if
you aren't going to complain then shut the HELL up.

> Almost 40, he's living at home and sopping up all the resources he can from mumsy and
>pops while they are still able to do it.

Yeah right steve, lying again

> Todd's biggest rants center around (1) his inability to obtain an LPFM license for his
non-existant
>"company",

Steve, it was LOW POWER TV not LOW POWER FM, get your fact right before
posting. As for my "company" who said it's non-exisant? you a little
nobody. RIGHT!

>(2) his illegal use of the Amateur service to take the place of the LPFM license he didn't
get,

Dam right, and there's NOTHING yo can do about it Bwahahaha

> and now (3) his BBS sites for the promulgation of kiddy-porn anime. I wish him well since
there's >a recent news release of a guy sentenced by a FEDERAL court for promulgating
cartoon-style >kiddy-porn.

The truth steve is the guy was found guilty of possession REAL child
porn, animation porn is in fact legal (Below is the Federal Law)

SSEC. 502. IMPROVEMENTS TO PROHIBITION ON VIRTUAL CHILD
PORNOGRAPHY.
(a) Section 2256(8) of title 18, United States Code, is amended-
(1) so that subparagraph (B) reads as follows:
''(B) such visual depiction is a digital image, computer
image, or computer-generated image that is, or is indistinguishable
from, that of a minor engaging in sexually
explicit conduct; or'';
(2) by striking ''; or'' at the end of subparagraph (C) and
inserting a period; and

(3) by striking subparagraph (D).
(b) Section 2256(2) of title 18, United States Code, is amended
to read as follows:
''(2)(A) Except as provided in subparagraph (B), 'sexually
explicit conduct' means actual or simulated-''(i) sexual
intercourse, including genital-genital, oralgenital,
anal-genital, or oral-anal, whether between persons
of the same or opposite sex;
''(ii) bestiality;
''(iii) masturbation;
''(iv) sadistic or masochistic abuse; or
''(v) lascivious exhibition of the genitals or pubic area
of any person;
''(B) For purposes of subsection 8(B) of this section, 'sexually
explicit conduct' means-
[next page]
''(i) graphic sexual intercourse, including genital-genital,
oral-genital, anal-genital, or oral-anal, whether
between persons of the same or opposite sex, or lascivious
simulated sexual intercourse where the genitals, breast,
or pubic area of any person is exhibited;
''(ii) graphic or lascivious simulated;
''(I) bestiality;
''(II) masturbation; or
''(III) sadistic or masochistic abuse; or
''(iii) graphic or simulated lascivious exhibition of the
genitals or pubic area of any person;''.
(c) Section 2256 is amended by inserting at the end the following
new paragraphs:
''(10) 'graphic', when used with respect to a depiction of
sexually explicit conduct, means that a viewer can observe
any part of the genitals or pubic area of any depicted person
or animal during any part of the time that the sexually explicit
conduct is being depicted; and
''(11) the term 'indistinguishable' used with respect to a
depiction, means virtually indistinguishable, in that the depiction
is such that an ordinary person viewing the depiction
would conclude that the depiction is of an actual minor engaged
in sexually explicit conduct. This definition does not apply
to depictions that are drawings, cartoons, sculptures, or
paintings depicting minors or adults.''.
(d) Section 2252A(c) of title 18, United States Code, is amended
to read as follows:
''(c) It shall be an affirmative defense to a charge of violating
paragraph (1), (2), (3)(A), (4), or (5) of subsection (a) that-
''(1)(A) the alleged child pornography was produced using
an actual person or persons engaging in sexually explicit conduct;
and
''(B) each such person was an adult at the time the material
was produced; or''(2) the alleged child pornography was not

produced using any actual minor or minors.
No affirmative defense under subsection (c)(2) shall be available
in any prosecution that involves child pornography as described
in section 2256(8)(C). A defendant may not assert an affirmative
defense to a charge of violating paragraph (1), (2), (3)(A), (4), or
(5) of subsection (a) unless, within the time provided for filing
pretrial motions or at such time prior to trial as the judge may
direct, but in no event later than 10 days before the commencement
of the trial, the defendant provides the court and the United States
with notice of the intent to assert such defense and the substance
of any expert or other specialized testimony or evidence upon which
the defendant intends to rely. If the defendant fails to comply
[NEW PAGE VerDate 11-MAY-2000 21:52 May 02, 2003 Jkt 019139 PO 00021
Frm 00031 Fmt 6580 Sfmt 6581 E:\PUBLAW\PUBL021.108 APPS24 PsN: PUBL021
117 STAT. 680 PUBLIC LAW 108-21-APR. 30, 2003]
with this subsection, the court shall, absent a finding of
extraordinary
circumstances that prevented timely compliance, prohibit
the defendant from asserting such defense to a charge of violating
paragraph (1), (2), (3)(A), (4), or (5) of subsection (a) or presenting
any evidence for which the defendant has failed to provide proper
and timely notice.''.

>Of course like all kiddy-porners, he claims it's his "Constitutional" right to promulgate kiddy-porn.

Animation Porn, even lolicon is LEGAL and in 2001 the US Supreme Court ruled that "virtual child porn" (which includes animation lolicon) WAS protected by the First Amendment. Beside what are going to do about it??? NOTHING, grow up steve you little worm

Hey Toiddie...If you can bring YOUR mindless trash in here under
the color of protection of the Constitution, then guess what...?!?!?

YOU don't have ANY right to suggest someone else not exercise
their opinions regardless of what YOU think of them.

> > Almost 40, he's living at home and sopping up all the resources he can from mumsy and
> >pops while they are still able to do it.

> nobody. RIGHT!

LPTV...I stand corrected...However the rest remains correct.

Your "company" does not have a charter in the State of Illinois.
Nor is there a business license I can find.

Ergo...It doesn't exist...save perhaps in your imagination.

> >(2) his illegal use of the Amateur service to take the place of the LPFM license he
didn't get,
>
> Dam right, and there's NOTHING yo can do about it Bwahahaha

Sure there is.

AWARD "FAMOUSE AMATEUR RADIO"

RULES

The section ARI of Sala Consilina (SA) ITALY, has founded the permanent award FARA "Famous Amateur Radio Award".
General requirements - Awards are available to all amateurs and SWLs for worked or heard the countries of the following list where they were born some famous radioamateurs
All the QSO made from year 1970 are valid to claim the award.

Bands e Modes - All the bands assigned to the Radio Amateur Service and all the modes are allowed, satellites and WARC included.

There are 2 versions of the award:
1) HF (are enough 10 countries)
2) 50MHZ/VHF/UHF (are enough only 6 countries to claim the award)

I countries sono i seguenti:
1) Argentina LU (LU1SM C.L. Menem, ex presidente dell'Argentina)
2) Bolivia CP (CP1CL Dr. H. Panzer, ex presidente della Bolivia)
3) Brasile PY (PY1JKO J.K. de Oliveira, ex presidente del Brasile SK)
4) Cook ZK (ZK1AN Sir T. Davis, Presidente delle isole Cook)
5) Giordania JY (JY1 Re Hussein di Giordania SK)
6) India VU (VU2SON Sonia Ghandi)
7) Italia I (I0FCG Sen. Francesco Cossiga, ex Presidente Rep. Italiana, I2NSF A. Fogar)
8) Libano OD (OD5LE Emil Lahoud, presidente del Libano)
9) Marocco CN (CN8MH Hassan II, Re del Marocco SK)
10) Monaco 3A (3A0AG Alberto Grimaldi, Principe di Monaco)
11) Nicaragua YN (YN1AS Gen. A. Somoza, ex Presidente del Nicaragua)
12) Oman A4 (A41AA Q. Bin Said Al-Said, Sultano dell'Oman)
13) Per&#65533; OA (OA4FB F. Belante Terry, ex Presidente del Per&#65533;)
14) Polinesia Francese FO (FO5GJ Marlon Brando)
15) Polonia SP (SP3RN Padre Massimiliano Kolbe)
16) Russia UA (UA1LO Yuri Gagarin astronauta)
17) Spagna EA (EA0JC Juan Carlos de Borbone, Re di Spagna)
18) Tailandia HS (HS1A Bhumiphol Adulayadej, Re di Tailandia)
19) USA A-N-K-W (N6YOS Priscilla Presley)

To claim the Award the QSL cards are not required but they must be in possession of the applicant and could be requested anytime for checks.

The fee is 10 Euro or 12 Dollars. To receive the Award as registered mail please add 3 Euro or 4 Dollars.

Application forms must be sent to this address:

ARI SEZIONE SALA CONSILINA
CASELLA POSTALE N.11
CAP 84036 SALA CONSILINA (SA)
ITALY

For more informations and to receive the application forms you can contact
the award manager IZ8AJQ Erminio via email: iz8ajq@amsat.org

That's the problem steve with the first amendment huh? BTW I do have
the right to assert and protect myself from assholes like you,
regardless if you like it or not.

> Yeah right steve, lying again
>Nope.

Where's your proof, Sure I live at home, but that don't mean I don't
have money, I own my own business.

> Steve, it was LOW POWER TV not LOW POWER FM, get your fact right before

>LPTV...I stand corrected...However the rest remains correct.
>Your "company" does not have a charter in the State of Illinois.
>Nor is there a business license I can find.

But you forget one thing, as I've stated many times before, there's a
lot more to that LPTV deal it then you know. Secondly my "company" as
you claim isn't a business, it's a club, it always has been, since
1983. It started in 1983 as DDC-TV, we produced programs for the local
public acess channel, and for school. Most of the people that were in
our group back then was also part of the local theater group called
"the Spotlight Players" In 1985 We started Langley Park Studio's for
the sole purpose to get people interested in theater and the preforming
arts. In 1987 the Spotlight Player's disbanned so we were all that was
left when it can to theater and the arts. In the 1990's we changed it
to Langley Park Telecommuniation, because we not only wanted to promote
theater and the preforming arts but telecommunication as well. Langley
Park has done a hell of lot more work then what you think. We've had
people who has gone through our group only to later go on into other
aspects of the industry. We had one guy name Joey who was with our
group and now has his own rock band (Last time I talked to him they had
cut an album). Another one named Matt, went to the University of
Florida and got his degree in theater. We've also taught a number of
people radio and electronics only to later move on into the military
and Universities to continue their studies in that field. So steve, I
don't really give a shit what you think, cause frankly you don't know
what the hell your talking about.

> Dam right, and there's NOTHING yo can do about it Bwahahaha
> Sure there is.

RIGHT.....you've been saying that for a long time now...

>Sooner or later you'll get jammed up, Toiddie, and you'll wish

As some of you know, I supported my bad habits for many years as a Navy Radioman, and quite frankly considered myself something of a hotshot operator. To set that stage..... I spent my early Navy years aboard destroyers in the 2nd and 6th fleets. The amount of traffic you handled was related to the seniority of your skipper, because senior skippers not only commanded their own ships, but also often had additional duties as task group commanders, etc. Our skipper at the time was CDR Grant "Flash" Gordon, and he was one of these 'senior' skippers. We made a couple of cruises to the Mediterranean and Capt Gordon was also CTU-60.2.5 which required our ship to guard the Sixth Fleet Task Group Commanders Net (nicknamed "Sixes Alfa"). Sixes Alfa was a high speed net, typical traffic speeds were 40WPM, and routine procedural speed in excess of 50WPM. At the time, I was one of only 23 radiomen in the Sixth Fleet who were fully qualified Net Control operators for that net. I go into all of this not to brag, but only to give you an idea of how big my 21-year-old ego was. If you were qualified to NCS "Sixes Alfa" (you got a fancy diploma style wallet certificate signed by the Fleet Commander) then you were pretty hot stuff.

Unlike today, in those days the Red Sea and Persian Gulf area was a quiet backwater without much military attention. The US Navy presence was something called "Middle East Force" and COMMIDEASFOR was a Rear Admiral whose flagship was a distinctly unwar-like AVP (seaplane tender) anchored at the Brit base on Bahrain. (K0DQ, Admiral Scott Redd (Retired), now an active contester and a high honcho in Dept of Homeland Security, once held that post) The rest of his fleet consisted of a couple of destroyers loaned to him from the Sixth Fleet in the Mediterranean for tours of a couple months at a time to strut around and show the flag. Often we used that opportunity to also conduct joint training exercises with ships from allied navies in the SEATO and CENTO treaty organizations.

Our ship, USS Henley, DD762 drew that temporary assignment while I was aboard. To get from the Med over to the Persian Gulf requires transiting the Suez Canal, which was under Egyptian (they called themselves the UAR in those days) control. Ships transiting the canal were arranged in convoys, on a given day consisting perhaps of 10 or 15 ships, one convoy northbound and one southbound. These convoys met and passed each other about midway in the canal at a 'wide spot in the road' called "Great Bitter Lake". Each convoy carried an Egyptian civilian pilot who knew the waters and acted as our 'guide' in navigating the canal. If there was a warship in the convoy, they would carry the pilot and lead the group. These pilots were required to provide the canal "Traffic Control" with periodic position reports so that canal authorities could track our progress and coordinate the 'passing' of the two convoys at the wide spot. The circuit which handled this traffic was a CW circuit, and the ashore operator was an Egyptian civilian. This was not a busy circuit, so typically it was on 'speaker watch' while you attended to other more busy circuits, and only actually 'manned' the

circuit when you had to send or receive a report.

Now picture me, hotshot NCS from "Sixes Alfa", keeping an ear on this pilots coordination circuit while handling traffic on another circuit. Across comes the call:

"NHXW DE SUQ K" ---

I put my regular military circuit on hold with a 'ZUJ' and impatiently called the 'lowly Egyptian civilian' at about 40WPM with a speed key

"SUQ DE NHXW QRQ K" ..... (QRQ my friends, is the inverse of QRS)

Bad move..... really bad and embarrassing move!

'Lowly civilian' at SUQ came back to me at a blistering speed I'm sure was 60WPM (or faster) of beautiful musical code (there were no electronic keyers in those days) of which I could copy no better than 50%.

I humbly sent a break signal, then a crisp and polite "QRS PSE", and the "Kind Sir" at SUQ slowed down to a stately 30WPM. To this day I have never sent another QRQ to ANYONE! (That guy may be still out there waiting for the impertinent sailor to challenge him again!)

Have 35 lapel mikes for Jedi radios, new in box, never used.

$1,575 takes them all.

[that's only $45 each]

Or, take 17 of them for $816

[that's only $48 each]

Add $10 for shipping, please!

They have the standard connector for XTS, HT1000, MTX and other Jedi radios,
w/lapel clip, and these are brand new in the box with paperwork.
Model number is NMN6191C

Sorry, no other splits or singles requests please!

Thanks and just email if interested!

Heh heh. During 18 years on the circuits at VCS, Halifax, I can relate to this. During part of that we were often required to copy long fishing reports from Russian trawlers operating under license within our 200 mile zone. These messages could run to 5000 words and more. You did not want to copy them slowly and the Russian ops (probably KGB-trained) were good. But when they were sending weather OBS (you know--the standard 5-figure group synoptic reports), they would just let fly. The messages we'd do at about 50wpm, but I think they were trying to see just how fast I could copy an OBS. Never did find one I couldn't get the first time. A year and a half up north on very fast point-to-point circuits sending upper air reports gave me that skill. But it's a lost art. Everything is satellite and RTTY nowadays.

But on the other end of the scale, I came across a vessel on 500khz one day with a callsign from a certain Caribbean country (not Cuba) that shall remain unnamed. His code was bad but I managed to get him off onto 480 and listening to me on 484. I was using an AEA Morsematic that would not slow below 5wpm and this joker kept sending QRS until I bottomed out. Now I simply cannot send morse with a handkey at less than about 10 and I keep winding up to 20 all the time even trying to do that. But I could keep the Morsematic going at 5. But not satisfied, he still insisted QRS. At that point I gave up. I mean 20 is minimum commercial speed and this joker was telling me he couldn't read me at 5 with perfect code!

So I said, "OM, if I QRS any more I am stopped." At that point the QSO was transferred to 2Mhz SSB. His English was better than his CW and his French actually understandable!

Has QSL NET gone black for good or will it be back>

Is Al Waller K3TKJ still alive?
I get no answer from him.

Canonical name ftp.qsl.net 63.238.179.50
is the server that appears to be down, at least, I cannot
reach it most of the time.

proxy.qsl.net 63.238.179.184 is up

www.qth.net 63.238.179.60 is up,

What other domains does he have on his adsl server in Delaware?

(Good reason why it is slow, when it is up)

Leave it to Lardass to fuck up and post it again.

Behold he shall ride upon a hard dick and his name shall be Lloyd Austin Davies.

And it came to pass that the king of knob jobs in Alabama, (as Lloyd is known) was gone for a long time, and some of the people celebrated and some speculated that he had died, some speculated that he was ill, some speculated that he was in Maryland at Ray Chason's apartment, and some even thought that the king of knob jobs in Alabama had been made a sex slave by Ray Chason and his butt buddies. It was then the people started to rejoice.

And when the niggers and crackheads heard the murmuring and rumours of the people they assured them that the king of knob jobs in Alabama was just busy sucking on one of his nigger neighbors' big black dicks and would address the people as soon as he could swallow that big load of nigger jizz. The neighbors in his hud apartment complex also knew that the project was the sucking of nigger dicks and telling lies and more lies, but they did not tell the people this for they did not desire to have a vice squad nightmare in the city of Deliverance Extras. Alabama liked to hear about the fat retarded one who proclaimed he was the king of knob jobs in Alabama.

And the niggers and crackheads reassured the people that everything was all right, and told them to prepare pyres and to cook meat, and to ice down beer and nehi soda, and to go out and buy potato chips and other unhealthy snacks from the traders who had immigrated to the kingdom from Vietnam and the land of Gaza. And so the went down to these little stores owned and bought these things. And they went home and warmed up their TV's, for the sabbath approached and the sabbath would bring more action from the mediocre football team at U of Alabama, and the sabbath would bring plenty of exciting nob gobbling action and goo gobbling from the king of knob jobs in Alabama.

The king of knob jobs in Alabama in reality is a ghastly pale porker who stands only 5'6" and weighs an unhealthy 290 Lbs. His skin is as white as copying paper due to his night job of delivering pizzas to the ghetto neighborhood where he dwells in a filthy, roach infested HUD hovel. He doesn't venture outside during the daylight hours, instead preferring to play with Star Trek and Dalek dolls, post lies and filth on the internet and jack off to thoughts of his unrequited love interest Roger Wiseman and dream of finally actually getting some pussy. Not stick pussy, which his homosexual lover Steve Holsten feeds him several times a year when Lloyd goes for his visits, usually around Thanksgiving.

Lately, the king of knob jobs in Alabama has been consumed with posting pictures of someone he says is Roger Wiseman. In fact, the obviously botched purple rendering of somebody else has been cut and pasted, photoshopped and distributed all over the internet by the king of knob jobs in Alabama and his homosexual fantasy lover Ray Chason who is the king of knob jobs in Maryland. Chason who is also a porker has set up a blog of Roger's ex-wife "Regina" telling even more lies. Roger wasn't ever married to anyone named Regina. Of course Chason and Lloyd refuse to let truth get in the way of their lies, like their butt buddy friends who post lies, lies and more lies about anybody who reveals the truth about this band of homosexual predators.

> Wodger

Lloyd Austin Davies will suck your cock! (232)-233-3000

> Here is a quote:

Notice Lardass fucks up and doesn't post the actual retest letter, but a press release about it fromn the ARRL enforcement letters website that gives the ARRL's take on what happened.

>
> NOTE: Issuance by the FCC of a Warning Notice indicates that the FCC has
> what it believes to be reliable evidence of possible rules infractions and
> not necessarily that the recipient has violated FCC rules.

Exactly. Lardass fucks up and makes the case that Roger has not violated FCC rules.

> The FCC has the
> authority, pursuant to §97.519(d)(2) of the rules to readminister any
> examination element previously administered by a volunteer examiner.

Yet Lardass fails to read that the FCC letter had this same phrase above in the retest letter and no reason (like interference) was given in the retest letter.

>From Hap Holly's website when it published FCC letters (it was also posted on Google)

July 11, 2000

CERTIFIED MAIL--RETURN RECEIPT REQUESTED

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47 C.F.R. Section 97.519(d)(2), the Commission has the authority to re-administer any examination element previously administered by Volunteer Examiners (VE's). The Commission may either administer the examination itself, or under the supervision of a Volunteer Examiner Coordinator (VEC) or VE designated by the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an American Radio Relay League Volunteer Examiner Coordinator. This examination must be completed on or before September 11, 2000. The required code speed that you must demonstrate is 5 words per minute.

Please be prepared to verify your current address and to present a photo identification. Pursuant to Commission rules, your license will be cancelled if you do not appear for re-examination. You will be granted an Amateur Radio license consistent with the elements you pass upon re-examination.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

Enforcement Bureau

>nauseaum.

>One letter?
>No "interference"?

Read everything closely. There were three letters sent.

The letters to both Wiseman and Tunder were a preemptive "warning"
that did not allege any activities. That hardly qualifies as a warning
in the context of someone having actually done something.

The letter with the warning in it ALLEGED interference, and warned of
consequences.

The retest letter made no reference to interference; in fact gave no
reason for requiring the retest. Such a request is part of the
Volunteer Examining program. It could have been made for any number of
reasons that may have had nothing to do with any of the addressee's
actions. An investigation into the VE group that gave the test, would
be a good example.

Only one letter was a warning referring to interference.

So, yes; if you are going to tell it, tell it straight.

Might help of we knew what country you are in...

If you are in Australia a good starting point might be Huber and Suhner.
I think they are also elsewhere in the world.

A web search turns up quite a few hits for supplying the part numbers
mentioned.

Cheers Bob W5/VK2YQA

3686. Amateurs Listening to Police etc in the USA

Newsgroup: rec.radio.amateur.misc
Date: 2005-12-15 20:14:44 UTC
From: Brian Reay <see@website.invalid>
Message-ID: <U8kof.11768$n95.2820@newsfe4-gui.ntli.net>
Source record: 46889

There was a documentary on the radio in the UK about the amateur involvement in "9/11".

In the documentary the statement was made that, in the USA, amateurs are legally allowed to listen to the radio traffic of the emergency services.

Can anyone confirm this please and may put some details to it?

AFAIK anybody is allowed to listen to the radio traffic of the emergency services if they have the equipment to do it.

In general terms, there are no restrictions to the reception of
signals in the U.S. There are a couple of exceptions--one involves the
possession of radar detectors in a few states--I never have figured
out how that passes muster--federal preemption of RF matters and all
that.

The other really isn't an exception. It's more of an option permitted
to users. For example, many services encode their data to prevent
reception by other than authorized parties. Over the air television,
for example. Another, commonly used by police, particularly in
relatively large municipalities is a "voting" system of repeaters,
which entails the use of switching algorithms common within the
system, but unknown to those with scanners. It has the effect of
scrambling reception.

No one is restrained from receiving signals but no one is guaranteed
the right to understand them.

QRS = slow down
QRQ = speed up

example:

PSE QRS 15 = please slow down to 15wpm
PSE QRS 30 = please speed up to 30wpm

If you don't attach a number, you are leaving it up to their judgement what speed to change to. This often works but as you can see from Hans' story, it can get you in over your head.

Yes it is true. Actually the general population is also allowed to legally listen to radio traffic of the emergency services. You can buy a scanner in just about any store that handles radios. There are publications available listing the frequencies used by the emergency services on an area by area basis.

Some states do prohibit scanners in vehicles though. However, they do not prohibit them in the home.

Sorry, out of town for a few weeks.

The Astronet guys observed that the flashes were conicident
both in time and location on the moon when observed from various
locations up and down the west coast. Conclusion was that the flashes
were meteor impacts on the lunar surface. I think this was later
confirmed independently.

One of the guys had an interesting 80m setup. Separate Tx and Rx,
and 1kw amplifier. He had an separate Rx antenna, an IF output
jack on the Rx, and an electronic TR switch on the Rx.

He would connect an oscilloscope to the IF output of the Rx, and
hit a few dits on the keyer. You could see the transmit waveform
as full-screen signal, then nothing as the Rx recovered back into operation
after a few tens of microseconds. Then you could see the backscatter
pop up on the receiver scope. The keying rate had to be fast enough
and completely synchronous to see it on the non-storage scopes of the
day. But he was able to measure the time to receive the echos back
from the ionosphere and pretty much could predict whether he should
bother operating the net that night (with reasonable accuracy). The echos
were somewhat smeared out, so the return signal was undergoing a somewhat
distributed reflection process.

I don't recall if the backscatter was normally TX->Ionosphere->Rx or if
it was Tx->Ionosphere->Ground->Ionsphere->Rx
My recollection is that he had seen both cases.

Some of the other replies may be a little off base. Federal law
prohibits listening to cellular and cordless telephones (yes,
cordless), transmissions by the news services (field to news center,
obviously not the evening TV or radio news broadcasts) and certain
federal frequencies.

States laws for all 50 states prohibit listing to police and other
emergency communications for gain, such as an independent tow truck
driver rushing to a car crash or to tak photographs which will be sold
unless you have the appropriate permit.

Also, state laws prohibit having a radio receiver capable of receiving
police, etc., broadcasts in a vehicle without a permit. Because the
10, 6, 2 and 70cm amateur band radios are capable of receiving police,
etc., communications licensed amateur radio operators are specifically
exempt from having such radios in their vehicles without a permit.

The bottom line is that amateurs are legally allowed to listen, but
not for financial gain. I hope this helps clear up any misinformation
floating around.

Someone contacted me about sending a copy of the article a few weeks ago.
Supposedly it was sent. I still have not received it. Got mixed up in
Christmas mail?

The Federal Communication Commissions (FCC) needs to changed the
amateur radio rules to allow a more flexable in regards to allow
amateurs the
ability to experiment, and remove rules that are outdated.

Rules that need to be changed

---

§97.113 Prohibited transmissions.

(a) No amateur station shall transmit:

(5) Communications, on a regular basis, which could reasonably be
furnished alternatively through other radio services.

---

§97.113 Prohibited transmissions.

(a) No amateur station shall transmit:

messages in codes or ciphers intended to obscure the meaning thereof,
except as therwise provided herein;

Todd N9OGL

K1MAN BULLETIN - 051216A -

W1AW AND K1MAN JOIN FORCES

Dateline - Belgrade Lakes, Maine - 16 December 2005

W1AW/4 came up on 14.275 MHz. yesterday, 15 December 2005, calling CQ for their special event station from the ARRL Christmas toy drive national distribution center in Memphis, Tennessee. K1MAN answered, and Chief Operator Darryl was called to the W1AW mic. The two stations had a short QSO with Darryl explaining the toy drive project in detail. W1AW is the flagship station of ARRL, the American Radio Relay League (www.ARRL.org), and K1MAN is the flagship station of AARA, the American Amateur Radio Association (www.K1MAN.com). K1MAN wished W1AW well and then QSYed to 14.272 MHz. to kick of K1MAN's new live call-in talk show with co-hosts Glenn at K1MAN and Karol at VE7KFM on the "left coast" of Canada (Hi). K1MAN is on the United States "right coast" (Hi). The call in number is 1-800-262-9543.

The kick off "show" was a huge success as the ARRL toy drive 3 KHz up was heavily promoted by both Glenn and Karol. During this "show" on 14.272 MHz., ND8V, enabled by K4ZDH, QRMed W1AW off of 14.275 MHz., an alleged criminal act under the Goldwater Law, Sections 333 and 501 of the 1934 Communications Act. ND8V is under the assumption that the Goldwater Law has been repealed (it has not) since ARRL dropped their listing this law in their FCC Rule Book in the early 1990s, another alleged criminal act itself, under the Goldwater Law, since de-listing of Sections 333 and 501 does give that false impression, doesn't it?. K4ZDH is also in alleged criminal violation of the Goldwater Law, of course, since he has repeatedly failed to discourage interference by hams to the K1MAN Amateur Information Bulletin Service heard on 14.275 MHz. since 1987 and just resumed yesterday after going off the air for IARN (International Amateur Radio Network) emergency traffic reasons on 4 July 2005.

Their is a rampant rumor going around in amateur radio circles that ND8V has requested to share his federal jail cell at Leavenworth with K4ZDH, known to his friends at the Commission at "Rot Riley" Hollingsworth the "K1MAN Killer." According to Glenn Baxter, K1MAN, Executive Director of AARA, there are no provisions in United States law for "vanity jail cells." Dave Sumner, K1ZZ, CEO of ARRL could not be reached for comment on this question and did not return any phone calls almost certainly made from K1TP, W5YI, and other ham

radio reporters as this story broke on Thursday.

Glenn Baxter, K1MAN, said in an interview that:

"I certainly support waiving the rules in this case by allowing ND8V and K4ZDH to share jail cells after trial on purely humanitarian grounds. This, after all, is the holiday season, and radio amateurs should all pull together on this one and throw up, errr, throw their support for ND8V's behind, errr, throw their support BEHIND ND8V and K4ZDH." Ed. comment: Lay off the wine Glenn!

Chris Imlay, ARRL counsel, has advised, we believe, K1ZZ to invoke the Fifth Amendment since ARRL might also be criminally prosecuted in this case. Former Assistant U.S. Attorney Gail Fisk Malone is rumored to be considering a return to the Justice Department to personally handle this very high profile case. Gail, no doubt, has her eye on Hillery Clinton and the White House. Malone has neither confirmed nor denied that she is a presidential candidate nor that her running mate will be Wayne Green, W2NSD, who ran for Vice President at least once before. Wayne indicated to this reporter recently that he wants to reform education in the U.S., and, as Vice President, he would most certainly have his best chance to do this, in this reporter's opinion.

Glenn Baxter, K1MAN, has stated, again, that he IS NOT a candidate for President and that there WILL NOT be K1MAN Amateur Information Bulletins coming from the White House if he is:

"I am getting too old for politics, and my responsibilities at AARA and K1MAN are far to great at this time to even consider the White House. With Hollingsworth in jail, there would be no point. One FCC Commissioner will be as good as any other once we have put Rot Riley away," Mr. Baxter said.

Later in the day, W1AW and K1MAN re-established contact on 14.275 MHz. and were driven off the frequency by ND8V. Mr. Baxter stated:

"ND8V also drove me off of 14.275 MHz. while I was working G7BGY and 4Z4UN on December 14, 2005. There seems to be a pattern here. K3VR even E-mailed me yesterday that he has sent CD recordings of K1MAN to all FCC Commissioners. For the full text of little Brian's juvenile E-Mail see www.K1MAN.com, also attached below."

Today, in Washington, D.C., several FCC Commissioners were spotted walking around listening to Brian's MP3 recordings of K1MAN on their I-PODs, according to sources of questionable reliability, since all of the FCC is out on Christmas vacation and in Maine skiing with their kids now home from college.

"It is great that W1AW and K1MAN are working together now," Mr. Baxter said. "Tune in to the K1MAN live call-in talk show on 14.275 MHz.

plus or minus QRM, of course! Give us a call, even if it is only for a signal report or QSL request. Call 1-800-262-9543. The first show begins daily at about 11 A.M. EST, and the second program begins at about 2 P.M. EST. Join the fun!" 73 and GL de K1MAN

A few states do. AFAIK California does not have this prohibitio

Oddly, and in opposition, most states DO allow scanner owners to listen to emergency communications within one's home or place of business.

There are some states that prohibit this and a violation of the state statutes can run anywhere from a misdemeanor to a minor Felony.

The charges, if any, are most often left up to the Officer who does a traffic stop (most often where these scanner violations are found) and it is left to "Officer Discretion" whether or not the Officer wishes to file charges.

In many instances the Officer can confiscate the 'scanner' and the Courts will return it after a court action.

Insofar as having a radio that receives public safety? Not a problem, provided one is a licensed Ham.

Dear Santa,

This Christmas I would like a brain and some double A batteries to run it. Is Rudolph real? How is the North Pole? I would also like a bell from your sleigh and some crayons too. I color a lot and I was good all year and did not touch my sister one time. Can you put a rope through the hole in the bell and tie the rope to my neck so I can wear it every day and be a ding-a-ling?

Your friend
Todd

3744. Yaesu VX-7R firmware problem ????

Newsgroup: rec.radio.amateur.misc
Date: 2005-12-18 11:37:01 UTC
From: Bewlay51 <bewlay51@yahoo.co.uk>
Message-ID: <xRbpf.16095$b4.7593@newsfe1-win.ntli.net>
Source record: 46848

Hi,

As anybody else seen these problems with the Vx-7R handheld

I have entered a number of frequencies I wish to scan. I have setup PMS to scan these frequencies. The problem is, each time the rig completes a scan and returns back to the start it emits a beep. I can't seem to turn the beep off and enter "a silent scan mode". It's only scanning about 10 frequencies so beeps every few seconds. I have tried all the setting to enable/disable scans beeps, none work.

The other problem is entering "Special Memory" mode. With I press [F] then SPCL key 9, then rotate the dial to select "2 MR Group" then press PTT to confirm, I get an error beep. I cant select OTM or HYP mode as well. I have found I need to select Broadcast or Marine before it works. If I then re-enter "Special Memory" mode and then select "2 MR Group" or any other mode it then works. Very odd!!.

Thanks

John G4KUC

The Ohio/Penn DX PacketCluster
DX Bulletin No. 739
BID: $OPDX.739
December 19, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
```

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, WS1V, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N4BAA, NF4A, KD7WPJ, K8YSE, AH&#65533;W, DJ8NK, DL1EK & The DX News Letter, DL5EBE, DS4NMJ, F5NQL & UFT, F6AJA & LNDX, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, MM0DFV, RW6HS, Sergey Nam, SQ6IU and VA3RJ & ICPO for the following DX information.

```
*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): I would like to thank the
individuals who sent the goodwill/sympathy wishes in my absence. I
was able to get to Nevada in time to spend three hours with my dad
before he passed away on December 6th. It is something I will never
forget. He is now in a better place with my mother. I miss them both.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the
week of Sunday, 11th/December, through Sunday, 18th/December there were
208 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W,
4J, 4L, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X,
8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, A2, A4, A6, A7, A9,
AP, BV, BY, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6,
DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG,
FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HI,
HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J6, JA, JD/o, JT, JW, JX, JY, K,
KG4, KH0, KH6, KL, KP2, KP4, KP5, LA, LU, LX, LY, LZ, OA, OD, OE, OH,
OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5,
S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TJ, TK,
TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE,
VK, VK9N, VP2E, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI,
YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP,
ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or
more likely a "BUSTED CALLSIGN". As always, you never know - "Work
First Worry Later" (WFWL).
```

3B9, RODRIGUES ISLAND. Robert Gerard Felicite, 3B9FR, continues to enjoy working DXers from around the world from his hilltop QTH in Citronelle, Rodrigues Island. He is most workable on 20 meters SSB. Robert reports that the postal authorities in Mauritius will no longer accept IRCs and that a single U.S. dollar bill is no longer sufficient to cover postage costs for return QSLs. He regrets having to ask DXers to cover the minimal postage costs but with no more than 2 USD. Robert and Frank, AH&#65533;W/3B9R (who also resides in Mauritius), are working together to establish two permanent radio stations on one of the outer islands of Mauritius as part of a larger humanitarian initiative. Future information on this will be announced via OPDX and the QRZ DX Newsletter and on non-Ham Web sites TBA.

3Y0X UPDATE. Instead of a Press Release this time around, Ralph/K0IR and Bob/K4UEE have prepared a "Status Report" which is available on their Web site at: http://www.peterone.com/
OPDX Subscribers/Readers are encouraged to visit the Web to the view the full status report. The report includes details of all the operators of the 3Y0X team, plans of operation, their ship and helicopter...etc. Please visit the Web site and possibly make a contribution to this very expensive DXpedition.

6W, SENEGAL. Dave, G4WFQ, will be active as 6W/G4WFQ between February 4-17th. Activity will be on 160-10 meters including the WARC bands, mainly on CW and RTTY with some SSB. QSL via G3SWH, by the bureau or direct with SAE and adequate return postage. Also, bureau QSLs can be received by sending and E-mail to: phil@g3swh.demon.co.uk

AAW NEWS. Stations are beginning to line-up for the 3rd Antarctic Activity Week (AAW), February 20-26th. So far the following have announced that they will be active using the special suffix for the event:

VU2ANT by VU2UR WAP-21 II5ANT by IZ5BTC SRT Toscana WAP-25
4O3ANT by YZ1SG WAP-22 II8ANT by SRT Campania WAP-18
IR1ANT by I1HYW WAP-02 TO2ANT by F6HMJ WAP-26
IO2MET by IK2IWU WAP-23 TM0ANT by F6KDF R.C. WAP-08
II7ANT by IZ7AUH WAP-12 IO6ANT by IZ6FZS WAP-28
IR0ANT by IZ0EGC/IK0JFS/IW0HP WAP-10 TM5ANT by F5NOD WAP-29
UE6ANT by UA6HPR WAP-24

A completed updated list of stations and details on the AAW event can be found on the Worldwide Antarctic Program (WAP) Web page at:
http://www.ddxc.net/wap

CE0Z, JUAN FERNANDEZ (Update). It seems that several operators will now be joining the few 3Y0X operators planning to activate Juan Fernandez before heading to Peter I Island. Operations will take place between January 20-28th, and the team will use the callsign CE0Z. Activity will be on 160-6 meters. Team members are: Dave/K4SV, Bob/N6OX, Bill/N2WB, Gerard/F2JD, Pedro/CE3BFZ, Guillermo/XQ3SA, Sergio/CE3GL, Juan/CE3GRG, Maite/CE3BYL, Roberto/CE5RH, Hector/CE3VII and Ignacio/CE3GFN. Suggested frequencies are:
CW - 1820, 3540, 7020, 10010, 14040, 18080, 21040, 24890, 28040 and 50110
SSB - 1840, 3795, 7060, 14195, 18145, 21295, 24945, 28495 and 50110 kHz

There is three QSL Manager for this activity:
N2OO - Robert Schenck, PO Box 345, Tuckerton, NJ 08087, USA
F6AJA - Jean Michel Duthilleul, 515 Rue du Petit Hem, 59870 Bouvignies, FRANCE
CE3BSQ - Radio Club Manquehue, P.O. Box 27064, Santiago, CHILE
Check out the DXpedition Web page which contains details of the island and will have an online log at: http://www.ce3bsq.cl/ce0z/

DP0, ANTARCTICA. Torsten, DD1BG, currently active from Neumayer Base (WAP DL-02) signing DP0GVN, was heard this past Sunday on 14195 kHz at 0000z. Reports state he is using a YAESU FT-857 and the local antenna system on SSB only. His favorite frequency is 14195 kHz after 2030z (closer to 2300z). Torstens activity will last until the January 11th. QSL via DD1TG: Torsten Grasse, Schumannstr. 2, D - 30177 Hannover, Germany.

DT8, SOUTH SHETLAND ISLANDS. Sang Hoon Lee, DS4NMJ (KE5CNK), informs OPDX he will be working at the King Se-jong Station (South Korean Antarctic Scientific Base) as a radio operator on King Geogre Island in the South Shetland Islands group between January 1st and December 30th. His callsign will be DT8A and activity will be on 160-10 meters, SSB, CW and RTTY. The island's reference numbers are: IOTA: AN-010, CQ: 13, ITU: 73 and WABA: HL-01.

EX, KYRGYZSTAN (Plan A DXpedition To Central Asia!). The "International Adventure and Travel Company" (Along The Way) with the co-operation of Radio Hit-FM Bishkek under the technical support of the "Collective Amateur Radio Station" (EX9BV) offers you three types of ham-radio expeditions to Kyrgyzstan. After you get a special license, you are able to legally operate from the territory of Kyrgyzstan using a callsign like "EX/homecall" or "EX/homecall/M" in case of mobile operations. Expedition plans are available for a single individual or a group to spend 3 days in Bishkek City to 21 days to different regions in Kyrgyzstan. For more details, visit the Web page at: http://www.alpinism.net/radio.htm

FS & PJ7, ST. MARTIN AND ST. MAARTEN. Operators Sigi/DL7DF, Frank/DL7UFR, Rob/DL7VOA, Les/SP3DOI and Wolf/DL4WK will be active from the French and Dutch side of this island between February 21st and March 8th. They will operate one week on each side (FS first) from two different QTHs. Activity will be on 160-10 meters, including the WARC bands and on the modes CW/SSB/RTTY/PSK31/SSTV. They plan to have two stations with amps active using a V80e (vertical), Hexbeam (20/15/10), R7 and vertical for 30m. Their main activity will be 160/80/40/30 meters. They will also be active in the ARRL DX SSB Contest (March 4-5th). QSL via DL7DF, direct or the DL Bureau. Look for online logs on the following Web site at: http://www.dl7df.com

FT5XO KERGUELEN ISLAND VIDEO: REVIEW by Tedd, KB8NW. James, 9V1YC, has put together another "FIVE STAR *****" presentation. This PBS high quality DVD is well worth the purchase. As always, James not only captures all the hard work the "Micro-lite Penguins DXpedition Team" had to endure getting to and setting up their operation on Kerguelen, but also the beauty of the

island and the stormy South Indian Ocean. On the DVD you get to see each operator in action during their low-power and vertical antennas operations. As in all his videos, James provides history of the island, but this time he also provides an interesting history of the famous ship, R/V Braveheart. The DVD is packed with 54 minutes of great video. A must for a DXer's video collection! Details on how to purchase this video can be found at: http://www.dxvideos.com/ft5xovideo.htm

GU0/MU0, GUERNSEY. Paul/F6EXV and Jan/DJ8NK will sign MU0EXV and GU0VNK, respectively, from January 20-30th. Activity will be on SSB/CW/Digital modes and all bands from 160-10 meters. QSL via their home callsigns (QRZ.com addresses). Jan informs OPDX that there is a chance that Martin, G3ZAY, will join them for the last weekend or so.

IOTA NEWS.....
AF-NEW. OPDX was provided with the following statement by "The Midway Kure DX Foundation" (WH7M): "Contrary to erroneous information published in one of the DX bulletins, there will NOT be a Hollams Bird Island IOTA operation the last ten days of March. However various operators and foundations are working to make this difficult location a reality for IOTA hunters in the future. Subsequent information regarding a proposed operation will be made available via Barry Fletcher, ZS1FJ, of the Midway-Kure DX Foundation which continues to sponsor such oceanic island operations including Hollams Bird Island and two other island DXpeditions."

EU-129. Helmut, DL7VOX, will once again be active as DL7VOX/p from Usedom Island (GIA O-013 for the German Islands Award) between December 23rd and January 2nd. He will operate CW only on the HF bands. QSL via his home callsign, direct or by the bureau.

NA-066. Oleh, KD7WPJ, was expected to sign KD7WPJ/6 from Santa Catalina Island, December 17-19th. He was heard on 40 meters Sunday.

NA-123. Operators Allen/KV4T and Bridget/KS4YT will be active as homecall/p from Dauphin Island (USI AL-002S, Mobile County, Alabama), December 21-24th. Activity will be on 40/17 meters CW and SSB. QSL via their home callsigns.

JD1, MINAMI TORISHIMA. Look for Takeo, JA1DDH, to be active as JD1YBJ between December 20th and January 15th. He will focus on 160 meters. QSL will be announced.

JD1, OGASAWARA. Operators Makoto/JI5RPT and Toru/JI5USJ will be active as JD1BLY(CW only) and JD1BLX(SSB, RTTY and CW), respectively, from Chichijima Island (AS-031) in the Ogasawara Islands group, between 0400z, February 19th and 2200z, February 28th. Activity will be on 160-10 meters including the WARC bands and on CW/SSB/RTTY/PSK31 and the satellites (VO-52 and FO-29). All QSL cards for JD1BLX will go to "JI5USJ" via the Bureau or CBA. All QSL cards for JD1BLY will go to "JI5RPT" via the Bureau or CBA. For more details, visit the Web site at:

http://www.aa.alpha-net.ne.jp/ji5rpt/jd1/

KG4, GUANTANAMO BAY. Look for Jose/N4BAA and Bill/W4WV to be active from Guantanamo Bay, Cuba (GITMO), from January 21-31st. Callsigns will be KG4SB and KG4WV, respectively. Operations will be on 160-6 meters and all modes. Also, look for Jose (KG4SB) to be operating in the CQ WW 160M CW Contest (January 28-29th). QSLs via their home callsigns.

KH0, MARIANA ISLANDS. Remember to look for Hide, JM1LJS, to be active as KH2VL/KH0 from Saipan (OC-086), Northern Mariana Islands, December 22-25th. QSL via JM1LJS (QRZ.com). Visit it his Web page with an online log search at: http://radio-dream.com/anyway_holiday/kh2vl_kh0_rota_logsearch.html

KH2, GUAM. Look for Matsuda, JM3PIT, to be active December 22-26th. His callsign and bands of activity were not provided. QSL via JM3PIT.

KP5, DESECHEO ISLAND. Some DXers received an early Christmas present when operators Kam/N3KS and Dave/K3LP came on the air as N3KS/KP5 and K3LP/KP5 on Friday, December 16th. Thanks to Bernie of "The Daily DX", who was in contact with the operators via a cell phone, updates were being provided to the DX community. First announcements stated that the two operators would be there for a very short time (possibly a minium of 48 hours only). It was also mentioned that this was a working trip and not a full-blown DXpedition. During the operation, another announcement came stating activity may last until Tuesday, December 20th. However, the Grinch stole Christmas for the DXers. The KP5 team was served with "some kind of official documentation that apparently has the word lawsuit" late afternoon or early evening on December 16th by the police. "The Daily DX" states, "It seems the police served some kind of paper work that supposed came from Washington DC demanding the KP5 team leave the island immediately." The KP5 team was able to operate through the night and until the waves died down to safely leave the island. They went QRT around 1730z, December 17th. The lucky DXers that were able to work them can QSL via W3ADC: John F. King, P.O. Box 64, Hampstead, MD 21074, USA. Stateside DXers should remember that U.S. postage rates will increase on January 8, 2006.

P4, ARUBA. Contest: John, W2GD, will be active as P40W between February 16th and March 8th. Activity will be on the WARC bands and 160 meters. Also, look for him in the ARRL DX CW Contest (February 18-19th) as Single-Op/All-Band entry. QSL via N2MM.

QSL INFO AND NEWS.....
Reports indicate that the FT5XO logs are now LoTW.

The KH6ND/KH5 Palmyra QSLs are reportedly coming out.

QSL SU8BHI via HA3JB only direct with SASE. Recommend address: Gabor Kutasi, H-8601 Siofok, P.O.Box 243, HUNGARY - EUROPE. The QSL is valid for the I.P.A (International Police Association) Award.

QSL ZF1A via W5ASP, direct or by the W5 Bureau for the recent operation during the 2005 CQWW DX CW Contest.

SPECIAL EVENT. To celebrate the 15th annual participation by the Polish Boy Scouts during the Bethlehem Peace Fire, look for special event station SP15BSP between December 15th and January 2nd. QSL via SP6YFU.

SPECIAL EVENT. Look for two special event stations, UP1SAT (op. UN7ED) and UP2SAT (op. UN0LL), to be active from Kazakhstan between December 26th and January 15th, to celebrate the first launch of Kazakhstan's "KazSat" broadcasting satellite. Activity will be on all modes and bands (including the WARC bands, 2m and 70cm). QSL via RW6HS.

TR8, GABON. Roland, F8EN, is expected to be active as TR8CR from Libreville until January 12th. Activity is mostly during his mornings. His QSL Manager, Jean-Michel, F6AJA, reports that he will receive the TR8CR logs after Roland returns to France. The logs will be available on the Web at: http://LesNouvellesDX.free.fr

VP8, ANTARCTIC. Willy, ON5AX, will be traveling the Antarctic waters again. He will be active onboard of the vessel "Europa" touring around the Antarctic Peninsula / South Shetlands between December 28th and January 18th. Willy will be active on CW/SSB on all bands up to 30 meters signing VP8DII/mm. He will be using an ALINCO DX70, SGC 231 antenna tuner and a longwire antenna. Willy will look for Western Europe, especially on Saturday and Sunday afternoons on 14020, 14220, 21020 and 21220 kHz. QSL via ON5AX.

Hey Lardass, how does one "hear" a newsgroup post, shit for brains?
It's no wonder you are just a pizza delivery BOY. You lack the
goddamned intellect to do anything else but menial employment, you
mentally ill retard. You see Roger behind every fucking post. He has
beaten you so badly, king of knob jobs in Alabama Davies.

You could sure do with the weight loss, Davies. The world wouldn't miss
you if you died, either.

You really have to stretch for a comeback, don't you, Woger? But you
still haven't answered Todd's question about your own excuse for
having a license, and you really should do that. Point out to Todd
that you were tested twice, while he was only tested once, and that
your license is therefore twice as good as his.

My all-time favorite jeep (general purpose) logging program is HyperLog, but support has been discontinued, so I'm shopping for a new product.

Bought EQF-logger, but after a few months of use I still haven't gotten used to the kluge-operator-interface, so I've written that one off.

Here's my list of MUST HAVE features:

An intuitive, non-rodent-centric operator interface, similar to the simplicity of Hyperlog or CT (Mouse OK for non-routine functions, but logging sequences must be touch-typist-hands-on-the-keyboard-no-need-to-watch-the-screen.)

Radio control integration

LoTW integration

Import from ADIF

Good support from the author

Any suggestions?

Hi Hans,
You should most certainly look at EasyLog (www.easylog.com).
I have used it for a number of years and also tested other logging
softwares, but always turned back to EasyLog.
Take a look at it and feel free to contact med with questions.

Have you tried N1MM? Though I don't know how well it works for large databases and I've only used it for contests although it can do general logging.

Some people speak highly of the DXLab suite. I haven't tried it myself though.

3794. K1MAN REQUIRED READING ESSAY: THE LIFE OF KAROL

Newsgroup: rec.radio.amateur.misc
Date: 2005-12-20 20:30:57 UTC
From: netmanager2@yahoo.com
Message-ID: <1135110657.254064.56780@g43g2000cwa.googlegroups.com>
Source record: 46797

THE LIFE OF KAROL - 18 December 2005 - ES051218A - (draft)

by

Glenn Baxter, P.E., K1MAN
(written in the third person)

I have just finished word for word reading of The Life of Riley, including all footnotes, dated March, 2005. There are various and very serious defects in this otherwise very informative and basically correct document. Riley and ND8V need to go, but Karol feels that K1MAN will go instead. No so. K1MAN is too smart for Riley, ND8V, K3VR, AND Karol. K1MAN's weapon is the U.S. Constitution. For K1MAN this is child's play.

FIRST

The most serious fault regards the concept of "frequency ownership." The problem with Karol is that the Polish calling frequency on 14.273 MHz. came into conflict with K1MAN and IARN on 14.275 MHz. beginning in 1985 with IARN emergency operations and then in 1987 with K1MAN Amateur Information Bulletins. One main purpose of the information bulletins was to "establish" 14.275 MHz. as an emergency frequency so the contesters would not wipe out IARN emergency operations due to lack of knowledge. The Polish calling frequency on 14.273 MHz. is too close, and the logical thing to do would be to move to 14.272 MHz. or ask IARN (and the Bermuda Net, of course) to move to 14.276 MHz. Another idea would be to move the Polish calling frequency to 14.272.5 MHz. and ask IARN (and the Bermuda Net, of course) to move to 14.275.5 MHz.

I do remember some discussions with representatives from the Polish group, and their position seemed to be "We will not move, you move..." or something to that effect.

Now, the FCC rule of using the spectrum most efficiently kicks in. If IARN moved to 14.276 MHz., there would still be a problem with the Bermuda Net who opted to have K1MAN's license revoked with the eager assistance of ARRL instead of moving themselves or working out a mutually acceptable schedule. Etc. K1MAN has always tried to negotiate in good faith in order to be within the FCC rule of cooperating with respect to selection of frequency. It is hard for a bona fide bulletin station or a bona fide emergency organization with substantial track record (such as IARN) to come up short in such negotiations.

The smart thing for the Polish to do would be to slide down to 14.272 MHz. When K1MAN took two years off (to teach) from 14.725 MHz., ND8V and associates jumped from the "zoo" on 13.313 MHz. onto the 12 year K1MAN established 14.275 MHz., and the turf war began. Sorry, but ND8V was right. 14.273 MHz. IS too close to the more heavily occupied 14.275 MHz. (by more than one group). The Polish were outnumbered, and common sense still called for the Polish to slide down.

Recently, Karol tried to slide K1MAN to 14.274 MHz., just occupied nearby by ND8V on 14.273 MHz. ND8V was wrong to be on 14.273 MHz. (just as the Polish are wrong to be on 14.273 MHz.), and K1MAN would be wrong to slide to 14.274 MHz. Two wrongs don't make a right, and Karol should realize that such poor practive by K1MAN could easily be translated (in the current K1MAN/FCC legal environment) to criminal proseedings against K1MAN by "Rot Riley" Hollingsworth, FCC Special Counsel. Was Karol also sick on the day they taught law at law school?

The "Life of Riley" asks Hollingsworth to get into a juvenile frequency dispute turf battle which "Rot Riley" played to the hilt with his campaign against K1MAN (with IARN, AARA, and information bulletins barley mentioned at all by Karol - what's with that?). Sure, Riley is corrupt, and sure, ND8V is "enabled" by Riley to break the law, Mike's reward for his cooperation to nab K1MAN. Same deal was implemented with KV4FZ. Then KV4FZ was dumped into the fire (with WB2OTK and K1MAN, almost!) just as ND8FZ will be dumped into the fire with K1MAN is Riley has his way; he won't.

Karol mixes his issues and the net result is his Polish friends are involved with something that could have been avoided years ago by sliding down to 14.272 MHz. where his war with bigot ND8V could be easily won, hands down.

SECOND

Karol is very "anti American," it seems. He has stated to me that he does not care about the U.S. Constitution, something I would gladly die to protect. (Blood is thicker than water!) Bad image for Karol if he want to constructively and therefore effectively criticise the U.S. We can take it; we need it actually! Also, ethnic slurs against "Red Necks" and "Stupid Land" and how dumb ALL Americans are is not too smart as far as amateur radio public relations goes, but Canadians are not too smart, are they? Hi! See what I mean? That stung didn't it?. Such generalizations are taken quite seriously by many if not most. How about "All Canadians are stupid" or "All Pollak's are stupid." Ouch! See what I mean?

THIRD

Personal attacks (weight, mental problems, intelligence, etc.) against anyone is always a sign that you are losing your fight. Not a winning strategy, in my view.

FOURTH

Karol needs to define his goal or goals. These are quite unclear to me. Two good goals would be to move the Polish to 14.272 MHz. and not be harassed there plus to constructively criticise America; we welcome a Devil's advocate. I welcome it anyway. If Karol wants to "nix" the U.S., he will lose. We have the aircraft carriers, remember? Sam and John Adams and company set up a pretty powerful group down here in Amarica, and we are not done yet!

FIFTH

Karol should reign in his "potty mouth" on amateur radio. It makes him, his military college, Poland, and Canada look very bad. His childish references to "sucking" or otherwise "doing" Riley in the bath house are illegal here in the U.S. and that would be more than enough for Riley to issue a Notice of Forfeiture and win big, big, big against K1MAN if Glenn did likewise. Make no mistake, I say that Riley is a cheap and corrupt polition playing ND8V like a grand piano, and what he does in the "bath house" is not relevant, of course.

This is America. Anything goes. Market forces sort it all out. The current market forces dictate that potty mouth on amateur radio and national television is out. Even Janet Jackson's bare boob is out. The ancient Egyptians flaunted their boobs all the time. It is great to be a king, isn't it? Hi, of course.

ND8V and K3VR were dealt on air mortal blows om 16 and 17 December 2005. The pen is mightier than the sword!!!!!!!!!!!!!!! Both can recover if they are smart. I still have hopes for ND8V. I am afraid that K3VR and Riley are toast, however. They are going down.

FINALLY

Karol can do better and fix things by acting better in public. His intellect and wit are awesome. Clean it up, Karol, define your goals, and we can make one hell of a difference in both amateur radio and in the lives of all of our listeners. The latter (and the new talk show) has the very real possibility of becoming huge and blowing both the FCC (rather Riley and his FCC support), K3VR, ARRL (and ND8V) right out of the water. Carpe diem!

Trying to set me up for a weapons conflict with the government here at K1MAN might be aimed at illustrating your anti gun Canadian view, however, our Constitution prohibits advocating the overthrow of our government by force. Not very smart, Karol! Also, this plays right into the hands of Brian, the fraudulent Crow.

I have all the tools I need right in our Constitution to beat those punks, hands down. We Americans are not as stupid as you suggest. You are not as smart as you think. I am playing at Level I, Riley is at Level II, Brian is at Level III, and you are at a distant Level IV. If you really think I am "going down," as you say, then you are at Level V or posibly as low as Level XX.

I think you are all wound up with anti American sentiments and it is clouding your judgment. Come down and sit in my chair for a day and see just how smart you really are! You would go down, and hard, here on our U.S. playing field, and fast. Yes, you have "free" health care but no aircraft carriers. Your kids and adults are not in Iraq. Good for you. We will gladly let you switch roles with us, old pal from the North! We don't plan to let punks like Hitler and Stalin (or Saddam, or anyone else) gang rape our mothers!

Don't like America? Just wait and let us hang ourselves if you really think we are THAT stupid. When we run out of fossil fuel we will all freeze anyway. eh? Except those in "stupid land!"

73 and GL de K1MAN

My ass cheese is green,
My ass cheese is black,
My ass cheese smells,
Like my husbands nutsack.

My lips smell like fish,
My lips smell like eggs,
My lips dangle down
Way beneath my legs.

My pussy runs hot,
My pussy runs cold,
My pussy looks rotten,
But it is quite old.

The more I scratch it,
The more sores I create,
The more I rub it,
The more I masturbate.

My twat oozes yellow,
My twat oozes green.
My twat has been used,
By a whole football team.

My warty puss looks good,
When it's hot, warm and wet.
My warty puss feels yummy,
When it's licked by my pet.

hating the fact I will now sound like bill Clinton but that depends on
the maeing of the word "anomaly"

but K1man seems to be bit further out than most hams although I am not
certain any of this stuff published as if it were his is in fact his
many hams hate him so much they will say anything about him

but ham that nuts are common

we have K4YZ that states lying on the interent is child abuse and
pedophilia, and that anyone who disagress with him is a homosexual Dave
who says their is nothing wrong with Knowing help other to break thier
own laws if he can claim DXCC credit in the process. N2ey who seems to
recite the whole histoory of Ham radio QSO by QSO in answer to
question, and that is just here on RRAP
wether this mean K1Man is an anomoly in your eyes or not I realy can't
say but I'll report you decide

at least a quarter of hams seem to prsent some real ego problems

Hans didn't "make up" any words. Every word he use can be found
in any standard dictionary.

> just more proof stevie is the ###hole of RRAP

Just more proof you're the drunken sloth of RRAP.

Steve, K4YZ

Only a quarter? Most *people* seem to present some real ego problems,
so if only a quarter of hams do, we're a pretty well-adjusted group.

CHELSEA Timemaster Clock

The 6" Timemaster Quartz Radio Room Clock

by Chelsea (Model 40101)

A rare opportunity to own a Chelsea special, non-catalog Government/Commercial clock.

New, factory fresh in an unopened, factory sealed box.

The Chelsea Timemaster is the pinnacle of maritime timekeeping - and this model features a Radio Room dial. This clock has been used for many years by the United States Navy in the demanding shipboard environment - setting the standard long before satellites were used for navigation - and still in use today.

This Chelsea Timemaster has a silent, high precision quartz movement as specified by the U.S. Military. It meets standards for vibration, temperature and humidity extremes. The accuracy of this quartz movement is +/- 1 minute per year. The Chelsea Timemaster clocks have passed U. S. Navy tests for accuracy, shock, vibration, temperature and humidity extremes.

The sinking of the Titanic resulted in the Radio Act of 1912 that required 24-hour radio watches. The disaster also led to clocks in the newer radio rooms featuring three-minute periods marked in red. That three minutes provided a silent period when only emergency radio messages could be transmitted.

These clocks had an extra hour hand which was set on local time; the regular hands were set at Greenwich mean time (Zulu) since all incoming and outgoing messages were so marked. The red segments radiating out from the center post designated 3 minute periods at the quarter and three-quarter hours to observe radio silence to listen for emergency broadcasts on 500kcs. Later models featured additional green sectors at the top of each hour and 30 minutes past each hour for the monitoring of the 2182kcs. distress frequency. The red marks in the chapter ring designated 4 second intervals to time emergency autoalarm signals used to activate alarm bells on nearby ships and shore stations during the sending of an SOS.

The Timemaster is suitable for use on the enclosed bridge, wheelhouse, and ships radio room, on any Government, Commercial or Pleasure vessel or of course, in any home.

Timemaster is not included in the Chelsea catalog. Produced under various contracts which offer limited availability to the civilian market, and available only through authorized dealers by special order.

This clock is available for immediate shipment to the winner of this auction. It comes in its Factory-sealed (unopened) box.

Features:

6" diameter Radio Room dial
Accurate 12 hour quartz movement (+/- 1 min per year)
Second register
Hinged front bezel
Second hand
Black phenolic case

"an old friend" <kb9rqz@yahoo.com> wrote

> what proof?

Proof? You want proof? I'm right, and you're wrong, and I can provide the
mathematical proof.

It is obvious, even to you, that the opposite of right is left and that three
lefts
make a right or 3l = r.

It is also clear that wrong is the opposite of right so -w = r.

So this would make 3l = r = -w which means that 3l = -w. Now, since
left is the opposite of right (-l = r) this would mean l = r = -w, which
playing with the math gives me l = -r = w and so left is the same as
wrong (yes, I could have done this in fewer steps, but I didn't feel
like doing that).

Now, since l = w and 3l = r that would make 3w = r. This means
that three wrongs make a right. Of course, since 3 is an odd number,
this situation doesn't work out with any values for r and w except 0
which would mean that r = 0 and w = 0 and l = 0, although the last
one I don't really care about.

This means that right and wrong are mathematically identical and so
classifying things as right or wrong is pointless because both of them are
the same. And since there is no difference between right and wrong, that
would make ME always right and YOU always wrong and isn't that the
thing that rrap is all about?

2 + 2 = 8 if you assign sufficiently large values to 2.

Warmest personal wishes for the holiday,

de Hans, K0HB
--
If a `religion' is defined to be a system of ideas that contains unprovable
statements, then Kurt Godel taught us that mathematics is not only a
religion, it is the only religion that can prove itself to be one.

' '

Not to be "judgeing" one by the degrees they claim to hold, but if Toad were
to go to barber college and take the test twice and pass both times,
wouldn't that make him twice the barber he was before?
Could we then call Toad 2Test, also?
Likewise for the malcontent sociopath Amateur Radio Operator (2Test) who has
had to take his Ham test twice. Doesn't that make the Ham in question twice
the operator he was before Riley 'invited' him to retest?

Heck, by extrapolation and a looooooong stretch of the imagination, according
to 2Test this should be so.

SOLDERSMOKE!
A SHOW FOR ELECTRONICS HOMEBREWERS!
http://www.ourmedia.org/node/123300

Topics discussed in SolderSmoke 11:
Video of Trivial Electric Motor. Solar powered station on 80 meters. Mike's new PIC-pong game. Coax traps for a 160 meter antenna. Understanding solid state amplifier design. Homebrew shows on the Discovery RealTime Channel. The G-QRP Superdrug radio project. Altoids and I-pods. Listen at: http://www.ourmedia.org/node/123300

Background:
Tired of listening to Led Zepplin or NPR on your I-Pod? Wouldn't you like to be able to carry with you the kinds of ham radio conversations that you listen to while in your radio shack?
Mike, KL7R, in Juneau, Alaska, and Bill, M0HBR, in London, England meet regularly on the ECHOLINK system to discuss their homebrew radio projects. We are making them available as PODCASTS.

You can subscribe to the program, have them downloaded to your MP-3 player, and listen to them at your convenience. To subscribe, just cut and paste this URL into your I-poder (or similar) software.

http://www.ourmedia.org/mediarss/user/36170

If you don't have an MP3 player you can just go to the site below and listen to the latest program (and earlier editions) using the audio software on your computer.

http://www.ourmedia.org/node/123300

We hope you enjoy the program. Please send us feedback.

Hello Lee,

You're quite right, some of the paddles are quite expensive, but aren't they beautiful?!

You might want to consider making your own paddle. There are numerous designs on the web, and a decent paddle can be made for under 15 or 20 dollars.

My first homemade paddle was made using hacksaw blades and worked rather well. I should mention that they worked well up to 20 wpm or so...after that they left a bit to be desired.

Another favorite came from the old 73 magazine. Nothing more than two short pieces of brass welding rod held in place, making contact with a spacer. This worked really well and I could send just fine with it.

I have a copy of the article I could send along to you if you like. Even today this should cost no more than 6 or 7 dollars...less if you have a small piece of scrap wood laying around.

The point being is that you don't have to spend a fortune to have a great time with CW...and the guy at the other end won't be able to tell the difference between your homemade paddle and a $300 Whizbang Mark 5.

73 and Merry Christmas de WA2AFD Howard

You reading this Todd? Obscene cartoon drawings *are* an illegal form of child pornography. Read the final paragraph below carefully. You just might have a few Federal agents scanning your filthy little bbs after all.

====(begin quote)====

posted on 2005-12-02 10:01:34
source: Richmond Times-Dispatch

In March we reported on a man in Virginia who faced life in prison for, among other things, downloading anime-child pornography on a computer at the Virginia Employment Commission. The downloads occurred while the man was on probation for a previous conviction involving child pornography.

In total he was accused of 20 counts of receiving obscene materials, 20 counts of receiving obscene visual representations of sexual abuse of children, 14 counts of receiving child pornography and 20 counts of sending and receiving obscene e-mails describing sexual abuse of children. Besides the anime-child porn, he was also received digital photographs of children engaged in sexually explicit acts.

Yesterday that man was found guilty, by jury, of 74 counts of child pornography charges in U.S. District Court.

When he is sentenced on March 10, he faces a maximum sentence of 1,160 years in prison and a fine of US$18.5 million.

According to the man was "the first person convicted under a 2003 federal statute that makes obscene cartoon drawings as well as photographs an illegal form of child pornography."

Provisions of the Child Pornography Prevention Act (CPPA), a 1996 law that banned virtual child pornography, were thrown out by the US Supreme Court in 2002 on freedom of speech grounds. However WRIC reports that this individual is the first to be charged under "a new child pornography law that can apply to cartoons." The report did not specify whether this was a federal or state law, however the US Attorney's Office was cited as being involved. If convicted, he could face life in prison.

It wasn't much of a sanction or punishment either way, eternal no code
tech. Roger upgraded from the General he had to retake (quite easily,
too; YOU can't even get 5 wpm code, remember, you get stuck after 5
lettters). Looks like the "punishment/sanction" wasn't very effective.

> Heck, by extrapolation and a looooooong stretch of the imagination, according
> to 2Test this should be so.

^^^^^^^^^^^^^

Making up words again, you chronic alcoholic? Go back to delivering
those greasy shitty Papa John's pizzas, fatass.

Tnx, Howard, I ended up purchasing a BY-1 Bencher from HRO. It was their classic paddle (without the chrome base), and only set me back $100, so I guess it was a good compromise between quality and price. I didn't realize paddles were so easy to make yourself. Maybe if I had more time, but such a project does not appeal to me at this time. BTW, I built the NORCAL keyer (real fun project, that), and it works great with the Bencher, and it was only $16!

If you ask that to a few of the Amateurs lurking about in the Newsgroups
then the answer from them would be an emphatic yes it does matter, followed
by the same old "lowering of standards" and "m3/brain dead cb'ers" "Lazy
Asses" etc etc.

That's not from me btw, I take people as I find them, I was simply curious.

Regards,
Graham

also do you realy need a Iambic key
most ops never realy send Iambic style
even when using a iambic key

I still slap a iambic key like its a bug

good non iambic (single lever) keys are less expensive
and much easier to make than a set of iambic paddles

might want ask on
yahoo group brasspounder

also see the text on key strokes
iambic style sending vs non iambic style sending

by the way a key that one op loves
can be the same key that another op hates

there are lots of great keys out their
I own 3 expensive high end keys realy love them

but often find my self using a 70 year old Vibroplex bug
looks like its been thrugh a war, still keeps working

yours truly
mac

Could be, but it's a misdemeanor. And after the judge reads all his homo posts, I'm sure we will get off with a slap on the wrist. Then in the judges chamber he will probably pat us on the back for a job well done.

http://www.boston.com/news/local/massachusetts/articles/2005/12/24/students_tall_tale_revealed/

"Student's tall tale revealed
Confesses fabricating US surveillance story

By Jonathan Saltzman, Globe Staff ï¿½|ï¿½ December 24, 2005

It rocketed across the Internet a week ago, a startling newspaper report that agents from the US Department of Homeland Security had visited a student at the University of Massachusetts at Dartmouth at his New Bedford home simply because he had tried to borrow Mao Tse-Tung's ''Little Red Book" for a history seminar on totalitarian goverments.

The story, first reported in last Saturday's New Bedford Standard-Times, was picked up by other news organizations, prompted diatribes on left-wing and right-wing blogs, and even turned up in an op-ed piece written by Senator Edward M. Kennedy in the Globe.

But yesterday, the student confessed that he had made it up after being confronted by the professor who had repeated the story to a Standard-Times reporter.

The professor, Brian Glyn Williams, said he went to his former student's house and asked about inconsistencies in his story. The 22-year-old student admitted it was a hoax, Williams said.

''I made it up," the professor recalled him saying. ''I'm sorry. . . . I'm so relieved that it's over."

.
.
.

The student later told the professors he had requested the book at UMass-Amherst. But officials there said UMass-Dartmouth students cannot use their ID cards at the Amherst library and that all interlibrary requests are made by the libraries, not students.

A Homeland Security spokeswoman in Washington said she had no record of any interview of a UMass-Dartmouth student and pointed out that the department does not have its own agents. An FBI spokeswoman in Boston also expressed doubt.

That didn't stop it from buzzing around the Internet and even being picked up by Kennedy, who cited it as the latest example of the Bush

administration's intrusion on civil liberties.

''Incredibly, we are now in an era where reading a controversial book may be evidence of a link to terrorist," he wrote in an op-ed piece in Thursday's Globe.

Laura Capps, a Kennedy spokeswoman, said last night that the senator cited ''public reports" in his opinion piece. Even if the assertion was a hoax, she said, it did not detract from Kennedy's broader point that the Bush administration has gone too far in engaging in surveillance."

----

http://www.boston.com/news/globe/editorial_opinion/oped/articles/2005/12/22/on_wiretapping_bush_isnt_listening_to_the_constitution/?page=2

"Just this past week there were public reports that a college student in Massachusetts had two government agents show up at his house because he had gone to the library and asked for the official Chinese version of Mao Tse-tung's Communist Manifesto. Following his professor's instructions to use original source material, this young man discovered that he, too, was on the government's watch list.
Think of the chilling effect on free speech and academic freedom when a government agent shows up at your home -- after you request a book from the library.
Incredibly, we are now in an era where reading a controversial book may be evidence of a link to terrorists.
Something is amiss here. Something doesn't make sense. We need a thorough and independent investigation of these activities.

The Congress and the American people deserve answers now.
Edward M. Kennedy is the senior US senator from Massachusetts"

LMFAO!!!!!

I suggest you use the BAMA site, but if you have a problem, email me if you
want me to email them to you. The schematic is in three sections.

There aren't any likely fault possibilities in the receiver that would cause
a voltage on the antenna terminal. What type of voltage do you see, how
much, and if it's DC what is the polarity?

Even if the capacitor (C33) on the grid of the RF Amp was shorted, you would
measure nothing, because the slight voltage would be well grounded through
the inductors.

Don

One of the interesting tid-bits from Nixon's tapes, besides his
assertion that the "Warren Report was the biggest fraud ever
perpetuated on the American people," was this;
John Dean's musing to Richard Nixon as recorded on the White
House tapes in 1973: "If Teddy knew the bear trap he was walking into
at Chappaquiddick. . . ." (page 121, White House Tapes Paperback
Edition, published by New York Times)

Unlike, say, the phrase " stepping into a pile of shit," the words
"bear trap" suggest that there were other actors in that sorry
episode, which, given the fate of his brothers, seems entirely
possible.

no, its not..... it is, like a lot of other things, a symptom of a larger problem. :(

and here the mass media is, for the most part, a significant part of that problem. if they'd just report the facts and leave the opinions to those more qualified, well, it wouldn't probably have not gotten as far as it has.

This "mass hysteria" is one of the reasons why I no longer pay much attention to anything news wise unless its a natural disaster that will result in my being called up for comms duty.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 740
BID: $OPDX.740
December 26, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NG3K, W3UR & The Daily DX, K4WY, N4AA & QRZ DX, W4TV, K8YC, K8YSE, W0YG, DJ8NK, DL1EK & The DX News Letter, E21EIC, F5NQL & UFT, F8DVD, I1HYW, I1JQJ/IK1ADH & 425 DX News, IZ8CCW, IZ8EDJ, IZ0FKE, JA3MCA, JI6KVR & JA-IOTA Islands News, LU9ESD, LZ1ZF, SP2FAP, VA3RJ & ICPO, VE6LB/VA6XDX and VK6CQ for the following DX information.

*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): My family (wife/OPDX's chief proof-reader Linda, son Teddy [TJ] and his wife Jesse, daughter Katie) and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy Holiday and Season's Greetings". Thanks to the individuals who sent holiday wishes to me and the family. I tried to answer all of them this time around..... 73 and Have a Great Holiday de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 18th/December, through Sunday, 25th/December there were 207 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5U, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9N, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J6, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9 & FR, RODRIGUES AND REUNION ISLANDS. Look for Jean-Marie, F8CHN, to be active as FR5EZ from on Reunion Island this week. His operations will take place between December 30th and January 3rd. He will then leave and go to Rodrigues Island and operate as 3B9/FR5EZ between January 3-11th, before returning to Reunion Island and staying until January 17th. Most of his activity will be on 30 and 17 meters. QSL both operations via F8CHN.

ANTARCTICA NEWS.....
Horacio, LU4DXU, will operate as LU4ZS from Marambio Base (IOTA AN-013, Antarctica Award LU-03) on Seymour Island from January 3-8th, if everything works out with "logistical transport". More details are forthcoming.

Alan Cheshire, VP8PJ (aka VK6CQ, VK0LD, and 9V1DX), is active until around January 30th from Patriot Hills Base Camp in Ellsworth Land, Antarctica (80 Deg South 81 Deg West, about 700 miles south of Peter 1st Island). His main activity will be CW on 7003, 10103, 14003; SSB depending on propagation. He was heard this past week on 40 meters between 0200-0330z. Alan mentions to OPDX that he might also activate the nearby unoccupied Chilean camp "Arturo Parodi" as CE9/VP8PJ. QSL via Dominik, DL5EBE. For more info and photos, visit his Web site at: http://www.geocities.com/vk0ld/home.html

C6, BAHAMAS. Bill, KM1E, is active as C6AGN from Green Turtle Cay (NA-080), Little Bahama Bank, until March 8, 2006. Activity will be on all HF bands. QSL via his home callsign.

E2/HS, THAILAND (Scout Activity). Look for special event station E25AJ to be active during the 25th Asia-Pacific Scout Jamboree from Hat Yao, Thailand, between now and January 3rd. Activity will be on all bands (no WARC) on CW, SSB, RTTY, PSK, SSTV and Satellite. More info can be found at: http://jamboree.siamportals.com
INTERESTING NOTE: The Boy Scouts will have a schedule between E25AJ and the International Space Station, NA1SS, on December 31st. QSL via E21EIC, except for JA stations who should QSL to JR5XPG.
Also, look for following to be active in the Scout Jamboree from Chonburi, Thailand, between now and January 3rd. HF operators include:
E21EIC December 24th, Dec 27-31st (HF Team Leader)
E20PFE December 24-31st
HS0XNO December 27-30th
HS9EQY December 27-30th
HS0EHF December 29-31st
E21YDP December 29-31st

Also, visit the 25th Asia-Pacific Scout Jamboree Web site at: http://www.aprjam25.org

EM10, UKRAINE (Special Event). To celebrate 1&#65533;th anniversary of the Ukrainian Antarctic station at the Vernadsky Base, look for special event station EM1&#65533;KY (operator Paul, UT1KY/EM1KY) to be active between February 3-12th. QSL Manager is IK1QFM, direct or by the bureau. ADDED NOTES: Being a special event to celebrate Antarctica, EM1&#65533;KY will be referenced for the

World-Wide Antarctic Program (WAP) as WAP-33. The "Academic Vernadsky" (WAP UKR-01) is the first Ukrainian Antarctic station (the UAS) and became the basic place for the Ukrainian researches. The station (the former Faraday Base) was transferred to the Ukrainian Antarctic Center (the UAC), by the British Antarctic Survey (the BAS) on February 7, 1996. It is located on Marina Point, Galindez Island (65°15'S, 64°16'W). This area of high biological productivity is a southern border of distribution and reproduction of the mass birds species (Gentoo Penguins and Adelie Penguins). For more detailed info, visit the WAP Web site at: http://www.ddxc.net/wap

HNY 2006 PARTY. Next weekend is the "Happy New Year 2006 Party" sponsored by Polish MK QTC Magazine. An award is available and will be issued for at least twenty QSOs/HRDs conducted on any HF and VHF+ bands from 1800z on December 31st to 1800z on January 1st. For details and a picture of the award, visit the following Web page at: http://qtc.radio.org.pl/galeria/index.php?gallery=./Happy%20New%20Year%20Party&image=HNY.jpg

IOTA NEWS.....
AF-032. (Update) Members of the Provins ARS (F6KOP) will be active as 5H1C from Zanzibar Island, January 24th to February 2nd. Their activity will be on 160-10 meters, CW, SSB and digitals (PSK, RTTY, SSTV ....). It was announced this past week, that the F6KOP members agreed to try to take skeds for 160/80 meters only. Serge, F6AML, will collect the 160/80m requests from now until January 20th (and not after). Send your 160/80m requests, only to: F6AML@aol.com
Also, put in the subject line of your message, "Sked 5H1C". Please send your request one time and once per band only. This is on a trial basis. Since this is the first time, they ask you for some patience on the bands you requested at your sked time. Also, the local and propagation conditions at the sked time will be taken in consideration, too. They will do their best for each of you. Thanks to VE3NEA, a tool for propagation forecast has been added on the 5H1C Web page at: http://5h1c.free.fr/trafic_uk.html
The team will also enter the CQWW 160 Meters CW Contest. Operators mentioned for the DXpedition are: Franck/F4AJQ (SSB), Serge/F6AML (CW/SSB), Pascal/F5JSD (CW/SSB Webmaster), John/F5VHQ/0E5TGL (SSB), Bernard/F9IE (CW/SSB), Jean Paul/F8BJI (Digit/SSB), Romain/F8BUI(Digi/SSB/CW), Gerard/F2VX (SSB) and Jean-Marc/F8IXZ (CW). QSL via Franck, F5TVG, by the Bureau or direct to: Franck Savoldi, BP 92, 94223 Charenton Cedex, France. More info on the DXpediton can be found on the Web page at: http://5h1c.free.fr/index.html

AS-015/
AS-058. Rich, PA0RRS, will be active from Penang Island (AS-015) between December 28th and March 8th. His current plans are to operate as 9M2/PA0RRS, but hopes he will get an official 9M2 callsign.

A trip to Langkawi Island (AS-058) may also be possible. QSL
via his home callsign, by the bureau or direct to:
Richard Smeets, Schoorveken 100, 5121 NM Rijen, The Netherlands.

AS-079. Take, JI3DST, will be active as JI3DST/JS6 from Miyako Island
(JIIA AS-079-005) and a few of the islands in the Miyako Island
Group between December 28th and January 8th. Look for him to
be active from Miyakojima City, Okinawa-ken (JCC 4714), from
his tourist home between 1100-1500z and 1900-2300z on 160,
80, 40, 17, 15, 12, 10 and 6 meters SSB, SSTV, RTTY and CW.
Outside of his tourist home, Take will be active between
0200-0700z on 17/6 meters SSB, CW, SSTV, RTTY and FM. During
his stay Take plans to activate Ikema Island (JIIA AS-079-001)
and Kurima Island (JIIA AS-079-003) one or two times. He also
plans a one trip operation, weather permitting, from Irabu
Island (JIIA AS-079-002), Shimoji Island (JIIA AS-079-007)
and Ogami Island (JIIA AS-079-006). QSL via his home callsign
through the JARL bureau only.

EU-047. Sven, DD6VSF, will be active from Norderney Island (GIA/DID
N-05 for the German Islands Award, Lighthouse WLOTA LH-1621)
between December 26th and January 5th. He will sign DD6VSF/p.
His activity will be limited because he will be on holiday.
Operations will be on 40-10 meterss, the WARC bands included,
CW only. QSL via his home callsign, direct or by the bureau.

NA-093. A group of Cuban operators plan to activate Cayo Jutias Island
during the last week on January. Each operator will use their
own callsign and sign homecall/1. Operators mentioned so far
are: CO2WL, CO3CJ, CO3JN, CO3LF and CO3VK. Activity will be
on 40/20/15 meters CW/SSB and possibly some PSK and the other
bands. They expected this to be a very hard and difficult
DXpedition because there are no facilities on this island.
QSL via IZ8EBI. The Cuban group is looking for donations and
sponsors to help support this DXpedition. For more information,
visit the following Web page at:
http://xoomer.virgilio.it/iz8_ebi/

SA-023. Cris, PY7GK, plans to be active Itaparica Island (DIB 15 for
the Brazilian Islands Award), December 27-30th. Activity will
be on 20/15/10 meters, maybe 40 meters, CW and SSB. QSL via
his home callsign (QRZ.com).

KH6, HAWAII. John, N7ON, will be active from here between December 25-29th.
Activity may be limited because he is vacationing on Kauai Island (OC-019,
USI HI-003S, Kauai county). Look for him on 40/30/20 meters CW only. This
activity will also count for the Kauai Island Lighthouse (WLOTA LH-1761).
QSL via his home callsign (QRZ.com).

LZ13, BULGARIA (Special Event). Look for special event station LZ13ARDF
to be active between January 1st through December 31st, 2006. Activity
is to celebrate the upcoming 13th ARDF World Championships. which will be

held September 12-17th, in Primorsko, Bulgaria. Operations will be on all bands and modes. QSL via LZ1KZA: P.O. Box 36, Karlovo, 4300 BULGARIA. Also, visit the following Web page: http://www.qrz.com/lz13ardf

NEW OFFICERS FOR 2006. At its annual meeting on December 16th, the Carolina DX Association elected its officers for 2006. Those elected were: President: Ted Goldthorpe, W4VHF
Vice President: Thomas Wright, N4HN
Secretary/Treasurer: Cliff Wagoner, W3ZL
Editor: John Scott, K8YC
Cluster Manager: Joe Simpkins, K4MD
Assoc. Cluster Manager: Paul Sturpe, W3GQ
Webmaster: Wayne Setzer, WB4BXW

A new position of Contest Manager was named starting for 2006. The first incumbent in this new position will be Dick Williams, W3OA.

OH0, ALAND ISLAND. Vincenzo, IZ0FKE, will be active later this week as OH0/IZ0FKE, which he informs OPDX is the last leg of this "Microlite Baltic Tour (IOTA EU-002 Aland Islands - He calls it the 'Winter side of Dxing..')." He will guest Op at the Alandia Club Station from December 31st to January 4th. He also states/mentions to OPDX "to send New Year wishes to ham community from the frozen Baltic Sea (SSB Low Bands only)." His activities are supported by Strange Radio Team, Alandia Contest Team and Peter, OH0JFB. For QSL cards, the QSL Manager is Alberto, IZ0FMA (direct - bureau to ARI ROMA.001 - eQSL and LoTW 100%). Also, look for "Live Media" at: http://www.iz0fke.com
For more info, also visit: http://www.strangeradioteam.com

QSL INFO AND NEWS.............
ANOTHER REMINDER. Stateside Dxers should remember that U.S. postage rates will increase on January 8, 2006. ADDED NOTE: Joe, W4TV, also wants to remind OPDX readers that FOREIGN postage rates will also increase. New rates:
Postcards: 1 Oz. letter:
Canada and Mexico - $0.55 Canada and Mexico - $0.63
Rest of the world - $0.75 Rest of the world - $0.84
It won't effect those DX stations who send a USD or Euro, but it will be important to those who use U.S. postage. It will also cut into the "extra" that often pays for the cards, envelopes, labels, ink, etc. for the QSL manager.

3C2MV QSL INFO. Gerry, VE6LB/VA6XDX, informs OPDX that he has received the late VE6JO's 3C2MV logs from his widow. These have been uploaded to the LoTW on December 21s for those who need an immediate confirmation. Vitality's, VE6JO logs, will be obtained in the New Year. Direct and bureau cards for 3C2MV and VE6JO (and special PXs) will be processed and sent out early in the New Year. LAST MINUTE UPDATE: Gerry reports (Dec. 24th), "All of the outstanding DIRECT 3C2MV QSLs have been sent as of today. If you haven't received your direct card in a few weeks, we didn't get yours or it has been lost in the return mail. You can either re-submit, use LoTW or send one via the Bureau. I have started

working on the Bureau cards, and they will be sent out over the next few months."

Reports indicated that KH6ND/KH5 QSLs are being received.

VK9CG/VK9XG QSL UPDATE. Charlie, W0YG, informs OPDX that he has been receiving VK9XG QSLs in the mail, but doubts he will be able to send all requests out before he leaves on a trip on January 3rd and will not return until the end of January. With the postage to increase on January 8th, Charlie states, "This means many envelopes will not have the proper postage. I don't mind subsidizing my trips, but I do mind subsidizing other's postage on top of trip expenses." He also states that he does not have the VK9CG cards on hand as they were not ordered until he returned from Cocos-Keeling. Charlie states, "They have been mailed via surface mail from Europe but that generally takes a couple of months to get here. The same applies for postage for VK9CG. Many did not send in appropriate postage. I would like to remind all who need these two DX locations confirmed that I do not use the bureau. I do not keep funds on deposit there as again, I don't want to pay bureau user's postage to receive their card. Therefore, all requests must come direct with appropriate postage, NEW IRC or 1 USD to insure a QSL card. Otherwise, it is a dead issue."

SILENT KEY. It is with great sadness to report former Northern Ohio DX Assoication (NODXA) President, Ray Brown, W8BIN, became a Silent Key (SK) on December 22nd. Ray was a dedicated NODXA member and was club president during the late 1980's. The NODXA membership will miss his presence during club events and input at club meetings. OPDX and its readers would like to send out our deepest sympathy to Ray's friends and family.

SPECIAL EVENT (Lighthouse). Look for special event station LR3DX to be active now through January 6th to celebrate the 100th anniversary of the Recalada Lighthouse (ARG 009). Activity will be on all bands 80-2 meters, CW/SSB and the digital modes. A special 3-contact awards is available by working LR3DX and three Bahia Blanca DX Group (BBDX) members. For more details, please contact Emmanuel Siebert, LU9ESD, BBDX Group Internet-Manager, at: lu9esd@speedy.com.ar

SPECIAL EVENT (Update). It seems that more than two special event stations will be active between December 26th and January 15th, to celebrate the first launch of Kazakhstan's "KazSat" broadcasting satellite. Activity will be on all modes and bands (including the WARC bands, 2m and 70cm). RW6HS will be the QSL Manager for all the following stations:
UP1SAT (operated by UN7ED) UP4SAT (operated by UN7BD)
UP2SAT (operated by UN0LL) UP5SAT (operated by UN7BM)
UP3SAT (operated by UN7BF) UP0SAT (operated by UN0B)

T30, WESTERN KIRIBATI. The Finnish operators who were going to return to the Pacific and operate from Tarawa (OC-017), West Kiribati, January 5-22nd (see OPDX.738), seem to have put their trip on hold. The only plane that services the island has been seized by Export-Import Bank of

America in a court ruling and all flights have been cancelled. Reports are
that more details will be forthcoming on December 29th. For more details
and updates, please visit the Web site at: http://www.ohpacificdx.com

V2, ANTIGUA AND BARBUDA. Steve, G4OHX, will be active from Antigua between
December 31st and January 13th. He has not been issued a callsign yet
but has requested V25OHX. His activity will be limited because he is
on holiday but hopes to be on 30/20/17 meters.

V6, MICRONESIA. Nao, JK1FNL, is expected to be active this week as V63O
from Pohnpei (OC-010), December 28-31st. Activity will be on 80-6 meters
using CW, SSB and RTTY. QSL via JK1FNL, direct or by the bureau.

V7, MARSHALL ISLANDS. Kaoru, JA3MCA, a member of Yamato ARC, will be
active from Majuro, Marshall Islands, from December 29th to January 2nd.
Callsign will be V73Z and operations will be on 80-10 meters SSB and CW.
QSL via JA3MCA.

Hello Hans,
Great logic. I found an error / probable typo in your equation.
See below.
Very 73 & Merry Christmas, Ace - WH2T

You're using the variable "r" for two very different and unrelated quantites, "right" as in "starboard" and "right" as in "correct", hence turning your proof into poop. To avoid such ambiguity, instead use the equations 3l = s (s for starboard) and -w = c (c for correct). But good luck finding a relationship between s and c.

That relation is true for Z mod(4) (an additive algebraic group of four elements, i.e., all multiples of 4 = 0 mod(4)).

3879. No link attitude!

Newsgroup: rec.radio.amateur.misc
Date: 2005-12-26 04:31:08 UTC
From: n9zle <NoSpam@nospam.com>
Message-ID: <gmKrf.37464$dO2.7340@newssvr29.news.prodigy.net>
Source record: 46733

No link attitude!

http://www.n9zle.com/forum/

What is it with this no-link to other site attitude?
Years ago when the internet was in its infancy just about any site would add your site as a link from theirs. In return you would do the same. But now it has come to NO-LINKS. Not even in the forums. I have had a website located on tripod for about 9 years over those nine years I had a link to qrz dot com That site received over a million hits. And many users went from that site to qrz and on-to Icomamerica dot com. I have always supported Icom. They have never given a link on their site to mine. I have always supported qrz. But of course he(AA7BQ) never put a link on his site to mine. Well you may say that "I never asked". And that is true. But recently I have noticed he has been deleting my posts. ALL OF THEM. He never contacted me telling me why. AA7BQ just deleted them. I build CIV cables and sell a few of them every week to amateur operators who want them. When I posted one on his site. I found he deleted the post soon after it was placed there.

My beliefs are.
1. QRZ AKA AA7BQ no longer has the amateur radio attitude.
2. AA7BQ has gone fully commercial but calls his site "The Ham Radio Super Site"
3. AA7BQ does not have your best interest in mind.

I can also prove what I am writing here.
For one if he claims he is nothing but a commercial site then why does he ask for donations?
If he is not a commercial site than why will he not allow me to post my CIV cables on his site?

That takes care of number 2
Now for number 1 and 3. If some one knows the truth about something but keeps it from you he is a liar.
No mater how you put it, he is a liar. On the QRZ site Fred is there to help you renew your license. Or so he leads you to believe so. He charges you for it. Mr. Lloyd has never revealed it to any amateurs that you can renew your license or do an address change at the fcc.gov web site for FREE. Yes TOTAL FREE at the FCC web site.
The forms at the FCC web site or no harder to fill out than his.

His CD. He charges 24.95 plus tax and shipping. On that CD is data he obtained from the FCC and got it for FREE, he sales it to you. Also he has software, created by programmers like MYSELF. And MODS that have been made available from the manufactures and other HAMS like ME! I have been contributing to Amateur Radio community for greater than 10 years, and have

received very little for software I created. Never complained when it was copied. I have performed and created several of the MODS for various transceivers. Never asked a penny for it. I never commercialized HAM RADIO. And NEVER took money from some one for something they could get FREE else where.

I am sure many of you would like to ask me "what I am going to do about it?" Here is my answer.

I have created an open forum on my web site http://www.n9zle.com/forum/

There you can post a link to your own site even if it is a commercial site. You can post any ham radio equipment you have for sell on the site.

You can do a callsign lookup at my site from the FCC database, not that stupid qrz thing.
I will soon put together an open source database that I will sell for the price of the CD plus the true cost of shipping. About two bucks total. Once you install the database on your system, you will be able to download updates for FREE. I will make drivers available to programmers to access the database in several different languages and operating systems. I will also attempt to make the database available on the internet for FREE to download.

I only ask for a little help from other HAMS like myself. I need a few elmers that are willing to moderate some of the forums. It is easy and you will find it fun. If you have any suggestions on new forums or sections please logon to my site and make a post.

3882. Searching for OT HAM Friends

Newsgroup: rec.radio.amateur.misc
Date: 2005-12-26 14:24:54 UTC
From: Vince <NoSPAM2THISHAM@yahoo.com>
Message-ID: <lkuvq1hmhf9fr5frhuuogldqt916miekvc@4ax.com>
Source record: 46736

Does anyone know if there is a database or yahoo eGroup available that can be used to search out my old time friends that have changed their HAM callsign ?

IOW, something that I can use to locate HAM friends that have changed their callsigns? For example, where is Bill, WB2PUX or Al, WA2RKL today?

73, de ~ Vince ~

My web site has a link to help looking up - old, expired calls. I tried to look up the call of someone though - that would have expired in about 92 and it doesn't come up. So, I suppose within reason, this will help. Otherwise, you may try the FCC database.

Vince -- good news! The FCC's ULS data base, http://wireless.fcc.gov, allows you to search by name. I've always used that site for
seaching callsigns but that's only on of many many search criteria that can be utilized. I entered my own name by LAST, FIRST and the
result was hundreds of close matches in all services; many pages down I found my entry. You can narrow the search by entering which
service you want to search. Best way to learn is to play with their data base.

Just a note to let all you ham operators out there that want to buy
programing software from RT Sytems,Please rethink about it.They do not want
to help you if you have a problem with their software,They are slow in any
contacting and are not willing to help you when in need.
I have bought several programs in the past few years from them for different
Yaesu radios etc.I spent a lot of money on them.Now I need help in getting
one of my programs to work,(one for the FT-8000 radio),and now they say they
will not help me because I have misplaced my box with all my original
software from them.I have explained that I have made copies of all my
software from them so that I do not damage or corrupt the originals as most
everyone does.Now I cannot locate the box with about six programs from them
as I have had to move several times since the programs were purchased.I do
however have the copies and now they refuse to help me out.
So just thought i would pass this on.

I have always had excellent dealings with RT System Softwares.
Perhaps *you* are the problem?

Ok Paul
Why do say that?I am looking to get a problem solved with programing my
radio with software I purchased from them.Is that a problem to ask for help?
My has this world gone backwards.I have had no other problems with any of
the other software from them also.Does that mean that it will never be a
problem?Get a life.

Oh stop, be nice!!

My software for the 8000 works.
The one for the FT-50 sucks!
Although the software is OK, I almost ALWAYS
get the damn ERR on the radio when uploading.
Anybody out there using "EVE" or "YARD" for the newer radios?
They had versions for the FT-51 and the VX-5. EXCELLENT!!
Or does anyone know of another software package for the newer radios?

Gen. J. O'Neill

Anybody can see you are one of the many whiney little
geeks who inhabit Usenet. You come here whining and
crying, expecting someone to hold your hand you freaking little
worm. If you have a beef with RT Sytems,
DEAL WITH IT dont come whining and crying on
Usenet. Ham radio is too full of little fruits like you.......
BWAHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHH
BWAHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHH
BWAHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHHH
(sound of you crying & whining)

RT Systems probably got tired of your whiney little crap too and
finally told you to get lost.

George -- if you put yourself in their position for a moment, it would be
obvious why they're reluctant to help you: You only have a copy of the
software, not the original with its VERY important serial number.

The fact that you've purchase several of their programs means you're
quite happy with their products.

Just to offset your potentially damaging post, I'm going to their website
right now to make a purchase. So there.

No 73 for you,
Jeff KH6O

The folllowing is from the URL: http://www.fuckchristmas.org/

This is a F-N MASTERPIECE. ENJOY you mother-fucking assholes. (grin)

Oh man, fuck Christmas.

Seriously – are you kidding me with this “There’s a war on
Christmas” bullshit? FOX News wasn’t raking in enough
cash already from all the Christmas commercials for
Kill ‘em All Barbie and Girls Gone Wild Brand Toddler Gear?
They had to start publishing books about some bogus attack
on Christianity? And who did they pick to lead this particular charge?

John fucking Gibson. This guy has wiener written all over him.

Bill O’Reilly gets all the credit as the biggest nutcase in
FOXville, but Gibson really deserves his own special wing
in the happy house. This motherfucker’s embedded
assignment reads “Up Karl Rove’s ass.”

What makes him such a dick? I mean, besides making a fortune
by screaming hysterically about how oppressed Christians
are by the other twenty percent? How about advocating
bombing countries that don’t vote the way we want in their
own elections? Way to encourage democracy, fuckhead.
And maybe he was kidding when he wished, on air,
that the French had gotten the 2012 Olympics instead
of the Brits so the terrorists would “blow up Paris,” but it
might have been just a touch over the top to call for it
again on the day of the London train bombings. Classy move, asshole.

And really? That’s just scratching the fucking surface.
Anyone remember who was responsible for the bombing
of the Federal building in Oklahoma City? John does: Iraq.
And speaking of Iraq, Gibson thinks Rove deserves a
fucking medal for outing that CIA agent. And, like any
good reporter, he wanted to burn the Florida ballots after
his buddy Bush got “elected” rather than, I don’t know,
count them? “Is this a case where knowing the facts
actually would be worse than not knowing?” That right
there is why sometimes it’s useful for journalists to go
to, what do you call that fucking place? Oh yeah, journalism school.

And now he's all worked up about Christmas being stolen. What is this, the fucking Fairytale Network? It's a national fucking holiday and we're spending gobs of our hard-earned tax dollars on wreaths and lights for your special Santa day. But these bastards are all "But they call them Holiday trees!" Here's a clue: no, they fucking don't. Ok, maybe in a couple places, like on FOXNews.com and at the White House, but if Christmas is under attack, I'm Kris fucking Kringle.

And guess who's stealing Christmas, according to Gibson. Go on — guess. "A cabal of secularists, so-called humanists trial lawyers, cultural relativists, and liberal, guilt-wracked Christians — not just Jewish people." (Emphasis mine. Pure, unadulterated anti-semitism, his.) A cabal? Are you fucking kidding me? Could we try to be a little more fucking original with our Jew-hating?

Speaking of Jew-hating, Pat Buchanan has joined the hype-a-thon of the supposed Attack on Christmas, too. Or, as he put it, "What we're witnessing here are hate crimes against Christianity." Sorry? We're not so hot on paying for an inflatable camel for your goddamn nativity scene and suddenly we're Slobodan fucking Milosevic? Fuck you. Get some goddamn perspective, you little prick. When they start hunting Christians in the streets, it'll be time to start yelling "Hate crime." And no, it won't count when they start chasing you with the torches. That'll be called "The Most Wonderful Time of the Year."

And Bill O'Reilly, Gibson's cellmate in the silly shack, is doing his part to save Christmas, too. He's been going after New York's Mayor Bloomberg (that Commie) because he says the Christmas Tree at Rockefeller Center has been renamed a "Holiday Tree," and "No Christian Christmas symbols are allowed in the public schools." The only problem? Neither of those things is even remotely fucking true.

It takes some super-sized balls for O'Reilly to get all lathered up about sinners and their fictional anti-Christian crusade. Every fucking person on the planet has hard and fast evidence that Bill is a world-class pervert, but still he feels totally justified lecturing the rest of us on our moral inferiority.

How fucked up is Bill O'Reilly? Pretty fucked up. Everyone got so crazyfaced about him confusing a sponge and a Middle Eastern snackcake (pretty fucking funny, mind you), that they missed the scary bit: what he meant to say. Old Bill wanted to get all funky on his intern like this: (you'll excuse my foul language, I'm quoting an award-winning newscaster here) "I'd take the other hand with the [loofah] thing and

put it on your pussy."

loofah (lū'fə) noun. A natural exfoliating sponge.

exfoliate (ĕks-fō'lē-āt') verb. To remove
(a layer of bark or skin, for example) in flakes
or scales; peel.

That's right. Bill O'Reilly, fount of morals, is super
familiar with the female anatomy. So much so, that
he knows how good it feels to have one's pussy
exfoliated. We're talking h – o – t, Hot.
That's exactly who I'm going to for my life lessons.

Sorry, where were we? Oh yeah, fuck Christmas.

Can we back up just a couple steps here? At what
point did a basic understanding of the separation
of church and state become a fucking war on religion?
And how did we get to the point where you can call
an organization set up to defend our civil liberties
"Terrorists" on national television and no one fires
your ass? Enough. Fuck all of you lying little shitheads
who wish the world was out to get you so you could
play the poor oppressed victims. Wake up assholes
— you're the cowboys, not the fucking Indians.

"But we want to display our Christmas tree on city property!"
You can, go right ahead. "They're stopping us from
praying in school!" They're not, so fuck off. "We're
not allowed to say 'Merry Christmas' anymore!" Are you
fucking kidding me? Knock yourself out. Say it at work,
scream it in your high school lunch room, hell, tattoo it
on your fucking g-ddammed slooped forehead for all we care.
Guess who's gonna be there defending your right to do
every one of those things? The fucking ACLU. One of
these days you bastards are going to drive those fuckers
out of business, and then you'll see some actual attacks
on your religious liberties. I thought conservatives
were supposed to be all proud and independent?
When did they turn into a bunch of fucking crybabies?

Let's back up even fucking further, shall we?
Can anyone tell me how old Christmas is? Anyone?
Two thousand years, give or take, right? Gee, who's
been reading their No Child Left Behind History Textbooks?
Try fucking four thousand years. Huh. Twice as fucking
long as your little baby king has been around. How
could that possibly be, unless. . . waitaminute. . .

Christmas isn't fucking Christian. Ok, now we're talking.

That’s right, that Yuletide cheer you’re spreading? What exactly
do you think Yule is? It's the fucking Pagan celebration of solstice.
And those “Christmas” traditions? They’re not just *like* Pagan
rituals, they fucking *are* Pagan rituals. Way before your Jesus
got all magical with the bread and fishes, the Romans were
celebrating the birth of Mithra on . . . guess? Go on – guess.
December fucking twenty fifth. What a weird coincidence, eh shithead..?
Practically the whole thing is ripped off from the fucking
Druids and the Romans. Twelve days? Check. Exchanging gifts?
Check. Mistletoe? Check. And you’d better fucking believe that
those decorated trees that Gibson and Co. are so bent out of
shape over are as Pagan as the Rune and Crystal Shack
at Pentagramfest 2005. You might as well be building miniature
fucking Stonehenges in your den or rec room alongside the bar.

And don’t you read your own goddamn Bibles? Jesus was
born when? In the middle of winter? Lot of Shepherds out
watching their flocks around that time of year in Bethlehem?
No, because they’d be freezing their fucking asses off.
Tell you what – y’all go figure out which one of the different
Bible stories about the birth of Baby Jesus® you want to
believe, and then we’ll argue about whether it fucking
happened like that or not.

Christians just stole a bunch of traditions from other
cultures, slapped them together, stuck a fucking tinfoil
star on top and called it the Most Important Holiday
of the Year. Modern American Christmas makes
Michael Jackson look positively organic.

But you boys at FOX still freak out every year about
how everyone's out to get your special trees. This is really
the most important thing you have to talk about? Whether
Target says Happy Holidays or Merry Christmas?
Here’s a brainstorm: there’s a fucking war on. Our soldiers
are out there dying in an Islamic shithole Country while you
guys do your 14th live feed of the day from WalMart to
show us what good little consumers we are. What Would Jesus Do?
He’d jump over that newsdesk and kick your ass
for that shit. Are you sure you want to hang your journalism
credentials on a story about what some guy calls a tree?
They should break one of the branches off and shove it up his
arse raw and with the splinters still intact.

Well we’ve fucking had it. You want to play bullshit games
and scream about how God’s fucking judgment is gonna
come raining down on us if we don't start watching our
vocabulary? Go right the fuck ahead. But let me clue
you in on something: fire and brimstone ain’t no
deterrent for us. We’re not going to hell, assholes,
we’re fucking in hell. We live with you.

And fuck Easter too, you fertility-rite-celebrating,
whiny, self-righteous, don't-know-the- history-
of-your-own-religion assholes.

Fuck off.

:)

snipped of stupidity

My kids school no longer has x-mas plays. They are not allowed to pray in school. In her religion class, they do not study any form of Christianity. Bill O'Reilly was cleared of the sex allegations,and if you would have kept up with that bit of the news, you would know that Bill O'Reilly's lowers WANTED them to release the alleged tapes because there were none. I could go on, but it would be a waste of bandwidth and your going to believe what you want no matter what I say.

The spreading stain of the M3/CB Fools' Licence scheme
has been allowed to contaminate Radio Hammery for
too long.

Now that the RSCB plays no part in licensing matters and
is little more than a money-hungry CBer's book publisher,
let's drive them out of business - if you haven't yet
resigned - then do so today _BEFORE_ your sub comes
up for renewal.

Don't forget - if you are one of the traditional _REAL_
Radio Hams - the RSCB is already taking you for
a sucker by using your hard-earned subscription
money to give free membership to the CBers
at the bottom end. If they're so eager to give
out free membership - let them have nothing
but non-paying members and then see how
long they can survive!

Show your disgust - resign today! Starve the
alien life form that is the gangrenous degeneration
of the M3/CB Fools' Licence scheme of its life-blood!

news:1134762538.372568.263240@o13g2000cwo.googlegroups.com...

The Federal Communication Commissions (FCC) needs to changed the
amateur radio rules to allow a more flexable in regards to allow
amateurs the
ability to experiment, and remove rules that are outdated.

Rules that need to be changed

97.113 Prohibited transmissions.

(a) No amateur station shall transmit:

(5) Communications, on a regular basis, which could reasonably be
furnished alternatively through other radio services.

97.113 Prohibited transmissions.

(a) No amateur station shall transmit:

messages in codes or ciphers intended to obscure the meaning thereof,
except as therwise provided herein;

Todd N9OGL

One of our M3s has already decided the ARRL are a better deal.

If the RSGB has less members it has less income from members therefore less money to spend salaries and on freebies (by which I mean 'jollys' to meetings etc.). Unless, of course, these guys are cleverer than we think and can do more with less ;-)

I may have missed something but it seems logical to me.

Your posting is posted to Yankland for two reasons....

1. You cross-posted to rec.radio.amateur.policy and
rec.radio.amateur.misc
which although being international fora, also get sent to 3rd World
places like Yankland.

2. The google archive (formerly Deja Vu) sucks articles
from all over the globe, even, for example those in the Britland
hierarchy.

There's nothing stopping non-members from writing to Ofcom explaining why they're non-members, and making representations as individuals (for example, requesting a review of the current licensing scheme).

well making a gues based on how things in Americe Vsav the ARRL and FCC
the indivgual Hams are largely un willing to stand up and say something
with some kind of Occifcail scation for it, this si likly why there
were about 3000 coment the recent NPRM here in the USA out of 600,000
hams and about 300,000 arrl memebrs

I suspect that the ARRL is rather more representative of hams in the US
than the RSGB is of hams in the UK, but there's something in what you
say. By and large, citizens respond to corrupt "leaders" by working
longer hours, drinking more alcohol, and blaming the French and the
Arabs. OTOH, the opportunity is there for hams to cut out the middlemen
and tell the government agency what they want.

Some of us have been doing this for a number of years. Perhaps that
input helped persuade OFCOM to do some surveys....

You seem to be a Confused Babbler (CBer)

You have just upbraided me for discussing matters
of Britland, and now, here you are doing the same,
because Ofcom is a Britland institution.

(Cross-posted to rec.radio.cb to put you back where you
belong; you certainly exhibited Childish Broadcasting (CB)
in your recent posts)

Would it not be more appropriate to give it away if you don't want it?

If I wanted it (which I don't), I'd much rather get
invisible-antennas.com, invisibleHamAntennas.org (more appropriate for a
non-commercial product), invisiblehamantennas.info, or something similar.

Why would I bother paying $50 for a domain which quite honestly is no
more attractive than any I could get for just the registration cost?

If I am missing the point, please correct me.

Good luck if you can sell it, but I doubt you will be able to.

> Click on this link to see the parking page:
> http://www.InvisibleHamAntennas.com

I see you have come down a bit from the $850 your web page says you are
asking for it!! Now that was pushing your luck, but I think *any*
surcharge would be.

I just noticed you sent this to multiple groups, but did not cross-post it. I'll reply here too, having just replied elsewhere.

If you want to send to multiple groups, do it all at the same time, then replies will be sent to them all too.

Here is my response.

Would it not be more appropriate to give it away if you don't want it?

If I wanted it (which I don't), I'd much rather get invisible-antennas.com, invisibleHamAntennas.org (more appropriate for a non-commercial product), invisiblehamantennas.info, or something similar. (Or as Gordon Hudson says, the uk domain).

Why would I bother paying $50 for a domain which quite honestly is no more attractive than any I could get for just the registration cost?

If I am missing the point, please correct me.

Good luck if you can sell it, but I doubt you will be able to.

> Click on this link to see the parking page:
> http://www.InvisibleHamAntennas.com

I see you have come down a bit from the $850 your web page says you are asking for it!! Now that was pushing your luck, but I think *any* surcharge would be.

I know the January sales are coming up, but you must be desparate to drop from $850 to $50.

> Thank you for looking.

No problem, but I will not be wasting my money!!

3964. K1MAN

Newsgroup: rec.radio.amateur.misc
Date: 2005-12-30 16:25:38 UTC
From: N9OGL <toddaug555@yahoo.com>
Message-ID: <1135959938.091103.97400@g47g2000cwa.googlegroups.com>
Source record: 46667
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

It seems to me that the FCC is taking it's sweet time sending the FINAL ORDER out on K1MAN. Why is that? perhaps the FCC is playing it cautious regarding K1MAN. I still have a lot questions regarding the NAL and I'm sure the US Court of Appeal would also have some question about it.

1. pecuniary interest

One of the things that K1MAN was fined by the FCC for was Pecuniary Interest. K1MAN was transmitting the address to his website (which has commercial goods for Sale) over the radio. The fact is the ARRL also has good for sale on their website and transmits the address of their website over the radio as well. So how is it that one group is allowed to do it and the other isn't?

2. Broadcasting

Another thing the FCC had fined K1MAN for was "broadcasting" although in the NAL the FCC didn't know what the fined for that should be set at. The question raised here is was the program he was running "directed to the general public" or "directed to amateurs"? If was directed to the public then it is a broadcast and if it was the other way it could fall within the scope of definition of "information bulletin". Amateur's don't believe that information bulletin should be opinionated yet there is no "official rulling" from the FCC that states that oher wise. The easies way to determine if a program is a broadcast or not is to determine if it was directed to the general public or directed to the amateur radio service and NOT by determining if the program is opinionate or not.

I am not really for nor aganist K1MAN, however, I would question a lot of the FCC on some of this stuff.

http://www.coasttocoastam.com/shows/2005/12/30.html

1) FRIDAY: 2006 Predictions I w/Art Bell

Art Bell hosts the first of two shows featuring
Predictions for 2006 as made by callers.
He'll also review their predictions from last year.

http://www.coasttocoastam.com/shows/2005/12/31.html

2) SATURDAY: 2006 Predictions II w/Art Bell:

Art Bell hosts his annual New Year's Eve Prediction
show featuring callers' predictions for 2006 and a
review of their predictions from last year.

http://www.coasttocoastam.com/shows/2006/01/01.html

3) SUNDAY: Predictions Special w/George Noory & 8 Guests
Kicking off the New Year, George Noory presents
a special 4-hour Predictions Show featuring a group
of psychics and prognisticators, each appearing in
a half-hour time slot.

The line-up:

Joseph Jacobs
Dr. Louis Turi
The Merlin Project
Hans King
Sean David Morton
Gerald Celente
Robert Camp
Aaron Donahue

That needs to remain in place, Todd. It was put in force to prevent amateurs from utilizing the ham bands for commercial purposes, and to prevent the amateur service from unfairly competing with commercial services. Without that rule, those providing such services would have every right to file grievances with the FCC.

Also, without that rule, there would be more congestion on the ham bands.

One of them who says he's a 'remote viewer' claims that
several of his protege's have picked several winning
lottery no's. Of course when they are asked to come
forward to substantiate the claims, the usual excuses
of 'confidentiality' and other such is usually stated.

Fuckin crosspoters predict this, If you don't stop crossposting I will
personally make all of my posts to your group under a number of aliases till
hell freezes over.
My second prediction is you are all a bunch of livin in yo mamma's basement
playin D&D mother fuckers.
Third prediction is you won't know anything about me using what you
laughingly refer to as psychic abilities.

Give it a rest. I don't care if they are taking their time or not. the fact is, K1MAN is a known problem and its about damned time someone did anything about him. so what if the FCC is taking their time (all the better to cross those t's and dot those i's with).

Lead, follow or get the hell out of the way! you are blocking the road!

>have every right to file grievances with the FCC.
>Also, without that rule, there would be more congestion on the ham
>bands.

It really not the matter of removing th rule, the problem is that the vast majority of things that amateurs can do can be done through alternative radio service. As for the commercial service, the FCC and congress is giving them a HUGE chunk of spectrum of what was the old TV spectrum So I wouldn't really worry about them.

Dayton Hamvention® 2006
PO Box 964
Dayton Ohio 45401-0964
General Information (937) 276-6934
On-Line: http://www.hamvention.org

Press Release
(December 28, 2005)

Nominations Sought For 2006 Dayton Hamvention® Awards

The Dayton Hamvention ® now is accepting nominations for its 2006 awards for Radio Amateur of the Year, Special Achievement, and Technical Excellence. The deadline for nominations is February 20, 2006.

All amateur radio operators are eligible. The winners will be recognized at the 2006 Hamvention ®, which runs May 19-21.

· The Radio Amateur of the Year Award goes to an individual who has made a long-term, outstanding commitment to the advancement of Amateur Radio.

· The Technical Excellence Award is for the person who has made an outstanding technical advancement in the field of Amateur Radio.

· The Special Achievement Award honors someone who has made an outstanding contribution to the advancement of Amateur Radio, usually someone who has spearheaded a significant project.

The Hamvention® Awards Committee makes the decision on all awards based in part upon the information it receives--and not on the number of nominations submitted.

Documentation that informs the Awards Committee of a candidate's accomplishments may include magazine articles, newsletters, newspaper clippings, and even videos. (Note: These materials become the property of Hamvention and will not be returned.)

Nominations are due by February 20, 2006. Additional details on these awards and a nomination form are available on the Dayton Hamvention® Web site <http://www.hamvention.org/nominate.htm>. Nominations also are accepted via US mail to Dayton Hamvention® Awards, PO Box 964, Dayton, OH 45401.

The Dayton Hamvention® is the world's largest gathering of amateur radio operators. It is expected to bring more than 25,000 of the worlds

radio amateurs to the Dayton area next May.

For more information please send e-mail to: media@hamvention.org

not quite allow me to correct you

they takeon those they THINK don't have the reasourses or that they
CAN bluff in folding

which is how the latest K1MAN flap started at least according to rumor

tthe rumor like this the FCC had decided to let sleeping dog lie in
the but someone did not get the word (and issued the NAL) based on his
assement of K1MAN resources and willingness to fight
